GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

DERR: Division of Emergency & Remedial Response's Database

The DERR listings contains sites from all of Ohio that are in the Division of Environmental Response and Revitalization (DERR) database, which is an index of sites for which our district offices maintain files. The database is NOT a record of contaminated sites or sites suspected of contamination. Not all sites in the database are contaminated, and a site's absence from the database does not imply that it is uncontaminated.

State and tribal institutional control / engineering control registries

HIST INST CONTROLS: Institutional Controls Database

"Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

Last EDR Contact: 06/02/2008
Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SPILLS: Emergency Response Database

Incidents reported to the Emergency Response Unit. The focus of the ER program is to minimize the impact on the environment from accidental releases, spills, and unauthorized discharges from any fixed or mobile sources. Incidents involving petroleum products, hazardous materials, hazardous waste, abandoned drums, or other materials which may pose as a pollution threat to the state?s water, land, or air should be reported immediately. Not all incidents included in the database are actual SPILLS, they can simply be reported incidents.

Date of Government Version: 12/16/2024

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HIST USD: Urban Setting Designations Database
A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined. This database is no longer updated or maintained by the state agency.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

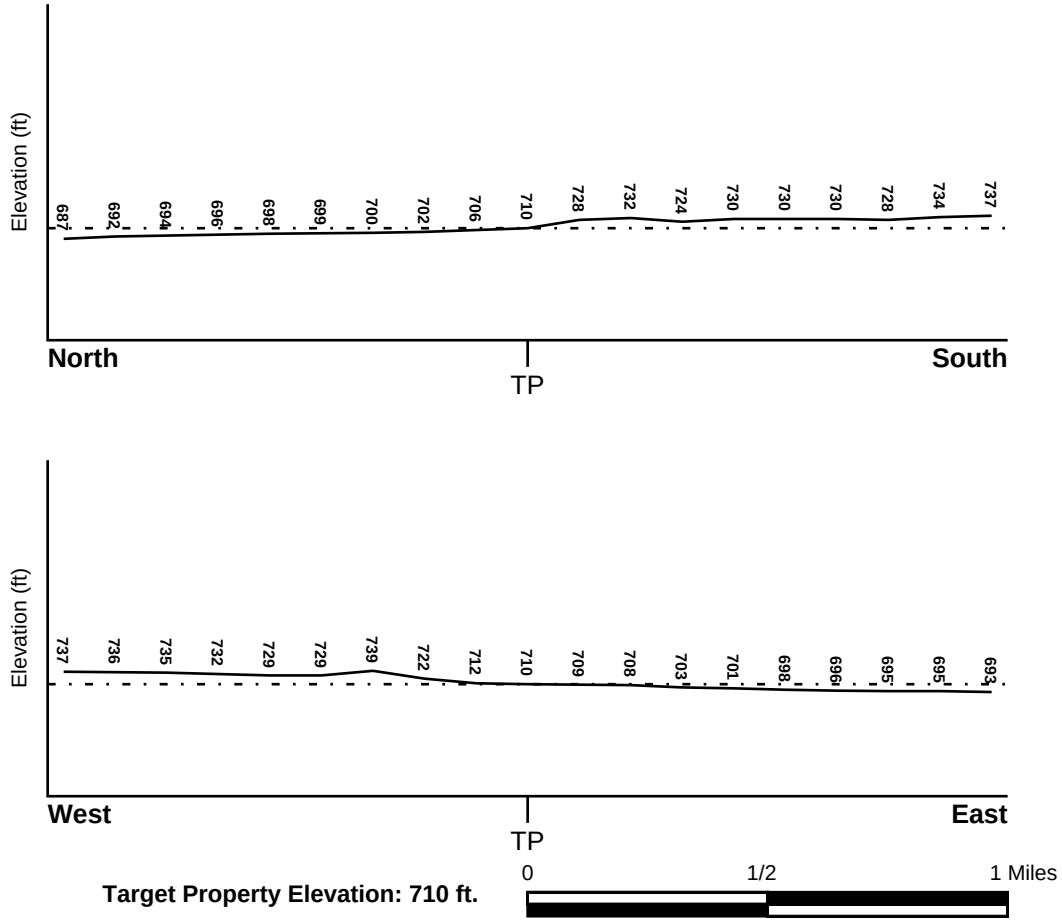
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
39035C0178E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

39035C0179E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CLEVELAND SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 53 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

1.0 INTRODUCTION

1.1 Purpose

Partners Environmental Consulting, Inc. (Partners) was contracted by the Stockyard Redevelopment Organization (Client) to conduct a Phase I Environmental Site Assessment (ESA) on three (3) parcels of land (subject site) located along Wentworth Avenue (7275), Neville Avenue (7255-7283) and West 73rd Street (3297-3311) in Cleveland, Ohio 44102. **Figures 1, 2** and **3** are presented as a Site Location Map, a Site Plan Map, and a Surrounding Properties Map, respectively.

Partners conducted the Phase I ESA in general accordance with *ASTM Standard E 1527-00 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process)* at the above referenced site. The purpose for conducting a Phase I ESA is to identify Recognized Environmental Conditions (RECs) at the subject site. A Recognized Environmental Condition refers to the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property.

1.2 Limitations to the ASTM Standard

Limitations or exceptions to the ASTM Standard E 1527-00, noted during the course of the Phase I ESA, consisted of a lack of historical information prior to 1892. The earliest documentation available was the 1892 Atlas Map of Cuyahoga County.

In conducting this assessment Partners has relied on the information presented in documents prepared by others, and has accepted this information as accurate and complete unless discovered otherwise during the course of our assessment. Partners did not attempt to independently verify the information provided. Partners has not been retained to provide additional warranty or guaranty to these documents prepared by others and provided, in part or in whole, for our review.

No formal title search, evaluation of deeds or determination of ownership was performed for the subject site as part of this scope of work.

Small areas on each floor of the building could not be evaluated due to the presence of office equipment (desks, chairs, filing cabinets, etc.), pallets, and equipment left in-place from operations by Simkins Industries, Inc. (Simkins).

Several small cabinets located in the maintenance area were locked and not accessible.

Partners' evaluation of the transformer room was limited to observations made through a chain link gate covered with wire mesh.

The chain link fence surrounding the parking lot parcel (Parcel 2) located on the southeast corner of the subject site was locked, preventing Partners from accessing the parcel. Partners made observations from the perimeter of the parcel through the chain link fence.

A construction company was temporarily using the parcel located immediately east of Parcel 2 as a storage area for miscellaneous equipment, stone, and machinery. Because of the current use of the property, observations made during the site visit were limited.

No other significant limitations or exceptions to ASTM Standard E 1527-00 were noted during the course of the Phase I ESA.

Copyright © 2004, Partners Environmental Consulting, Inc.

1.3 Previous Environmental and Other Reports

No previous environmental or other reports were provided to Partners by the Client. However, Partners obtained files formerly maintained by Simkins during the site visit. Discussion of these files is included in **Section 4.2** of this report.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject site consists of three (3) parcels identified by Partners as Parcels 1, 2, and 3. Parcel 1 is located at 7275 Wentworth Avenue. Parcel 2 does not have a recognized street address, but is located along 7255 and 7283 Neville Avenue and along West 73rd Street. Parcel 3 is located between Parcel 1 and the railroad. The location of the parcels is depicted on **Figure 3**.

According to title information obtained from the Client and the Cuyahoga County Auditor's website, the subject site is currently owned by Simkins and is identified by Permanent Parcel Numbers (PPNs) 006-28-096, 006-25-028, and 006-28-102. According to the Client and the Cuyahoga County Auditor's website, the City of Cleveland owns the parcel of land currently used as a construction equipment storage area (PPN 006-25-027). The parcel will be included and identified as a part of Parcel 2 for the purposes of this report since the Client wants to acquire this piece of land in the future.

The location of the subject site is depicted on the Cleveland South, Ohio, USGS 7.5-Minute topographic map (**Figure 1**). Portions of the property record obtained by Partners from the Client and the Cuyahoga County Auditor's website are located in **Appendix A**.

2.2 Vicinity Characteristics

The elevation of the subject site and vicinity is approximately 710 feet above mean sea level (AMSL, USGS Datum). The topography of the subject site is generally flat. The regional topography slopes toward the northeast.

The subject site is located in a mixed residential/industrial area. North, across Wentworth Avenue are single-family residences. The Hillson Nut Company is located northeast of the subject site. South of the subject site is a small electrical substation and recycling center. Denison Avenue is located further south beyond the substation. Presently, the Denison Avenue overpass of the railroad is under repairs. The Norfolk & Southern Railroad borders the subject site to the east-southeast. On the opposite side of the railroad tracks is the former "Stockyards" currently occupied by Shaker Valley Foods, Blue Ribbon, and Park Ohio. West, across 73rd Street are single-family residences.

Photographs showing the subject site and vicinity characteristics are included in **Appendix B**.

2.3 Site Characteristics

The subject site consists of three (3) parcels of land. Parcel 1 encompasses approximately 2.19 acres of land and is fully developed with a multi-story building last used for manufacturing purposes. The building is currently unoccupied and contains various equipment (office/industrial), containers, and other materials left in-place from operations by Simkins. Parcel 2 encompasses approximately 2.1 of land last used by Simkins as a parking lot. Parcel 2 consists of areas covered with asphalt or vegetation (grass and weeds). Parcel 3 encompasses approximately 0.035 acres of land located between Parcel 1 and the railroad tracks.

According to Sanborn maps obtained from Environmental Resource Inc. (EDR) and information provided by the Client, Parcel 1 of the subject site has historically been used as a paper manufacturing company for over 75 years. Prior to that time, Parcel 1 was the Cleveland Macaroni Company. According to Sanborn maps, Parcel 2 has historically been utilized as a steel foundry/casting facility, a cleaner and paste

Copyright © 2004, Partners Environmental Consulting, Inc.

company, and an auto/truck/trailer yard. **Section 2.5** of this report provides further detail on historical usage of the subject site.

The three-story building encompasses approximately 104,200 square feet and contains a partial basement located under Sections B, C, D, E, and I. There are three (3) elevators located along the eastern portion of Sections B and C. The two (2) elevators located on the north and south end are cable operated. The freight elevator located in the central section is hydraulically operated. **Figure 2** depicts the location of the individual sections of the building. The original building includes Sections B, C and I, which were constructed in about 1917. The remaining portions of the building were added in stages between 1920 and 1976. The majority of the building is constructed of concrete and/or masonry materials with concrete floors. Construction details for each section are included in **Appendix A** of this report.

The following is a brief discussion of observations made inside the building during the site visit. Because of the number of containers observed during the site visit, the containers and contents identified do not constitute a comprehensive list of all materials present at the subject site. Mr. Wally Chmielewski, with the Stockyard Redevelopment Organization, provided some of the historic uses described in the section below.

Basement

Numerous containers (plastic, metal, and cardboard) were observed throughout the basement area. These containers varied in size from 1-gallon canisters to 55-gallon drums. The drums were labeled to contain oil applicator, multi-purpose oil, hydraulic oil, inks, and aqueous glass coating liquid. The smaller containers were labeled to contain various materials including cutting oils, plate developer, inks, isopropanol, and paints. The majority of the containers were found in the northeastern portion of the basement, which contained a parts storage area. Several workbenches with miscellaneous materials including chains, boxes of small parts, and cutting devices were found in the parts storage area. Numerous cabinets and shelves containing oils, paints, parts, and other materials used by Simkins during their operations were located in the parts area. Some cabinets were locked in the parts room, which limited Partners' observations in these areas. Miscellaneous equipment, including a welder, grinder, and drill press, was also found in the parts area. Other materials found in the northeast portion of the basement included a number of empty 2-gallon plastic containers labeled to contain fast plate developer, hot metal grinding equipment, and a car battery. A section of the basement, which was formerly used as a photo developer room contained miscellaneous equipment including a light table, camera, furnace, cutting table, and two (2) air compressors. One (1) Hyde oil/water separator was located in the central part of the basement (Section D) on the north side of the building. One (1) large air compressor was found near the former photo developer room. A small air compressor was adjacent to the larger compressor in this area. One (1) 250-gallon (estimated) aboveground storage tank (AST), which was believed to contain hydraulic fluid, was found near the middle freight elevator. The AST was located in secondary containment. A number of concrete cut outs were observed in the southwestern section of the basement. The previous use of this area is unknown. A small room, which was potentially used as a transformer room was found on the south side of Section B. A janitor's room was found on the north side of the basement in Section C. The room contained various sized containers of paints, cleaners, and oils.

1st Floor

The first floor contained the majority of the large equipment used for operations conducted by Simkins. Two (2) large lithographic printing presses were found on the first floor in Section D of the building. There were two (2) small metal containers labeled to contain lube grease, a small air compressor, and an oxy dry blanket washer observed near the older press. Two (2) 55-gallon metal drums presumed to contain oils/inks were found near the newer press. One (1) electrical transformer was found in this area near the presses. Various sized containers labeled to contain lubricating oil, floor cleaner, and plate-finishing gum were found in the engineer's office next to the large presses. Two (2) large cutting machines were observed in Section E. One (1) large piece of machinery, reportedly used as a shaker, was also located in Section E. This piece of machinery

Copyright © 2004, Partners Environmental Consulting, Inc.

was equipped with a vent. One (1) electrical wall-mounted transformer was observed in Section E. Within Section E, there was a large blowpipe system, which was connected to the three (3) transfer ASTs located on the roof. According to Mr. Chmielewski, cellulose was stored in the three transfer tanks and was distributed to the machines located throughout the building via this system. The boiler room, Section H, was accessed from the first floor. Three (3) steam boilers and one (1) small expansion tank were observed in the boiler room. No insulation was observed on the piping in the boiler room. According to Mr. Chmielewski, the boilers are fueled by natural gas. One (1) cabinet containing various products was observed in the boiler room. The former machine area located in Section F was observed to contain a number of concrete cut outs where former equipment was presumably located. There was one (1) large piece of equipment, reportedly used as a cellulose distribution machine, located within Section F. One (1) 3-gallon container labeled to contain petroleum oil was located in Section F. Seven (7) hoppers were found near the cellulose distribution machine. Other equipment observed on the 1st floor included conveyer belts, small scales, air compressors, motor tow trucks, and other equipment formerly used by Simkins. Several small (1-gallon to 5-gallon) containers labeled to contain transmission fluid and hydraulic fluid were found in Section A. The offices located on the first floor were observed to have acoustical ceiling tile. Several 1-gallon containers labeled to contain marking ink were found in an office in Section B of the building. A small electrical transformer room was located on the north side of the building and was accessible from the sidewalk along Wentworth Avenue. Observations of the transformer room were made through a chain-link gate with wire mesh. Three (3) large transformers were located within the room.

2nd Floor

The majority of the 2nd floor was empty warehouse/office space. One (1) large air compressor was found in the warehouse space. One (1) 30-gallon drum estimated to be ½ full and labeled to contain oil were found within the warehouse space. Two (2) 55-gallon drums estimated to be ¼ full and labeled to contain oil were found in the warehouse space. Several small containers (plastic and metal) were found on a shelf in one of the office spaces. The metal container was labeled to contain a flammable substance. Acoustical ceilings and carpeting were observed in the office spaces.

3rd Floor

The greater part of the 3rd floor was warehouse/office space. Office space occupied the northwestern section. Acoustical ceilings and 9x9 floor tiles were found in the office spaces. Significant water damage to the ceiling and floor was found in these office areas.

Elevators/Roof

The tar roof of the original three-story building was flat. Three (3) brick elevator buildings were located along the eastern side of the building and were all accessible from the roof. Motors used to operate the elevators were located in the three buildings. Thirteen (13) buckets of roofing tar were found in the north elevator building. One (1) gallon of elevator lubricant was found in the middle elevator building. One (1) bucket of roofing tar was found in the south elevator building. Three (3) large transfer tanks and associated blowpipes, reportedly used to store and distribute cellulose were found on the roof of the building just east of the original three-story building.

Parcel 2 is an area that was formerly used as a parking lot by Simkins. The chain link fence surrounding the parking lot parcel located on the southeast corner of the subject site was locked, preventing Partners from accessing the parcel. Partners made observations from the perimeter of the parcel through the chain link fence. A number of concrete piers were observed within the enclosure. The usage of these piers is unknown. The eastern portion of Parcel 2 was currently being used by a construction company as a storage yard for equipment. The surface is covered with gravel and was observed from the right-of-way due to on-site activities.

Copyright © 2004, Partners Environmental Consulting, Inc.

Parcel 3 is a small overgrown area, which is located between the building and the railroad tracks.

Further information about these observations is included in **Section 5.1** of this report.

Site photographs are included in **Appendix B**.

2.4 Current Uses of Property

Parcel 1 is developed with a three-story building that is currently vacant. The western portion of Parcel 2 consists of an area, enclosed within a chain-link fence, formerly used as a parking lot by Simkins. The eastern portion of Parcel 2 is currently used to store equipment and materials associated with construction of the Denison Avenue bridge. Parcel 3 is a small vacant section of railroad frontage located between Parcel 1 and the railroad tracks.

2.5 Past Uses of Property

Past uses of the subject site were determined by reviewing available historical atlases, plat books, aerial photographs, and city directories. Partners conducted a Sanborn Map search through EDR. Sanborn Maps and other historical maps are located in **Appendix C**. Aerial photographs are located in **Appendix D**.

The following is a chronological summary of the documented history of the subject site.

1887 Sanborn Map – No coverage was available for the subject site.

1892 Atlas of Cuyahoga County – The subject site was divided into a number of small parcels of land. Five buildings that appear to be dwellings are present.

1903 Sanborn Map – The southeast portion of Parcel 1 was developed with in building identified as The Cleveland Macaroni Factory. A railroad spur appears to be located on the eastern portion for Parcel 1. The remainder of Parcel 1 is either vacant land or developed with dwellings that occasionally contain sheds. No Sanborn coverage was available for Parcel 2.

1913 Sanborn Map – The building occupied by The Cleveland Macaroni Factory has expanded to the northeast. The remainder of Parcel 1 has been further developed with dwellings. Parcel 2 was developed with eight (8) buildings. Three of the buildings are identified as dwellings. One building located in the eastern portion of the parcel was identified as The Atlas Steel Foundry Company. One smaller building associated with The Atlas Steel Foundry Company is identified as an office. The building located near the corner of Neville Avenue (then Shaw) is identified as The Standard Steel Casting Company. Areas located within The Standard Steel Casting building were identified as foundry (2), office, and a “cleaning Dept”. One large building located near the railroad tracks was not identified as to its use. A railroad spur is located on the east side of The Standard Steel Casting building.

1922 Plat Book (City of Cleveland) – Parcel 1 was identified as the Cleveland Macaroni Company. The buildings located on Parcel 2 appear to be similar to buildings and occupants identified on the 1913 Sanborn map.

1936 City Directory – The subject site was listed as The Cleveland Corrugated Box Co. and The Great Lakes Box Co.

1940 City Directory – The subject site was listed as The Cleveland Corrugated Box Co., Rayon Machinery Corp., and The Great Lakes Box Co.

1944 City Directory – The subject site was listed as The Great Lakes Box Co./Dobeckmun Co.

Copyright © 2004, Partners Environmental Consulting, Inc.

1950 Sanborn Map – The building located on Parcel 1 has been expanded to the west and appears to be in a similar location and configuration as the building observed during the site visit. The occupant of the building was not identified; however, the map indicated that the building was used to manufacture paper carton and paper products. Operations identified within the building consisted of storage and receiving areas. The remaining portions of Parcel 1 contained one dwelling. The eastern portion of Parcel 2 contains one building (previously occupied by Atlas Steel) that is occupied by The Cleveland Cleaner & Paste Co. (Mfg. of Wallpaper, Cleaner & Paste). The unlabeled building on the 1913 Sanborn map is identified as an office. The dwellings and the building identified on the 1913 Sanborn map as being occupied by Standard Steel have been razed and appear to be vacant. The area is now identified as an auto truck & trailer yard. The railroad spur located on Parcel 2 is no longer apparent.

1951 Aerial Photograph – Parcel 1 contains a building located in a similar location and configuration as the building observed during the site visit, with one exception. The area located between the older buildings appears to be an open courtyard. The eastern section of Parcel 2 is developed with a building that is similar in location and configuration as the building depicted on the 1950 Sanborn map. The western portion of Parcel 2 appears to be vacant and recently graded.

1951 City Directory – The subject site was listed the same as in the 1944 city directory.

1955 City Directory – The subject site was listed the same as the 1944 and 1951 city directories.

1959 Aerial Photograph – The subject site appeared to be similar to the 1951 aerial photograph, except that the building has been expanded over the area observed in the 1951 aerial photograph to be an open courtyard. The eastern portion of Parcel 2 appears to be similar to the 1951 aerial photograph. The western portion of Parcel 2 is used as a parking lot.

1960 City Directory –The subject site was listed as The Great Lakes Box Co./St. Regis Container Co. Corrugated Box Manufacturer (factory).

1963 Sanborn Map – The subject site appeared similar to the 1950 Sanborn Map, except that the building located on Parcel 1 has expanded to the west. The map indicated that The St. Regis Paper Company occupied the building and that operations consisted of manufacturing folding cartons and boxes. Areas within the St Regis building included storage, receiving, parts, and factory. Parcel 2 is similar to the 1950 Sanborn map.

1965 City Directory – The subject site was listed as The St. Regis Carton Division/Great Lakes Box Co.

1970 City Directory – The subject site was listed the same as in the 1965 city directory.

1971 Sanborn Map – Parcels 1 and 2 appear to be similar to the 1963 Sanborn map, except that the building located on Parcel, which was formerly identified as an office is now identified as a warehouse.

1975 City Directory – The subject site was listed as St. Regis Paper/Great Lakes Box Division.

1977 Aerial Photograph – Parcels 1 and 2 appear to be similar to the 1959 Aerial Photograph.

1980 City Directory – The subject site was listed the same as in the 1975 city directory.

1985 City Directory – The subject site was listed as Great Lakes Box Division/Simkins Industries.

1988 Aerial Photograph – Parcel 1 of the subject site appeared to be developed with a building located in a similar location and configuration as the building observed during the site visit. The building located in prior aerial photographs on the eastern portion of Parcel 2 has been razed and is vacant. The western portion of Parcel 2 is vacant.

Copyright © 2004, Partners Environmental Consulting, Inc.
\\partnerssolon1\Working Documents\Project Files\640 Cleveland Housing Network\640.11B VA Supportive Housing Update\Report\App G - Previous Reports\01 507.01 Phase I.doc

1990 City Directory – The subject site was listed as Simkins Industries.

1996 City Directory – The subject site was listed as Simkins Industries.

2000 Aerial Photograph – The subject site appeared to be developed as it exists today. The eastern portion of Parcel 2 appeared to have parked vehicles on the property. No vehicles were present on the western portion of Parcel 2.

2001/2002 City Directory - The subject site was listed as Simkins Industries.

2.6 Current Uses of Adjoining Properties

Current uses of the adjoining and surrounding properties were determined by site reconnaissance. The following are observations concerning current uses of adjoining properties. Observations of adjoining properties were generally made from the subject site and/or adjacent rights-of-way.

North, across Wentworth Avenue are single-family residences. The Hillson Nut Company is located northeast of the subject site. West, across 73rd Street are single-family residences.

North: The adjoining properties to the north of the subject site are developed with single-family residences.

East: The Norfolk & Southern Railroad borders the subject site to the east-southeast. On the opposite side of the railroad tracks is the former “Stockyards” currently occupied by Shaker Valley Foods, Blue Ribbon, and Park Ohio.

South: South of the subject site is a small Cleveland Electric & Illuminating (CEI) electrical substation and a recycling center. Denison Avenue is located further south beyond the substation. Presently, the Denison Avenue overpass of the railroad is under repairs.

West: The adjoining properties to the west of the subject site are developed with single-family residences.

2.7 Past Uses of Adjoining Properties

Past uses of the adjoining and surrounding properties were determined by reviewing available historical atlases, plat books, aerial photograph, city directories, and Sanborn maps. The following is a chronological summary of the documented history of the adjoining properties.

City directories were reviewed for the following addresses: 7176-7606 Wentworth Avenue, 3225-3296 73rd Street, 7000-7509 Denison Avenue, and 3264-3584 67th Street. Surrounding listings were mostly for industrial and residential properties with some commercial listings found mostly along Denison Avenue.

The following is a chronological summary of the documented history of the surrounding properties.

1887 Sanborn Map – The adjoining properties to the east, across the railroad tracks was identified as the Cleveland Stockyard Co./Hog and Cattle Sheds/Estate of Edward Rose-Packing and Slaughter House. Several tanks associated with rendering processes were associated with operations at the facility. No additional Sanborn coverage was available for surrounding properties.

1892 Atlas of Cuyahoga County – Surrounding properties to the north, south, and west were small parcels of land that appeared to be subdivided for residential use. Small buildings were located on some of these parcels, which were consistent with dwellings. The CCC & St. L. Railroad is located to the east. Properties further east are large tracts of land owned by individuals.

Copyright © 2004, Partners Environmental Consulting, Inc.
\\partnerssolon1\Working Documents\Project Files\640 Cleveland Housing Network\640.11B VA Supportive Housing Update\Report\App G - Previous Reports\01 507.01 Phase I.doc

1903 Sanborn Map – Surrounding properties to the north and west of Parcel 1 are vacant or contain dwellings. The CCC & St. L. Railroad is located to the east. The Cleveland Union Stockyards Company is located further east of Parcels 1. No Sanborn coverage is available south of Parcel 1.

1913 Sanborn Map – Properties located west and north of Parcel 1 are developed with dwellings. The CCC & St. L. Railroad is located to the east of Parcels 1 and 2. Properties south of Parcel 2 are vacant. No Sanborn map coverage was available for properties located east-southeast of Parcel 2.

1922 Plat Book (City of Cleveland) – The surrounding properties appeared similar to the 1913 Sanborn Map.

1936 City Directory – Surrounding listings were mostly for residences, with the exception of two (2) filling stations located at 7014 and 7208 Denison Avenue.

1940 City Directory – Surrounding listings were similar to the 1936 city directory; however, a filling station was listed at 7050 and 7403 Denison Avenue.

1944 City Directory – Surrounding listings were mostly for residences, with the exception of the filling stations and other light industrial listings including The Cleveland Transit System car barn and a coal supply facility located along Denison Avenue.

1950 Sanborn Map – Surrounding properties appeared similar to the 1913 Sanborn map, except that additional dwellings have been constructed north and west of Parcel 1. A small electrical substation was located south of Parcel 2.

1951 Aerial Photograph – Surrounding properties to the north and west appeared to be single-family residences. A small building in a similar location and configuration as the electrical substation identified in the 1950 Sanborn map, and observed south of the subject site during the site visit is apparent. A number of large industrial type buildings were located east of the subject site in the area designated as The Stockyards.

1951 City Directory – Surrounding listings were similar to the 1944 city directory. 7406 Denison Avenue was listed as Redman's Auto Garage Repair. 7050 and 7403 were listed as SOHIO and Shell stations, respectively.

1955 City Directory – 7201 Wentworth Avenue was listed as Sterling Manufacturing Co. Similar listings were found for Denison Avenue, with the exception of the Easterbrook Coal Co. located at 7008. 7408 Denison was listed as Precision Pattern Machine. 7150 was listed as vacant.

1959 Aerial Photograph – Surrounding properties appeared similar to the 1951 aerial photograph. The Hillson Nut Co. building, located further northeast of the subject site was evident in the photograph.

1960 City Directory – Surrounding listings were mostly for residences with the exception of the light industrial and commercial listings along Denison, which included Evro Corp located at 7150. 7408 Denison was listed as Precision Pattern Machine. 3584 W. 67th Street was listed as Brooklyn Moving.

1963 Sanborn Map – Surrounding properties appeared similar to the 1950 Sanborn map.

1965 City Directory – Surrounding listings were similar to the 1960 city directory. 7150 Denison was not listed.

1970 City Directory – Surrounding listings were similar to the 1965 city directory; however, 7000 Denison was listed as Allen Products.

1971 Sanborn Map – Surrounding properties appeared similar to the 1963 Sanborn map.

Copyright © 2004, Partners Environmental Consulting, Inc.

1975 City Directory – Surrounding listings were mostly for residences, with the exception of Denison Avenue, which included listings for gas stations, a car wash, ALPO pet food, and Precision Pattern Machines. 3584 was listed as Parma Movers and Roush/Denardy Trucking.

1977 Aerial Photograph – Surrounding properties appeared similar to the 1951 aerial photograph.

1980 City Directory – Surrounding listings were similar to the 1975 city directory. However, there were more listings for commercial properties including shoe stores and pizza shops located on Denison Avenue. Listings for limited industrial properties including Rose D & E Co. Inc, Fastener Sales Bolt & Nut, Lawson Milk Co., and Roush/Denardy Trucking were located on W. 67th Street. 3256 73rd Street was listed as Reeds Longbranch.

1985 City Directory – Surrounding listings were similar to the 1980 city directory. 3229 73rd Street was listed as a furnace company. 7000 Denison Avenue was listed as Russell Burdsall.

1988 Aerial Photograph – Surrounding properties appeared similar to the 1977 aerial photograph. A small building is located in the area observed during the site visit to be occupied by the recycling center.

1990 City Directory – Surrounding properties appeared similar to the 1985 city directory.

1996 City Directory – Surrounding listings were mostly for residences. Listings for Denison Avenue were for commercial listings including an auto body shop and auto service station. 7000 Denison was listed as Buckeye Trailer Rental. Limited industrial listings were located along W. 67th Street including Blue Ribbon Meats, Shore Piping, Singleton Corp. and Star Provisions.

2000 Aerial Photograph – Surrounding properties appeared similar to the 1988 aerial photograph.

2001/2002 City Directory – Surrounding listings were similar to the 1996 city directory. However, there were a number of properties located along W. 67th Street that were not listed. 7000 Denison Avenue was listed as Handlit, Inc.

3.0 HYDROGEOLOGIC INFORMATION

Partners reviewed readily available information about soil, geology, and groundwater on a regional scale.

3.1 Soils

According to the "Soil Survey of Cuyahoga County, Ohio", the subject site is underlain with soils classified by the United States Department of Agriculture (USDA) Soil Conservation Service (SCS) as Urban land-Mahoning, complex, undulating (UmB). The Urban land (Ub) mapping unit borders the subject site to the east.

The Urban land-Mahoning complex, undulating map unit consists of Urban land and of a deep, somewhat poorly drained, undulating Mahoning soil. Individual areas of this map unit are on till plains and the higher parts of lake plains. They are broad and irregularly shaped and range from 30 to over 500 acres in size. They contain about 70 percent Urban land and 20 percent Mahoning silt loam. Slopes range from 0 to 6 percent. Streets, parking lots, buildings, and other structures obscure or alter the Urban land soils so identification is not feasible. Typically, the Mahoning soil has a surface layer of dark grayish brown, friable silt loam about 7 inches thick. The subsoil is about 32 inches thick. It is yellowish brown, dark yellowish brown and olive brown silty clay loams that is mottled and firm. The substratum to a depth of about 60 inches is olive brown, mottled, firm silty clay loam and clay loam. In places, the soil has been radically altered. Some low areas have been filled or leveled during construction, and other small areas have been cut, built up, or smoothed. Most areas of this unit are artificially drained by sewer systems, gutters, and subsurface drains.

Copyright © 2004, Partners Environmental Consulting, Inc.
\\partnerssolon1\Working Documents\Project Files\640 Cleveland Housing Network\640.11B VA Supportive Housing Update\Report\App G - Previous Reports\01 507.01 Phase I.doc

Urban land is areas where more than about 80 percent of the surface is covered by asphalt, concrete, buildings, or other manmade surfaces. Areas are 10 acres or more in size and are nearly level and gently sloping. Included in mapping are large areas that are mostly miscellaneous materials placed in fills and almost totally covered with roads, buildings, and other structures. Examination and identification of soils or soil-like materials in this unit are impractical. Onsite investigation is needed to determine the potential and limitation for any proposed use.

According to the USDA Natural Resources Conservation Service, hydric soil is one characteristic used to define wetlands. According to the USDA Hydric Soil List, Urban land-Mahoning, complex, undulating and Urban land soils are not listed as hydric soils.

3.2 Geology

According to the "Glacial and Surficial Geology of Cuyahoga County, Ohio" map, subsurface materials at the subject site consist of "Till, primarily Lavery Till." Lavery Till is dark gray to dark brown, silty to clayey, strong calcareous, and cohesive. Younger Hiram Till is identifiable in local outcrops, but in most places is thinner than the modern soil. Subsurface materials classified as "Made land" border the subject site to the east. This classification identifies areas of reclaimed land, cut and fill, dumps, and continuous urban cover where 90 percent or more of the surface is covered with concrete, asphalt, building complexes, structures, or other manmade surfaces. Urbanized areas where manmade surfaces are intricately associated with other types of cover are not included.

Bedrock topography estimates presented on the "Glacial and Surficial Geology of Cuyahoga County, Ohio" map estimate a bedrock elevation in the vicinity of the site at approximately 650-700 feet AMSL (compared to a topography of 710 feet); thereby, indicating a depth to bedrock ranging from 10-60 feet below grade.

3.3 Groundwater

According to the "Groundwater Resources Map of Cuyahoga County" prepared by the Ohio Department of Natural Resources (ODNR), the subject site is located within an area in which impermeable deposits, basically clay overlaying shale or shaley sandstone, provide a very poor area for even minimal domestic supplies. Brackish water and dry wells are common. Yields of less than 3 gallons per minute (gpm) may be developed. The nearest well depicted on the map is on Wentworth Avenue, just west of the subject site and is completed to a depth of 72 feet in shale. The well yields 0 gallons per minute and bedrock was encountered 42 feet below grade.

No information was available to quantitatively determine shallow groundwater flow direction at the subject site; however, shallow groundwater typically follows surface topography. Based on this assumption, shallow groundwater flow at the subject site, if present, is inferred to be toward the northeast.

4.0 RECORDS REVIEW

4.1 Database Records

Records reviewed during the Phase I ESA include databases maintained by federal, state and local agencies. Partners contracted FirstSearch to conduct a database search in accordance with ASTM Standard E 1527-00. In preparing this Phase I ESA report, Partners relied upon the results of the database search provided by FirstSearch. The conclusions can only be as accurate as the information provided by FirstSearch and Partners cannot be held liable for inaccurate or incomplete information provided by FirstSearch. The purpose of the database search was to obtain for review the records that would help identify recognized environmental conditions in connection with the subject site and the surrounding properties. A copy of the FirstSearch report is provided in **Appendix E**.

Copyright © 2004, Partners Environmental Consulting, Inc.

4.1.1 CERCLIS

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) is the United States Environmental Protection Agency's (USEPA's) database of current and potential hazardous waste sites currently or previously under investigation.

According to information contained in the EDR report, no CERCLIS sites were identified on or within one-half mile of the subject site.

The CERCLIS No Further Remedial Action Planned (NFRAP) archive designation indicates that assessment at a site has been completed and no further action will be taken to list the site on the NPL database (it does not necessarily mean there is no hazard associated with the site).

According to information contained in the FirstSearch report, the subject site was identified in the NFRAP database. Partners obtained additional information on the USEPA's Superfund Information Systems website. According to the database report and website, Simkins Industries is not on the National Priority List (NPL) and the facility has been deferred to Resource Conservation and Recovery Act (RCRA). No additional information about the facility was included in the database report or the USEPA's website.

4.1.2 NPL

The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority clean up under the Superfund Program.

According to information contained in the FirstSearch report, the subject site is not identified in the database and no priority clean up sites under the Superfund Program have been reported within a one mile radius of the subject site.

4.1.3 ERNS

The Emergency Response Notification System (ERNS) database maintained by the United States Coast Guard, records and stores information on reported releases of oil and hazardous substances.

According to information contained in the FirstSearch report, the subject site is not identified in the database.

4.1.4 RCRIS

The Resource Conservation and Recovery Information System (RCRIS) database includes selective information on sites that generate, or treat, store or dispose (TSD) hazardous wastes as defined by the RCRA.

<u>ON-SITE</u>

According to information contained in the FirstSearch report, the subject is identified in the RCRA TSD and RCRA Generator databases. The subject site is described in the database report as a manufacturing/folding paperboard box facility, which is subject to corrective action. The FirstSearch report identifies the subject site as a Small Quantity Generator (SQG). A SQG generates 100-1,000 kilograms per month of hazardous waste. Three (3) violations are reported for the subject site with all of the enforcements being "written informal" and resolved. No additional information about the facility was included in the database report. Based on the above information, it is possible that operations have adversely impacted the subject site.

Copyright © 2004, Partners Environmental Consulting, Inc.

OFF-SITE

According to the FirstSearch report, there are three (3) sites listed in the RCRA database located within the 0.5-mile radius to the subject site.

- **Park-Ohio Products, 7000 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.15 miles south of the subject site and hydraulically crossgradient in the inferred direction of groundwater flow. According to the FirstSearch report, this facility is described as a bolts, nuts, rivets, and washers manufacturer and is identified as a Large Quantity Generator (LQG). A LQG generates more than 1000 kilograms per month of hazardous waste. No additional information about the facility was included in the database report. Based on the above information, it is unlikely that operations at the facility have adversely impacted the subject site.

- **Denison Auto Body and Frame, 7408 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.17 miles southwest and hydraulically upgradient in the inferred direction of groundwater flow from the subject site. According to the FirstSearch report, the facility is identified as a SQG. No additional information about the facility was included in the database report. Based on the above information, it is unlikely that operations at the facility have adversely impacted the subject site.

- **American Recycling Company Inc., 3203 W. 71st Street, Cleveland, Ohio.** This site is located approximately 0.24 miles northeast and hydraulically downgradient in the inferred direction of groundwater flow from the subject site. According to the FirstSearch report, the site is identified as a SQG. Four (4) violations are reported for the site including two (2) TSD violations, one (1) generator pre-transport violation, and one (1) generator general violation. No additional information about the facility was included in the database report. Based on the above information, it is unlikely that operations at the facility have adversely impacted the subject site.

4.1.5 CORRACTS

The Corrective Action Report (CORRACTS) database identifies hazardous waste handlers with RCRA corrective action activity.

ON-SITE

According to information contained in the FirstSearch report, the subject site is listed in the database. The subject site is described in the database report as a manufacturing/folding paperboard box facility, which is subject to corrective action. Three (3) violations are reported for the subject site with all of the enforcements being “written informal” and resolved. No additional information about the subject site was included in the database report. Based on the above information, it is possible that operations have adversely impacted the subject site.

OFF-SITE

According to information contained in the FirstSearch report, there is one (1) CORRACTS site reported within a one-mile radius of the subject site.

- **Container Compliance Corp, 5151 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.87 miles southeast of the subject site and hydraulically crossgradient in the inferred direction of groundwater flow. According to the FirstSearch Report, this facility is identified as a manufacturer of paints, lubricating oils, adhesives, sealants, greases, and allied products and is subject to corrective action. There are fourteen (14) violations reported for this facility with all of the enforcements being “written informal”. No additional information about the facility was included in the database report. Based on the above information, it is unlikely that operations at this facility have adversely impacted the subject site.

Copyright © 2004, Partners Environmental Consulting, Inc.
\\partnerssolon1\Working Documents\Project Files\640 Cleveland Housing Network\640.11B VA Supportive Housing Update\Report\App G - Previous Reports\01 507.01 Phase I.doc

4.1.6 UST

According to the information contained in the FirstSearch report, the subject site is not identified in the database and no sites have been reported adjacent to the subject site.

4.1.7 LUST

According to the information contained in the FirstSearch report, the subject site is not listed in the LUST database. However, there are twenty-three (23) LUST sites located within 0.5 miles of the subject site. Nineteen (19) of the LUST sites are located over 0.25 miles and hydraulically crossgradient or downgradient from the subject site. Based on the location of these LUST sites, it is unlikely that operations at the facilities have adversely impacted the subject site. The other four (4) LUST sites are discussed below.

- **Action Auto Service, 7050 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.15 miles southeast of the subject site and hydraulically crossgradient in the inferred direction of groundwater flow. According to the FirstSearch report, a suspected or confirmed release from a regulated UST has occurred at this site. The responsible party has filed an initial correction action program report. Based on the location of this facility from the subject site and the anticipated groundwater flow direction, it is unlikely that operations at this facility have adversely impacted the subject site.

- **R B & W Corp., 7000 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.15 miles southeast of the subject site and hydraulically crossgradient in the inferred direction of groundwater flow. According to the FirstSearch report, a suspected or confirmed release from a regulated UST has occurred at this site. Based on the distance and the anticipated groundwater flow direction, it is unlikely that operations at this facility have adversely impacted the subject site.

- **Former Sunoco 001-7403, 7403 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.17 miles southwest of the subject site and hydraulically upgradient in the inferred direction of groundwater flow. According to the FirstSearch report, a suspected or confirmed release from a regulated UST has occurred at this site. Based on the distance, it is unlikely that operations at this facility have adversely impacted the subject site.

- **Denison Care, 6918 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.20 miles southeast of the subject site and hydraulically crossgradient in the inferred direction of groundwater flow. According to the FirstSearch report, a suspected or confirmed release from a regulated UST has occurred at this site. A corrective action plan has been submitted by the responsible party. Based on the location of this facility from the subject site and the anticipated groundwater flow direction, it is unlikely that operations at this facility have adversely impacted the subject site.

4.1.8 MSL

The Ohio Environmental Protection Agency's (OEPA's) Master Sites List (MSL) database contains State hazardous waste site records that are equivalent to CERCLIS and NPL. These hazardous waste sites would be managed by the OEPA Division of Emergency and Remedial Response (DERR).

ON-SITE

According to information contained in the FirstSearch report, the subject site is identified in the STATE database. The DERR database is an index of sites which the Ohio EPA now maintains. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated. This site is included in the Ohio Voluntary Action (Cleanup) Program

Copyright © 2004, Partners Environmental Consulting, Inc.

(VAP). The FirstSearch report does not provide any other detailed information on the subject site. Based on the above information, it is possible that operations have adversely impacted the subject site.

OFF-SITE

According to information contained in the FirstSearch report, there are three (3) STATE sites reported within a one-mile radius of the subject site.

- **Swift Co., 3229 W. 65th Street, Cleveland, Ohio.** This site is located approximately 0.38 miles southeast and hydraulically crossgradient in the inferred direction of groundwater flow from the subject site. According to information contained in the FirstSearch report, the DERR database is an index of sites which the Ohio EPA now maintains. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated. This site is included in the Ohio Voluntary Action (Cleanup) Program (VAP). The FirstSearch report does not provide any other detailed information on this site. Based on the location of this facility from the subject site and the anticipated groundwater flow direction, it is unlikely that operations at the facility have adversely impacted the subject site.

- **Boehm Pressed Steel Co., 2219 W. 63rd Street, Cleveland, Ohio.** This site is located approximately 0.65 miles northeast and hydraulically downgradient in the inferred direction of groundwater flow from the subject site. According to information contained in the FirstSearch report, the DERR database is an index of sites which the Ohio EPA now maintains. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated. This site is included in the Ohio VAP. The FirstSearch report does not provide any other detailed information on this site. Based on the location of this facility from the subject site and the anticipated groundwater flow direction, it is unlikely that operations at the facility have adversely impacted the subject site.

- **Parr West Property, 5151 Denison Avenue, Cleveland, Ohio.** This site is located approximately 0.87 miles southeast and hydraulically crossgradient in the inferred direction of groundwater flow from the subject site. According to information contained in the FirstSearch report, the DERR database is an index of sites which the Ohio EPA now maintains. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated. This site is included in the Ohio VAP. The FirstSearch report does not provide any other detailed information on this site. Based on the distance of this facility from the subject site, it is unlikely that operations at the facility have adversely impacted the subject site.

4.1.9 SWL

The Solid Waste Landfill (SWL) database contains the OEPA's listing of landfills and transfer stations. The database is maintained by the Division of Solid and Infectious Waste Management.

According to the information contained in the FirstSearch report, the subject site is not identified in the database and no SWF/LF sites have been reported within one-half mile of the subject site.

4.1.10 Orphan Sites Listed in the Database Report

An orphan site is a facility or a location listed in one of the federal, state or local databases that has not been mapped due to an inadequate address. According to the FirstSearch report, two (2) unmappable sites were identified. Further research of these addresses determined that the sites are located over 1.0 mile and hydraulically crossgradient or downgradient from the subject site. Based on the location of these two sites, it is unlikely that the operations at the two orphan sites have adversely impacted the subject site.

Copyright © 2004, Partners Environmental Consulting, Inc.

4.2 Additional Record Sources

On May 25, 2004, Partners requested information located in files maintained by the City of Cleveland Fire Department (Fire Department). The Fire Department has not responded to Partners' request for information at this time. If the records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

Partners located and conducted a cursory review of files formerly maintained by Simkins during the site visit. The following is a summary of information discovered in the files.

- Documentation (dated 1982) from the US EPA that the facility was withdrawing its Part A Hazardous Waste Permit Application.
- Documentation and analytical results from wastewater discharges from the facility.
- Waste manifests indicating that flammable liquids (UN 1993) were removed from the facility.
- Correspondence identifying the amount and type of machine oils and non-halogenated solvents purchased from 1981 through 1986.
- Semi-Annual Reports detailing environmental issues. Information on the forms indicated that Safety Kleen removes the spent solvents and that metal is sent to a recycling facility.
- Correspondence form the Ohio EPA to Simkins indicating that closure of the hazardous waste drum storage area is complete. Information attached to the correspondence indicated that the floor was washed and that samples of the rinseate were collected and analyzed. A drawing attached to the work plan indicated the location of the solvent separator and the flammable storage area. The location of the solvent separator corresponded with the location of the equipment observed in the basement during the site visit (Photograph 5, **Appendix B**). The drawing also shows the location of flammable storage. Additional information on the drawing indicated the presence of a transformer room along the south-central portion of the building. This room corresponds with the small room observed during the site visit to have possibly been a transformer room (see **Section 5.1.6**)
- An annual hazardous waste generating report from 1988 indicated that wastes included soil contaminated with electroplating sludge and a spent solvent mixture containing trichloroethene (TCE), methyl ethyl ketone (MEK) and methylene chloride. The wastes were removed from the facility by a private contractor (Hukill Chemical Corporation).

5.0 SITE VISIT

Ms. Sunshine Fluharty and Mr. John Chapman of Partners conducted a site visit on May 25, 2004, to observe and document existing conditions according to ASTM 1527-00. Observations made during the site visit were directed at storage, use and disposal of potential hazardous materials or wastes, petroleum, or other chemical products with the potential to adversely impact the subject site. An inspection was made for aboveground storage tanks (ASTs), USTs, electrical or hydraulic equipment (electrical transformers, hydraulic lifts, etc.), distressed vegetation, stained or discolored surface areas, and depressions or mounds which could indicate past burial or disposal activities.

Observations of the adjoining and/or surrounding properties were made from the subject site or from public rights-of-way.

Copyright © 2004, Partners Environmental Consulting, Inc.

5.1 Subject Site

5.1.1 Hazardous Substances and Petroleum Products

Numerous containers (plastic, metal, and cardboard) were observed throughout the entire building. These containers varied in size from 1-gallon canisters to 55-gallon drums. The drums were labeled to contain oil applicator, multi-purpose oil, hydraulic oil, inks, and aqueous glass coating liquid. The smaller containers were labeled to contain various materials including cutting oils, plate developer, inks, isopropanol, and paints. The majority of the containers were found in the northeastern portion of the basement, which contained a parts storage area. With the exception of the office spaces, concrete floors were observed throughout the entire building. The concrete floors appeared to be in good condition with no signs of major cracks observed throughout the building. No floor drains or evidence of former floor drains was observed in these areas. Although, there was some surficial staining observed on the floors, it appeared to be *de minimus* amounts. Based on the above information, it is possible that the subject site has been adversely impacted.

5.1.2 Hazardous Waste Storage and Disposal

No hazardous waste storage or disposal was observed during the site visit. Documentation obtained during the site visit indicated that a hazardous waste storage area was located in the northeast corner of the building (see **Section 4.2**).

5.1.3 Solid Waste Disposal

No evidence of solid waste disposal, other than normal solid waste left in-place by Simkins, was observed in the building on Parcel 1 during the site visit

One large dumpster was observed on the section of Parcel 2, currently owned by the City of Cleveland. The City is currently utilizing the eastern section of Parcel 2 for storage of materials necessary for the reconstruction of the Denison Avenue bridge. No odors or discolorations were observed during the site visit. Based on these observations, it is unlikely that the subject site has been adversely impacted.

5.1.4 Underground Storage Tanks

No evidence of USTs was observed during the site visit.

5.1.5 Aboveground Storage Tanks

Three (3) large ASTs were observed on the roof of the newer section of the building during the site visit. According to Mr. Chmielewski, these ASTs were used as transfer tanks in the blowpipe system used to distribute cellulose throughout the building. The ASTs appeared to be in good condition. Based on the historic use of the ASTs and their location, it is unlikely that the subject site has been adversely impacted.

One (1) 250-gallon (estimated) AST was located near the middle elevator, which was reportedly hydraulic. The AST is located within secondary containment and is believed to contain hydraulic fluids used by the freight elevator. Aboveground piping from the AST to the freight elevator was observed during the site visit. The AST appeared to be newer and in good condition with no staining observed on the concrete floor surrounding the AST. In addition, no floor drains were observed near the AST. Based on these observations, it is unlikely that the AST has adversely impacted the subject site.

One (1) Hyde oil/water separator was located in the north-central part of the basement (Section D). According to documentation obtained during the site visit, the Hyde separator is a device especially designed to automatically separate free oil from oily-water mixtures. The documentation about closure of the hazardous waste storage area indicated that this piece of equipment may have been associated with closure activities (see **Section 4.2**). The concrete floor surrounding the separator was observed to be in

Copyright © 2004, Partners Environmental Consulting, Inc.

good condition. No piping associated with the separator was observed during the site visit. A *de minimus* amount of surficial staining was observed. Based on the apparent use of the equipment and the chemicals used in operations by Simkins (see **Section 4.2**), it is possible that the subject site has been adversely impacted.

One (1) 500-gallon AST was observed on the section of Parcel 2, currently being utilized by the City during the site visit. The AST was observed to be located in secondary containment. The tank appeared to be in good condition with no evidence of leaks. Based on these observations, it is unlikely that the subject site has been adversely impacted.

5.1.6 PCBs

Several transformers were observed throughout the building. The transformers appeared to be in good condition with no apparent stains observed on or surrounding the transformers. Based on these observations, it is unlikely that the transformers have adversely impacted the subject site.

A small transformer room was located on the north side of the building and was accessible from the sidewalk located along Wentworth Avenue. Observations of the transformer room were made through a chain-link gate with wire mesh. Three (3) large transformers were located within the room. A *de minimus* amount of staining was observed on one (1) transformer. The concrete floor appeared to be in good condition. Based on these operations, it is unlikely that the subject site has been adversely impacted.

One (1) hydraulic freight elevator was observed in the basement of the central area (Section B). The motor for the elevator was located on the roof of Section B. The equipment and surrounding surfaces appear to be in good condition with *de minimus* amounts of leakage or staining. Partners was not able to evaluate areas below the elevator for the presence or staining and/or hydraulic fluids. Based on these observations and that use of the elevator dates back to the early 1900s, it is possible that the subject site has been adversely impacted.

According to documentation obtained and observations made during the site visit, a former transformer room was located in the basement on the south side of Section B. The concrete floor in this room appeared to be in good condition with no evidence of stains. No floor drains were apparent. **Section 4.2** of this report provides additional information on the former transformer room. Based on historical use of the room, it is possible that the subject site has been adversely impacted.

5.1.7 Pits, Ponds, Lagoons, and Waste Disposal Areas

Partners observed no evidence of existing pits, ponds, lagoons or waste disposal areas during the site visit.

5.1.8 Fill Material and Stockpiles

No fill material or stockpiles were observed on the subject site during the site visit. Based on the review of the “Soil Survey of Cuyahoga County, Ohio”, the subject site is underlain with Urban land soils. Urban land soils typically contain fill materials.

5.1.9 Drums, Silos, and Containers

No evidence of silos was observed during the site visit. **Sections 2.3** and **5.1.1** provide information on drums and containers observed during the site visit.

5.1.10 Asbestos Containing Materials (ACM)

Partners observed suspect asbestos-containing materials (ACM) in the form of floor tiles, ceiling tiles, plaster and wallboard systems. The suspect ACM was observed to be in poor condition in some areas, which were water damaged.

Copyright © 2004, Partners Environmental Consulting, Inc.

5.1.11 Other Conditions of Concern

Partners observed suspect lead-based paint in the building. The suspect lead-based paint was observed to be peeling off some walls and piping in the building.

5.2 Adjoining Properties

5.2.1 Hazardous Substances and Petroleum Products

There was no evidence of hazardous substances and petroleum products observed on adjacent properties during the site visit.

5.2.2 Hazardous Waste Storage and Disposal

No evidence of hazardous waste storage and disposal was observed on adjacent properties during the site visit.

5.2.3 Solid Waste Disposal

Several dumpsters were observed near the recycling center located south of the subject site. No odors or discolorations were observed during the site visit. Based on these observations, it is unlikely that the subject site has been adversely impacted.

5.2.4 Underground Storage Tanks

No evidence of USTs (fill pipes, dispensers, vent pipes) was observed on adjacent properties during the site visit.

5.2.5 Aboveground Storage Tanks

No evidence of ASTs was observed on adjacent propertied during the site visit.

5.2.6 PCBs

A Cleveland Electric Illuminating Company (CEI) electrical substation was observed on the property just south of the western section of Parcel 2. The substation was present on historical Sanborn maps dating back to 1950. A number of transformers (old and new) were observed at the substation. The concrete pads underlying the transformers were observed to be in good condition with no evidence of stains. Dielectric fluids used in transformers prior to 1979 have been known to contain PCBs. Based on the age and close proximity of the substation to Parcel 2, it is possible that the subject site has been adversely impacted by releases (if any) of dielectric fluids from electrical transformers.

Two (2) pole-mounted transformers were observed on adjoining properties. One (1) was located on 73rd Street and one (1) was observed on the opposite side of Wentworth Avenue. The transformers appeared to be in good condition with no staining observed on the transformers. Based on these observations, it is unlikely that the transformers have adversely impacted the subject site.

5.2.7 Fill Materials and Stockpiles

No evidence of fill material or stockpiles was observed on the adjoining properties during the site visit. Based on the review of the “Soil Survey of Cuyahoga County, Ohio”, the adjoining properties are underlain with Urban land soils. Urban land soils typically contain fill materials.

Copyright © 2004, Partners Environmental Consulting, Inc.

5.2.8 Drums, Silos, and Containers

No evidence of drums, silos, or other containers was observed on the adjoining properties during the site visit.

5.2.9 Other Conditions of Concern

No other conditions of concern were observed on the adjoining properties during the site visit.

6.0 INTERVIEWS

6.1 Owner/Operator

On May 27, 2004, Partners contacted Mr. Mike Ambrosio, with Westfield Realty. According to Mr. Ambrosio, Westfield Realty is a subsidiary of Simkins. Mr. Ambrosio stated that he has been involved with Simkins for 15 years. According to Mr. Ambrosio, Simkins purchased the subject site in the mid-1980s. Mr. Ambrosio indicated that Simkins was strictly a printing facility. According to Mr. Ambrosio, there are no environmental liens on the subject site. To the best of his knowledge, there are no USTs at the subject site. He was not aware of any former USTs located at the subject site. Mr. Ambrosio was not aware of any environmental issues associated with the site.

6.2 Additional Interviews

Mr. Wally Chmielewski, with the Stockyard Redevelopment Organization was available at the time of the site visit. Mr. Chmielewski provided Partners with information on the historic use of the subject site documented throughout the report.

7.0 FINDINGS AND CONCLUSIONS

Partners Environmental Consulting, Inc. (Partners) was contracted by the Stockyard Redevelopment Organization (Client) to conduct a Phase I Environmental Site Assessment (ESA) on 3 parcels of land (subject site) located along Wentworth Avenue (7275), Neville Avenue (7255-7283) and West 73rd Street (3297-3311) in Cleveland, Ohio 44102.

Partners conducted the Phase I ESA in general accordance with *ASTM Standard E 1527-00 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process)* at the above references site.

Based on the information described in this report, this assessment has revealed the following “recognized environmental conditions” as defined by ASTM E-1527-00, in connection with the subject site.

<u>ON-SITE</u>

- **Historical Uses of Parcel 1:** According to information obtained during Phase I ESA activities, the subject site was developed for manufacturing purposes dating back to the early 1900s (possibly 1903). Occupants of the Parcel have included The Cleveland Macaroni Factory, The Cleveland Corrugated Box Co, The Great Lakes Box Co., St. Regis Container Co. Corrugated Box Manufacturer, and Simkins. Historic operations by St. Regis and Simkins indicated that hazardous chemicals were stored and used in daily operations throughout the facility. These chemicals included solvents (including TCE), petroleum products, inks, and film developing chemicals. Based on the extensive use and handling of these compounds throughout the facility, it is possible that the subject site has been adversely impacted.

Copyright © 2004, Partners Environmental Consulting, Inc.

- **Regulatory Database:** Review of the environmental database report (**Section 4.0**) indicated that Parcel 1 of the subject site was identified on the STATE, NFRAP, RCRA, and RCRA CORRACTS databases. Inclusion of the parcel on these databases indicates that the OEPA and USEPA have been involved with operations, cleanup and/or closure activities conducted on-site. Based on the subject site being included on these databases, it is possible that there are unresolved regulatory issues that may need to be addressed and/or completed with the agencies.

- **Historical Uses of Parcel 2:** According to the review of historical documents, Parcel 2 was historically developed with The Standard Steel Casting Co. and The Atlas Steel Foundry Co. A portion of the Parcel 2 was identified as an Auto Truck and Trailer yard in the 1950, 1963, and 1971 Sanborn maps. Based on the historical use of Parcel 2, it is possible that the subject site has been adversely impacted.

OFF-SITE

- **CEI Substation:** An electrical substation operated by CEI was observed on the property just south of the western section of Parcel 2. The substation was present on historical Sanborn maps dating back to 1950. A number of transformers (old and new) were observed at the substation. Dielectric fluids located in transformers prior to 1979 have been known to contain PCBs. The concrete pads underlying the transformers were observed to be in good condition with no evidence of stains. Based on the age and close proximity of the substation to Parcel 2, it is possible that a release (if any) of dielectric fluids from the electrical transformers has adversely impacted the subject site.

OTHER CONDITIONS OF CONCERN

- **Drums/Containers and Equipment**: Numerous drums and containers (plastic, metal, and cardboard) and other miscellaneous equipment (many of which potentially contain oils) remain at the subject site. The drums and containers were labeled to contain oil applicator, multi-purpose oil, hydraulic oil, inks, cutting oils, plate developer, isopropanol, paints, and aqueous glass coating liquid.

- **Suspect ACM:** Partners observed suspect ACM in the form of floor tiles, ceiling tiles, plaster and wallboard systems. The suspect ACM was observed to be in poor condition in some areas, which were water damaged.

- **Suspect Lead:** Partners observed suspect lead-based paint in the building. The suspect lead-based paint was observed to be peeling off some walls and piping in the building.

- **Fill Material:** No evidence of the fill material (mounded soils, miscellaneous debris, and unusual topographic features) was observed on the subject site at the time of the site visit. Based on the review of the "Soil Survey of Cuyahoga County, Ohio", the adjoining properties are underlain with Urban land soils. Urban land soils typically contain fill materials. Based on the above information it is possible that the subject site has been adversely impacted.

8.0 RECOMMENDATIONS

Based on the results of the Phase I ESA activities, Partners recommends the following.

- Based on historical operations, Partners recommends an OEPA and USEPA file review be conducted to determine if the subject site has been adversely impacted. If the results of the file review are inconclusive, it may be necessary to conduct a Phase II investigation to resolve this potential concern.

- Due to the historical uses of Parcels 1 and 2, Partners recommends that limited Phase II activities be conducted to determine if the subject site has been adversely impacted.

Copyright © 2004, Partners Environmental Consulting, Inc.

- Partners recommends a comprehensive waste characterization of all chemicals be conducted and the materials be managed in accordance with all local, state, and federal regulations.

- Based on the age of the building and observations made during the site visit, Partners recommends an Asbestos Survey be conducted prior to any renovation activities.

- Based on the age and since the subject site is reportedly going to be used for residential purposes, Partners recommends a Lead Based Paint Survey be conducted.

- Based on the review of the "Soil Survey of Cuyahoga County, Ohio, " it is possible that fill material may be discovered during redevelopment activities. Partners recommends that any fill material be handled in accordance with all federal, state, and local regulations if any impacted material is encountered during site development.

Partners has prepared this report on behalf of its Client, the Stockyard Redevelopment Organization. Resumes for the individuals who worked on this report are included in **Appendix F** and signatures are provided below.

EXECUTIVE SUMMARY

Partners was contracted by CHN Housing Partners (User/Client) to conduct a Phase I Environmental Site Assessment (ESA) at vacant land located at West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio (Subject Property) in an effort to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), and de minimis conditions. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society of Testing and Materials (ASTM) Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21). The report also complies with the Ohio Housing Finance Agency (OHFA), United States (U.S.) Department of Housing and Urban Development (HUD), and City of Cleveland Department of Community Development Environmental Review non-scope items. Limitations and/or deviations from the ASTM E1527-21 standard are described in **Section 1.4** of this report.

According to the Cuyahoga County Auditor's website, the Subject Property is comprised of two (2) parcels, designated as Permanent Parcel Numbers (PPNs) 006-25-027 and 006-25-028, which are currently owned by the City of Cleveland Land Utilization Program. The Subject Property was initially developed by at least 1902, with industrial and residential development of the Subject Property apparent by at least 1913. Several residential dwellings were located in the north-central portion of the Subject Property, the Atlas Steel Foundry Company occupied the eastern portion, and the Standard Steel Casting Company Foundry occupied the western portion of the Subject Property. One (1) 6,000-gallon crude oil underground storage tank (UST) was depicted southwest of the Atlas Steel Foundry Company warehouse on the 1913 Sanborn Fire Insurance map. There are no records indicating that the UST was removed from the Subject Property.

By at least 1930, the Atlas Steel Foundry Company warehouse was occupied by the Cleveland Cleaner & Paste Company, who manufactured wallpaper, pastes, and commercial-grade cleaning products. Records reviewed from the City of Cleveland Fire Department (CFD) indicated that the Cleveland Cleaner & Paste Company obtained several permits throughout their occupancy period for the usage of various UST systems, including USTs for gasoline and kerosene. Specific notes related to the location, size, and duration of use for these USTs was not specified. There are no records indicating that the UST was removed from the Subject Property. Additionally, CFD records indicate the storage and use of dry-cleaning detergent solvents.

The Standard Steel Casting Company vacated the Subject Property by at least 1950, and the residential dwellings appeared to have been razed. The former buildings associated with the Standard Steel Casting Company operation were razed, and the location was labeled to be occupied by an automotive trailer and truck yard. According to CFD records, the Cleveland Cleaner & Paste Company vacated the Subject Property in 1984. By at least 1991, any remaining structures associated with past operations were razed, and the Subject Property remained vacant.

The adjoining sites and surrounding area were developed by at least 1902; the C.C.C. and St. L Railroad is present adjoining the Subject Property to the east. By 1903, the Cleveland Macaroni Factory was apparent on the northeastern adjoining site. The site was vacated by 1930 and reoccupied by at least 1938 by the Cleveland Corrugated Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue), which changed entities to the Great Lakes Box Company Division of St. Regis Paper Company by 1961. The southern adjoining site was developed by at least 1950 with an electrical substation. The northeastern adjoining site was purchased by Simkins Industries in 1991 and Fluorescent Recycling, Inc. occupied the site by at least 2016. Observations made during the site visit indicated the northeastern adjoining site is currently vacant.

According to CFD records reviewed for the northeastern adjoining industrial warehouse site, the Great Lakes Box Company Division of St. Regis Paper Company utilized several USTs of various sizes and contents ranging from gasoline, kerosene, and fuel oil. There were no records available that indicated whether or not these tanks were removed from the site.

Additionally, Simkins Industries, a former occupant, was identified to be a former Resource Conservation and Recovery Act (RCRA) Generator for the generation of various hazardous substances, including Not

Copyright © 2024, Partners

Defined Waste, Ignitable Waste, Benzene, Tetrachloroethylene (TCE), Nonhalogenated solvents, and Solvent Washes and Sludges. Several violations were reported and returned to compliance. A Phase I ESA previously conducted on the site determined that the storage and use of these hazardous substances (TCE, petroleum products, inks, and film developing chemicals) likely adversely impacted the site. Fluorescent Recycling, Inc. was also a former occupant of the northeastern adjoining site and was identified to be a RCRA Generator for the generation of mercury waste. The facility occupied the site by at least 2016 and received numerous compliance violations, which do not appear to have been resolved. A fire occurred at the site in 2018, resulting in a Superfund listing for the site, however, the site is listed to not require site assessment work.

The southwestern adjoining site beyond West 73rd Street was historically developed as a dry cleaner in at least 1991 and 1992. Additionally, an electrical substation was noted on the southern adjoining site from at least the early 1950s to present.

Below are conclusions derived from this Phase I ESA, which were based on, but not necessarily limited to, a visual inspection of the Subject Property; review of pertinent background and historical information; evaluation of physical setting sources; interviews with persons knowledgeable of the Subject Property (as available); review of environmental records; and Partners' professional experience.

Significant Data Gaps

There were no significant data gaps identified during the performance of this Phase I ESA.

Recognized Environmental Conditions

The Phase I ESA has revealed no evidence of RECs in connection with the Subject Property with the exception of the following.

- **REC-1: Historical Operations, 7255-7283 Neville Avenue (Subject Property):** The eastern portion of the Subject Property addressed at 7255-7275 Neville Avenue was developed and utilized as a foundry (Atlas Steel Foundry Company) from approximately 1913 until 1930. At least one (1) 6,000-gallon crude oil UST was associated with the foundry operations. Following the foundry, a paste and commercial-grade cleaning product manufacturer (Cleveland Cleaner & Paste Company) operated at 7255-7283 Neville Avenue through the 1980s. Fire department records show that high volumes of solvents were stored and used in their operations, and multiple kerosene and gasoline UST systems were in operation during this time as well. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **REC-2: Former Foundry, 7299 Neville Avenue, 3297 and 3319 West 73rd Street (Subject Property):** The western portion of the Subject Property was also developed and utilized as a foundry (Standard Steel Casting Company Foundry) from approximately 1913 until 1950. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **REC-3: Historical Operations, 7260 Neville Avenue, and 7275 Wentworth Avenue (Adjoining Site):** The northeastern adjoining site has been developed and utilized as various manufacturing and industrial facilities, generally from 1913 through the 2010s. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **REC-4: Historical Operations, 3322 West 73rd Street (Adjoining Site):** The adjoining site to the southwest was historically utilized as a dry cleaner. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

Copyright © 2024, Partners

- **REC-5: Electrical Substation, 3321-3323 West 73rd Street (Adjoining Property):** The southern adjoining electrical substation, present since at least 1951, was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release but are considered as a REC due to the close proximity to the Subject Property. Based on Partners' experience, hazardous substances may have been used at this adjoining property, which have the potential to adversely impact the Subject Property.

Controlled Recognized Environmental Conditions

The Phase I ESA has revealed no evidence of CRECs in connection with the Subject Property.

Historical Recognized Environmental Conditions

The Phase I ESA has revealed no evidence of HRECs in connection with the Subject Property.

De Minimis Conditions

The Phase I ESA has revealed no evidence of de minimis conditions in connection with the Subject Property.

Other Conditions of Concern

This assessment has revealed no evidence of business environmental risk or other noteworthy items in connection with the Subject Property. All OHFA or HUD related items of potential concern are related to and included within the identified RECs.

RECOMMENDATION

Based on the findings and conclusions of this Phase I ESA, a Limited Phase II Investigation is recommended. Additionally, in accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system.

Notice

This Executive Summary is part of this complete report; any findings, opinions or conclusions in this Executive Summary are made in context with the complete report. Partners recommends that the User read the entire report and supporting documentation for all supporting information related to findings, opinions, and conclusions.

Copyright © 2024, Partners

1.0 INTRODUCTION

Partners was contracted by CHN Housing Partners (User/Client) to conduct an ASTM E1527-21 Phase I ESA at vacant land located at West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio (Subject Property). According to information obtained from the Cuyahoga County Auditor's website, the Subject Property is comprised of two (2) parcels, designated as Permanent Parcel Numbers (PPNs) 006-25-027 and 006-25-028, which are currently owned by the City of Cleveland Land Utilization Program.

The Subject Property's current land use is designated "Exempt – City Land Bank." A zoning map of the Subject Property and surrounding area obtained from the Cleveland City Planning Commission Zoning Department website indicates that the Subject Property is zoned as "Semi-Industry." The Subject Property information is included in **Appendix A**.

The Client did not contract with Partners to procure title, lien search and/or activity and use limitation (AUL) nor did Client provide same to Partners as part of this Phase I ESA.

1.1 Purpose

One of the purposes of conducting a Phase I ESA in accordance with the ASTM Practice E1527-21 and the All-Appropriate Inquiries (AAI) Final Rule is to permit the User to satisfy one of the requirements to qualify for the Innocent Landowner, Contiguous Property Owner, or Bona Fide Prospective Purchaser limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability.

Partners understands that this Phase I ESA Report was completed in preparation of the Subject Property being purchased by the Client.

1.2 Objective

The goal of the Phase I ESA process is to identify RECs at the Subject Property and present findings in a written report. A REC is defined by ASTM E1527-21 as follows:

1) "the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* to the *environment*;
2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* or likely *release* to the *environment*; or
3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* under conditions that pose a *material threat* of a future *release* to the *environment*."

The ASTM E1527-21 standard indicates (Appendix X4) that Historical RECs (HRECs), Controlled RECs (CRECs), and de minimis conditions are not RECs.

Partners has considered the migration of hazardous substances or petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property.

1.3 Scope of Work

Partners conducted the Phase I ESA in general accordance with the United States Environmental Protection Agency (USEPA), *Standard and Practices for All Appropriate Inquires (AAI), Final Rule (40 CFR Part 312)* and *ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-21), effective February 13, 2023.* Phase I ESA activities generally consisted of the following components, presented below with the dates those activities commenced:

Copyright © 2024, Partners

ASTM E1527-21 Component	Date Activity Started
Retention of Partners to perform ASTM E1527-21 Phase I ESA	12/27/2023
Obtaining and reviewing federal, state, and local environmental databases;	1/2/2024
Reviewing other reasonably ascertainable public records (historical and current) for the Subject Property and surrounding sites;	1/2/2024
Conducting a site walkover to observe and document existing conditions;	1/5/2024
Interviewing people knowledgeable about current and past operations at the Subject Property;	1/11/2024
Documentation of findings in this Phase I ESA Report.	1/11/2024
Declaration by Environmental Professional	1/23/2024

In addition to ASTM standards, at the request of the Client, Partners had also included Ohio Housing Finance Agency (OHFA) considerations as described in the *Ohio Housing Finance Agency* (OHFA) *Environmental Review Standards for HOME Funded Projects* (OHFA Requirements), effective May 11, 2016, and the OHFA *2024-2025 Qualified Allocation Plan*. These non-scope items are detailed in **Section 8.0**.

Exceptions to, or deletions from these practices are described in **Section 1.4** of this report.

1.4 Limitations to the ASTM Standard and Data Gaps

Limitations or exceptions to ASTM Standard E1527-21 and data gaps, as defined in the AAI Final Rule noted during the course of the Phase I ESA are discussed below.

Based on a review of available resources and conditions observed during the site inspection, the potential data gaps or limitations to ASTM Standard E1527-21 described below do not likely affect the ability to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the Subject Property or would be likely to have a material impact on the conclusions of this report. The following limitations or deviations to the ASTM standard are not considered significant, as they do not substantially change the findings and conclusions of this report.

- Although available resources were reviewed, there are intervals over five (5) year periods when data was not available.

- The apparent uses of the Subject Property were identified to 1913, the date of the earliest historical resource that was reviewed and contained information as to the Subject Property's use. The use of the Subject Property as an industrial steel foundry in the 1913 Sanborn Fire Insurance map could not definitively be identified as first use. Topographic maps were reviewed back to 1902; however, Topographic maps do not generally provide information regarding property use. Although additional information sources listed in ASTM E1527-21 were not reviewed (other than as described in **Section 5.0**), it is not expected that any information reviewed prior to 1913 would substantially change the findings and conclusions of this report.

- The Client did not provide Partners with an environmental lien and/or activity use limitation (AUL) search for the Subject Property. Partners was not requested to obtain this item for the purposes of review. While no other resource reviewed as part of this Phase ESA provided an indication that such

Copyright © 2024, Partners

information would change the conclusions of this report, the absence of this information may limit various protections provided under the AAI standard.

There were no exceptions and/or significant data gaps encountered during the performance of this Phase I ESA. As a result, they did not affect the ability of the Environmental Professional (EP) to identify a REC.

1.5 Reliance

The Phase I ESA Report has been prepared for the exclusive use of the Client, OHFA, and HUD and may not be relied upon by any other party. The Client, OHFA, and HUD may rely on this Phase I ESA subject to the terms and conditions of the contractual agreement between Partners and the Client for environmental consulting services relative to the Subject Property, and any limitations identified in this Phase I ESA.

Copyright © 2024, Partners

2.0 SUBJECT PROPERTY AND ADJOINING SITES DESCRIPTION

2.1 General Subject Property Location

The Subject Property is located on the southeastern corner of West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio. The Subject Property is located in an area developed primarily for residential use to the north and west, industrial use to the northeast, and railroad tracks with industrial properties beyond to the south and east. The location of the Subject Property is depicted on **Figure 1**.

2.2 Subject Property Characteristics

Figure 2 depicts the features on the Subject Property. Photographs are included in **Appendix B**. Below is a description of the Subject Property features and characteristics.

Subject Property Feature/Characteristics	Description
Approximate Acres	1.99 acers
Approximate Elevation	710 feet above the mean sea level (AMSL)
Topographic Gradient(1)	Northeast towards Old River approximately 2.05 miles away.
Buildings/Structures	Not Applicable
Roads, Paths, and/or Rail	Access to the Subject Property is gained from Neville Avenue by means of both a gravel and asphalt drive.
Water Supply System	City of Cleveland Division of Water (currently not utilized, but connections are available.)
Sanitary Disposal System	Not Applicable
Industrial Wastewater System	Not Applicable
Stormwater Control System	Infiltration through the ground surface, with catch basin along Neville Avenue and West 73rd Street.
Electric Provider	First Energy (currently not utilized, but connections are available.)
Natural Gas Provider	Dominion (currently not utilized, but connections are available.)
Back-Up Power System	Not Applicable.
Heating/Cooling System (including fuel source)	Not Applicable.
Solid Waste Storage/Transport Provider	Not Applicable.

Copyright © 2024, Partners

Exterior	Partially Paved Parking, Wooded, Unmanicured Greenspace

(1) According to the Cleveland South, Ohio Quadrangle, USGS 7.5-Minute Topographic Map (**Figure 1**).

2.3 Current Uses of Subject Property

Currently, the Subject Property is owned by the City of Cleveland Land Utilization Program and is vacant land. At the time of the site visit, no buildings were observed.

2.4 Past Uses of Subject Property

According to historical documents reviewed (**Section 5.0**), in general, the Subject Property was developed for industrial purposes by at least 1913. Below is a table summarizing past uses of the Subject Property.

Occupant/Operator	Description of Use	From	To
Various	Residential	Prior to 1913	c. 1950
The Atlas Steel Foundry Company	Steel Foundry	Prior to 1913	c. 1930
The Standard Steel Casting Company Foundry	Steel Foundry	Prior to 1913	c. 1950
The Cleveland Cleaner & Paste Company	Cleaning and Wallpaper Paste Manufacturing	c. 1930	c. 1991
Unknown	Automotive Truck and Trailer Yard	c. 1950	c. 1991
Simkins Industries, Inc.	Vacant Industrial Land (PPN 006-25-028)	1979	2010
City of Cleveland Land Bank	Vacant Industrial Land (PPN 006-25-027)	1992	Present
City of Cleveland Land Bank	Vacant Industrial Land (PPN 006-25-028)	2010	Present

2.5 Current Uses of Adjoining Sites

Current uses of the adjoining sites and surrounding area were observed from the Subject Property or public rights-of-way. The following are observations of the current uses of adjoining sites and the surrounding area, which are depicted on **Figure 2**.

Adjacent Site	Owner/Operator	Description of Use
North	Various	Residential and Vacant Industrial Building
East	W & L E Railroad	Railroad (Industrial Buildings beyond)

Copyright © 2024, Partners

South	City of Cleveland	CEI Substation
West	Various	Residential

2.6 Past Uses of Adjoining Sites

According to historical documents reviewed (**Section 5.0**), the adjoining sites were developed prior to 1902 for residential and industrial use. Industrial development of the northeastern adjoining site is apparent by at least 1903, when it was occupied by the Cleveland Macaroni Factory. The site was occupied by the Cleveland Box Company by at least 1938 and continued similar operations until the early 2000s, operating under different entities. CFD records indicate the site was formerly developed with several USTs of various contents and capacities, however there are no records indicating that these USTs were removed from the site. Residential and industrial development of the adjoining sites continued through the 1950s, when the sites were developed as they generally appear today. Specific information from historical documents reviewed is presented below.

Adjacent Site	Owner/Operator	Description of Use
North	Cleveland Macaroni Factory	Industrial factory
East	W & L E Railroad	Railroad tracks
South	Various	Industrial and residential
West	Various	Residential

2.7 Current and Past Uses of Surrounding Area

According to historical documents reviewed (**Section 5.0**), in general, the area surrounding the Subject Property was developed prior to 1902. Residential, commercial, and industrial development of the surrounding area was apparent by at least 1903 in the earliest reviewed Sanborn Fire Insurance map; residential development was apparent to the north, northwest, and west of the Subject Property. Commercial and industrial development of the surrounding area continued to the east and southeast through the 1960s, when much of the area was developed as it appears today.

Copyright © 2024, Partners

3.0 USER PROVIDED INFORMATION

Where the term "User" appears in this report, it refers to the Client. To satisfy the intent of the ASTM E1527-21, inquiries were made with the User for information that will help identify the potential for a REC. Therefore, Partners provided the User with an *ASTM E1527-21 Questionnaire* (User Questionnaire). When completed, the User Questionnaire provides certain information and satisfies Section 6. User's Responsibilities of the ASTM E1527-21 Standard.

The User completed the User Questionnaire to assist in gathering information that may be material to identifying RECs at the Subject Property. The User provided the information in **Sections 3.1** through **3.7** by means of the User Questionnaire. Refer to **Appendix C** for a copy of the completed questionnaire.

3.1 Environmental Cleanup Liens

The User is not aware of environmental cleanup liens that have been filed or recorded for the Subject Property.

3.2 Activity and Land Use Limitations

The User is not aware of any activity or land use limitations in place on the Subject Property or that have been filed or recorded in a registry.

3.3 Specialized Knowledge or Experience

The User does not have any specialized knowledge or experience related to the Subject Property, aside from the findings of a previous Phase I ESA prepared by Partners in 2022, which are incorporated into this current report.

3.4 Relationship of Purchase Price to Fair Market Value

According to the User, the parcels are city-owned Land Bank parcels, and the city policy is to price the land below the fair market value.

3.5 Commonly Known or Reasonably Ascertainable Information

The User is aware of the commonly known past uses of the Subject Property. The User is unaware of any specific chemicals historically or currently present on the Subject Property, spills or chemical releases or any environmental cleanups that have taken place on the Subject Property, aside from any mentions of these items in Partners' prior Phase I ESA.

3.6 Presence of Contamination

The User is not aware of any obvious indicators that point to the presence or likely presence of contamination at the Subject Property.

3.7 Other

The User did not provide any other information of environmental significance.

Copyright © 2024, Partners

4.0 GEOLOGIC AND HYDROGEOLOGIC INFORMATION

Partners reviewed readily available information provided by the Ohio Department of Natural Resources (ODNR) website and other sources about oil and gas wells, abandoned mines, water wells, soil, geology, and groundwater in the general area of the Subject Property. Copies of geologic and hydrogeologic information are included in **Appendix D**. Site-specific information regarding the Subject Property is not available.

4.1 Oil and Gas Well Map

Partners reviewed the Oil and Gas Well Map obtained from the ODNR website. According to the ODNR map, no oil or gas wells are located on the Subject Property or the adjoining sites.

4.2 Abandoned Mines

Partners reviewed the Abandoned Mines of Ohio Map obtained from the ODNR website. According to the ODNR map, no abandoned underground mines are located beneath the Subject Property or surrounding area.

4.3 Water Well Drilling Log Reports

According to the ODNR website, one (1) water well is located on the Subject Property. A total of 25 water wells are located within 2,000 feet of the Subject Property. Refer to **Section 4.5** for additional discussion of these water wells.

4.4 Soils

According to the United States Department of Agriculture's (USDA) Natural Resources Conservation Service Web Soil Survey, the Subject Property is underlain with the following soil types:

Soil Name	Soil Description	Permeability	Meets Hydric Criteria
Urban land(1)	N/A	N/A	No
Urban land(1)-Mahoning Complex, 2 to 6 percent slopes	Silty Clay Loam	Somewhat poorly drained, very low to moderately low	No

(1)Urban Land is characterized as areas in which more than 80 percent of the surface is covered by asphalt, concrete, buildings, and/or other manmade surfaces. Most areas are artificially drained by sewer systems and gutters.

4.5 Geology

According to the ODNR Water Well Logs for the 26 total water wells referenced in **Section 4.3**, subsurface material generally consists of clay from the surface to a depth of 17 feet below ground surface (bgs), gravel ranging from one (1) to four (4) feet bgs, sand ranging from one (1) to 42 feet bgs, silt ranging from four (4) to 16 feet bgs, and sandstone ranging from four (4) to 116 feet bgs. Native soils are underlain by shale to a depth of 125 feet bgs (terminal depth of the deepest water well).

According to the *Surficial Geology of the Cleveland South 30 x 60 Minute Quadrangle* map, subsurface materials at the Subject Property include Wisconsinan-age till, which includes an unsorted mix of clay, silt, sand, gravel, and boulders with an average thickness of 30 feet bgs, Wisconsinan-age sand and gravel with an average thickness of 20 feet bgs, underlain by Devonian-age shale bedrock.

Copyright © 2024, Partners

4.6 Groundwater

According to the ODNR Water Well Logs for the 26 water wells referenced in **Section 4.3**, static water levels ranged from five (5) to 62.6 feet bgs.

No information was available to quantitatively determine shallow groundwater flow direction at the Subject Property. However, shallow groundwater typically follows surface topography. According to the Cleveland South, Ohio Quadrangle, USGS 7.5-Minute Topographic Map, regional topography in the vicinity of the Subject Property slopes down to the northeast. Therefore, the inferred direction of groundwater flow is to the northeast.

Copyright © 2024, Partners

5.0 HISTORICAL RECORDS REVIEW

Past uses of the Subject Property, adjoining sites and the surrounding area were determined by reviewing 1) historical topographic maps dated between 1902 and 2019; 2) historical Sanborn Fire Insurance (Sanborn) maps dated between 1903 and 1971; 3) historical aerial photographs dated between 1938 and 2017; and 4) city directories dating back to 1930. Historical information reviewed was provided by Environmental Data Resources, Inc. (EDR). The historical information is included in **Appendix E**.

5.1 Subject Property History

Based on the review of the aforementioned historical records, the following Subject Property history was obtained.

Years	Description of Subject Property History
Prior to 1902	Unknown
1902 to 1913	The Subject Property appears to be developed with several unlabeled structures.
1913 to 1930	By at least 1913, the Subject Property is developed with The Atlas Steel Foundry Company warehouse, sand house, brick storage, and office in the northeastern portion (7255-7275 Neville Avenue). One (1) 6,000-gallon crude oil underground storage tank (UST) is listed to be located southwest of the warehouse and enclosed in cement. Additionally, three (3) single-family dwellings in the north-central portion (7279-7291 Neville Avenue). The Standard Steel Casting Company Foundry (7299 Neville Avenue, 3297 and 3319 West 73rd Street) is located in the western and south-central portions of the Subject Property, with a large industrial warehouse, pattern shop, storage building, sand house, and coke bin.
1930 to 1950	The Atlas Steel Foundry Company warehouse is now occupied by the Cleveland Cleaner & Paste Company, which reportedly manufactured wallpaper, cleaners, and pastes (7255-7283 Neville Avenue).
1950 to 1991	By at least 1950, the Standard Steel Casting Company warehouse, storage building, sand house, and coke bin are no longer located on the Subject Property (7299 Neville Avenue, 3297 and 3319 West 73rd Street). The pattern shop was converted into an office. The location of the previous warehouse is listed to be utilized as an automotive truck and trailer yard (3311 West 73rd Street). Additionally, the three (3) single-family dwellings in the north-central portion of the Subject Property were razed (7279-7291 Neville Avenue). An addition was added to the northern and western portions of the Cleveland Cleaner & Paste Company Warehouse (7255-7283 Neville Avenue). The previous crude oil UST, office building, sand house, and brick storage house utilized by the Atlas Steel Foundry Company are no longer depicted on the Subject Property.

Copyright © 2024, Partners

1991 to 1994	The remaining structures on the Subject Property were razed and the Subject Property appears to be vacant with remnants of asphalt and gravel.
1994 to 2005	The Subject Property appears to be generally consistent with previous conditions, except for the Subject Property appears to be utilized as a parking lot.
2005 to the Present	Parking activities on the Subject Property are no longer apparent.

5.2 Adjoining Site History

Based on the review of the aforementioned historical records, the following history of the adjoining sites was obtained.

Years	Description of Adjoining Sites' History
Prior to 1902	Unknown
1902 to 1913	Adjoining sites appear to be developed. The C.C.C. and St. L Railroad is present adjoining the Subject Property to the east. Several single-family residences are apparent in the 1903 Sanborn Fire Insurance map to the north along Neville Avenue and West 73rd Street, and the Cleveland Macaroni Factory (7256 Neville Avenue) is present to the northeast of the Subject Property beyond Neville Avenue.
1913 to 1930	By at least 1913, further residential development is apparent to the west of the Subject Property along West 73rd Street, and a Warf House appeared on the Cleveland Macaroni Factory site to the northeast.
1930 to 1938	The adjoining site to the northeast was listed to be vacant by at least 1930 and reoccupied by at least 1938 with the Cleveland Corrugated Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).
1938 to 1941	By at least 1938, the demolition of several residential homes to the north along Neville Avenue was apparent and the location was redeveloped with a large industrial warehouse (7260 and 7270 Neville Avenue).
1941 to 1950	The adjoining sites appear generally consistent with previous conditions, except for the site to the northeast is occupied by the Great Lakes Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).
1950 to 1961	The adjoining site to the south was developed by 1950 with an electrical substation (3321 and 3323 West 73rd Street). The Warf House previously located on the northeastern adjoining site is now labeled as a donut factory.
1961 to 1991	By at least 1961, the site to the northeast is now referred to as the Great Lakes Box Company Division of St. Regis Paper Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).
1991 to the Present	The adjoining sites appear generally consistent with previous conditions, except for an additional structure appeared on the site to the south. Additionally, the site to the northeast is now occupied by Simkins

Copyright © 2024, Partners

	Industries (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).

5.3 Surrounding Area History

Based on the review of the aforementioned historical records, the following history of the surrounding area was obtained.

Years	Description of the Surrounding Area's History
Prior to 1902	Unknown
1902 to 1938	The surrounding area appears to be developed. Residential development of the surrounding area is apparent in the 1903 Sanborn Fire Insurance Map.
1938 to 1952	Commercial and industrial development is apparent in the surrounding area to the east and southeast. Heavy residential development is apparent to the northwest.
1952 to 1971	By at least 1952, the site to the southeast of the adjoining railroad tracks was developed with the Denison Coal and Supply Company, which was no longer apparent in the 1963 Sanborn Fire Insurance map.
1971 to the Present	The site to the southeast beyond the adjoining railroad tracks was redeveloped with an industrial warehouse.

Copyright © 2024, Partners

6.0 RECORDS REVIEW

6.1 Regulatory Database Records

Records reviewed during the Phase I ESA include databases maintained by federal, tribal, and state agencies. Partners contracted EDR to conduct a database search in accordance with ASTM Standard E 1527-21 and the AAI Final Rule. In preparing this Phase I ESA report, Partners relied upon the results of the database search provided by EDR. The conclusions can only be as accurate as the information provided by EDR and Partners cannot be held liable for inaccurate or incomplete information provided by EDR. The purpose of the database search was to obtain for review the records that would help identify RECs in connection with the Subject Property and the surrounding sites.

The following is a summary of our review and evaluation of the facilities identified in the EDR report. All of the statements in **Sections 6.1.1** through **6.1.3** are based on the EDR report. A copy of the EDR report is provided in **Appendix F**.

6.1.1 Subject Property

There were no records identified for the Subject Property in the listed regulatory databases.

6.1.2 Adjoining and Nearby Sites

There were 72 records for other sites identified in the listed regulatory databases, for which five (5) records were listed in the EDR proprietary databases. These sites were reviewed based on their distance to the Subject Property, the inferred direction of groundwater flow to the Subject Property and regulatory status. Based on the information reviewed in **Section 4.0**, the first encountered groundwater at the Subject Property likely flows to the northeast. Therefore, sites located hydraulically upgradient in the inferred direction of groundwater flow are more likely to adversely impact the Subject Property.

Based on this review of all listed records, a total of 44 listings at seven (7) sites were identified to have the potential to adversely impact the Subject Property's environmental condition. These adjoining and/or nearby sites are further described below.

- **Fluorescent Recycling, Inc., 7260 Neville Avenue:** This facility adjoins the Subject Property to the northeast beyond Neville Avenue, which is hydraulically down gradient in the inferred direction of groundwater flow from the Subject Property and is identified in the Resource Conservation and Recovery Act (RCRA) Non-Generator / No Longer Regulated (NONGEN / NLR) database. The site operated as a Specialized Freight (Except Used Goods) Trucking (48423), Solid Waste Collection (562111), and Administration of Air and Water Resource and Solid Waste Management Programs (924110) facility. The facility was historically a Large Quantity Generator (LQG) in March 2018 and reportedly generated mercury (D009). By December 2018, the facility was listed to be a Non-Generator. The facility has received numerous violations since 2016. The violations have related to Treatment, Storage, and Disposal Facilities (TSD) Preparedness and Prevention, TSD General Facility Standards, State Statute or Regulation, Focused Compliance Inspection, and Significant Non-Complier. The violations received do not appear to have been resolved. Additionally, the facility is identified in the Superfund Enterprise Management System (SEMS) database relating to a fire that occurred at the facility in February 2018 (OHN000507862). The facility is listed to not be on the National Priority List (NPL), and it was noted that the facility was a removal only site with no site assessment work needed. However, based on the unresolved violations and SEMS listing, this facility is likely to have potentially adversely impacted the Subject Property.

- **Simkins Industries, 7275 Wentworth Avenue:** This facility adjoins the Subject Property to the northeast beyond Neville Avenue, which is hydraulically down gradient in the inferred direction of groundwater flow from the Subject Property and is identified in the Division of Emergency & Remedial Responses (DERR), Spills, SEMS Archive, Corrective Action Report (CORRACTS), US Brownfields, RCRA NONGEN / NLR, and Facility Index System (FINDS) databases. The facility

Copyright © 2024, Partners

was listed to be a Folding Paperboard Box Manufacturer and held a RCRA EPA Generator ID (OHD097623961), reportedly generating Not Defined Waste (D000), Ignitable Waste (D001), Benzene (D018), Tetrachloroethylene (D039), Nonhalogenated Solvents (F003 and F004), and Solvent Washes and Sludges (K086). Several historic violations were reported, all of which returned to compliance. A Phase I ESA conducted in June 2004 by Partners Environmental, Inc. revealed that early manufacturing activities at the facility may have adversely impacted the facility. It was recommended that a Phase II investigation be conducted. The facility is listed to not be on the NPL and deferred to RCRA. Additionally, a transformer oil spill occurred at the facility in 2007. Based on the historic uses of this facility and its proximity to the Subject Property, this facility is likely to have potentially adversely impacted the Subject Property.

- **Royce Cleaning Systems, 3322 West 73rd Street:** This facility adjoins the Subject Property to the southwest beyond West 73rd Street, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the EDR Historical Cleaners database. The facility reportedly operated as a dry-cleaning plant from at least 1991 through approximately 1992. No further useful information is provided. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **S. Redman Garage Rear, 7406 Denison Avenue:** This facility is located approximately 315 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the EDR Historical Auto Station database. The facility reportedly operated as an automotive repair station in 1951. No further useful information is provided. Based on the distance from the Subject Property, location across multiple major roadways, and redeveloped status, this facility is not likely to have adversely impacted the Subject Property.

- **Denison Auto Body and Frame, 7408 Denison Avenue:** This facility is located approximately 425 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the RCRA NONGEN / NLR database. The facility was reportedly a Small Quantity Generator (SQG) (OH986966570) in at least 1988, and reportedly generated Not Defined Waste (D000), Ignitable Waste (D001), and Nonhalogenated Solvents (F003 and F005). No violations were reported. As of at least July 2020, the facility was listed to no longer be a generator. Additionally, the facility was identified in the FINDS and Enforcement Compliance History Online (ECHO) databases with no further useful information provided. Based on the lack of violations identified and distance from the Subject Property, this facility is not likely to have adversely impacted the Subject Property.

- **Angelo's Service, 7401 Denison Avenue:** This facility is located approximately 460 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the EDR Historical Auto Station database. The facility reportedly operated as a gasoline service station from at least 1986 through approximately 1989. No further useful information is provided. Based on the distance from the Subject Property, location across multiple major roadways, and redeveloped status this facility is not likely to have adversely impacted the Subject Property.

- **Sunoco Service Station / Former Sunoco 0001-7403 / G&S Sunoco Service Station, 7403 Denison Avenue:** This facility is located approximately 575 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property, and is identified in the EDR Historical Auto Station, Underground Storage Tank (UST), and Leaking UST (LUST) databases. The facility reportedly operated as a gasoline station from at least 1935 until approximately 1974. The location was historically developed with five (5) USTs; three (3) 6,000-gallon gasoline USTs, which were removed on October 25, 1990, and one (1) 8,000 gallon and one (1) 1,000-gallon UST, both with unknown contents, were removed on December 27, 1990. On December 19, 1990, a LUST incident (#18010145-N00001) was reported. The LUST incident received No Further Action status. An NFA status is defined as a suspected

Copyright © 2024, Partners

or confirmed release where initial and/or long-term corrective actions have been conducted and the regulating authority has determined that further corrective actions are not necessary for the incident. The facility is also identified in the RCRA NONGEN / NLR, database and reportedly generated Not Defined Waste (D000) and Ignitable Waste (D001). No violations were reported. Additionally, the facility is identified in the FINDS and ECHO databases with no further useful information provided. Based on the NFA status, lack of violations reported, and distance from the Subject Property, this facility is not likely to have adversely impacted the Subject Property.

Partners completed a detailed review of 28 additional regulatory database listings and determined that these listings are not likely to adversely impact the Subject Property due to their locations either cross-gradient and downgradient in the inferred direction of groundwater flow from the Subject Property and/or resolved regulatory issues.

6.1.3 Orphan Sites

An orphan (non-geocoded) site is a facility, or a location listed in one (1) or more of the federal, tribal, state, or local databases that have not been mapped due to an inadequate address. A total of four (4) orphan sites are identified in the database report. Partners verified the addresses of the orphan sites and determined that the facilities are located outside the ASTM standard search distances and are unlikely to have adversely impacted the Subject Property.

6.2 Previous Reports

Partners completed the following report for the Subject Property, the text of which is provided in **Appendix G**:

- *Partners Draft Phase I Environmental Site Assessment of 3 Parcels of Land, Wentworth, and Neville Avenues and West 73rd Street, Cleveland Ohio 44102,* dated June 3, 2004.

Four (4) RECs were identified in the previous report relating to the historical usage of the subject property, the northeastern adjoining site, and the southern adjoining electrical substation site. Historic operations by the northeastern adjoining Great Lakes Box Company Division of St. Regis Paper Company (7256-7270 Neville Avenue) and Simkins Industries (7275 Wentworth Avenue) indicated that hazardous substances were stored and used in daily operations of the facility, including tetrachloroethylene (TCE), petroleum products, inks, and film developing chemicals. Several drums and containers remained at the site, and the remaining industrial warehouse was noted to contain suspected Asbestos Containing Materials (ACM), and suspected lead-based paint (LBP). The electrical substation was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release but were labeled as a REC due to the close proximity to the subject property. A Limited Phase II investigation was recommended for the subject property and northeastern adjoining site due to the historical operations.

Partners also previously completed a Phase I ESA for the Subject Property, the findings of which have been updated and incorporated into this current OHFA and HUD compliant Phase I ESA report.

Copyright © 2024, Partners

7.0 SUBJECT PROPERTY AND SURROUNDING SITE RECONNAISSANCE

Mr. Zachary Graham of Partners conducted a site visit on January 5, 2024, to observe and document existing conditions at the Subject Property in accordance with the requirements of ASTM E1527-21 and the AAI Final Rule. The weather conditions at the time of the site visit included cloudy skies and temperatures in the 30s (degrees Fahrenheit). Partners was unaccompanied during the site visit.

Observations made during the site reconnaissance were directed at the use, treatment, storage, disposal or generation of hazardous substances, petroleum products with the potential to adversely impact the Subject Property. An inspection was made for the following: aboveground storage tanks (ASTs); USTs; drums and other containers; electrical or hydraulic equipment likely to contain polychlorinated biphenyls (PCBs); pits, ponds, or lagoons; stained soils or pavement; stressed vegetation; depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors. For any buildings present, observations were made regarding the means of heating and cooling, including the following: fuel sources; stains or corrosion on walls, floors, and ceilings; and the presence of floor drains.

7.1 Site Reconnaissance

Report Section	Section Description	Observed	
		Yes	No
7.1.1	Hazardous Substances and Petroleum Products		No
7.1.2	Underground Storage Tanks		No
7.1.3	Aboveground Storage Tanks		No
7.1.4	Storage Drums and Containers		No
7.1.5	Stained Surfaces, Corrosion, Pooled Liquids and Stressed Vegetation		No
7.1.6	Strong, Pungent or Noxious Odors		No
7.1.7	Polychlorinated Biphenyl	**Transformer** – See Section 7.1.8	No
7.1.8	Solid Waste Disposal, Fill Material, Mounds or Depressions	**Yes** – See Section 7.1.8	
7.1.9	Pits, Ponds, or Lagoons		No
7.1.10	Wastewater Discharge or Treatment, Floor Drains, Sump Pumps, Septic Systems, Wells		No

7.1.1 Hazardous Substances and Petroleum Products

Partners did not observe apparent hazardous substances or petroleum products.

7.1.2 Underground Storage Tanks

Apparent locations of current and/or former USTs were not identified.

7.1.3 Aboveground Storage Tanks

Apparent locations of current and/or former ASTs were not identified.

Copyright © 2024, Partners

7.1.4 Storage Drums and Containers

Partners did not observe visual evidence of storage drums or containers.

7.1.5 Stained Surfaces, Corrosion, Pooled Liquids and Stressed Vegetation

Apparent stained surfaces, corrosion, pooled liquids, or stressed vegetation were not identified.

7.1.6 Strong, Pungent or Noxious Odors

Partners did not identify any apparent unusual odors emanating from the Subject Property.

7.1.7 Polychlorinated Biphenyl

Partners observed the following potential PCB-containing equipment or materials.

- Electrical service is provided to the Subject Property by means of overhead lines located within the public rights-of-way. One (1) pole-mounted electrical transformer was observed along the northern Subject Property boundary. The electrical transformer was observed to be in good condition with no evidence of a release (e.g., leakage and staining). The electrical transformer was not labeled as to the PCB content. Based on the age of the transformer, the dielectric fluids in the transformer may contain PCBs. First Energy owns and maintains this transformer, and if an oil discharge or spill were to occur, First Energy should be contacted.

7.1.8 Solid Waste Disposal, Fill Material, Mounds or Depressions

Partners did not identify apparent mounds or depressions. The following solid waste disposal activities and fill material were observed:

- According to historical documents reviewed (**Section 5.0**), the majority of the Subject Property once contained residences and industrial warehouse structures. It is possible that during the demolition of the former structures, fill material of unknown composition was used to grade the individual parcels.

- Several piles of miscellaneous trash were present on the north Subject Property parcel near Neville Avenue. The origins of the materials are unknown.

These sources of refuse and fill material are not likely to adversely impact the subject property.

7.1.9 Pits, Ponds, or Lagoons

Partners did not identify apparent pits, ponds, or lagoons.

7.1.10 Wastewater Discharge or Treatment, Floor Drains, Sump Pumps, Septic Systems, Wells

Partners did not observe apparent wastewater discharge or treatment, floor drains, sump pumps, septic systems, or wells.

7.2 Adjoining Sites and Surrounding Area

Observations made of the adjoining sites and surrounding area during the site visit were directed at the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products on adjoining sites or surrounding area with the potential to adversely impact the Subject Property. Observations of the adjoining sites and surrounding area were made from the Subject Property or from public rights-of-way. Observations were made for the following: ASTs; USTs; drums and containers; electrical or hydraulic equipment likely to contain PCBs; pits, ponds, or lagoons; stained soils or pavement;

Copyright © 2024, Partners

stressed vegetation and depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors.

Partners did not observe visual evidence of environmental concerns at the adjoining or surrounding sites, except the following:

- An electrical substation to the south of the Subject Property was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers were observed to be in good condition with no evidence of a release (e.g., leakage and staining). The electrical transformer was not labeled as to the PCB content. Based on the age of the transformer, the dielectric fluids in the transformer may contain PCBs. First Energy owns and maintains these transformers, and if an oil discharge or spill were to occur, First Energy should be contacted. However, given the large scale, proximity to the Subject Property, and location upgradient of the Subject Property, hazardous substances that may have been used at this adjoining property have the potential to adversely impact the Subject Property.

8.0 OHFA AND HUD CONSIDERATIONS

In addition to the observations made in accordance with ASTM E 1527-13 and AAI Final Rule, Partners conducted a preliminary review of environmental conditions, which, according to the OHFA, may pose a threat to the health and safety of proposed residents of the sites. In addition to ASTM regulations, this report also complies with the OHFA, HUD, and City of Cleveland Department of Community Development Environmental Review non-scope items. Partners' evaluation of OHFA and HUD considerations is limited to information that was obtained from sources typically utilized in the completion of a Phase I ESA under the ASTM E 1527-21 standard, and no physical testing or laboratory analysis was completed. Supporting documentation for the OHFA and HUD considerations, including associated maps, and the OHFA letter of reliance is included in **Appendix H**.

8.1 Local Regulatory Review

8.1.1 Fire Department

During the initial Phase I ESA, Partners conducted a file review at the City of Cleveland Fire Department (CFD) on November 7, 2022. According to files reviewed from the CFD, the Subject Property held several permits for various capacities of kerosene and gasoline USTs associated with the Cleveland Cleaner & Paste Company. Records from 1947 indicate that a 1,000-gallon fuel oil tank was approved to be installed in the "center of the triangle of lot." In 1950, the Subject Property obtained a permit for a 500-gallon gasoline UST and 5,000-gallon kerosene UST. By at least 1969, another permit was filed for a 500-gallon gasoline UST and a 10,000-gallon kerosene UST. No records reviewed indicated that the previous USTs were removed from the Subject Property. Additionally, a CFD record from 1966 indicates that dry cleaning detergent solvents were stored and used in the manufacturing process at the Subject Property. The Cleveland Cleaner & Paste Company vacated the Subject Property in 1984.

The CFD also provided files pertaining to the northeastern adjoining site. According to the CFD files reviewed, the Great Lakes Box Company site utilized several USTs or various sizes, and contents ranging from gasoline, kerosene, and fuel oil. There were no records available that indicated whether or not these tanks were removed from the site.

During the completion of the current Phase I ESA, on December 29, 2023, Partners contacted the CFD to obtain any updated information pertaining to the Subject Property and surrounding sites. The CFD has not responded to Partners' request for additional information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

Copyright © 2024, Partners

8.1.2 Health Department

On December 29, 2023, Partners contacted the Cleveland Public Health Department (CPHD) to obtain information pertaining to the Subject Property and surrounding sites. The CPHD has not responded to Partners' request for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.3 Building Department

On December 29, 2023, Partners contacted the Cleveland Building and Housing Department (CBHD) to obtain information pertaining to the Subject Property and surrounding sites. The CBHD has not responded to Partners' request for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.4 Police Department

During the initial Phase I ESA, Partners conducted a file review at the City of Cleveland Police Department (CCPD) on November 7, 2022. According to files reviewed from the CCPD, the Subject Property had three (3) incident reports found two (2) of which were scattershot reports and one (1) which was a stolen car report. No other useful information was given.

During the completion of the current Phase I ESA, on December 29, 2023, Partners contacted the CCPD to obtain any updated information pertaining to the Subject Property and surrounding sites. The CCPD has not responded to Partners' request for additional information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.5 Public School District

On December 29, 2023, Partners contacted the Cleveland Public School District (CPSD) to obtain information pertaining to the Subject Property and surrounding sites. The CPSD has not responded to Partners' request for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.6 Bureau of Uinderground Storage Tank Regulations

Partners contacted the Bureau of Underground Storage Tank Regulations (BUSTR) to obtain information pertaining to the Subject Property and surrounding sites. BUSTR replied that they have no information related to the Subject Property or western adjoining facility. If any further records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.2 Observations for Structures Undergoing Demolition and/or Rehabilitation

8.2.1 Asbestos Containing Materials

The Subject Property is vacant with no structures or improvements; therefore, a pre-demolition/renovation asbestos containing materials (ACM) inspection to identify and quantify all ACM that might be disturbed during any renovation or demolition work is not applicable.

Copyright © 2024, Partners

8.2.2 Lead Based Paint

The Subject Property is vacant with no structures or improvements; therefore, a pre-demolition/renovation lead-based paint inspection to identify and quantify all lead-based paint materials that might be disturbed during any renovation or demolition work is not applicable.

8.2.3 Histoplasmosis

The presence of birds or bats was not apparent during the reconnaissance conducted on January 5, 2024. The Subject Property consists of wooded land; however, no birds, bats, or evidence of these animals (nests, etc.) were observed.

8.2.4 Lead in Drinking Water

The Subject Property is not developed with water supply infrastructure. Drinking water in the surrounding area is supplied by the City of Cleveland, which draws from four (4) intake sources offshore in Lake Erie's Central Basin. Raw water is treated and tested at an on-site Ohio EPA certified lab before distribution to public consumers. According to the City of Cleveland Water Department website, the drinking water does not have high levels of naturally occurring lead and the water is treated to prevent corroded lead from piping and soldering from entering the water flow. The City of Cleveland follows all EPA mandates to treat and test water to prevent lead from entering public drinking water systems.

Ohio Administrative Code (OAC) 4101:3-6-01, outlines the construction material requirements for water service pipes, water distribution pipes and associated manufactured pipe nipples, pipe fittings, and valves. According to OAC 4101:3-6-01, the lead content of water supply pipe and fittings in pipe, pipe fittings, joints, valves, faucets, and fixture fittings utilized to supply water for drinking or cooking purposes is required to have an average lead content of 0.25 percent lead or less. Any new construction on the Subject Property should be done in accordance with these regulations. Given that the Subject Property is currently vacant, undeveloped land assessment of lead in drinking water is not required.

8.2.5 Radon

The Subject Property is vacant with no structures or improvements. According to the Ohio EPA Map of Radon Zones, the Subject Property is located in Zone 2. In this zone, indoor radon can range between two (2) to four (4) picocuries per liter of air (pCi/L). The EPA recommends action if the radon level is four (4) pCi/L (picocuries per liter) or more. In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system. A copy of the map is included in **Appendix H.**

8.2.6 Mold

The Subject Property is currently vacant land with no structures; therefore, a mold assessment is not applicable.

8.2.7 Historic Preservation

According to the Ohio Historic Preservation Office (OHPO) National Register website, the Subject Property is not a registered historical site. No known historic sites adjoin the Subject Property. The associated map is included in **Appendix H.**

8.3 Geologic, Hydrogeologic, and Natural Observations

8.3.1 Floodplain

Partners reviewed the National Flood Insurance Program, Flood Insurance Rate Map, for the Subject Property and surrounding area. The Subject Property is mapped as Zone X, which is defined as an area located outside of the 0.2% annual chance flood. A copy of the Flood Insurance Rate Map is included in **Appendix H**.

Copyright © 2024, Partners

8.3.2 Wetlands

Partners reviewed the National Wetlands Inventory (NWI) map obtained from the U.S. Fish and Wildlife Service (USFWS) Wetlands website. According to the NWI map, no wetlands are identified on the Subject Property. A copy of the NWI Map is included in **Appendix H**.

According to the USDA's Natural Resources Conservation Service Web Soil Survey, the Subject Property is underlain with soil classified by the USDA as Urban land(1)-Mahoning Complex silty clay loam, two (2) to six (6) percent slopes (CTA), which is listed as a non-hydric soil.

8.3.3 Wild and Scenic Rivers

According to the National Wild and Scenic Rivers System website, no applicable rivers are located on or near the Subject Property. The associated map is included in **Appendix H.**

8.3.4 Coastal Zone Management

According to the ODNR Office of Coastal Management website, the Subject Property is not located within a designated coastal management area. The Ohio Coastal Atlas Map is included in **Appendix H.**

8.3.5 Sole Source Aquifer

According to the USEPA's Sole Source Aquifer website for Region 5, the Subject Property is not located in a sole source aquifer area. The Sole Source Aquifer Map is included in **Appendix H.**

8.3.6 Soil Suitability

Soils on the property consist of Urban land complex soils, which are nearly level silty-clay loams that are poorly drained. This soil partially meets hydric criteria, and no wetlands were mapped via USFWS or observed during reconnaissance. Storm water runoff is managed by a municipal system. Further geologic information is included in **Section 4.0**.

8.3.7 Farmland Protection and Agricultural Use

Due to the known former commercial/industrial uses of the Subject Property, its location within an urban setting, and the urban land soil types underlying the Subject Property, farmland protection considerations are not applicable. Prior to 1902, the Subject Property may have been undeveloped fields or agricultural land; however, chemical pesticides were not a concern during this time period and have note likely adversely impacted the Subject Property.

8.3.8 Endangered Species

According to the USFWS Critical Habitat Mapper, the Subject Property is not located in or within the vicinity of any registered critical habitats. A copy of the Critical Habitats map is included in **Appendix H**.

According to the USFWS Endangered Species website, two (2) endangered species are listed in Cuyahoga County including the Indiana Bat and Piping Plover. No evidence of habitats for these species was noted during Subject Property reconnaissance. A copy of the species informational pages is also included in **Appendix H**.

8.4 Manmade Hazards

8.4.1 Aboveground Storage Tanks

Partners did not observe visual evidence of current or former ASTs on the Subject Property or surrounding sites during reconnaissance.

Copyright © 2024, Partners

8.4.2 Underground Storage Tanks

Partners did not observe visual evidence of current or former USTs on the Subject Property or surrounding sites during reconnaissance. However, at least two (2) former USTs were known to be associated with the former Atlas Steel Foundry Company that operated on the eastern portion of the Subject Property. The USTs included one (1) 1,000-gallon fuel oil UST and one (1) 6,000-gallon crude oil UST.

8.4.3 Electromagnetic Fields

Overhead electric distribution lines are situated along various public rights-of-way provide service to the Subject Property and surrounding areas. An electrical substation was observed on the southern adjoining site, addressed at 3321-3323 West 73rd Street. More information on this site is provided in **Section 7.2**. No other high voltage electrical transmission lines were observed in the vicinity of the Subject Property during reconnaissance.

8.4.4 High Pressure Buried Gas Lines or Liquid Petroleum Transportation Pipelines

According to the Cleveland South, Ohio Quadrangle, USGS 7.5-Minute Topographic Map, no pipelines are depicted on or in the vicinity of the Subject Property. In addition, no evidence of buried gas pipelines or liquid petroleum pipelines was observed on or in the vicinity of the Subject Property during reconnaissance.

Additionally, according to the United States Department of Transportation (DOT) National Pipeline Mapping System, no hazardous liquid pipelines are located within 10 miles of the Subject Property. A copy of the US DOT National Pipeline Map is included in **Appendix H**.

No oil or gas wells were identified on the Subject Property or adjoining sites in reviewed ODNR information.

8.4.5 Traffic Hazard Consideration

West 73rd Street runs along the west Subject Property boundary; Neville Avenue runs along the north Subject Property boundary. Cloggsville Rail Line adjoins the Subject Property to the east. Interstate 90 is located approximately 2,200 feet north of the Subject Property. The western, northern, and southern surrounding neighborhood is mainly residential, with a vacant commercial building to the northeast. Railroad tracks with commercial development beyond are present to the east.

Partners observed little road or rail traffic during the Subject Property reconnaissance, and it is not likely that heavy traffic and associated hazards are a condition of concern to the Subject Property.

8.4.6 Noise Source

Surrounding road traffic is described above and is not anticipated to be a large generator of noise in the vicinity of the Subject Property.

One (1) active railroad adjoins the Subject Property to the east. According to NEPA sources, this rail line may contribute up to an average of 45.5 to 60.9 relative weighted decibels (dBA) within 24-hours. According to the HUD Exchange's Day/Night Noise Level (DNL) reference material, a day-night average of less than 65 decibels for exterior and 45 decibels for interior noise is acceptable. The Subject Property falls within this range.

8.4.7 Air Quality

The Subject Property's county or air quality management district (Cuyahoga County) is in non-attainment status for the following: Ozone. This project does not exceed de minimis emissions levels or the screening level established by the state or air quality management district for the pollutant(s) identified above. The project is in compliance with the Clean Air Act, and construction is not anticipated to change this status in a long-term capacity.

Copyright © 2024, Partners

8.4.8 Emerging Contaminants

Emerging contaminants, such as per- and polyfluoroalkyl substances (PFAS), were considered during the Phase I ESA process. During reconnaissance PFAS containing chemicals were not noted to be stored on the Subject Property; however, given the commercial/industrial historical uses and known solvents previously used and stored on the Subject Property, chlorinated solvents and PFAS-containing materials may previously have been present. No known spills were documented.

8.4.9 Environmental Justice

According to information included in the Environmental Justice Assessment for the Subject Property, obtained from the United States EPA EJView website, the Property is located in an area in which 67 percent or greater of the residents live below the poverty line, the per capita income is $18,696, and 62 percent of the population is a minority. It is Partners' understanding that the intention for the Subject Property is to be developed as veteran supportive housing, which these statistics support that the neighborhood would appear to benefit in a net positive manner. The EJSCREEN Summary Report is saved in **Appendix G**.

8.5 Vapor

Partners prepared a Tier 1 Vapor Encroachment Screening (VES) in general accordance with *ASTM E 2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (VES Standard). Under the ASTM VES Standard, information obtained during the Phase I ESA is used to evaluate if the Subject Property is subject to a Vapor Encroachment Condition (VEC). A VEC is defined by ASTM E 2600-10 as follows:

> *The presence or likely presence of chemicals of concern (COC) vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property as identified by Tier 1 or Tier 2 procedures*.

The purpose of a VES is to identify, to the extent feasible pursuant to the procedures presented in ASTM VES Standard, if a VEC exists at the Subject Property.

The first step of the VES is to identify known or suspected contaminated sites within an established search distance or Area of Concern (AOC). The ASTM VES Standard establishes a search radius of one third (1/3) of a mile for non-petroleum hydrocarbon sources and one tenth (1/10) of a mile for petroleum hydrocarbon sources. If a known or suspected contaminated site is located within the AOC, the site is evaluated to determine if the site is located, up-, cross-, or down-gradient in the inferred direction of groundwater flow from the Subject Property or if the site is separated from the Subject Property by a hydraulic or physical barrier (i.e., stream, perched aquifer, utility corridor, etc.). The conclusion from a Tier 1 VES can be any of the following:

1. A VEC exists;
2. A VEC likely exists;
3. A VEC cannot be ruled out; or
4. A VEC can be ruled out because a VEC does not or is not likely to exist.

Partners reviewed historical documents (**Section 5.0**) and regulatory database records (**Section 6.0**) to identify sites located within 1/10 of a mile from the Subject Property for petroleum sources (i.e., service stations, UST, or LUST sites) and sites within 1/3 of a mile of the Subject Property for non-petroleum hydrocarbon sources. Facilities that were determined to be far enough away or hydraulically cross gradient to down gradient in the inferred direction of groundwater flow from the Subject Property and would not be expected to have an impact on the subject property are not discussed in further detail. The sites that may represent a VEC to the Subject Property are discussed in further detail below.

Subject Property:

Copyright © 2024, Partners

- **Former Atlas Steel Foundry Company / Former Cleveland Cleaner & Paste Company, 7255-7283 Neville Avenue:** The eastern portion of the Subject Property was utilized as a foundry from approximately 1913 until 1930, with one (1) 6,000-gallon crude oil UST. Following the foundry, a paste and commercial-grade cleaning product manufacturer operated until the mid-1980s. Solvents were stored and used in their operations, and multiple kerosene and gasoline UST systems were associated with this occupant as well. No record of UST removal was available. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.

- **Former Standard Casting Company Foundry, 7299 Neville Avenue, 3297 and 3319 West 73rd Street:** The western portion of the Subject Property was utilized as a foundry from approximately 1913 until 1950. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.

Adjoining and Surrounding Sites:

- **Former Fluorescent Recycling, Inc. / Former Simkins Industries / Former Great Lakes Box Company, 7260 Neville Avenue, and 7275 Wentworth Avenue (Adjoining Site):** The northeastern adjoining site has been developed and utilized as various manufacturing and industrial facilities, generally from 1913 through the 2010s. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.

- **Royce Cleaning Systems, 3322 West 73rd Street:** This site is identified as a dry cleaner in 1991 and 1992 and was located on the southwestern adjoining site beyond West 73rd Street. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.

In accordance with the ASTM VES Standard, a finding that a VEC exists or likely exists at the Property or that a VEC cannot be ruled out for the Property is not a determination that a REC is identified at the Subject Property. Refer to **Section 10.0 and 11.0** for further discussion of the findings and conclusions of this Phase I ESA report.

Copyright © 2024, Partners

9.0 INTERVIEWS

Interviews were conducted with the following individuals in order to obtain pertinent information regarding the Subject Property including the current or historical presence of the following: ASTs; USTs; drums and containers; electrical or hydraulic equipment likely to contain PCBs; pits, ponds, or lagoons; stained soils or pavement; stressed vegetation and depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors.

9.1 Owner/Operator/Occupants

Partners called and spoke with a representative of the City of Cleveland Land Bank, the current owner of the Subject Property, on November 9, 2022, and January 4, 2024. The representatives did not have any historical information on past uses of the Subject Property. They were unaware of details related to hazardous material, underground tanks, or other potential environmental concerns related to the Subject Property and did not have copies of any previous reports. According to the auditor's files reviewed in **Section 1.0**, the city land bank acquired PPN 006-25-027 on May 13, 1992, and PPN 006-25-028 on December 6, 2010.

Copyright © 2024, Partners

10.0 FINDINGS

10.1 Subject Property

- The Subject Property was developed by at least 1902. Industrial development of the Subject Property was apparent by at least 1913, with the Atlas Steel Foundry Company in the eastern portion and the Standard Steel Casting Company Foundry was located in the western and southern portions of the Subject Property. One (1) 6,000-gallon crude oil UST was listed to be southwest of the warehouse on the Atlas Steel Foundry site. By 1930, the Atlas Steel Foundry Company warehouse was occupied by the Cleveland Cleaner & Paste Company. No evidence was apparent of the UST being removed. By 1950, the buildings associated with the Standard Steel Casting Company were razed, and the location of the former buildings was utilized as an auto truck and trailer yard. The Cleveland Cleaner & Paste Company occupied the Subject Property until the 1980s.

- According to historical documents reviewed (**Section 5.0**), the majority of the Subject Property once contained residences and industrial warehouse structures. It is possible that during the demolition of the former structures, fill material was used to grade the individual parcels.

- According to the ODNR website, one (1) water well is located on the Subject Property, which was installed in 1978. Partners did not observe the water well during the site visit.

- There were no records identified for the Subject Property in the listed regulatory databases.

- According to files reviewed from the CFD, the Subject Property held several permits for various capacities of kerosene and gasoline USTs. Records from 1947 indicate that a 1,000-gallon fuel oil tank was approved to be installed in the “center of the triangle of lot.” In 1950, the Subject Property obtained a permit for a 500-gallon gasoline UST and 5,000-gallon kerosene UST. By at least 1969, another permit was filed for a 500-gallon gasoline UST and a 10,000-gallon kerosene UST. It is not clear whether or not the previous USTs were removed from the Subject Property.

- The Subject Property has remained vacant since at least the 1980s, and the Cleveland Land Bank acquired the eastern parcel in 1992, and the western parcel in 2010.

- One (1) pole-mounted electrical transformer was observed along the northern Subject Property boundary. The electrical transformer was observed to be in good condition with no evidence of a release (e.g., leakage and staining). The electrical transformer was not labeled as to the PCB content. Based on the age of the transformer, the dielectric fluids in the transformer may contain PCBs.

- Several piles of miscellaneous trash were present on the northern Subject Property parcel. The origins of the materials are unknown.

10.2 Adjoining/Surrounding Sites

- The adjoining sites and surrounding area were developed by at least 1902; the C.C.C. and St. L Railroad is present adjoining the Subject Property to the east. By 1903, the Cleveland Macaroni Factory was apparent on the northeastern adjoining site. The site was vacated by 1930 and reoccupied by at least 1938 by the Cleveland Corrugated Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue), which changed entities to the Great Lakes Box Company Division of St. Regis Paper Company by 1961. The southern adjoining site was developed by at least 1950 with an electrical substation. The northeastern adjoining site was purchased by Simkins Industries in 1991 and Fluorescent Recycling, Inc. occupied the site by at least 2016. Observations made during the site visit indicated the northeastern adjoining site is currently vacant.

Copyright © 2024, Partners

- According to CFD records reviewed for the northeastern adjoining industrial warehouse site, the site utilized several USTs of various sizes and contents ranging from gasoline, kerosene, and fuel oil. There were no records available that indicated whether or not these tanks were removed from the site.

- Simkins Industries, a former occupant of the northeastern adjoining site, was identified to be a former RCRA Generator for the generation of various hazardous substances. Several violations were reported and returned to compliance. A Phase I ESA previously conducted on the site determined that the storage and use of these hazardous substances (TCE, petroleum products, inks, and film developing chemicals) likely adversely impacted the site.

- Fluorescent Recycling, Inc., a former (and most recent) occupant of the northeastern adjoining site, was identified to be a RCRA Generator for the generation of mercury waste. The facility occupied the site by at least 2016 and received numerous compliance violations, which do not appear to have been resolved. A fire occurred at the site in 2018, resulting in a Superfund listing for the site, however, the site is listed to not require site assessment work.

- The southwestern adjoining site beyond West 73rd Street was historically developed as a dry cleaner in at least 1991 and 1992. No further useful information is provided regarding this site.

- The southern electrical substation was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release; however, given the proximity to the Subject Property, potential hazardous substances used may have adversely impacted the Subject Property.

- Other than the above-described electrical substation, Partners did not observe visual evidence of environmental concerns at the adjoining or surrounding sites during the site visit that would be likely to adversely impact the Subject Property.

Copyright © 2024, Partners

11.0 OPINIONS AND CONCLUSIONS

Partners was contracted by CHN Housing Partners (User/Client) to conduct a Phase I ESA at vacant land located at West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio (Subject Property). The Subject Property is further defined as PPNs 006-25-027 and 006-25-028.

Partners conducted the Phase I ESA in general accordance with the USEPA, *Standard and Practices for AAI, Final Rule* (40 CFR Part 312) and *ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-21).* The report also complies with the Ohio Housing Finance Agency (OHFA), United States (U.S.) Department of Housing and Urban Development (HUD), and City of Cleveland Department of Community Development Environmental Review non-scope items. Exceptions to, or deletions from these practices are described in **Section 1.4** of this report. The purpose of conducting a Phase I ESA in accordance with the ASTM Practice E1527-21 and the AAI Final Rule is to permit the User to satisfy one of the requirements to qualify for the Innocent Landowner, Contiguous Property Owner, or Bona Fide Prospective Purchaser limitations on CERCLA liability.

Partners has considered the migration of hazardous substances or petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property.

11.1 Significant Data Gaps

As discussed in **Section 1.4**, there were no significant data gaps identified during the performance of this Phase I ESA.

11.2 Recognized Environmental Conditions

A REC is defined by ASTM E1527-21 as follows:

1. "the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* to the *environment*;
2. the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* or likely *release* to the *environment*; or
3. the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* under conditions that pose a *material threat* of a future *release* to the *environment*."

The ASTM E1527-21 standard indicates (Appendix X4) that Historical RECs (HRECs), Controlled RECs (CRECs), and de minimis conditions are not RECs.

Partners has considered the migration of hazardous substances or petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property.

This assessment has revealed no evidence of RECs in connection with the Subject Property, with the exception of the following.

- **REC-1: Historical Operations, 7255-7283 Neville Avenue (Subject Property):** The eastern portion of the Subject Property addressed at 7255-7275 Neville Avenue was developed and utilized as a foundry (Atlas Steel Foundry Company) from approximately 1913 until 1930. At least one (1) 6,000-gallon crude oil UST was associated with the foundry operations. Following the foundry, a paste and commercial-grade cleaning product manufacturer (Cleveland Cleaner & Paste Company) operated at 7255-7283 Neville Avenue through the 1980s. Fire department records show that high volumes of solvents were stored and used in their operations, and multiple kerosene and gasoline UST systems were in operation during this time as well. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **REC-2: Former Foundry, 7299 Neville Avenue, 3297 and 3319 West 73rd Street (Subject Property):** The western portion of the Subject Property was also developed and utilized as a foundry (Standard Steel Casting Company Foundry) from approximately 1913 until 1950. Based

Copyright © 2024, Partners

on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **REC-3: Historical Operations, 7260 Neville Avenue, and 7275 Wentworth Avenue (Adjoining Site):** The northeastern adjoining site has been developed and utilized as various manufacturing and industrial facilities, generally from 1913 through the 2010s. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **REC-4: Historical Operations, 3322 West 73rd Street (Adjoining Site):** The adjoining site to the southwest was historically utilized as a dry cleaner. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **REC-5: Electrical Substation, 3321-3323 West 73rd Street (Adjoining Property):** The southern adjoining electrical substation, present since at least 1951, was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release but are considered as a REC due to the close proximity to the Subject Property. Based on Partners' experience, hazardous substances may have been used at this adjoining property, which have the potential to adversely impact the Subject Property.

11.3 Controlled Recognized Environmental Conditions

A CREC is defined by ASTM E1527-21 as follows:

> *A recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

This assessment has revealed no evidence of CRECs in connection with the Subject Property.

11.4 Historical Recognized Environmental Conditions

An HREC is defined by ASTM E1527-21 as follows:

> *A previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

This assessment has revealed no evidence of HRECs in connection with the Subject Property.

11.5 De Minimis Conditions

De minimis condition is defined by ASTM E1527-21 as follows:

> *A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.*

Copyright © 2024, Partners

This assessment has revealed no evidence of de minimis conditions in connection with the Subject Property.

11.6 Other Conditions of Concern

While not representing RECs, CRECs, HRECs, or *de minimis* conditions, Other Conditions of Concern (noteworthy items), including business environmental risk, may be of interest or significance to the Client or User.

Business Environmental Risk is defined by ASTM 1527-21 as follows:

> *A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope consideration, some of which are identified in Section 13 (of the Standard).*

This assessment has revealed no evidence of business environmental risk or other noteworthy items in connection with the Subject Property. All OHFA or HUD related items of potential concern are related to and included within the identified RECs.

12.0 RECOMMENDATIONS

Based on the findings and conclusions of this Phase I ESA, a Limited Phase II Investigation is recommended. Additionally, In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system.

Geo-Sci Project No. 1124389.11

Dear Ms. Holmes:

As per our proposal, Geo-Sci has completed the subsurface exploration for the above-noted project. The results of the exploration including geotechnical recommendations for the design of the proposed structure are included herewith.

Upon completion of the plans, it is recommended that Geo-Sci review the final design to verify that the geotechnical design recommendations have been properly implemented into the design of the proposed building. **Furthermore, it is recommended that the geotechnical engineer and/or representative be onsite during foundation and earthwork operations to observe field conditions at the time of construction.**

We appreciate the opportunity to work with you on this project. Should you have any questions or if we may be of further assistance, please contact us at (440) 234-8985.

Sincerely,

Geo-Sci, Inc.

Dorian Taran
Geotechnical Engineer

APPENDICES

Appendix A: Boring Location Plan

Appendix B: Boring Logs

Appendix C: Grain Size Distribution

Appendix D: Rammed Aggregate Pier (RAP) System

1. Project Description

Based upon the information provided, the project consists of a veterans permanent supporting housing building with associated parking and drive areas located at 3311 West 73rd Street in Cleveland, Cuyahoga County, Ohio, as depicted in the Figure 1, aerial photograph below:

Figure 1. Aerial Photograph

Based upon the information provided, it is proposed to construct a new three-story slab-on-grade veterans support building along with associated pavement to be used for access and parking. Note that the site is currently vacant, relatively flat and covered with grass and some trees on the north and east sides. Preliminary plans indicate a finish-floor elevation approximating the existing ones.

Table 1. Proposed Construction

Element	Test Borings	Boring Depths (ft)
Building	B-1 through B-10	20.0
Pavement Areas	B-11 through B-13	10.0
Stormwater Detention Area	B-14	10.0

2. Field Investigation

A total of fourteen (14) test borings were drilled. Ten (10) within the proposed building footprint to an approximate depth of 20.0 feet each, three (3) in the proposed pavement areas to an approximate depth of 10.0 feet each, and one (1) in the proposed stormwater detention area to 10.0 feet deep,

below existing grade. The test boring locations were selected by the client and field located by Geo-Sci representatives utilizing visual surveying techniques. The generalized test boring locations are depicted on the attached Boring Location Plan (Appendix A). Test borings were advanced using 3-1/4 inch I.D. Hollow Stem Augers. Representative samples were collected using a standard two-inch O.D. and 1-3/8 inch I.D. split barrel sampler driven into the soil by means of a 140-pound hammer falling freely through a distance of 30 inches (Standard Penetration Test, ASTM D 1586). The groundwater levels at the test boring locations were measured at encounter and upon completion of the drilling operations. All samples were returned to Geo-Sci's laboratory in Berea, Ohio for further analysis. Individually typed test-boring logs are enclosed for your review. Please note that the sample depths shown on the boring logs are at the top of the sampling interval.

3. Laboratory Testing

Laboratory tests were performed on selected soil samples. Both classification and engineering property tests were performed to obtain various parameters for use in design and construction of the project. The table below provides a summary of the laboratory testing performed on select samples:

Table 2. Summary of Laboratory Testing

Test	ASTM	# of Tests
Moisture Content	D2216	85
Atterberg Limits	D4318	1
Grain Size Distribution	D422	1

Liquid limit, plasticity index and moisture content results are shown on the individually typed test-boring logs (Appendix B). The results of the grain size distributions are provided in Appendix C. The soil samples were classified in general accordance with the Unified Soil Classification System (USCS). Note that the visual descriptions provided on the logs are based upon an empirical Northeast Ohio nomenclature with the actual USCS symbol provided immediately after in parenthesis. Testing was performed in general accordance with the American Society for Testing Materials (ASTM) and other generally accepted methods.

4. Subsurface Conditions

The subsurface conditions are summarized in the table below:

Table 3. Summary of Subsurface Conditions

Test Boring	Boring Depths (ft)	Surface Cover	Fill Depth (ft)
B-1	20.0	None	9.5
B-2	20.0	6.5" Concrete	9.5
B-3	20.0	3" Asphalt	12.0
B-4	20.0	None	7.2

B-5	20.0	None	8.0
B-6	20.0	None	9.5
B-7	20.0	None	9.6
B-8	20.0	5” Asphalt	11.0
B-9	20.0	3” Topsoil	13.0
B-10	20.0	3” Topsoil	13.0
B-11	10.0	None	5.5
B-12	10.0	None	8.0
B-13	10.0	None	5.5
B-14	10.0	None	5.5

In general, the previously placed fill materials, noted above in Table 3, consisted mostly of dark brown, gray and black silty sand, silt and silty clay/sandy silty clay with gravel, organics, topsoil, cinders, brick, asphalt and debris. Natural soils consisted primarily of gray lean clay/silty clay and silty sand with varying amounts of sand and gravel fragments. These soils are classified in accordance with the USCS mostly as “CL”, “CL-ML” and “SM”. The relative consistency of the cohesive soils encountered ranged from “soft” to “very stiff”, and the relative density of the granular soils encountered, ranged from “very loose” to “loose”, as determined by the SPT N-Value.

Groundwater was encountered in most borings within the explored depths during drilling and upon completion of drilling operations.

Table 4. Groundwater

Test Boring	During Drilling Depth (ft)	At Completion Depth (ft)
B-1	6.0	14.5
B-2	8.0	None
B-3	5.5	None
B-4	4.8	None
B-5	5.5	None
B-6	7.0	14.5
B-7	8.0	14.0
B-8	6.0	11.5
B-9	8.0	None

B-10	8.0	None
B-11	6.0	None
B-12	8.0	None
B-13	0.5	None
B-14	None	None

For specific conditions at various depths, please refer to the enclosed test-boring logs (Appendix B). **It should also be noted that groundwater levels could fluctuate with seasonal changes.** Also, cave-ins of the boring holes were encountered in some of the drilled locations.

5. Conclusions and Recommendations

Based on the subsurface conditions encountered, our subsequent analyses, and the assumption that conditions between and away from the test borings are similar to those encountered, the following recommendations were prepared and are presented below.

5.1. Site Preparation and Critical Considerations

As noted above, the site is currently vacant, relatively flat and covered with grass and some trees on the north and east sides. Preliminary plans indicate a finish-floor elevation approximating the existing elevations. As we already mentioned, previously placed fill soils were encountered in all borings, due to past site development. The constituents and inconsistency encountered at the test borings is generally an indication of the non-engineered manner in which the fill was placed, signaling likely instability within the fill layers. The fill present on this site is, therefore, not adequate to support the proposed building loads. **Furthermore, due to the presence of saturated soils, depth of fill soils and a high groundwater table, removal and replacement of the fill is not considered to be an economically feasible alternative.**

In addition, due to the presence of some large trees with extended roots and possibility of soil contamination during tree clearing operations, some areas of topsoil/organic/soft soils could have a greater thickness. Furthermore, the presence of fill, soft and wet/saturated soils directly below the topsoil layer should also be considered throughout the site, whereby the construction equipment and site clearing machinery may destabilize the subgrade. Our experience has shown that this condition can extend up to 2 to 3 feet below the topsoil, especially at the wooded section of the site. Implementing proper dewatering measures prior to and throughout the clearing process may lessen the effect. Moreover, due to the presence of some large trees, stump cavities should be taken into consideration during fill volume calculations. Excavation and replacement of unsuitable soils should be implemented where necessary.

As shown above in Tabel 4, groundwater was encountered during drilling operations in most borings, therefore perched water within the fill or natural soils may be encountered during construction. Also, most of the upper soil samples exhibited high moisture content and were labeled as “wet” or “saturated”. Soils rich in silt are considered highly moisture sensitive and high water content can make them unstable, especially during steep moisture fluctuations. The contractor should be prepared for water management prior to and during any earthwork operations, especially during extended period of wetness. Precautions

should be taken during all earthwork operations to protect the work site from flooding, ponding, or inundation by poor or improper surface drainage. Temporary provisions should be made during the rainy season to adequately direct surface drainage away from and off the work site. Also, final grading should allow the water to divert from the building after construction is completed.

Rammed Aggregate Pier (RAP) System

"Rammed Aggregate Piers" (RAP) ground improvement systems are used to reinforce good to poor soils, including soft to stiff clay and silt; loose to dense sand; organic silt and peat; variable, uncontrolled fill; and soils below the groundwater. It is strongly recommended that the RAP system representatives review the soil borings to determine if this alternative is adequate for the subsurface conditions. RAP systems are proprietary and are engineered, designed and installed exclusively by an authorized contractor. Previous experience in using this alternative was relatively positive, significantly increasing the allowable bearing capacity for shallow foundations.

Based upon the findings of the field exploration program, laboratory testing and subsequent engineering analysis, the followings are presented for your consideration.

5.2. Foundation Recommendations

Aggregate Piers

The building and slab can be supported on "Rammed Aggregate Piers" subsequent to site preparation. After the installation of rammed aggregate piers, the conventional shallow foundations can be installed. This ground improvement option is proprietary and require a design/build contractor to design and install them. A benefit from this type of ground improvement is that the design/build contractors typically certify their foundation improvement system to limit the settlements to tolerable values. We anticipate that after these piers are installed, bearing pressures on the order to 3,000 to 4,000 psf might be achieved; however, these values would need to be determined by the stone column design engineer. We strongly recommend that Geo-Sci be retained to provide observation and testing of construction activities during installation of the "Rammed Aggregate Piers", foundation excavation, earthwork and related activities of this project.

5.3. Concrete Slab-On-Grade

The test borings conducted indicated that the existing fill is inadequate to support the proposed building slab and a slab supported on rammed aggregate piers or subgrade stabilization should be considered to provide adequate support. If the existing fill is left in place, adequate slab support could be provided through one of the following two alternatives:

Alternative one (preferred): A slab supported on rammed aggregate piers. Additional design considerations should be provided by the stone column design engineer.

Alternative two: Slab support on undocumented fill soils carries a varying degree of risk, which the owners have to consider. Potential damages to the slab include cracks and settlements. Those risks can be minimized to a degree if the subgrade soils are undercut for a minimum of 2 feet below the proposed subgrade level and stabilized, using ODOT #1 and #2 stones, choked with ODOT #304 limestone. The final

thickness of stabilization and the use of geo-fabrics and geo-grids will be determined in the field as influenced by the condition of subgrade at the time of construction. The owner should be made aware that this alternative does not completely eliminate the risk of slab cracks or settlements. If no cracks or settlements are permitted due to the nature of the activities inside the facility, the alternative one should be implemented.

Also, the following are provided for your consideration:

- Concrete slab should be installed on a minimum of six inches of granular base material, such as ODOT #304 limestone, and compacted as per the *Earthwork General Guidelines* section of this report. If stabilization alternative is elected, the above mentioned granular slab should be installed on top of the 2-foot stone stabilized subgrade.

- Slab supported on subgrade prepared, compacted, and tested in accordance with the *Earthwork General Guidelines* section of this report, may be designed using a modulus of subgrade reaction of 120 pounds per inch (pci).

- The floor slab should be provided with joints to help control the locations of shrinkage and settlement cracking, and should be free to move independently of the walls and columns. The use of mesh reinforcement is also recommended.

- All bearing surfaces should be free of water or contamination prior to concrete placement. In addition, concrete should not be placed on frozen ground.

5.4. Pavement

Pavement areas should be inspected by a geotechnical engineer, to evaluate the suitability of the bearing materials and to observe that no unsuitable materials are present. The previously placed fill soils encountered at the proposed pavement areas should be considered during earthwork operations planning. The following subgrade improvement alternatives are presented for your consideration:

Alternative 1. (preferred)
All fill and soft areas are completely removed and replaced with engineered fill materials as observed by an onsite geotechnical engineer and/or representative.

Alternative 2.
The potential unstable areas may be stabilized with stone, as noted below:
- Undercut up to 24 inches from the existing subgrade soils;
- Install approximately 18 inches of ODOT Item #1 and #2 stone, coupled with enhanced drainage, as required to achieve a stable subgrade;
- Choke off ODOT Item #1 and #2 stone, with 6 inches of ODOT Item #304 limestone.

The final thickness of stabilization and/or the use of geo-fabrics and geo-grids, will be determined in the field as influenced by the condition of subgrade at the time of construction.

Alternative 3.
In lieu of stone stabilization, chemical stabilization performed in general accordance with ODOT Item #206, may also be considered.

It should be noted that, if Alternatives 2 or 3 are used, cracks may still appear and a periodic maintenance program such as patching, crack sealing and overlay should be taken into consideration due to presence of fill and overall soft soil conditions.

Subsequently, the following pavement design parameters are provided for your consideration:

- A geotechnical engineer should approve the pavement subgrade and removal of all existing organics, wet, soft and unstable soil detected by proofrolling. Subsequently, the exposed subgrade should be compacted to a minimum density of 98% of the laboratory maximum dry density of the soil as determined by a standard proctor test (ASTM D-698).

- Stabilization of localized unstable areas may be achieved by conditioning the soil to its optimum moisture content followed by rolling or choking with crushed stone.

- Fill soils for grade raising or undercut and replacement should then be placed to the proposed grade using controlled backfill as recommended in the *Earthwork General Guidelines* section of this report.

- In order to ensure a drained condition, the subgrade should be sloped to allow for drainage of water through the subbase materials to collection or outlet points.

- A CBR value of 4.0 or a corresponding modulus of soil subgrade reaction of 120 pci should be considered in the design of pavement sections on prepared well-drained stabilized subgrade. Actual subgrade values should be verified during rough grading and pavement sections should be changed accordingly. Drainage is essential for adequate pavement performance. The subgrade should be compacted, fine graded, and set up to drain without any ruts or low areas that could collect water. The granular base should be allowed to drain freely and should not be used to fill low areas.

5.5. Earthwork General Guidelines

- Prior to construction, remove all existing topsoil, vegetation, grass, trees, unsuitable fill, soft soils, soils contaminated with more than three percent organics by weight and any other unsuitable soils or materials from the proposed development footprint. In addition, any utilities that are present currently on the site should be removed or relocated as necessary to accommodate the proposed construction. Prior to structure support or backfill operations, all cut areas should be proofrolled to detect yielding soil conditions. Any yielding areas discovered should be removed or stabilized in accordance with the *Earthwork General Guidelines* section of this report.

- Stabilization of localized unstable areas may be achieved by conditioning the soil to its optimum moisture content.

- Once a stable subgrade has been established, the surface should be scarified by a disc, harrow, or other acceptable means to a depth of six inches.

- The soil used for fill construction should be clean, inert soil, free of unsuitable matter, compatible with the site's soil, and approved by the geotechnical engineer. Unsuitable matter includes roots and debris. Shale should not be used as fill. It should be noted that the cohesive engineered fill should generally meet the following requirements:

o Dry Density	> 110 pcf
o Liquid Limit (LL)	< 40
o Plastic Index (PI)	< 15
o Silt %	< 40%
o Maximum Particle Size	< 4"
o Passing No. 200 Sieve	> 35%
o Organic Content	< 3%

- Following subgrade approval by the geotechnical engineer, an initial three-inch layer of fill material should be placed on the scarified subgrade. Successive layers should have a maximum thickness of six inches in the loose state.

- Each layer should be individually conditioned to the optimum moisture content, and should be compacted to a minimum density of 100 percent of the laboratory maximum dry density as determined by a Standard Proctor Test, ASTM D 698 inside the building footprint and 98 percent at pavement and sidewalk areas.

- Inspection, control, and testing of each fill layer as well as subgrades, should be conducted by soil technicians under the supervision of a geotechnical engineer for determining field densities, moisture content, selecting fill material, and ensuring adequate site preparation.

- All surfaces should be sealed and sloped to promote free drainage. In the event that work is interrupted for a prolonged period, the surface should be re-tested prior to resuming work to check for possible excessive changes in moisture and density, in which case the surface should be treated accordingly before additional lifts can be placed.

6. Stormwater Management Pond

It is our understanding that a proposed 5 to 6 feet deep detention area is planned at this time in the vicinity of boring B-14. As a result of the soils encountered during drilling operations, our conclusion is that the existing sandy silty clay natural soils, experiencing a permeability of approximately 10^{-4} cm/sec, cannot be considered impermeable. A soil with a permeability of 10^{-8} cm/sec or less should be used for providing an impermeable cap for the bottom and sides of the storm water detention basins, if storm water detention is intended. The impermeable cap should have a minimum thickness of 2 feet and should be placed in an engineered manner, in accordance with the *Earthwork General Guidelines* of this report. Strict quality control should be maintained during all earthwork operations.

It is our recommendation that slopes should be a minimum of 2 to 1 (horizontal: vertical) for overall stability. Slopes of 3 to 1 (horizontal: vertical) or flatter are preferred for ease in mowing, maintaining and stability enhancement. Provisions to minimize slope erosion should be made and should include providing diversions ditches or grading the embankment at the top of the slope to divert runoff away from the slope, and providing adequate vegetation. Slopes steeper than 2 to 1 (horizontal: vertical)

will most likely require installation of geogrid reinforcing and erosion control to stabilize the slope. Both lateral and parallel bonding benches should be provided where fill is being placed on slope side, in order to key the new fill into the competent original soil. The clay liner should meet the following criteria:

- Minimum Plastic Index (PI) = 15
- Maximum Organic Content = 3%
- Permeability of 10^{-8} cm/sec or less

The clay liner shall be compacted in maximum 6-inch lifts to a minimum of 95% of ASTM D 698, at 0 to +3 percent of the optimum moisture content. The liner shall not be placed dry of optimum.

7. Excavation considerations

During construction of the project, it is anticipated that, predominantly silty sand and fill soils will be encountered in the excavations for utilities and general site excavations. Based on the subsurface soil conditions described previously, we anticipate that conventional excavation equipment is likely to be sufficient for excavation through the subsurface soils. Excavation into fill, granular, soft, and/or wet soils will require temporary shoring. Temporary shoring will also be required at places where the sidewalls exhibit instability. Therefore, lateral support or appropriate sloping of the trench sidewalls will be required at these locations to facilitate construction. As an option, the sidewalls may be cut at a slope of 2 Horizontal to 1 Vertical, or flatter. The site restrictions of the project may limit available lateral distance for construction of slopes to keep the excavation sidewalls stable. It is recommended that all excavated material be stockpiled at a minimum horizontal distance of 15 feet away from the edges of the excavation, or transported away from the site as excavation occurs.

Also, the contractor should be aware that slope height, slope inclination, or excavation depths (including utility trench excavation) should in no case exceed those specified in local, state, or federal safety regulations, e.g. OSHA Health and Safety Standards for excavations, 29 CFR part 1926, or successor regulations. Such regulations are strictly enforced and, if they are not followed, the Owner, Contractor, and/or earthwork and utility subcontractors could be liable for substantial penalties.

8. Site Class Definition

Based on our investigation and in accordance with the Ohio Building Code, the seismic site class definition D should be considered for the structural design.

9. Groundwater

It should be noted that the water levels reported are indications of conditions existing at the locations at the times of observations only. In order to determine accurately the average elevation of the true groundwater table, it is essential to install monitoring wells and take periodic groundwater level readings, especially during extended periods of wetness. However, the installation of additional monitoring wells was not included in Geo-Sci's scope of services for this project.

10. Construction Monitoring

It is recommended that Geo-Sci be retained to review the project specifications regarding earthwork and the foundation system(s) prior to construction. In addition, it is also recommended that competent geotechnical personnel be present at the site during construction to examine the soil prior to placement of concrete, to verify subsurface conditions outlined in this report, and to make any changes deemed appropriate. If requested, Geo-Sci would welcome the opportunity to provide field monitoring services during construction.

11. Limitations

The preceding recommendations were based on the subsurface stratification observed at the location tested. Assumptions were made that this stratification is representative of that of the entire site. This assumption should be verified during excavation and, if changes occur, we should be notified so we may examine the conditions, review and revise our recommendations accordingly.

This report was completed using the professional standards currently applicable to the industry for the site and proposed construction described herein. Modifications in the plans should be brought to our attention so we may review and revise our recommendations accordingly.

GRAIN SIZE DISTRIBUTION

Project: Cleveland West Veterans

Location: 3311 West 73rd Street, Cleveland, Ohio

Number: 1124389.11

Appendix D: Rammed Aggregate Pier (RAP) System

AGGREGATE PIERS

Aggregate piers are columns of compacted stone installed in groups in poor soil to increase bearing pressure and mitigate settlement under structural footings.

They are a cost-effective method to reinforce soft, cohesive soil and poor fill for all types of structures. Aggregate piers are formed when lifts of stone are introduced to an open hole and compacted using high-energy densification equipment. The phrase aggregate piers may be used to describe either a rammed pier or a vibrated pier, also called a vibro stone column (VSC).

The down-hole compactive device may be either a high-frequency vibratory probe or a vertical tamper. Each lift of stone or other granular material is compacted, forming a high modulus aggregate pier. The aggregate piers are designed and installed in groups to improve the ground's ability to support structures.

Re: Limited Subsurface Investigation
West 73rd Street and Neville Avenue
Cleveland, Ohio 44102
August Mack Project Number JY1829.742

Dear Ms. Chandler:

August Mack Environmental, Inc. (August Mack) has completed subsurface investigation activities at the above-referenced subject property. During a recent Phase I Environmental Site Assessment (ESA) performed by Partners Environmental (Partners) (Partners Project No. 640.11A), the following recognized environmental conditions (RECs) were identified:

- **REC-1:** Historical Operations, 7255-7283 Neville Avenue (Subject Property): The eastern portion of the subject property addressed at 7255-7275 Neville Avenue was developed and utilized as a foundry (Atlas Steel Foundry Company) from approximately 1913 until 1930. At least one (1) 6,000-gallon crude oil underground storage tank (UST) was associated with the foundry operations. Following the foundry, a paste and commercial-grade cleaning product manufacturer (Cleveland Cleaner & Paste Company) operated at 7255-7283 Neville Avenue through the 1980s. Fire department records show that high volumes of solvents were stored and used in their operations, and multiple kerosene and gasoline UST systems were in operation during this time as well. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-2:** Former Foundry, 7299 Neville Avenue, 3297 and 3319 West 73rd Street (Subject Property): The western portion of the subject property was also developed and utilized as a foundry (Standard Steel Casting Company Foundry) from approximately 1913 until 1950. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-3**: Historical Operations, 7260 Neville Avenue, and 7275 Wentworth Avenue (Adjoining Site): The northeastern adjoining site has been developed and utilized as various manufacturing and industrial facilities, generally from 1913 through the 2010s. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-4:** Historical Operations, 3322 West 73rd Street (Adjoining Site): The adjoining site to the southwest was historically utilized as a dry cleaner. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-5:** Electrical Substation, 3321-3323 West 73rd Street (Adjoining Property): The southern adjoining electrical substation, present since at least 1951, was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release but are considered as a REC due to the close proximity to the subject property. Based on Partners' experience, hazardous substances may have been used at this adjoining property, which have the potential to adversely impact the subject property

The purpose of this investigation is to determine if subsurface conditions on the subject property have been impacted by the environmental concerns identified in the Phase I ESA. This report was prepared at the request of Ms. Jennifer Chandler with CHN Housing Partners and may be relied on by CHN Housing Partners. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by August Mack.

SUBSURFACE INVESTIGATION

August Mack mobilized to the subject property on July 31, 2024, to perform the subsurface investigation activities. Prior to starting subsurface activities, ground

penetrating radar (GPR), electromagnetic (EM) locating, and other utility locating tools were utilized to clear all boring locations.

A total of eight (8) soil borings (SB-1 through SB-8) were advanced across the subject property using a Geoprobe® direct push sampling system (Geoprobe®). Information regarding boring locations is provided below and boring locations are depicted on **Figure 1**.

- SB-1 was advanced on the east portion of the subject property, in the location of former Atlas Steel Foundry Company;
- SB-2 was advanced on the east portion of the subject property, in the suspected location of a former 6,000-gallon crude oil UST;
- SB-3 was advanced on the east portion of the subject property, in the suspected location of a former 1,000-gallon fuel oil UST;
- SB-4 was advanced on the north-northeast subject property boundary, in the location of the former Cleveland Cleaner & Paste Company and adjacent to a historically industrial property to the north;
- SB-5 was advanced on the west portion of the subject property, in the location of former Standard Casting Company and adjacent to an electrical substation to the south; and,
- SB-6 through SB-8 were advanced throughout the west portion of the subject property in the location of former Standard Casting Company.

Sampling Methodology

Soil borings SB-1 through SB-8 were advanced to depths ranging from 20 to 25 feet below grade (ft bg) using a Geoprobe® sampling system. The purpose of the borings was to field screen soils, determine geological conditions, and collect soil and groundwater samples for laboratory analysis. All soil sample intervals were inspected in the field for odors and staining and screened using a photoionization detector (PID). Field screening results and soil lithological information is provided on soil boring logs included as **Attachment A**.

One (1) soil sample interval from each boring location was selected for laboratory analysis based on field inspection observations and screening results. Soil samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of volatile organic compounds (VOCs) via United States Environmental Protection Agency (U.S. EPA) method 8260, polycyclic aromatic hydrocarbons (PAHs) via U.S. EPA method 8270, and Resource Conservation and Recovery Act (RCRA) 8 Metals U.S. EPA method 6010B/7470-7471. Additionally, the

sample from SB-5 was also submitted for polychlorinated biphenyl (PCB) analysis via U.S. EPA method 8082.

Soil borings were converted into temporary, 1-inch diameter PVC wells to aid in the collection of groundwater samples. Groundwater samples were collected from the temporary wells using a check valve attached to new, disposable sample tubing and submitted to PACE for analysis of VOCs via U.S. EPA method 8260, PAHs via U.S. EPA method 8270, and RCRA 8 Metals via U.S. EPA method 8082. Groundwater was not encountered in multiple boring locations; therefore, an additional soil sample was collected at the deepest interval in borings SB-4, SB-5, SB-6, SB-6, and SB-8.

August Mack field procedures are provided in **Attachment B.**

Field Observations

Inspection of collected soil samples from the borings revealed that the subsurface geology consists primarily of alternating layers of clay, silty clay, and silt. A sand seam was also observed at approximately 7.5 to 8.25 ft bg at SB-1, SB-4, and SB-5 from 9 to 10 ft bg. Fill material (brick, gravel, and soil) was observed at depths between 0 to 2 ft bg at SB-1, SB-3, SB-4, and SB-5. Saturated conditions were encountered beginning at approximately 4 to 8 ft bg at all soil boring locations, however, most of the borings were dry during groundwater collection. No soil or groundwater sample was able to be collected at SB-2, due to shallow refusal encountered in the vicinity of the sample area. Due to reduced available groundwater, sampling at SB-3 was limited to VOCs.

Field observations from the soil borings did reveal evidence of staining, odor, and sheen from soil boring SB-7 at 5 to 8 ft bg. In addition, the majority of PID measurements collected from the soil borings were below 105.1 parts per million (ppm).

Soil Analytical Results

The soil analytical results were compared to the Ohio Environmental Protection Agency (OEPA) Voluntary Action Program (VAP) Generic Direct Contact Soil Standards (GDCSS) for commercial/industrial land use. The laboratory analysis revealed the following results:

- Three (3) VOCs were detected in all soil samples (carbon disulfide, p-isopropyltoluene, and methylene chloride). All detected concentrations are below their most stringent standard.
- Several PAHs were detected in all soil samples. All detected concentrations are below their most stringent standard.

- Metals including arsenic, barium, cadmium, chromium, and lead were detected in each of the soil samples. All concentrations were below their respective standard with the exception of arsenic in SB-4 (0-2), SB-5 (1-3), and SB-6 (6-8). Arsenic was above the GDCSS standard for residential but well below the GDCSS standards for commercial / industrial and construction workers.

The soil analytical results are summarized in **Table 1**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

Groundwater Analytical Results

The groundwater analytical results were compared to the OEPA VAP Generic Unrestricted Potable Use Standards (UPUS). The laboratory analysis revealed the following results:

- No VOCs were detected above the LRLs.
- No PAHs were detected above the LRLs.
- All analyzed metals were not detected above LRLs, with the exception of barium, was detected above LRLs but well below its comparative OEPA VAP UPUS standard.

It is noted that the subject property is located within an OEPA approved Urban Setting Designation (USD), known as the Cleveland City-Wide and the Cleveland - Inner West. A USD recognizes that remediation of groundwater to drinking water standards is not necessary because no receptors will be drinking the groundwater in the USD area (i.e. area connected to municipal water supply).

The groundwater analytical results are summarized in **Table 2**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

SUMMARY AND CONCLUSION

August Mack has completed a Limited Subsurface Investigation for the subject property located at West 73rd Street and Neville Avenue, Cleveland, Ohio. A total of eight (8) soil borings were advanced throughout the subject property in order to evaluate if subsurface conditions have been impacted by the RECs identified in the recent Phase I ESA completed by August Mack.

Field observations and PID measurements from the soil borings did reveal any evidence of impacts at the subject property. Although, laboratory analysis of soil and groundwater samples from the borings did not reveal any constituents of concern

above their respective applicable residential standards, with the exception of arsenic. It should be noted that according to the OEPA *Evaluation of Background Metal Soil Concentrations* (updated March 2013), the range of background arsenic concentration in Cuyahoga County is 4.6 to 33.1 mg/kg. In addition, according to the Cox-Colvin background metals study for the State of Ohio (dated 1996), arsenic is present throughout Ohio at concentrations ranging from 0.5 mg/kg to 56 mg/kg, which is within range of the samples collected at the Study Site. It is the opinion of August Mack that the arsenic detected throughout the Site is consistent with naturally occurring/background concentrations as reported in published background studies for the State of Ohio and are not likely a result of historical Site activities, or the present fill material.

Additionally, no soil or groundwater sample was collected at SB-2, due to shallow refusal encountered in the vicinity of the sample area. During GPRS no anomalies were identified within the sample area.

Based on the findings presented above, August Mack did not identify any evidence of a release at the subject property and no further investigation is warranted at this time.

We appreciate the opportunity to provide you with environmental consulting services and trust that this submittal is in accordance with your needs. Please feel free to contact us if you have any questions or comments or require additional information regarding this project or the project site.

Sincerely,

Sarah Bergund

ATTACHMENT B

Field Procedures

SOIL & GROUNDWATER SAMPLING PROCEDURES

Soil Sampling Activities

Soil borings were advanced using a Geoprobe® Direct Push Dual-Tube Sampling System (Geoprobe®) and hand augers. Soil borings were advanced to the desired depth required for the investigation. Soil samples were collected continuously from each boring location by using the dual-tube tooling, which includes a disposable acetate sample liner. The sampler was recovered with a 4-foot soil sample collected within an acetate liner inside the barrel. A new acetate liner was used for each sample collected. All reusable equipment that contacted the soil samples was decontaminated with a Liquinox® solution and rinsed with water between each sample collection.

Upon retrieving the 4-foot sections of soil, the samples were divided into 2-foot sections and inspected in the field for evidence of contamination (odors, staining, etc.). Each sample was also screened in the field by headspace analysis using a MiniRae® photoionization detector (PID). The 2-foot section that exhibited the highest potential for contamination was sampled and transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. All samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals, via U.S. EPA 8260, 8270SIM, and 6010B/7470-7471 methods. One (1) additional sample will be collected from SB-5 and analyzed for polychlorinated biphenyl (PCB) via U.S. EPA method 8082.

Groundwater Sampling Activities

Temporary 1-inch groundwater sampling piezometers were installed in two of the three boring location to allow groundwater to collect for sampling purposes. Groundwater samples were collected from the temporary groundwater sampling points using a check valve and dedicated tubing. The groundwater samples were transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. Groundwater samples were submitted to PACE for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals via U.S. EPA 8260 , 8270SIM, and 6010B/7470-7471 methods. One (1) additional sample will be collected from SB-5 5 and analyzed for PBC via U.S. EPA method 8082.

Site Restoration Activities

Upon completion of the field sampling activities, the boreholes were abandoned by manually pouring soil cuttings and bentonite into the boring. Subject property restoration was completed by patching the surface materials to match pre-investigation conditions.

RE: Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Dear James Bell:

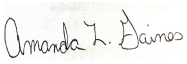
Enclosed are the analytical results for sample(s) received by the laboratory on August 01, 2024. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Indianapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,



Amanda Gaines

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-4-0-2 **Lab ID: 50379279005** Collected: 07/31/24 14:00 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-4-4-6 **Lab ID: 50379279006** Collected: 07/31/24 14:00 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-6-6-8 **Lab ID: 50379279010** Collected: 07/31/24 11:13 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-8-1-3 **Lab ID: 50379279013** Collected: 07/31/24 12:53 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-8-4-6 **Lab ID: 50379279014** Collected: 07/31/24 12:53 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

QUALIFIERS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

C9	Common Laboratory Contaminant.
ED	Due to the extract's physical characteristics, the analysis was performed at dilution.
HS	Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
N2	The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.
pH	Post-analysis pH measurement indicates insufficient VOA sample preservation.

Subject: Building Department Records Request
Attachments: Attachment 1.pdf

To Whom it may concern at the Cleveland Department of Building and Housing:

Partners Environmental Consulting, Inc. (Partners) is conducting a Phase I Environmental Site Assessment at the vacant lot located at West 73 Street and Neville Avenue in Cleveland, Cuyahoga County, Ohio. PPNs 006-25-027 and 006-25-028. Previous addresses include: 7255-7275 Neville Avenue, 7279-7291 Neville Avenue, 7299 Neville Avenue, 3297 and 3319 West 73rd Street. I will attach a map of the property below. As part of this process, Partners requests any records the Cleveland Building Department may have related to the property, including but not limited to inspections, violations, spills, hazardous materials storage, code violations, building blueprints, wells, septic systems, permits, and above/underground storage tanks. If I have reached the wrong contact, I would be grateful if you could point me to the direction of someone who might be able to assist. Thank you.

Subject: [Cleveland Public Records Center] Public Safety - Public Records Request :: P012380-061325
Body: RE: PUBLIC RECORDS REQUEST of June 13, 2025, Reference #P012380-061325.

Dear Ms. Margaret Eibler,

TheCity of Cleveland Division Of Fire received a public record requestfrom you on June 13, 2025. You requested the following:

“Dear Cleveland Fire Department :
We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the West veteran Supportive Housing project in Cleveland, Cuyahoga County, Ohio. The project involves the redevelopment of vacant land. A location map is attached.
Please provide the following information:
1. Are you aware of any USTs at or near the project site?
2. Are you aware of any hazardous-material responses or other environmental concerns in the project area?
3. Do you have file(s) available for the project site that can be made available for review, or can copies be provided?
4. What station will provide service to this location?
5. What is the approximate response time for fire and medical emergencies?
6. Who provides ambulance service in Cleveland?
7. Is the fire department included in the building plan review process? If not, would the fire department like to review the plans for this project?
Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 440-214-5299 and/or meibler@partnersenv.com.
Sincerely,
Maggie Eibler”

TheCity Of Cleveland Division Of Fire has reviewed its files and haslocated responsive records to your request. Please log in to the Cleveland Public Records Center at the following link Cleveland Public Records Center to retrieve the appropriate responsive documents.

Public Safety - Public Records Request - P012380-061325

Please note:

- Please make sure that you allow pop-ups from this site in order to view/download records.
- Records may be viewed/downloaded up to 3 times.

- You have up to 30 days to view/download records.

If you have any questions, or wish to discuss this further, you can reply to this email, go to the Cleveland Public Records Center and Send a New Message or call 216-664-6653.

Sincerely,

City of Cleveland - Division Of Fire

Dear Ms. Margaret Eibler,

Thank you for your interest in public records of the City of Cleveland. Your request has been received and is being processed in accordance with the Ohio Sunshine Laws. Your request was received in this office on 6/13/2025 and has been given the reference number P012380-061325 for tracking purposes.

Records Requested: **Dear Cleveland Fire Department :**

We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the West veteran Supportive Housing project in Cleveland, Cuyahoga County, Ohio. The project involves the redevelopment of vacant land. A location map is attached.
Please provide the following information:
1. Are you aware of any USTs at or near the project site?
2. Are you aware of any hazardous-material responses or other environmental concerns in the project area?
3. Do you have file(s) available for the project site that can be made available for review, or can copies be provided?
4. What station will provide service to this location?
5. What is the approximate response time for fire and medical emergencies?
6. Who provides ambulance service in Cleveland?
7. Is the fire department included in the building plan review process? If not, would the fire department like to review the plans for this project?
Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 440-214-5299 and/or meibler@partnersenv.com.
Sincerely,
Maggie Eibler

Your request will be forwarded to the relevant city department(s) to locate the information you seek and to determine the volume and any costs associated with satisfying your request. You will be contacted about the availability and/or provided with copies of the records in question. **PLEASE NOTE:** The public records law does not require a governmental body to create new information, to do legal research, or to answer questions.

You can monitor the progress of your request at the link below and you will receive an email when your request has been completed. Again, thank you for using the Cleveland Public Records Center.

City of Cleveland - Public Records

To monitor the progress or update this request please log into the Cleveland Public Records Center.

DRY PIPE VALVE TRIP TEST

REPORT → ALSO - 7275 WENTWORTH

FOR: Simkins Industries — INSPECTION NO.: DW-9911

STREET: 7276 Neville Avenue — CITY: Cleveland — STATE: OH

DATE OF TRIP TEST: 7/6/99 — INSPECTED BY: B. A. Cefaratti

NOTE: BEFORE ANY DRY PIPE VALVE IS TRIP TESTED, THE WATER SUPPLY LINE TO IT SHOULD BE THOROUGHLY FLUSHED. THE TW INCH DRAIN BELOW THE VALVE SHOULD BE OPENED WIDE, AND WATER AT FULL PRESSURE SHOULD BE DISCHARGED LONG ENOUGH TO CLEAR THE PIPE OF ANY ACCUMULATION OF SCALE AND FOREIGN MATERIAL. IF THERE IS A HYDRANT ON THE SUPPLY LINE, THIS HYDRANT SHOULD BE FLUSHED BEFORE THE TWO INCH DRAIN IS OPENED. THE DRIP VALVE ON THE DRY PIPE VALVE SHOULD BE CHECKED BEFORE TRIPPING THE DRY PIPE VALVE, TO SEE THAT IT IS IN OPERATING CONDITION.

Cleveland Cleaner and Paste Co

No change in Building or Occupancy since last Insp.

Owner - Mr F. Gilbert

Occupancy - Industrial C

This company makes wallpaper paste but due to the lack of use for this product, they now make a number of different products such as - Deicer for sidewalks - (Salt) - Play Dough - (Wall paper cleaner with color) - Plastics - Sponge Rubber wall paper cleaner.

The rubbish storage around this place is pretty bad they throw nothing away.

Mr Gilbert said he was going to have a warehouse sale and sell all the scraps. The rest will be burned or hauled away.

discussed enclosing the mixing room - Enclosing the ceiling of the incinerator room, soffits under the stairway and the closing of the fire door.

TARGET TARGET

7275 Neville Ave Cleveland Cleaner and Paste Co
contacted Jack Gilbert (son of Pres) toured
Mr F. Gilbert President of Corp.. 17100 Lake Rd. Lakewood

Discussed at length the merit of a sprinkler system but this company does not intend to spend any large amount of money on this property.. Jack Gilbert, claims that the wall paper cleaner business is declining steadily, It is apparent that new sources of income are being investigated..

new venture on very limited scale -

1 grade level mid fromt, area has been prepared for the operation of packaging light bulk materials into bags or boxes. As to date the only material being packages has been grass seed. Bulk grass seed is delivered to this room placed in the storage hopper and fed into measured quantity containers. This area is not fire separated from the other section of the building, there are plastic film, drop cloth like, over openings to prevent dust from blowing around.. no hazard, at this time the area in setting idle..

2 grade level west of mid Zeem packaging operation flash point 135 degrees Fahr. This operation was not in progress at time of inspection but was described as follows- 275 gallons of properly refined petroleum product (special kerosene) and immediately packaged in gallon containers. The gallon containers are then delivered to waiting orders. Mr J. Gilbert was approached on this operation and a lengthy explanation followed - Zeem (patent and Trade Name) was purchased at a foreclosure sale, and The Cleveland Cleaner and paste Co will not advertise this product but is still filling orders from customers, and does hold orders until approx 275 gallon is called for. There is a skid of over-stock on hand. The packaged Zeem is su posed to be shipped out the next day

3 second floor north west - plastic operation
This area has the previous injection molding operation and is the process of setting up ? vacuum impression molding?? (must be a proper name for this operation.) Present machine handles sheet approx one yard square. Automatic operation with material fed from roll of plastic on the machine, cut by hot wire impact, electric heated positioned on mold, vacuum and sheet of impressions formed. There is lots of scrap with this operation and it is stored in the warehouse storage area with paper stock of The complete company operation
Plastic high impact styrene - proponate Buterate polyethlene

This company will have to be rechecked for the new operations as they are very limited at this time - could expand anytime..

cont 7275 Neville

Operation of manufacture and packaging of wall paper cleaner and child play puddy is the same, conducted in the east section construction Type IV . The flour used to make the bulk of this cleaner and or puddy was previously stored in bulk in a bin immediately adjacent to this work area, but for this one (1) time a large quantity of rejected food flour was purchased. This flour is in oversea shipping bags with sand script labels. This bagged material does take conciderable space in the paper product storage area.. This material will NOT be purchased again - first there was a mildew problem, then the chemical added to counteract the mildew made the paste tacky, and there is additional handling.

Boiler room off east wall of structure has metal door to building but the boiler is positioned very close to the door and when the door is open for entrance or exit the boiler is immediately there. It must be a larger boiler than the original installation,. Incinerator there is an incinerator in an area of its own though not within a fire resistive room, This is an exixting incinerator probably a carry over from the foundry chimney..

There are fire doors on one interior stairway and on a conveyor opening. These opening protectives do give some slight protection at the south wall between the Type IV and Type III const, but there are unprotected openings at other areas that nullify these protectives..

This building would be well served by a sprinkler system.

Subject: Data Request for HUD Environmental Review, West Veteran Supportive Housing project at West 73 Street and Neville Avenue, Cleveland, Cuyahoga County, Ohio
Attachments: Attachment 1.pdf

Dear Ms. Staller:
We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the West Veteran Supportive Housing project located in Cleveland, Cuyahoga County, Ohio. The project involves the redevelopment of vacant land. A location map is attached.
Please provide the following information:
Is the health department aware of any environmental concerns at the project site or in the area?
Is the health department aware of any air quality concerns at the project site or in the area?
Do you have file(s) available for the project site that can be made available for review, or can copies be provided?
Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 440-214-5299 and/or meibler@partnersenv.com.
Sincerely,
Maggie Eibler

Attachments: Attachment 1.pdf

Hello,

Partners Environmental Consulting, Inc. (Partners) is conducting a Phase I Environmental Site Assessment at the vacant lot located at West 73 Street and Neville Avenue in Cleveland, Cuyahoga County, Ohio. PPNs 006-25-027 and 006-25-028. Previous addresses include: 7255-7275 Neville Avenue, 7279-7291 Neville Avenue, 7299 Neville Avenue, 3297 and 3319 West 73rd Street. Attached below is a map of the property. As part of this process, Partners requests any records the Ohio EPA may have related to the property, including but not limited to inspections, violations, spills, hazardous materials storage, code violations, building blueprints, wells, septic systems, permits, and above/underground storage tanks. If I have reached the wrong contact, I would be grateful if you could point me to the direction of someone who might be able to assist. If there are so no records, please let me know. Thank you.

Good afternoon,

I will forward this to our Public Records section to fill the request.

Respectfully,

D. Todd, Chief
Cleveland Division of Police

You don't often get email from meibler@partnersenv.com. Learn why this is important

CAUTION: This email originated from outside of the City of Cleveland. Do not click on links or open attachments unless you recognize the sender and know that the content is safe. If you believe that this email is suspicious, please forward to phishing@clevelandohio.gov.

We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the West Veteran Supportive Housing project in Cleveland, Cuyahoga County, Ohio. The project involves the redevelopment of vacant land. A location map is attached.

Please provide the following information:

1. Is criminal activity a significant problem in the area of the project site, as compared with the city in general? If so, what steps can the project take to promote safety in the area?

2. What is the approximate response time for emergency calls?

3. Are numerous traffic violations or accidents reported at the intersections near the project site? Is the area safe for pedestrian traffic?

Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 440-214-5299 and/or meibler@partnersenv.com.

Sincerely,

Maggie Eibler

To Whom it May Concern:
We are requesting information on behalf of the Ohio Housing Finance Agency in connection with the environmental review record for the West Veteran Supportive Housing project located in Cleveland, Cuyahoga County, Ohio. The project involves the redevelopment of vacant land. A location map is attached.
Please provide the following information:
1. Which schools within the system will students attend?
2. Can the schools adequately absorb an influx of students that may result from the construction?
3. Will these students be on bus routes or will students walk to school?
4. Are pre-school and adult education classes available through the school system?
5. If available, please provide literature regarding the school system.
Thank you for your assistance in this matter. If there are any questions regarding this request for information, please contact me at 440-214-5299 and/or meibler@partnersenv.com.
Sincerely,
Maggie Eibler

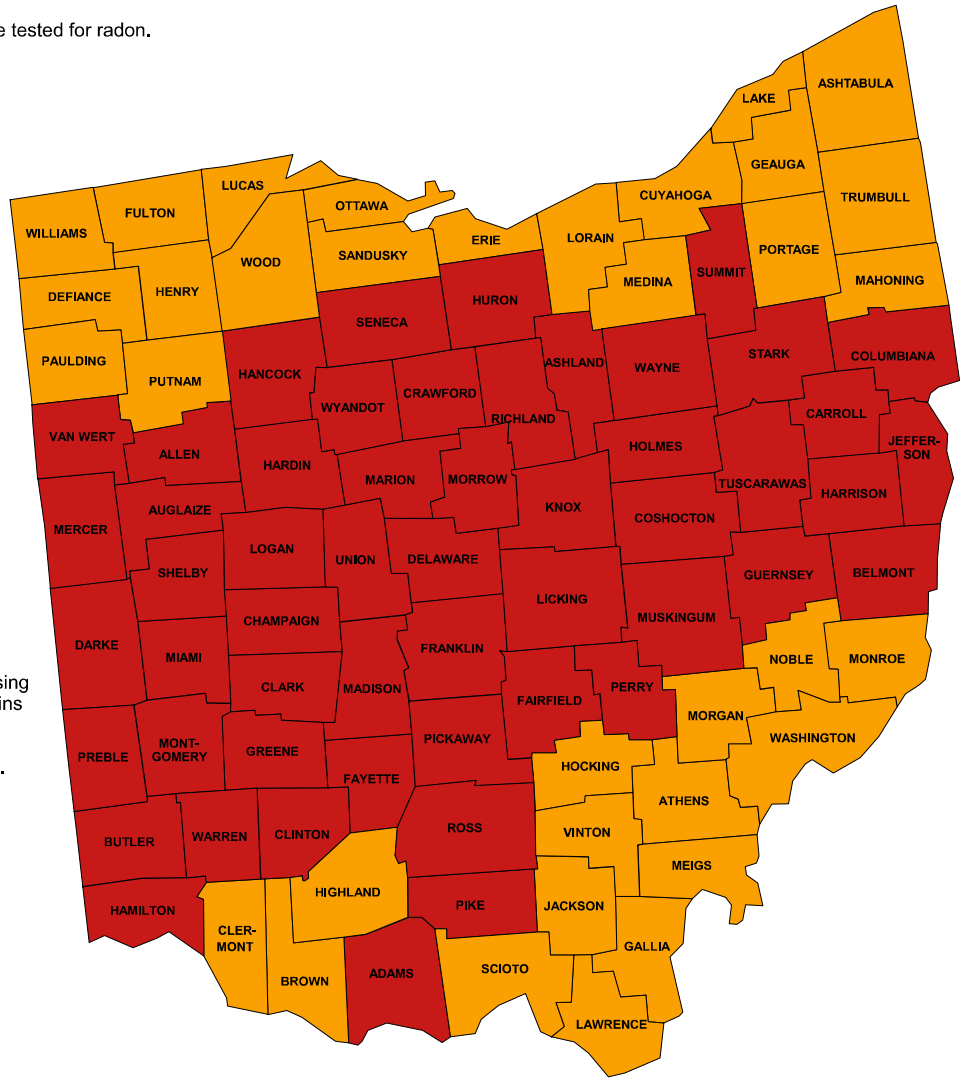
OHIO - EPA Map of Radon Zones

http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.



IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of Ohio" (USGS Open-file Report 93-292-E) before using this map. http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

NOT FOR CONSULTATION

Location

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species[1] and their critical habitats are managed by the Ecological Services Program of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries[2]).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact NOAA Fisheries for species under their jurisdiction.

NOT FOR CONSULTATION

---

1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the listing status page for more information. IPaC only shows species that are regulated by USFWS (see FAQ).
2. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Mammals

NAME	STATUS
Indiana Bat Myotis sodalis Wherever found There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/5949	Endangered

Birds

NAME	STATUS
Piping Plover Charadrius melodus There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/6039	Endangered
Rufa Red Knot Calidris canutus rufa Wherever found There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/1864	Threatened

Insects

NAME	STATUS
Monarch Butterfly Danaus plexippus Wherever found There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/9743	Proposed Threatened

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

NOT FOR CONSULTATION

You are still required to determine if your project(s) may have effects on all above listed species.

Bald & Golden Eagles

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act [2] and the Migratory Bird Treaty Act (MBTA) [1]. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management
- Measures for avoiding and minimizing impacts to birds https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds
- Nationwide avoidance and minimization measures for birds https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf
- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

There are Bald Eagles and/or Golden Eagles in your project area.

Measures for Proactively Minimizing Eagle Impacts
For information on how to best avoid and minimize disturbance to nesting bald eagles, please review the National Bald Eagle Management Guidelines. You may employ the timing and activity-specific distance recommendations in this document when designing your project/activity to avoid and minimize eagle impacts. For bald eagle information specific to Alaska, please refer to Bald Eagle Nesting and Sensitivity to Human Activity.

The FWS does not currently have guidelines for avoiding and minimizing disturbance to nesting Golden Eagles. For site-specific recommendations regarding nesting Golden Eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

If disturbance or take of eagles cannot be avoided, an incidental take permit may be available to authorize any take that results from, but is not the purpose of, an otherwise lawful activity. For assistance making this determination for Bald Eagles, visit the Do I Need A Permit Tool. For assistance making this determination for golden eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

Ensure Your Eagle List is Accurate and Complete

NOT FOR CONSULTATION

If your project area is in a poorly surveyed area in IPaC, your list may not be complete and you may need to rely on other resources to determine what species may be present (e.g. your local FWS field office, state surveys, your own surveys). Please review the Supplemental Information on Migratory Birds and Eagles, to help you properly interpret the report for your specified location, including determining if there is sufficient data to ensure your list is accurate.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to bald or golden eagles on your list, see the "Probability of Presence Summary" below to see when these bald or golden eagles are most likely to be present and breeding in your project area.

Review the FAQs
The FAQs below provide important additional information and resources.

NAME	BREEDING SEASON
Bald Eagle Haliaeetus leucocephalus This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Dec 1 to Aug 31
Golden Eagle Aquila chrysaetos This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds Jan 1 to Aug 31

NOT FOR CONSULTATION

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

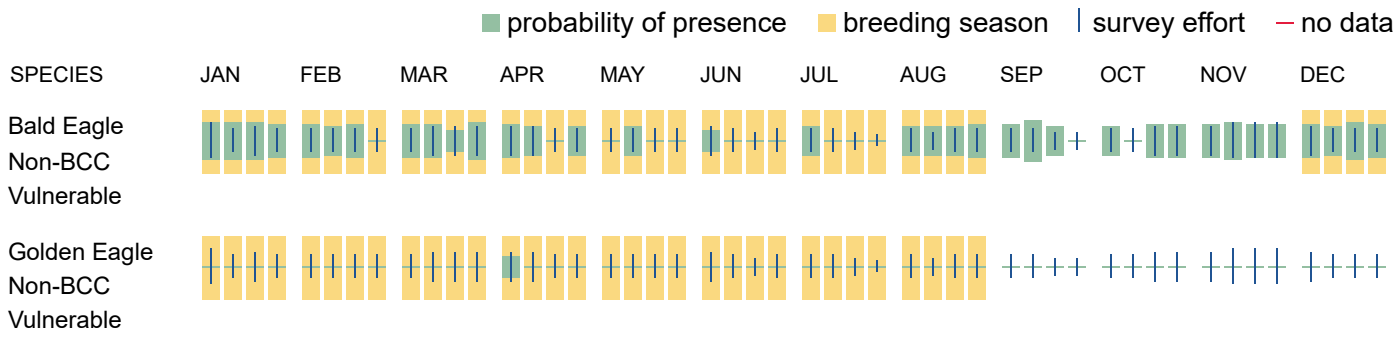
Breeding Season (▪)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.



NOT FOR CONSULTATION

Bald & Golden Eagles FAQs

What does IPaC use to generate the potential presence of bald and golden eagles in my specified location?

The potential for eagle presence is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are an eagle (Bald and Golden Eagle Protection Act requirements may apply).

Proper interpretation and use of your eagle report
On the graphs provided, please look carefully at the survey effort (indicated by the black vertical line) and for the existence of the "no data" indicator (a red horizontal line). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort line or no data line (red horizontal) means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list and associated information help you know what to look for to confirm presence and helps guide you in knowing when to implement avoidance and minimization measures to eliminate or reduce potential impacts from your project activities or get the appropriate permits should presence be confirmed.

How do I know if eagles are breeding, wintering, or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating, or resident), you may query your location using the RAIL Tool and view the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If an eagle on your IPaC migratory bird species list has a breeding season associated with it (indicated by yellow vertical bars on the phenology graph in your “IPaC PROBABILITY OF PRESENCE SUMMARY” at the top of your results list), there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

Interpreting the Probability of Presence Graphs

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. A taller bar indicates a higher probability of species presence. The survey effort can be used to establish a level of confidence in the presence score.

How is the probability of presence score calculated? The calculation is done in three steps:
The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.

To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.

The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

NOT FOR CONSULTATION

Breeding Season ()
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort ()
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data ()
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Migratory birds

The Migratory Bird Treaty Act (MBTA) [1] prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service).

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.

Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management
- Measures for avoiding and minimizing impacts to birds https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds
- Nationwide avoidance and minimization measures for birds
- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

Measures for Proactively Minimizing Migratory Bird Impacts

Your IPaC Migratory Bird list showcases birds of concern, including Birds of Conservation Concern (BCC), in your project location. This is not a comprehensive list of all birds found in your project area. However, you can help proactively minimize significant impacts to all birds at your project location by implementing the measures in the Nationwide avoidance and minimization measures for birds document, and any other project-specific avoidance and minimization measures suggested at the link Measures for avoiding and minimizing impacts to birds for the birds of concern on your list below.

Ensure Your Migratory Bird List is Accurate and Complete

NOT FOR CONSULTATION

If your project area is in a poorly surveyed area, your list may not be complete and you may need to rely on other resources to determine what species may be present (e.g. your local FWS field office, state surveys, your own surveys). Please review the Supplemental Information on Migratory Birds and Eagles document, to help you properly interpret the report for your specified location, including determining if there is sufficient data to ensure your list is accurate.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the "Probability of Presence Summary" below to see when these birds are most likely to be present and breeding in your project area.

Review the FAQs

The FAQs below provide important additional information and resources.

NAME	BREEDING SEASON
Bald Eagle Haliaeetus leucocephalus This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Dec 1 to Aug 31
Belted Kingfisher Megaceryle alcyon This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Mar 15 to Jul 25
Black-billed Cuckoo Coccyzus erythropthalmus This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9399	Breeds May 15 to Oct 10
Blue-winged Warbler Vermivora cyanoptera This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds May 1 to Jun 30
Bobolink Dolichonyx oryzivorus This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 20 to Jul 31
Canada Warbler Cardellina canadensis This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 20 to Aug 10

NOT FOR CONSULTATION

Cerulean Warbler Setophaga cerulea — Breeds Apr 20 to Jul 20

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/2974

Chimney Swift Chaetura pelagica — Breeds Mar 15 to Aug 25

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Eastern Meadowlark Sturnella magna — Breeds Apr 25 to Aug 31

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Evening Grosbeak Coccothraustes vespertinus — Breeds May 15 to Aug 10

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Golden Eagle Aquila chrysaetos — Breeds Jan 1 to Aug 31

This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.
https://ecos.fws.gov/ecp/species/1680

Golden-winged Warbler Vermivora chrysoptera — Breeds May 1 to Jul 20

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/8745

Lesser Yellowlegs Tringa flavipes — Breeds elsewhere

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/9679

Long-eared Owl asio otus — Breeds Mar 1 to Jul 15

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/3631

Pectoral Sandpiper Calidris melanotos — Breeds elsewhere

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

NOT FOR CONSULTATION

Red-headed Woodpecker Melanerpes erythrocephalus This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 10 to Sep 10
Rose-breasted Grosbeak Pheucticus ludovicianus This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds May 15 to Jul 31
Ruddy Turnstone Arenaria interpres morinella This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds elsewhere
Semipalmated Sandpiper Calidris pusilla This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds elsewhere
Short-billed Dowitcher Limnodromus griseus This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9480	Breeds elsewhere
Wood Thrush Hylocichla mustelina This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 10 to Aug 31

NOT FOR CONSULTATION

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Migratory Bird FAQs

Tell me more about avoidance and minimization measures I can implement to avoid or minimize impacts to migratory birds.

Nationwide Avoidance & Minimization Measures for Birds describes measures that can help avoid and minimize impacts to all birds at any location year-round. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is one of the most effective ways to minimize impacts. To see when birds are most likely to occur and breed in your project area, view the Probability of Presence Summary. Additional measures or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location, such as those listed under the Endangered Species Act or the Bald and Golden Eagle Protection Act and those species marked as “Vulnerable”. See the FAQ “What are the levels of concern for migratory birds?” for more information on the levels of concern covered in the IPaC migratory bird species list.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) with which your project intersects. These species have been identified as warranting special attention because they are BCC species in that area, an eagle (Bald and Golden Eagle Protection Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, and to verify survey effort when no results present, please visit the Rapid Avian Information Locator (RAIL) Tool.

Why are subspecies showing up on my list?

Subspecies profiles are included on the list of species present in your project area because observations in the AKN for **the species** are being detected. If the species are present, that means that the subspecies may also be present. If a subspecies shows up on your list, you may need to rely on other resources to determine if that subspecies may be present (e.g. your local FWS field office, state surveys, your own surveys).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets.

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go to the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating, or resident), you may query your location using the RAIL Tool and view the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your IPaC migratory bird species list has a breeding season associated with it (indicated by yellow vertical bars on the phenology graph in your “IPaC PROBABILITY OF PRESENCE SUMMARY” at the top of your results list), there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Bald and Golden Eagle Protection Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially BCC species. For more information on avoidance and minimization measures you can implement to help avoid and minimize migratory bird impacts, please see the FAQ “Tell me more about avoidance and minimization measures I can implement to avoid or minimize impacts to migratory birds”.

NOT FOR CONSULTATION

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Proper interpretation and use of your migratory bird report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please look carefully at the survey effort (indicated by the black vertical line) and for the existence of the "no data" indicator (a red horizontal line). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list does not represent all birds present in your project area. It is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list and associated information help you know what to look for to confirm presence and helps guide implementation of avoidance and minimization measures to eliminate or reduce potential impacts from your project activities, should presence be confirmed. To learn more about avoidance and minimization measures, visit the FAQ "Tell me about avoidance and minimization measures I can implement to avoid or minimize impacts to migratory birds".

Interpreting the Probability of Presence Graphs
Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. A taller bar indicates a higher probability of species presence. The survey effort can be used to establish a level of confidence in the presence score.

How is the probability of presence score calculated? The calculation is done in three steps:
The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.

To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.

The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

Breeding Season ()
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

NOT FOR CONSULTATION

Survey Effort ()
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data ()
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

Fish hatcheries

There are no fish hatcheries at this location.

Wetlands in the National Wetlands Inventory (NWI)

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

This location did not intersect any wetlands mapped by NWI.

NOT FOR CONSULTATION

NOTE: This initial screening does **not** replace an on-site delineation to determine whether wetlands occur. Additional information on the NWI data is provided below.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

About the Flight Noise Map Dashboard

X

Feel free to visit our home page and blog for more info about noise map

Both decibel values and flyovers were within ±2 value difference from the sensor measurement of the data points used in the evaluation. The colors used in the visualisation represent a range of Leq values as follows:

< 50 db (quite rural background noise, library)

50-55 db (office average background noise)

55-60 db (conversational speech)

60-65 db (piano practice)

65-70 db (noisy restaurant)

70 > db (vacuum cleaner)

The noise values reported in this dashboard app are based on the measure Leq. The noise value in each position is calculated based on flight information and other factors

EJScreen Community Report

This report provides environmental and socioeconomic information for user-defined areas, and combines that data into environmental justice and supplemental indexes.

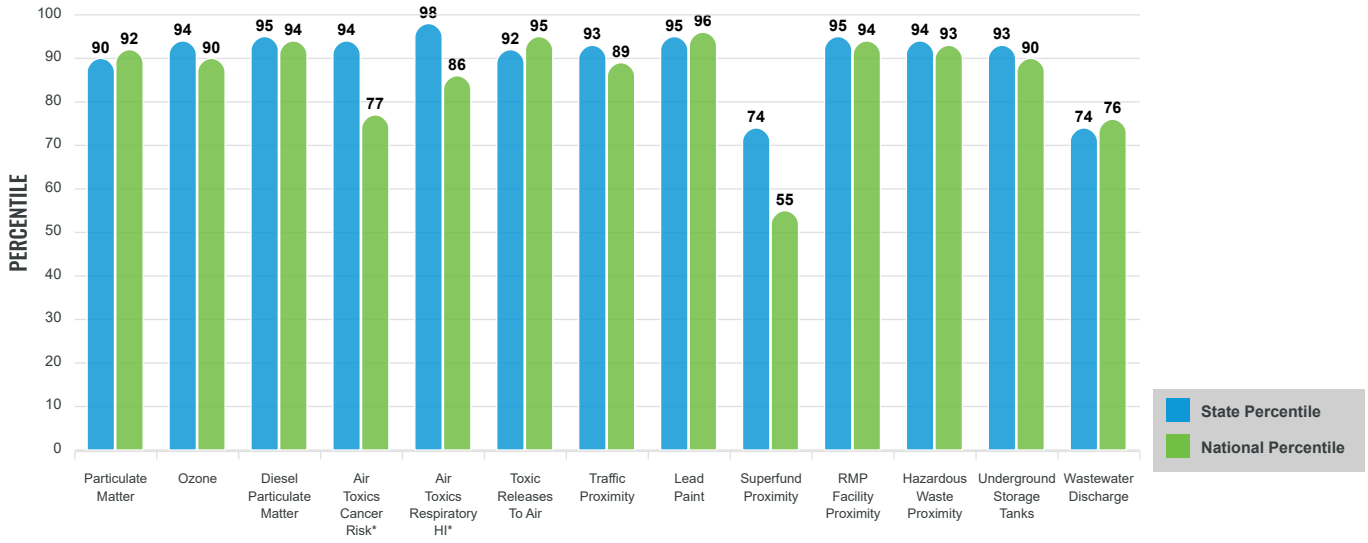
Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the EJScreen website.

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

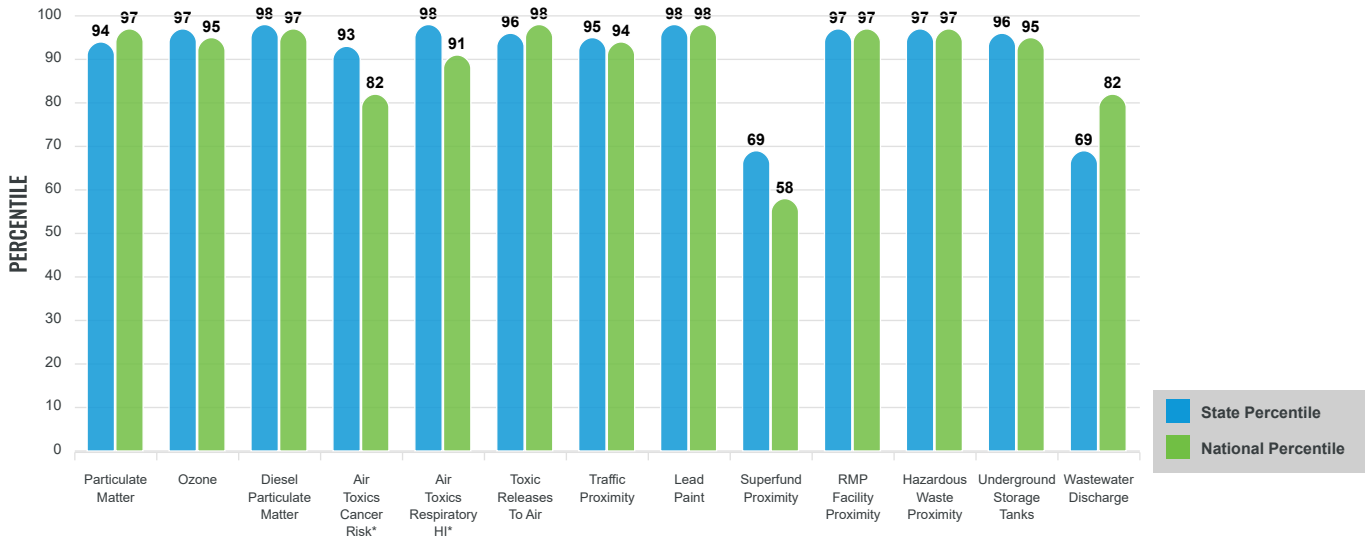
EJ INDEXES FOR THE SELECTED LOCATION



SUPPLEMENTAL INDEXES

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low-income, percent linguistically isolated, percent less than high school education, percent unemployed, and low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION



These percentiles provide perspective on how the selected block group or buffer area compares to the entire state or nation.

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the **Day/Night Noise Level Calculator Electronic Assessment Tool Overview (/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/)**.

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

RE: Phase I Environmental Site Assessment for: VA Supportive Housing Property, West 73rd Street and Neville Avenue, Cleveland, Cuyahoga County, Ohio (Project Number: 640.11B)

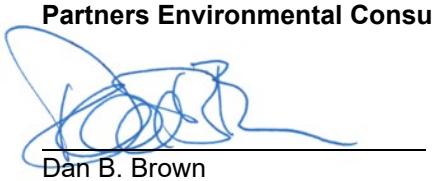
Dear Project Administration Manager:

Please find enclosed the Phase I Environmental Site Assessment for the Subject Property dated June 25, 2025, and addressed to the Ohio Housing Finance Agency (OHFA) and Ohio Development Services Agency (ODSA).

It is Partners' understanding that the information contained in the Environmental Site Assessment will be used by OHFA in considering proposed financing of residential development of the property and, furthermore, that OHFA and ODSA may rely upon the Environmental Site Assessment as if it were issued to OHFA and ODSA.

Partners certifies that the attached is a true, correct and complete copy of the Environmental Site Assessment and that the report represents Partners' professional opinion of the site as of this date. Partners also confirms the evaluation, recommendations and conclusions contained in the Environmental Site Assessment as of this date and that the Environmental Site Assessment has been performed in conformance with the scope and limitations of both the ASTM Practice E1527-21, and OHFA's Environmental Review Requirements.

Sincerely,
Partners Environmental Consulting, Inc.



Dan B. Brown
President

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

With respect to coverage afforded by this endorsement, the provisions of the policy apply unless modified by the endorsement.

A. NON-OWNED AIRCRAFT

Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** exclusion **g. Aircraft, Auto Or Watercraft** does not apply to an aircraft provided:

1. It is not owned by any insured;

2. It is hired, chartered or loaned with a trained paid crew;

3. The pilot in command holds a currently effective certificate, issued by the duly constituted authority of the United States of America or Canada, designating her or him a commercial or airline pilot; and

4. It is not being used to carry persons or property for a charge.

However, the insurance afforded by this provision does not apply if there is available to the insured other valid and collectible insurance, whether primary, excess (other than insurance written to apply specifically in excess of this policy), contingent or on any other basis, that would also apply to the loss covered under this provision.

B. NON-OWNED WATERCRAFT

Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** Subparagraph **(2)** of exclusion **g. Aircraft, Auto Or Watercraft** is replaced by the following:

This exclusion does not apply to:

(2) A watercraft you do not own that is:

(a) Less than 52 feet long; and

(b) Not being used to carry persons or property for a charge.

C. PROPERTY DAMAGE LIABILITY - ELEVATORS

1. Under Paragraph **2. Exclusions** of **Section I - Coverage A - Bodily Injury And Property Damage Liability,** Subparagraphs **(3), (4)** and **(6)** of exclusion **j. Damage To Property** do not apply if such "property damage" results from the use of elevators. For the purpose of this provision, elevators do not include vehicle lifts. Vehicle lifts are lifts or hoists used in automobile service or repair operations.

2. The following is added to **Section IV - Commercial General Liability Conditions,** Condition **4. Other Insurance,** Paragraph **b. Excess Insurance:**

The insurance afforded by this provision of this endorsement is excess over any property insurance, whether primary, excess, contingent or on any other basis.

D. EXTENDED DAMAGE TO PROPERTY RENTED TO YOU (Tenant's Property Damage)

If Damage To Premises Rented To You is not otherwise excluded from this Coverage Part:

1. Under Paragraph **2. Exclusions of Section I - Coverage A - Bodily Injury and Property Damage Liability:**

a. The fourth from the last paragraph of exclusion **j. Damage To Property** is replaced by the following:

Paragraphs **(1), (3)** and **(4)** of this exclusion do not apply to "property damage" (other than damage by fire, lightning, explosion, smoke, or leakage from an automatic fire protection system) to:

(i) Premises rented to you for a period of 7 or fewer consecutive days; or

(ii) Contents that you rent or lease as part of a premises rental or lease agreement for a period of more than 7 days.

Paragraphs **(1), (3)** and **(4)** of this exclusion do not apply to "property damage" to contents of premises rented to you for a period of 7 or fewer consecutive days.

A separate limit of insurance applies to this coverage as described in **Section III - Limits of Insurance.**

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

b. The last paragraph of subsection **2. Exclusions** is replaced by the following:

Exclusions **c.** through **n.** do not apply to damage by fire, lightning, explosion, smoke or leakage from automatic fire protection systems to premises while rented to you or temporarily occupied by you with permission of the owner. A separate limit of insurance applies to Damage To Premises Rented To You as described in **Section III - Limits Of Insurance.**

2. Paragraph **6.** under **Section III - Limits Of Insurance** is replaced by the following:

6. Subject to Paragraph **5.** above, the Damage To Premises Rented To You Limit is the most we will pay under Coverage **A** for damages because of "property damage" to:

a. Any one premise:

(1) While rented to you; or

(2) While rented to you or temporarily occupied by you with permission of the owner for damage by fire, lightning, explosion, smoke or leakage from automatic protection systems; or

b. Contents that you rent or lease as part of a premises rental or lease agreement.

3. As regards coverage provided by this provision **D. EXTENDED DAMAGE TO PROPERTY RENTED TO YOU (Tenant's Property Damage) -** Paragraph **9.a.** of **Definitions** is replaced with the following:

9.a. A contract for a lease of premises. However, that portion of the contract for a lease of premises that indemnifies any person or organization for damage by fire, lightning, explosion, smoke, or leakage from automatic fire protection systems to premises while rented to you or temporarily occupied by you with the permission of the owner, or for damage to contents of such premises that are included in your premises rental or lease agreement, is not an "insured contract".

E. MEDICAL PAYMENTS EXTENSION

If **Coverage C Medical Payments** is not otherwise excluded, the Medical Payments provided by this policy are amended as follows:

Under Paragraph **1. Insuring Agreement** of **Section I - Coverage C - Medical Payments,** Subparagraph **(b)** of Paragraph **a.** is replaced by the following:

(b) The expenses are incurred and reported within three years of the date of the accident; and

F. EXTENSION OF SUPPLEMENTARY PAYMENTS - COVERAGES A AND B

1. Under **Supplementary Payments - Coverages A** and **B**, Paragraph **1.b.** is replaced by the following:

b. Up to **$3,000** for cost of bail bonds required because of accidents or traffic law violations arising out of the use of any vehicle to which the Bodily Injury Liability Coverage applies. We do not have to furnish these bonds.

2. Paragraph **1.d.** is replaced by the following:

d. All reasonable expenses incurred by the insured at our request to assist us in the investigation or defense of the claim or "suit", including actual loss of earnings up to **$500** a day because of time off from work.

G. ADDITIONAL INSUREDS - BY CONTRACT, AGREEMENT OR PERMIT

1. Paragraph **2.** under **Section II - Who Is An Insured** is amended to include as an insured any person or organization whom you have agreed to add as an additional insured in a written contract, written agreement or permit. Such person or organization is an additional insured but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused in whole or in part by:

a. Your acts or omissions, or the acts or omissions of those acting on your behalf, in the performance of your on going operations for the additional insured that are the subject of the written contract or written agreement provided that the "bodily injury" or "property damage" occurs, or the "personal and advertising injury" is committed, subsequent to the signing of such written contract or written agreement; or

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

62273969 002308 560 of 316 113

b. Premises or facilities rented by you or used by you; or

c. The maintenance, operation or use by you of equipment rented or leased to you by such person or organization; or

d. Operations performed by you or on your behalf for which the state or political subdivision has issued a permit subject to the following additional provisions:

(1) This insurance does not apply to "bodily injury", "property damage", or "personal and advertising injury" arising out of the operations performed for the state or political subdivision;

(2) This insurance does not apply to "bodily injury" or "property damage" included within the "completed operations hazard".

(3) Insurance applies to premises you own, rent, or control but only with respect to the following hazards:

(a) The existence, maintenance, repair, construction, erection, or removal of advertising signs, awnings, canopies, cellar entrances, coal holes, driveways, manholes, marquees, hoist away openings, sidewalk vaults, street banners, or decorations and similar exposures; or

(b) The construction, erection, or removal of elevators; or

(c) The ownership, maintenance, or use of any elevators covered by this insurance.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and

2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

With respect to Paragraph **1.a.** above, a person's or organization's status as an additional insured under this endorsement ends when:

(1) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

(2) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

With respect to Paragraph **1.b.** above, a person's or organization's status as an additional insured under this endorsement ends when their written contract or written agreement with you for such premises or facilities ends.

With respects to Paragraph **1.c.** above, this insurance does not apply to any "occurrence" which takes place after the equipment rental or lease agreement has expired or you have returned such equipment to the lessor.

The insurance provided by this endorsement applies only if the written contract or written agreement is signed prior to the "bodily injury" or "property damage".

We have no duty to defend an additional insured under this endorsement until we receive written notice of a "suit" by the additional insured as required in Paragraph **b.** of Condition **2. Duties In the Event Of Occurrence, Offense, Claim Or Suit** under **Section IV - Commercial General Liability Conditions.**

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

2. With respect to the insurance provided by this endorsement, the following are added to Paragraph **2. Exclusions** under **Section I - Coverage A - Bodily Injury And Property Damage Liability:**

This insurance does not apply to:

a. "Bodily injury" or "property damage" arising from the sole negligence of the additional insured.

b. "Bodily injury" or "property damage" that occurs prior to you commencing operations at the location where such "bodily injury" or "property damage" occurs.

c. "Bodily injury", "property damage" or "personal and advertising injury" arising out of the rendering of, or the failure to render, any professional architectural, engineering or surveying services, including:

(1) The preparing, approving, or failing to prepare or approve, maps, shop drawings, opinions, reports, surveys, field orders, change orders or drawings and specifications; or

(2) Supervisory, inspection, architectural or engineering activities.

This exclusion applies even if the claims against any insured allege negligence or other wrongdoing in the supervision, hiring, employment, training or monitoring of others by that insured, if the "occurrence" which caused the "bodily injury" or "property damage", or the offense which caused the "personal and advertising injury", involved the rendering of, or the failure to render, any professional architectural, engineering or surveying services.

d. "Bodily injury" or "property damage" occurring after:

(1) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

(2) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

e. Any person or organization specifically designated as an additional insured for ongoing operations by a separate **ADDITIONAL INSURED -OWNERS, LESSEES OR CONTRACTORS** endorsement issued by us and made a part of this policy.

3. With respect to the insurance afforded to these additional insureds, the following is added to **Section III - Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

a. Required by the contract or agreement; or

b. Available under the applicable Limits of Insurance shown in the Declarations;

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declaratio ns.

H. PRIMARY AND NON-CONTRIBUTORY ADDITIONAL INSURED EXTENSION

This provision applies to any person or organization who qualifies as an additional insured under any form or endorsement under this policy.

Condition **4. Other Insurance of SECTION IV - COMMERCIAL GENERAL LIABILITY CONDITIONS** is amended as follows:

a. The following is added to Paragraph **a. Primary Insurance:**

If an additional insured's policy has an Other Insurance provision making its policy excess, and you have agreed in a written contract or written agreement to provide the additional insured coverage on a primary and noncontributory basis, this policy shall be primary and we will not seek contribution from the additional insured's policy for damages we cover.

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

62273969 002308 560 of 316 115

b. The following is added to Paragraph **b. Excess Insurance:**

When a written contract or written agreement, other than a premises lease, facilities rental contract or agreement, an equipment rental or lease contract or agreement, or permit issued by a state or political subdivision between you and an additional insured does not require this insurance to be primary or primary and non-contributory, this insurance is excess over any other insurance for which the additional insured is designated as a Named Insured.

Regardless of the written agreement between you and an additional insured, this insurance is excess over any other insurance whether primary, excess, contingent or on any other basis for which the additional insured has been added as an additional insured on other policies.

I. ADDITIONAL INSUREDS - EXTENDED PROTECTION OF YOUR "LIMITS OF INSURANCE"

This provision applies to any person or organization who qualifies as an additional insured under any form or endorsement under this policy.

1. The following is added to Condition **2. Duties In The Event Of Occurrence, Offense, Claim or Suit:**

An additional insured under this endorsement will as soon as practicable:

a. Give written notice of an "occurrence" or an offense that may result in a claim or "suit" under this insurance to us;

b. Tender the defense and indemnity of any claim or "suit" to all insurers whom also have insurance available to the additional insured; and

c. Agree to make available any other insurance which the additional insured has for a loss we cover under this Coverage Part.

d. We have no duty to defend or indemnify an additional insured under this endorsement until we receive written notice of a "suit" by the additional insured.

2. The limits of insurance applicable to the additional insured are those specified in a written contract or written agreement or the limits of insurance as stated in the Declarations of this policy and defined in **Section III - Limits of Insurance** of this policy, whichever are less. These limits are inclusive of and not in addition to the limits of insurance available under this policy.

J. WHO IS AN INSURED - INCIDENTAL MEDICAL ERRORS / MALPRACTICE
WHO IS AN INSURED - FELLOW EMPLOYEE EXTENSION - MANAGEMENT EMPLOYEES

Paragraph **2.a.(1)** of **Section II - Who Is An Insured** is replaced with the following:

(1) "Bodily injury" or "personal and advertising injury":

(a) To you, to your partners or members (if you are a partnership or joint venture), to your members (if you are a limited liability company), to a co-"employee" while in the course of his or her employment or performing duties related to the conduct of your business, or to your other "volunteer workers" while performing duties related to the conduct of your business;

(b) To the spouse, child, parent, brother or sister of that co-"employee" or "volunteer worker" as a consequence of Paragraph **(1) (a)** above;

(c) For which there is any obligation to share damages with or repay someone else who must pay damages because of the injury described in Paragraphs **(1) (a)** or **(b)** above; or

(d) Arising out of his or her providing or failing to provide professional health care services. However, if you are not in the business of providing professional health care services or providing professional health care personnel to others, or if coverage for providing professional health care services is not otherwise excluded by separate endorsement, this provision (Paragraph **(d)**) does not apply.

Paragraphs **(a)** and **(b)** above do not apply to "bodily injury" or "personal and advertising injury" caused by an "employee" who is acting in a supervisory capacity for you. Supervisory capacity as used herein means the "employee's" job responsibilities assigned by you, includes the direct supervision of other "employees" of yours. However, none of these "employees" are insureds for "bodily injury" or "personal and

© 2013 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

advertising injury" arising out of their willful conduct, which is defined as the purposeful or willful intent to cause "bodily injury" or "personal and advertising injury", or caused in whole or in part by their intoxication by liquor or controlled substances.

The coverage provided by provision **J.** is excess over any other valid and collectable insurance available to your "employee".

K. NEWLY FORMED OR ADDITIONALLY ACQUIRED ENTITIES

Paragraph **3.** of **Section II - Who Is An Insured** is replaced by the following:

3. Any organization you newly acquire or form and over which you maintain ownership or majority interest, will qualify as a Named Insured if there is no other similar insurance available to that organization. However:

a. Coverage under this provision is afforded only until the expiration of the policy period in which the entity was acquired or formed by you;

b. Coverage **A** does not apply to "bodily injury" or "property damage" that occurred before you acquired or formed the organization; and

c. Coverage **B** does not apply to "personal and advertising injury" arising out of an offense committed before you acquired or formed the organization.

d. Records and descriptions of operations must be maintained by the first Named Insured.

No person or organization is an insured with respect to the conduct of any current or past partnership, joint venture or limited liability company that is not shown as a Named Insured in the Declarations or qualifies as an insured under this provision.

L. FAILURE TO DISCLOSE HAZARDS AND PRIOR OCCURRENCES

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **6. Representations:**

Your failure to disclose all hazards or prior "occurrences" existing as of the inception date of the policy shall not prejudice the coverage afforded by this policy provided such failure to disclose all hazards or prior "occurrences" is not intentional.

M. KNOWLEDGE OF OCCURRENCE, OFFENSE, CLAIM OR SUIT

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **2. Duties In The Event of Occurrence, Offense, Claim Or Suit:**

Knowledge of an "occurrence", offense, claim or "suit" by an agent, servant or "employee" of any insured shall not in itself constitute knowledge of the insured unless an insured listed under Paragraph **1.** of **Section II - Who Is An Insured** or a person who has been designated by them to receive reports of "occurrences", offenses, claims or "suits" shall have received such notice from the agent, servant or "employee".

N. LIBERALIZATION CLAUSE

If we revise this Commercial General Liability Extension Endorsement to provide more coverage without additional premium charge, your policy will automatically provide the coverage as of the day the revision is effective in your state.

O. BODILY INJURY REDEFINED

Under **Section V - Definitions,** Definition **3.** is replaced by the following:

3. "Bodily Injury" means physical injury, sickness or disease sustained by a person. This includes mental anguish, mental injury, shock, fright or death that results from such physical injury, sickness or disease.

62273969 002308 560 of 316 117

P. EXTENDED PROPERTY DAMAGE

Exclusion a. of **COVERAGE A. BODILY INJURY AND PROPERTY DAMAGE LIABILITY** is replaced by the following:

a. Expected Or Intended Injury

"Bodily injury" or "property damage" expected or intended from the standpoint of the insured. This exclusion does not apply to "bodily injury" or "property damage" resulting from the use of reasonable force to protect persons or property.

Q. WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US - WHEN REQUIRED IN A CONTRACT OR AGREEMENT WITH YOU

Under **Section IV - Commercial General Liability Conditions,** the following is added to Condition **8. Transfer Of Rights Of Recovery Against Others To Us:**

We waive any right of recovery we may have against a person or organization because of payments we make for injury or damage arising out of your ongoing operations or "your work" done under a contract with that person or organization and included in the "products-completed operations hazard" provided:

1. You and that person or organization have agreed in writing in a contract or agreement that you waive such rights against that person or organization; and

2. The injury or damage occurs subsequent to the execution of the written contract or written agreement.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

BUSINESS AUTO COVERAGE ENHANCEMENT ENDORSEMENT

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM

With respect to coverage afforded by this endorsement, the provisions of the policy apply unless modified by the endorsement.

If the policy to which this endorsement is attached also contains a Business Auto Coverage Enhancement Endorsement with a specific state named in the title, this endorsement does not apply to vehicles garaged in that specified state.

TRAILERS - INCREASED LOAD CAPACITY	1
TWO OR MORE DEDUCTIBLES	19
UNINTENTIONAL FAILURE TO DISCLOSE HAZARDS	20
WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US	22

SECTION I - COVERED AUTOS is amended as follows:

1. TRAILERS - INCREASED LOAD CAPACITY

The following replaces Paragraph **C.1. Certain Trailers, Mobile Equipment And Temporary Substitute Autos** of **SECTION I - COVERED AUTOS:**

"Trailers" with a load capacity of 3,000 pounds or less designed primarily for travel on public roads.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

SECTION II - LIABILITY COVERAGE is amended as follows:

2. NEWLY FORMED OR ACQUIRED SUBSIDIARIES

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. - Who Is An Insured** is amended to include the following as an "insured":

d. Any legally incorporated subsidiary of which you own more than 50 percent interest during the policy period. Coverage is afforded only for 90 days from the date of acquisition or formation. However, "insured" does not include any organization that:

(1) Is a partnership or joint venture; or

(2) Is an "insured" under any other automobile policy except a policy written specifically to apply in excess of this policy; or

(3) Has exhausted its Limit of Insurance or had its policy terminated under any other automobile policy.

Coverage under this provision **d.** does not apply to "bodily injury" or "property damage" that occurred before you acquired or formed the organization.

3. EMPLOYEES AS INSUREDS

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. Who Is An Insured** is amended to include the following as an "insured":

e. Any "employee" of yours while using a covered "auto" you do not own, hire or borrow but only for acts within the scope of their employment by you. Insurance provided by this endorsement is excess over any other insurance available to any "employee".

f. Any "employee" of yours while operating an "auto" hired or borrowed under a written contract or agreement in that "employee's" name, with your permission, while performing duties related to the conduct of your business and within the scope of their employment. Insurance provided by this endorsement is excess over any other insurance available to the "employee".

4. ADDITIONAL INSURED BY CONTRACT, AGREEMENT OR PERMIT

SECTION II - LIABILITY COVERAGE, Paragraph **A.1. Who Is An Insured** is amended to include the following as an "insured":

g. Any person or organization with respect to the operation, maintenance or use of a covered "auto", provided that you and such person or organization have agreed in a written contract, written agreement, or permit issued to you by governmental or public authority, to add such person, or organization, or governmental or public authority to this policy as an "insured".

However, such person or organization is an "insured":

(1) Only with respect to the operation, maintenance or use of a covered "auto";

(2) Only for "bodily injury" or "property damage" caused by an "accident" which takes place after you executed the written contract or written agreement, or the permit has been issued to you; and

(3) Only for the duration of that contract, agreement or permit.

The "insured" is required to submit a claim to any other insurer to which coverage could apply for defense and indemnity. Unless the "insured" has agreed in writing to primary noncontributory wording per enhancement number 24, this policy is excess over any other collectible insurance.

5. SUPPLEMENTARY PAYMENTS

SECTION II - LIABILITY COVERAGE, Coverage Extensions, 2.a. Supplementary Payments, Paragraphs **(2)** and **(4)** are replaced by the following:

(2) Up to $3,000 for cost of bail bonds (including bonds for related traffic violations) required because of an "accident" we cover. We do not have to furnish these bonds.

(4) All reasonable expenses incurred by the "insured" at our request, including actual loss of earnings up to $500 a day because of time off from work.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

6. AMENDED FELLOW EMPLOYEE EXCLUSION

In those jurisdictions where, by law, fellow "employees" are not entitled to the protection afforded to the employer by the workers compensation exclusivity rule, or similar protection, the following provision is added:

SECTION II - LIABILITY, Exclusion B.5. Fellow Employee does not apply if the "bodily injury" results from the use of a covered "auto" you own or hire if you have workers compensation insurance in force for all of your "employees" at the time of "loss".

This coverage is excess over any other collectible insurance.

SECTION III - PHYSICAL DAMAGE COVERAGE is amended as follows:

7. HIRED AUTO PHYSICAL DAMAGE

Paragraph **A.4. Coverage Extensions** of **SECTION III - PHYSICAL DAMAGE COVERAGE,** is amended by adding the following:

If hired "autos" are covered "autos" for Liability Coverage, and if Comprehensive, Specified Causes of Loss or Collision coverage are provided under the Business Auto Coverage Form for any "auto" you own, then the Physical Damage coverages provided are extended to "autos":

a. You hire, rent or borrow; or

b. Your "employee" hires or rents under a written contract or agreement in that "employee's" name, but only if the damage occurs while the vehicle is being used in the conduct of your business,

subject to the following limit and deductible:

a. The most we will pay for "loss" in any one "accident" or "loss" is the smallest of:

(1) $50,000; or

(2) The actual cash value of the damaged or stolen property as of the time of the "loss"; or

(3) The cost of repairing or replacing the damaged or stolen property with other property of like kind and quality, minus a deductible.

b. The deductible will be equal to the largest deductible applicable to any owned "auto" for that coverage.

c. Subject to the limit, deductible and excess provisions described in this provision, we will provide coverage equal to the broadest coverage applicable to any covered "auto" you own.

d. Subject to a maximum of $1,000 per "accident", we will also cover the actual loss of use of the hired "auto" if it results from an "accident", you are legally liable and the lessor incurs an actual financial loss.

e. This coverage extension does not apply to:

(1) Any "auto" that is hired, rented or borrowed with a driver; or

(2) Any "auto" that is hired, rented or borrowed from your "employee" or any member of your "employee's" household.

Coverage provided under this extension is excess over any other collectible insurance available at the time of "loss".

8. TOWING AND LABOR

SECTION III - PHYSICAL DAMAGE COVERAGE, Paragraph **A.2. Towing,** is amended by the addition of the following:

We will pay towing and labor costs incurred, up to the limits shown below, each time a covered "auto" classified and rated as a private passenger type, "light truck" or "medium truck" is disabled:

a. For private passenger type vehicles, we will pay up to $75 per disablement.

b. For "light trucks", we will pay up to $75 per disablement. "Light trucks" are trucks that have a gross vehicle weight (GVW) of 10,000 pounds or less.

c. For "medium trucks" , we will pay up to $150 per disablement. "Medium trucks" are trucks that have a gross vehicle weight (GVW) of 10,001 - 20,000 pounds.

However, the labor must be performed at the place of disablement.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

9. PHYSICAL DAMAGE - ADDITIONAL TRANSPORTATION EXPENSE COVERAGE

Paragraph **A.4.a. Coverage Extensions, Transportation Expenses** of **SECTION III - PHYSICAL DAMAGE COVERAGE,** is amended to provide a limit of $50 per day and a maximum limit of $1,500.

10. RENTAL REIMBURSEMENT

SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage, is amended by adding the following:

a. We will pay up to $75 per day for rental reimbursement expenses incurred by you for the rental of an "auto" because of "accident" or "loss", to an "auto" for which we also pay a "loss" under Comprehensive, Specified Causes of Loss or Collision Coverages. We will pay only for those expenses incurred after the first 24 hours following the "accident" or "loss" to the covered "auto."

b. Rental Reimbursement requires the rental of a comparable or lessor vehicle, which in many cases may be substantially less than $75 per day, and will only be allowed for the period of time it should take to repair or replace the vehicle with reasonable speed and similar quality, up to a maximum of 30 days.

c. We will also pay up to $500 for reasonable and necessary expenses incurred by you to remove and replace your tools and equipment from the covered "auto". This limit is excess over any other collectible insurance.

d. This coverage does not apply unless you have a business necessity that other "autos" available for your use and operation cannot fill.

e. If "loss" results from the total theft of a covered "auto" of the private passenger type, we will pay under this coverage only that amount of your rental reimbursement expenses which is not already provided under Paragraph **4. Coverage Extension.**

f. No deductible applies to this coverage.

g. The insurance provided under this extension is excess over any other collectible insurance.

If this policy also provides Rental Reimbursement Coverage you purchased, the coverage provided by this Enhancement Endorsement is in addition to the coverage you purchased.

For the purposes of this endorsement provision, materials and equipment do not include "personal effects" as defined in provision **12.B.**

11. EXTRA EXPENSE - BROADENED COVERAGE

Under **SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage,** we will pay for the expense of returning a stolen covered "auto" to you. The maximum amount we will pay is $1,000.

12. PERSONAL EFFECTS COVERAGE

A. SECTION III - PHYSICAL DAMAGE COVERAGE, A. Coverage, is amended by adding the following:

If you have purchased Comprehensive Coverage on this policy for an "auto" you own and that "auto" is stolen, we will pay, without application of a deductible, up to $600 for "personal effects" stolen with the "auto."

The insurance provided under this provision is excess over any other collectible insurance.

B. SECTION V - DEFINITIONS is amended by adding the following:

For the purposes of this provision, "personal effects" mean tangible property that is worn or carried by an "insured." "Personal effects" does not include tools, equipment, jewelry, money or securities.

13. ACCIDENTAL AIRBAG DEPLOYMENT

SECTION III - PHYSICAL DAMAGE COVERAGE, B. Exclusions is amended by adding the following:

If you have purchased Comprehensive or Collision Coverage under this policy, the exclusion for "loss" relating to mechanical breakdown does not apply to the accidental discharge of an airbag.

Any insurance we provide shall be excess over any other collectible insurance or reimbursement by manufacturer's warranty. However, we agree to pay any deductible applicable to the other coverage or warranty.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

14. PHYSICAL DAMAGE DEDUCTIBLE - VEHICLE TRACKING SYSTEM

SECTION III - PHYSICAL DAMAGE COVERAGE, D. Deductible, is amended by adding the following:

Any Comprehensive Deductible shown in the Declarations will be reduced by 50% for any "loss" caused by theft if the vehicle is equipped with a vehicle tracking device such as a radio tracking device or a global position device and that device was the method of recovery of the vehicle.

15. AUDIO, VISUAL AND DATA ELECTRONIC EQUIPMENT COVERAGE

SECTION III - PHYSICAL DAMAGE COVERAGE, B. Exclusions, Paragraph **a.** of the exception to exclusions **4.c.** and **4.d.** is deleted and replaced with the following:

Exclusions **4.c.** and **4.d.** do not apply to:

a. Electronic equipment that receives or transmits audio, visual or data signals, whether or not designed solely for the reproduction of sound, if the equipment is:

(1) Permanently installed in the covered "auto" at the time of the "loss" or removable from a housing unit that is permanently installed in the covered "auto"; and

(2) Designed to be solely operated by use from the power from the "auto's" electrical system; and

(3) Physical damage coverages are provided for the covered "auto".

If the "loss" occurs solely to audio, visual or data electronic equipment or accessories used with this equipment, then our obligation to pay for, repair, return or replace damaged or stolen property will be reduced by a $100 deductible.

16. LOAN / LEASE GAP COVERAGE (Not Applicable In New York)

A. Paragraph **C. Limit Of Insurance** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by adding the following:

The most we will pay for a "total loss" to a covered "auto" owned by or leased to you in any one "accident" is the greater of the:

1. Balance due under the terms of the loan or lease to which the damaged covered "auto" is subject at the time of the "loss" less the amount of:

a. Overdue payments and financial penalties associated with those payments as of the date of the "loss";

b. Financial penalties imposed under a lease due to high mileage, excessive use or abnormal wear and tear;

c. Costs for extended warranties, Credit Life Insurance, Health, Accident or Disability Insurance purchased with the loan or lease;

d. Transfer or rollover balances from previous loans or leases;

e. Final payment due under a "Balloon Loan";

f. The dollar amount of any unrepaired damage which occurred prior to the "total loss" of a covered "auto";

g. Security deposits not refunded by a lessor;

h. All refunds payable or paid to you as a result of the early termination of a lease agreement or as a result of the early termination of any warranty or extended service agreement on a covered "auto";

i. Any amount representing taxes;

j. Loan or lease termination fees; or

2. The actual cash value of the damage or stolen property as of the time of the "loss".

An adjustment for depreciation and physical condition will be made in determining the actual cash value at the time of the "loss". This adjustment is not applicable in Texas.

B. Additional Conditions

This coverage applies only to the original loan for which the covered "auto" that incurred the "loss" serves as collateral, or lease written on the covered "auto" that incurred the "loss".

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

C. SECTION V - DEFINITIONS is changed by adding the following:

As used in this endorsement provision, the following definitions apply:

"Total loss" means a "loss" in which the cost of repairs plus the salvage value exceeds the actual cash value.

A "balloon loan" is one with periodic payments that are insufficient to repay the balance over the term of the loan, thereby requiring a large final payment.

17. GLASS REPAIR - WAIVER OF DEDUCTIBLE

Paragraph **D. Deductible** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by the addition of the following:

No deductible applies to glass damage if the glass is repaired rather than replaced.

18. PARKED AUTO COLLISION COVERAGE (WAIVER OF DEDUCTIBLE)

Paragraph **D. Deductible** of **SECTION III - PHYSICAL DAMAGE COVERAGE** is amended by the addition of the following:

The deductible does not apply to "loss" caused by collision to such covered "auto" of the private passenger type or light weight truck with a gross vehicle weight of 10,000 lbs. or less as defined by the manufacturer as maximum loaded weight the "auto" is designed to carry while it is:

a. In the charge of an "insured";

b. Legally parked; and

c. Unoccupied.

The "loss" must be reported to the police authorities within 24 hours of known damage.

The total amount of the damage to the covered "auto" must exceed the deductible shown in the Declarations.

This provision does not apply to any "loss" if the covered "auto" is in the charge of any person or organization engaged in the automobile business.

19. TWO OR MORE DEDUCTIBLES

Under **SECTION III - PHYSICAL DAMAGE COVERAGE,** if two or more company policies or coverage forms apply to the same "accident", the following applies to Paragraph **D. Deductible:**

a. If the applicable Business Auto deductible is the smaller (or smallest) deductible, it will be waived; or

b. If the applicable Business Auto deductible is not the smaller (or smallest) deductible , it will be reduced by the amount of the smaller (or smallest) deductible; or

c. If the "loss" involves two or more Business Auto coverage forms or policies, the smaller (or smallest) deductible will be waived.

For the purpose of this endorsement, company means any company that is part of the Liberty Mutual Group.

SECTION IV - BUSINESS AUTO CONDITIONS is amended as follows:

20. UNINTENTIONAL FAILURE TO DISCLOSE HAZARDS

SECTION IV- BUSINESS AUTO CONDITIONS, Paragraph **B.2.** is amended by adding the following:

If you unintentionally fail to disclose any hazards, exposures or material facts existing as of the inception date or renewal date of the Business Auto Coverage Form, the coverage afforded by this policy will not be prejudiced.

However, you must report the undisclosed hazard of exposure as soon as practicable after its discovery, and we have the right to collect additional premium for any such hazard or exposure.

© 2017 Liberty Mutual Insurance
Includes copyrighted material of Insurance Services Office Inc., with its Permission.

21. AMENDED DUTIES IN THE EVENT OF ACCIDENT, CLAIM, SUIT, OR LOSS

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **A.2.a.** is replaced in its entirety by the following:

a. In the event of "accident", claim, "suit" or "loss", you must promptly notify us when it is known to:

(1) You, if you are an individual;

(2) A partner, if you are a partnership;

(3) Member, if you are a limited liability company;

(4) An executive officer or the "employee" designated by the Named Insured to give such notice, if you are a corporation.

To the extent possible, notice to us should include:

(a) How, when and where the "accident" or "loss" took place;

(b) The "insureds" name and address; and

(c) The names and addresses of any injured persons and witnesses.

22. WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **A.5. Transfer Of Rights Of Recovery Against Others To Us,** is amended by the addition of the following:

If the person or organization has in a written agreement waived those rights before an "accident" or "loss", our rights are waived also.

23. HIRED AUTO COVERAGE TERRITORY

SECTION IV - BUSINESS AUTO CONDITIONS, Paragraph **B.7. Policy Period, Coverage Territory,** is amended by the addition of the following:

f. For "autos" hired 30 days or less, the coverage territory is anywhere in the world, provided that the "insured's" responsibility to pay for damages is determined in a "suit", on the merits, in the United States, the territories and possessions of the United States of America, Puerto Rico or Canada or in a settlement we agree to.

This extension of coverage does not apply to an "auto" hired, leased, rented or borrowed with a driver.

24. PRIMARY AND NON-CONTRIBUTING IF REQUIRED BY WRITTEN CONTRACT OR WRITTEN AGREEMENT

The following is added to **SECTION IV - BUSINESS AUTO CONDITIONS, General Conditions, B.5. Other Insurance** and supersedes any provision to the contrary:

This Coverage Form's Covered Autos Liability Coverage is primary to and will not seek contribution from any other insurance available to an "insured" under your policy provided that:

1. Such "insured" is a Named Insured under such other insurance; and

2. You have agreed in a written contract or written agreement that this insurance would be primary and would not seek contribution from any other insurance available to such "insured".

SECTION V - DEFINITIONS is amended as follows:

25. BODILY INJURY REDEFINED

Under **SECTION V - DEFINITIONS,** Definition **C.** is replaced by the following:

"Bodily injury" means physical injury, sickness or disease sustained by a person, including mental anguish, mental injury, shock, fright or death resulting from any of these at any time.

EXPERIENCE SUMMARY

Ms. Margaret Eibler is an environmental scientist at Partners Environmental as an Environmental Professional I. She possesses experience in water and soil data collection, project management, and maintaining strong client relationships. She pursued a Bachelor of Science degree in Biomedical Engineering with Minors in Bioinformatics and Studio Art from Miami University of Ohio (2025). In her pursuit of education, she has done various projects and developed foundational skills in biology and data science. Ms. Eibler's current focus is to expand her education and acquire new experience in the field of environmental Assessment, Remediation and Revitalization department of Partners and is eager to learn more about her passions in environmental work

SELECTED PROJECTS

Effect of Exercise on the Soleus Muscle in Mice - Miami University, Oxford, OH: Ms. Eibler worked and researched the effects both aging and exercise have on the soleus muscle on mice. With two others, they researched and compiled both outside resources and raw data into statistical evidence of a change in the muscle. She completed a 10+ page research paper detailing their findings as well as a verbal report with slides to correlate and convey the statical evidence.

Comparative RNA-Seq Data Analysis - Miami University, Oxford, OH: Mrs. Eibler used common bioinformatic tools through Linux and Google CoLab to go through the procedure of a typical RNA-Sequence analysis. She created a pipeline and a research question and got to see what bioinformaticists typically do. After she performed differential expression analysis to answer the question, how do different trimmers compare when analyzing RNA sequences?

Re: Limited Subsurface Investigation
West 73rd Street and Neville Avenue
Cleveland, Ohio 44102
August Mack Project Number JY1829.742

Dear Ms. Chandler:

August Mack Environmental, Inc. (August Mack) has completed subsurface investigation activities at the above-referenced subject property. During a recent Phase I Environmental Site Assessment (ESA) performed by Partners Environmental (Partners) (Partners Project No. 640.11A), the following recognized environmental conditions (RECs) were identified:

- **REC-1:** Historical Operations, 7255-7283 Neville Avenue (Subject Property): The eastern portion of the subject property addressed at 7255-7275 Neville Avenue was developed and utilized as a foundry (Atlas Steel Foundry Company) from approximately 1913 until 1930. At least one (1) 6,000-gallon crude oil underground storage tank (UST) was associated with the foundry operations. Following the foundry, a paste and commercial-grade cleaning product manufacturer (Cleveland Cleaner & Paste Company) operated at 7255-7283 Neville Avenue through the 1980s. Fire department records show that high volumes of solvents were stored and used in their operations, and multiple kerosene and gasoline UST systems were in operation during this time as well. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-2:** Former Foundry, 7299 Neville Avenue, 3297 and 3319 West 73rd Street (Subject Property): The western portion of the subject property was also developed and utilized as a foundry (Standard Steel Casting Company Foundry) from approximately 1913 until 1950. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-3**: Historical Operations, 7260 Neville Avenue, and 7275 Wentworth Avenue (Adjoining Site): The northeastern adjoining site has been developed and utilized as various manufacturing and industrial facilities, generally from 1913 through the 2010s. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-4:** Historical Operations, 3322 West 73rd Street (Adjoining Site): The adjoining site to the southwest was historically utilized as a dry cleaner. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the subject property.

- **REC-5:** Electrical Substation, 3321-3323 West 73rd Street (Adjoining Property): The southern adjoining electrical substation, present since at least 1951, was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release but are considered as a REC due to the close proximity to the subject property. Based on Partners' experience, hazardous substances may have been used at this adjoining property, which have the potential to adversely impact the subject property

The purpose of this investigation is to determine if subsurface conditions on the subject property have been impacted by the environmental concerns identified in the Phase I ESA. This report was prepared at the request of Ms. Jennifer Chandler with CHN Housing Partners and may be relied on by CHN Housing Partners. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by August Mack.

SUBSURFACE INVESTIGATION

August Mack mobilized to the subject property on July 31, 2024, to perform the subsurface investigation activities. Prior to starting subsurface activities, ground

penetrating radar (GPR), electromagnetic (EM) locating, and other utility locating tools were utilized to clear all boring locations.

A total of eight (8) soil borings (SB-1 through SB-8) were advanced across the subject property using a Geoprobe® direct push sampling system (Geoprobe®). Information regarding boring locations is provided below and boring locations are depicted on **Figure 1**.

- SB-1 was advanced on the east portion of the subject property, in the location of former Atlas Steel Foundry Company;
- SB-2 was advanced on the east portion of the subject property, in the suspected location of a former 6,000-gallon crude oil UST;
- SB-3 was advanced on the east portion of the subject property, in the suspected location of a former 1,000-gallon fuel oil UST;
- SB-4 was advanced on the north-northeast subject property boundary, in the location of the former Cleveland Cleaner & Paste Company and adjacent to a historically industrial property to the north;
- SB-5 was advanced on the west portion of the subject property, in the location of former Standard Casting Company and adjacent to an electrical substation to the south; and,
- SB-6 through SB-8 were advanced throughout the west portion of the subject property in the location of former Standard Casting Company.

Sampling Methodology

Soil borings SB-1 through SB-8 were advanced to depths ranging from 20 to 25 feet below grade (ft bg) using a Geoprobe® sampling system. The purpose of the borings was to field screen soils, determine geological conditions, and collect soil and groundwater samples for laboratory analysis. All soil sample intervals were inspected in the field for odors and staining and screened using a photoionization detector (PID). Field screening results and soil lithological information is provided on soil boring logs included as **Attachment A**.

One (1) soil sample interval from each boring location was selected for laboratory analysis based on field inspection observations and screening results. Soil samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of volatile organic compounds (VOCs) via United States Environmental Protection Agency (U.S. EPA) method 8260, polycyclic aromatic hydrocarbons (PAHs) via U.S. EPA method 8270, and Resource Conservation and Recovery Act (RCRA) 8 Metals U.S. EPA method 6010B/7470-7471. Additionally, the

sample from SB-5 was also submitted for polychlorinated biphenyl (PCB) analysis via U.S. EPA method 8082.

Soil borings were converted into temporary, 1-inch diameter PVC wells to aid in the collection of groundwater samples. Groundwater samples were collected from the temporary wells using a check valve attached to new, disposable sample tubing and submitted to PACE for analysis of VOCs via U.S. EPA method 8260, PAHs via U.S. EPA method 8270, and RCRA 8 Metals via U.S. EPA method 8082. Groundwater was not encountered in multiple boring locations; therefore, an additional soil sample was collected at the deepest interval in borings SB-4, SB-5, SB-6, SB-6, and SB-8.

August Mack field procedures are provided in **Attachment B.**

Field Observations

Inspection of collected soil samples from the borings revealed that the subsurface geology consists primarily of alternating layers of clay, silty clay, and silt. A sand seam was also observed at approximately 7.5 to 8.25 ft bg at SB-1, SB-4, and SB-5 from 9 to 10 ft bg. Fill material (brick, gravel, and soil) was observed at depths between 0 to 2 ft bg at SB-1, SB-3, SB-4, and SB-5. Saturated conditions were encountered beginning at approximately 4 to 8 ft bg at all soil boring locations, however, most of the borings were dry during groundwater collection. No soil or groundwater sample was able to be collected at SB-2, due to shallow refusal encountered in the vicinity of the sample area. Due to reduced available groundwater, sampling at SB-3 was limited to VOCs.

Field observations from the soil borings did reveal evidence of staining, odor, and sheen from soil boring SB-7 at 5 to 8 ft bg. In addition, the majority of PID measurements collected from the soil borings were below 105.1 parts per million (ppm).

Soil Analytical Results

The soil analytical results were compared to the Ohio Environmental Protection Agency (OEPA) Voluntary Action Program (VAP) Generic Direct Contact Soil Standards (GDCSS) for commercial/industrial land use. The laboratory analysis revealed the following results:

- Three (3) VOCs were detected in all soil samples (carbon disulfide, p-isopropyltoluene, and methylene chloride). All detected concentrations are below their most stringent standard.
- Several PAHs were detected in all soil samples. All detected concentrations are below their most stringent standard.

- Metals including arsenic, barium, cadmium, chromium, and lead were detected in each of the soil samples. All concentrations were below their respective standard with the exception of arsenic in SB-4 (0-2), SB-5 (1-3), and SB-6 (6-8). Arsenic was above the GDCSS standard for residential but well below the GDCSS standards for commercial / industrial and construction workers.

The soil analytical results are summarized in **Table 1**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

Groundwater Analytical Results

The groundwater analytical results were compared to the OEPA VAP Generic Unrestricted Potable Use Standards (UPUS). The laboratory analysis revealed the following results:

- No VOCs were detected above the LRLs.
- No PAHs were detected above the LRLs.
- All analyzed metals were not detected above LRLs, with the exception of barium, was detected above LRLs but well below its comparative OEPA VAP UPUS standard.

It is noted that the subject property is located within an OEPA approved Urban Setting Designation (USD), known as the Cleveland City-Wide and the Cleveland - Inner West. A USD recognizes that remediation of groundwater to drinking water standards is not necessary because no receptors will be drinking the groundwater in the USD area (i.e. area connected to municipal water supply).

The groundwater analytical results are summarized in **Table 2**, and a copy of the laboratory analytical report and chain of custody documentation is included in **Attachment C**.

SUMMARY AND CONCLUSION

August Mack has completed a Limited Subsurface Investigation for the subject property located at West 73rd Street and Neville Avenue, Cleveland, Ohio. A total of eight (8) soil borings were advanced throughout the subject property in order to evaluate if subsurface conditions have been impacted by the RECs identified in the recent Phase I ESA completed by August Mack.

Field observations and PID measurements from the soil borings did reveal any evidence of impacts at the subject property. Although, laboratory analysis of soil and groundwater samples from the borings did not reveal any constituents of concern

above their respective applicable residential standards, with the exception of arsenic. It should be noted that according to the OEPA *Evaluation of Background Metal Soil Concentrations* (updated March 2013), the range of background arsenic concentration in Cuyahoga County is 4.6 to 33.1 mg/kg. In addition, according to the Cox-Colvin background metals study for the State of Ohio (dated 1996), arsenic is present throughout Ohio at concentrations ranging from 0.5 mg/kg to 56 mg/kg, which is within range of the samples collected at the Study Site. It is the opinion of August Mack that the arsenic detected throughout the Site is consistent with naturally occurring/background concentrations as reported in published background studies for the State of Ohio and are not likely a result of historical Site activities, or the present fill material.

Additionally, no soil or groundwater sample was collected at SB-2, due to shallow refusal encountered in the vicinity of the sample area. During GPRS no anomalies were identified within the sample area.

Based on the findings presented above, August Mack did not identify any evidence of a release at the subject property and no further investigation is warranted at this time.

We appreciate the opportunity to provide you with environmental consulting services and trust that this submittal is in accordance with your needs. Please feel free to contact us if you have any questions or comments or require additional information regarding this project or the project site.

Sincerely,

Sarah Bergund

ATTACHMENT B

Field Procedures

SOIL & GROUNDWATER SAMPLING PROCEDURES

Soil Sampling Activities

Soil borings were advanced using a Geoprobe® Direct Push Dual-Tube Sampling System (Geoprobe®) and hand augers. Soil borings were advanced to the desired depth required for the investigation. Soil samples were collected continuously from each boring location by using the dual-tube tooling, which includes a disposable acetate sample liner. The sampler was recovered with a 4-foot soil sample collected within an acetate liner inside the barrel. A new acetate liner was used for each sample collected. All reusable equipment that contacted the soil samples was decontaminated with a Liquinox® solution and rinsed with water between each sample collection.

Upon retrieving the 4-foot sections of soil, the samples were divided into 2-foot sections and inspected in the field for evidence of contamination (odors, staining, etc.). Each sample was also screened in the field by headspace analysis using a MiniRae® photoionization detector (PID). The 2-foot section that exhibited the highest potential for contamination was sampled and transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. All samples were submitted to Pace Analytical (PACE) located in Indianapolis, Indiana, for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals, via U.S. EPA 8260, 8270SIM, and 6010B/7470-7471 methods. One (1) additional sample will be collected from SB-5 and analyzed for polychlorinated biphenyl (PCB) via U.S. EPA method 8082.

Groundwater Sampling Activities

Temporary 1-inch groundwater sampling piezometers were installed in two of the three boring location to allow groundwater to collect for sampling purposes. Groundwater samples were collected from the temporary groundwater sampling points using a check valve and dedicated tubing. The groundwater samples were transferred to clean, labeled sample containers (provided by the laboratory) and placed on ice in a cooler for preservation in the field. Groundwater samples were submitted to PACE for laboratory analysis of VOCs, PAHs, and RCRA 8 Metals via U.S. EPA 8260 , 8270SIM, and 6010B/7470-7471 methods. One (1) additional sample will be collected from SB-5 5 and analyzed for PBC via U.S. EPA method 8082.

Site Restoration Activities

Upon completion of the field sampling activities, the boreholes were abandoned by manually pouring soil cuttings and bentonite into the boring. Subject property restoration was completed by patching the surface materials to match pre-investigation conditions.

RE: Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Dear James Bell:

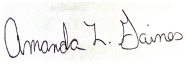
Enclosed are the analytical results for sample(s) received by the laboratory on August 01, 2024. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Indianapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,



Amanda Gaines

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-4-0-2 **Lab ID: 50379279005** Collected: 07/31/24 14:00 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-6-1-3 **Lab ID: 50379279009** Collected: 07/31/24 11:13 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-6-6-8 **Lab ID: 50379279010** Collected: 07/31/24 11:13 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-7-6-8 **Lab ID: 50379279011** Collected: 07/31/24 12:00 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-8-1-3 **Lab ID: 50379279013** Collected: 07/31/24 12:53 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

Sample: SB-8-4-6 **Lab ID: 50379279014** Collected: 07/31/24 12:53 Received: 08/01/24 09:00 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

QUALIFIERS

Project: JY1829.742- West Veterans
Pace Project No.: 50379279

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

C9	Common Laboratory Contaminant.
ED	Due to the extract's physical characteristics, the analysis was performed at dilution.
HS	Results are from sample aliquot taken from VOA vial with headspace (air bubble greater than 6 mm diameter).
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
N2	The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.
pH	Post-analysis pH measurement indicates insufficient VOA sample preservation.

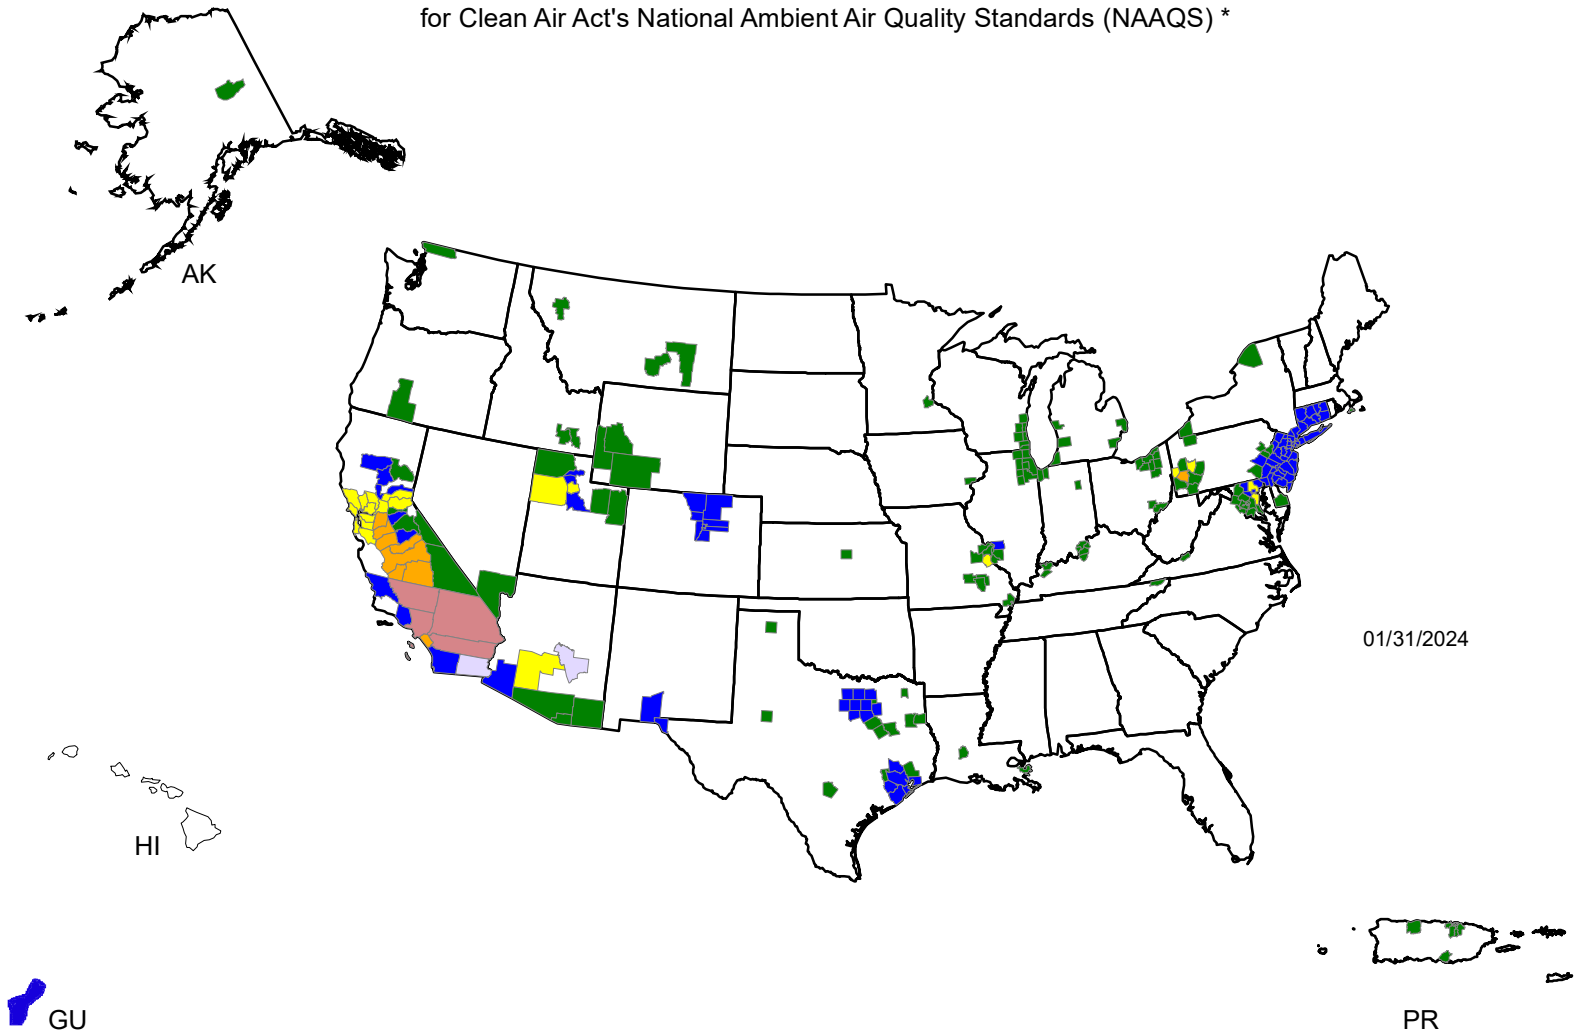
APPENDIX D
AIR QUALITY

Counties Designated "Nonattainment"

for Clean Air Act's National Ambient Air Quality Standards (NAAQS) *



Legend **

- County Designated Nonattainment for 6 NAAQS Pollutants
- County Designated Nonattainment for 5 NAAQS Pollutants
- County Designated Nonattainment for 4 NAAQS Pollutants
- County Designated Nonattainment for 3 NAAQS Pollutants
- County Designated Nonattainment for 2 NAAQS Pollutants
- County Designated Nonattainment for 1 NAAQS Pollutant

* The National Ambient Air Quality Standards (NAAQS) are health standards for Carbon Monoxide, Lead (1978 and 2008), Nitrogen Dioxide, 8-hour Ozone (2008), Particulate Matter (PM-10 and PM-2.5 (1997, 2006 and 2012), and Sulfur Dioxide.(1971 and 2010)

** Included in the counts are counties designated for NAAQS and revised NAAQS pollutants. Revoked 1-hour (1979) and 8-hour Ozone (1997) are excluded. Partial counties, those with part of the county designated nonattainment and part attainment, are shown as full counties on the map.

Within 1000 feet of an Ozone 1-hr (1979 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of an Ozone 8-hr (1997 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of an Ozone 8-hr (2008 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of an Ozone 8-hr (2015 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of a Lead (2008 standard) Non-Attainment/Maintenance Area?	no
Within 1000 feet of a SO2 1-hr (2010 standard) Non-Attainment/Maintenance Area?	no
Within 1000 feet of a PM2.5 24hr (2006 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of a PM2.5 Annual (1997 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of a PM2.5 Annual (2012 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of a PM10 (1987 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of a CO Annual (1971 standard) Non-Attainment/Maintenance Area?	yes
Within 1000 feet of a NO2 Annual (1971 standard) Non-Attainment/Maintenance Area?	no
Within 1000 feet of a Federal Land?	no
Within 1000 feet of an impaired stream?	no
Within 1000 feet of an impaired waterbody?	yes
Within 1000 feet of a waterbody?	no
Within 1000 feet of a stream?	no
Within 1000 feet of an NWI wetland?	Available Online
Within 1000 feet of a Brownfields site?	yes
Within 1000 feet of a Superfund site?	no

Within 1000 feet of a Toxic Release Inventory (TRI) site?	yes
Within 1000 feet of a water discharger (NPDES)?	no
Within 1000 feet of a hazardous waste (RCRA) facility?	yes
Within 1000 feet of an air emission facility?	yes
Within 1000 feet of a school?	no
Within 1000 feet of an airport?	no
Within 1000 feet of a hospital?	no
Within 1000 feet of a designated sole source aquifer?	no
Within 1000 feet of a historic property on the National Register of Historic Places?	no
Within 1000 feet of a Chemical Data Reporting (CDR) site?	no
Within 1000 feet of a Land Cession Boundary?	yes
Within 1000 feet of a tribal area (lower 48 states)?	no
Within 1000 feet of the service area of a mitigation or conservation bank?	yes
Within 1000 feet of the service area of an In-Lieu-Fee Program?	yes
Within 1000 feet of a Public Property Boundary of the Formerly Used Defense Sites?	no
Within 1000 feet of a Munitions Response Site?	no
Within 1000 feet of an Essential Fish Habitat (EFH)?	no
Within 1000 feet of a Habitat Area of Particular Concern (HAPC)?	no
Within 1000 feet of an EFH Area Protected from Fishing (EFHA)?	no
Within 1000 feet of a Bureau of Land Management Area of Critical Environmental Concern?	no
Within 1000 feet of an ESA-designated Critical Habitat Area per U.S. Fish & Wildlife Service?	no
Within 1000 feet of an ESA-designated Critical Habitat river, stream or water feature per U.S. Fish & Wildlife Service?	no

Created on: 7/11/2025 5:48:21 PM

Ohio Nonattainment/Maintenance Status for Each County by Year for All Criteria Pollutants

Data is current as of December 31, 2023

Listed by County, NAAQS, Area. The 8-hour Ozone (1997) standard was revoked on April 6, 2015 and the 1-hour Ozone (1979) standard was revoked on June 15, 2005.

* The 1997 Primary Annual PM-2.5 NAAQS (level of 15 µg/m^3) is revoked in attainment and maintenance areas for that NAAQS. For additional information see the PM-2.5 NAAQS SIP Requirements Final Rule, effective October 24, 2016. (81 FR 58009)

This map is for general reference only. The Coastal Barrier Resources System (CBRS) boundaries depicted on this map are representations of the controlling CBRS boundaries, which are shown on the official maps, accessible at https://www.fws.gov/library/collections/official-coastal-barrier-resources-system-maps. All CBRS related data should be used in accordance with the layer metadata found on the CBRS Mapper website.

The CBRS Buffer Zone represents the area immediately adjacent to the CBRS boundary where users are advised to contact the Service for an official determination (https://www.fws.gov/service/coastal-barrier-resources-system-property-documentation) as to whether the property or project site is located "in" or "out" of the CBRS.

CBRS Units normally extend seaward out to the 20- or 30-foot bathymetric contour (depending on the location of the unit). The true seaward

Re: 24-1923 - Cleveland West Veterans Housing

Project: The proposed project involves the development of a 62-unit, new construction veterans housing development with associated paved areas, landscaping, and parking area.

Location: The proposed project is located in Cleveland, Cuyahoga County, Ohio.

The Ohio Department of Natural Resources (ODNR) has completed a review of the above referenced project. These comments were generated by an inter-disciplinary review within the Department. These comments have been prepared under the authority of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.), the National Environmental Policy Act, the Coastal Zone Management Act, Ohio Revised Code and other applicable laws and regulations. These comments are also based on ODNR's experience as the state natural resource management agency and do not supersede or replace the regulatory authority of any local, state, or federal agency nor relieve the applicant of the obligation to comply with any local, state, or federal laws or regulations.

Natural Heritage Database: The Natural Heritage Database has the following data within one mile of the project area:

Bigmouth Shiner (*Notropis dorsalis*), T

Conservation status abbreviations are as follows: E = state endangered; T = state threatened; P = state potentially threatened; SC = state species of concern; SI = state special interest; U = state status under review; X = presumed extirpated in Ohio; FE = federally endangered, and FT = federally threatened. The review was performed on the specified project area as well as an additional one-mile radius. Records searched date from 1980. Features searched include locations of rare and endangered plants and animals determined to be of value to the conservation of their species, high quality plant communities, animal breeding assemblages, and outstanding geological features.

The species listed above is not recorded within the boundaries of the specified project area. However, please note that Ohio has not been completely surveyed and we rely on receiving information from many sources. Therefore, a lack of records for an area is not a statement that rare species or unique features are absent from that area.

Fish and Wildlife: The Division of Wildlife (DOW) has the following comments.

The DOW recommends that impacts to streams, wetlands and other water resources be avoided and minimized to the fullest extent possible, and that Best Management Practices be utilized to minimize erosion and sedimentation.

The entire state of Ohio is within the range of the Indiana bat (*Myotis sodalis*), a state endangered and federally endangered species, the northern long-eared bat (*Myotis septentrionalis*), a state endangered and federally endangered species, the little brown bat (*Myotis lucifugus*), a state endangered species, and the tricolored bat (*Perimyotis subflavus*), a state endangered species. During the spring and summer (April 1 through September 30), these species of bats predominately roost in trees behind loose, exfoliating bark, in crevices and cavities, or in the leaves. However, these species are also dependent on the forest structure surrounding roost trees. If trees are present within the project area, and trees must be cut, the DOW recommends cutting only occur from October 1 through March 31, conserving trees with loose, shaggy bark and/or crevices, holes, or cavities, as well as trees with DBH ≥ 20 if possible. If trees are present within the project area, and trees must be cut during the summer months, the DOW recommends a mist net survey or acoustic survey be conducted from June 1 through August 15, prior to any cutting. Mist net and acoustic surveys should be conducted in accordance with the most recent version of the "*OHIO DIVISION OF WILDLIFE GUIDANCE FOR BAT SURVEYS AND TREE CLEARING*". If state listed bats are documented, DOW recommends cutting only occur from October 1 through March 31. However, limited summer tree cutting may be acceptable after consultation with the DOW (contact Eileen Wyza at Eileen.Wyza@dnr.ohio.gov).

The DOW also recommends that a desktop habitat assessment is conducted, followed by a field assessment if needed, to determine if a potential hibernaculum is present within the project area. Direction on how to conduct habitat assessments can be found in the current USFWS "*RANGE-WIDE INDIANA BAT & NORTHERN LONG-EARED BAT SURVEY GUIDELINES*." If a habitat assessment finds that a potential hibernaculum is present within 0.25 miles of the project area, please send this information to Eileen Wyza for project recommendations. If a potential or known hibernaculum is found, the DOW recommends a 0.25-mile tree cutting and subsurface disturbance buffer around the hibernaculum entrance, however, limited summer or winter tree cutting may be acceptable after consultation with the DOW. If no tree cutting or subsurface impacts to a hibernaculum are proposed, this project is not likely to impact these species.

The project is within the range of the lake sturgeon (*Acipenser fulvescens*), a state endangered fish and a federal species of concern, the channel darter (*Percina copelandi*), a state threatened fish, and the bigmouth shiner (*Notropis dorsalis*), a state threatened fish. The DOW recommends no in-water work in perennial streams from March 15 through June 30 to reduce impacts to indigenous aquatic species and their habitat. If no in-water work is proposed in a perennial stream, this project is not likely to impact these or other aquatic species.

The project is within the range of the smooth greensnake (*Opheodrys vernalis*), a state endangered species. This species is primarily a prairie inhabitant, but also found in marshy meadows and roadside ditches. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

The project is within the range of the spotted turtle (*Clemmys guttata*), a state threatened species. This species prefers fens, bogs and marshes, but also is known to inhabit wet prairies, meadows, pond edges,

wet woods, and the shallow sluggish waters of small streams and ditches. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

The project is within the range of the Blanding's turtle (*Emydoidea blandingii*), a state threatened species. This species inhabits marshes, ponds, lakes, streams, wet meadows, and swampy forests. Although essentially aquatic, the Blanding's turtle will travel over land as it moves from one wetland to the next. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

Due to the potential of impacts to federally listed species, as well as to state listed species, we recommend that this project be coordinated with the US Fish & Wildlife Service.

Water Resources: The Division of Water Resources has the following comment.

If the subject project is in a floodplain regulated by the Federal Emergency Management Agency (FEMA), the local local floodplain administrator should be contacted concerning the possible need for any floodplain permits or approvals. The FEMA National Flood Hazard Layer (NHFL) Viewer website can be utilized to see if the project is in a FEMA regulated floodplain. If the project is not in a FEMA regulated floodplain, then no further action is required.

ODNR appreciates the opportunity to provide these comments. Please contact Mike Pettegrew (Environmental Services Administrator) at mike.pettegrew@dnr.ohio.gov if you have questions about these comments or need additional information.

Expiration: *ODNR Environmental Reviews are typically valid for 2 years from the issuance date. If the scope of work, project area, construction limits, and/or anticipated impacts to natural resources have changed significantly from the original project submittal, then a new Environmental Review request should be submitted.*

United States Department of the Interior

FISH AND WILDLIFE SERVICE

In Reply Refer To: 12/03/2024 15:40:09 UTC
Project Code: 2025-0026410
Project Name: MSG-OHFA-0028 Cleveland West Veterans-24-0019

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

PROJECT SUMMARY

Project Code: 2025-0026410
Project Name: MSG-OHFA-0028 Cleveland West Veterans-24-0019
Project Type: Residential Construction
Project Description: Development of a 62-unit, new construction veteran housing development. Site plan includes associated parking area and landscaped areas.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@41.46394515,-81.7375628987256,14z

Counties: Cuyahoga County, Ohio

ENDANGERED SPECIES ACT SPECIES

There is a total of 4 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

MAMMALS

NAME	STATUS
Indiana Bat *Myotis sodalis*	Endangered

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/5949

BIRDS

NAME	STATUS
Piping Plover *Charadrius melodus*	Endangered

Population: [Great Lakes watershed DPS] - Great Lakes, watershed in States of IL, IN, MI, MN, NY, OH, PA, and WI and Canada (Ont.)
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/6039

Rufa Red Knot *Calidris canutus rufa*	Threatened

There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/1864

INSECTS

NAME	STATUS
Monarch Butterfly *Danaus plexippus*	Candidate

No critical habitat has been designated for this species.
Species profile: https://ecos.fws.gov/ecp/species/9743

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

Report produced December 2, 2024 using EJScreen Version 2.3

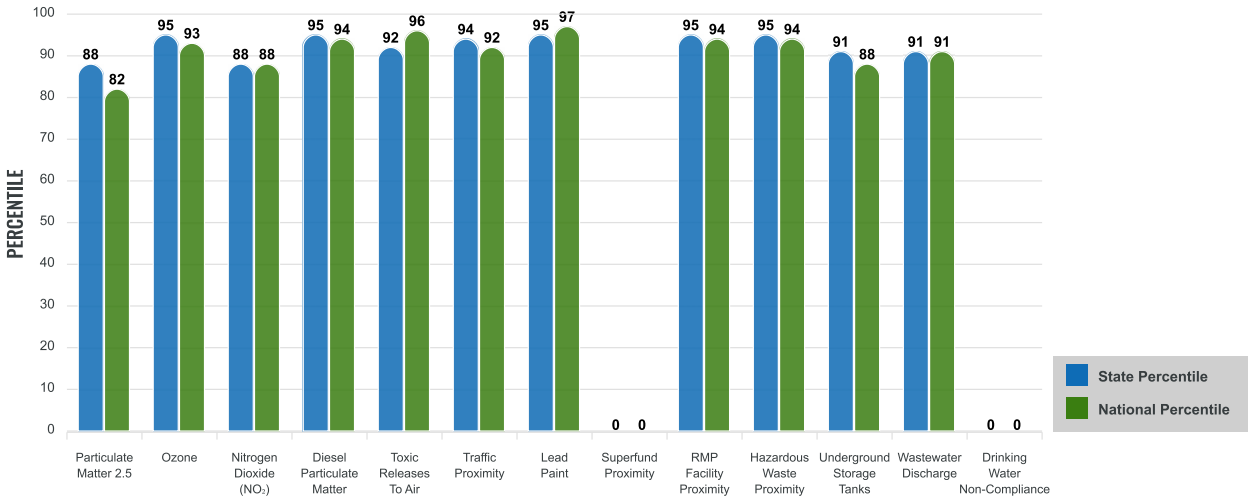
Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the EJScreen website.

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

EJ INDEXES FOR THE SELECTED LOCATION



SUPPLEMENTAL INDEXES

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low income, percent persons with disabilities, percent less than high school education, percent limited English speaking, and percent low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION

This Message is from an external sender.

--- Please respond above this line ---

RE: PUBLIC RECORDS REQUEST of August 22, 2025, Reference #P017473-082225.

Dear Claire Cerne,

TheCity of Cleveland Division Of Fire received a public record requestfrom you on August 22, 2025. You requested the following:

“Please provide all documentation available for any aboveground storage tanks in a one mile radius of the property listed at 3311 WEST 73RD STREET CLEVELAND, OHIO. This property is currently vacant.”

TheCity Of Cleveland Division Of Fire has reviewed its files and has not located responsive records to your request.

Public Safety - Public Records Request - P017473-082225

If you have any questions, or wish to discuss this further, you can reply to this email, go to the Cleveland Public Records Center and Send a New Message or call 216-664-6653.

Sincerely,

City of Cleveland - Division Of Fire

To monitor the progress or update this request please log into the Cleveland Public Records Center.

CITY OF CLEVELAND
Mayor Justin M. Bibb

APPENDIX K
FARMLANDS PROTECTION

2020 Census

Urban Areas of the United States and Puerto Rico

Legend

KS	State (or statistical equivalent)
	County (or statistical equivalent)
Sumter	Urban Area with a population of 10,000 or more[1]
Dillon	Urban Area with a population of less than 10,000[2]

[1] *Urban Area with a population of 25,000 or more for Alaska*

[2] *Urban Area with a population of less than 25,000 for Alaska*

Note: An urban area title consists of the commonly recognized place names within the urban area. The full title also includes the two letter United States Postal Service (USPS) state abbreviation(s) of the state(s) the urban area is within. For urban areas within a single state, the state abbreviation is omitted on this map.

Vintage and source: 2020 Census Urban Areas reflect the corrections applied in February 2023 and June 2023. All other legal and statistical boundaries are as of January 1, 2020. 2020 Census Urban Areas are delineated based on the results of the 2020 Census, National Land Cover Database (NLCD) and Coastal Change Analysis Program (C-CAP) land cover data, and Longitudinal Employer-Household Dynamics (LEHD) Origin-Destination Employment Statistics (LODES) commuting data.

About urban areas: The Census Bureau's urban areas represent densely developed territory, and encompass residential, commercial, and other non-residential urban land uses. The Census Bureau delineates urban areas after each decennial census by applying specified criteria to decennial census and other data.

For more information about the U.S. Census Bureau and Census Urban and Rural Classification, please visit <www.census.gov>.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 12/2/2024 at 9:43 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

APPENDIX M
HISTORIC PRESERVATION

PROJECT SUMMARY FORM
OHIO's STATE HISTORIC PRESERVATION OFFICE

Section 106 Review and Ohio Revised Code 149.53

This is a two-tiered form. Sections 1 to 3 must be completed by everyone submitting a Project Summary Form (PSF) to the Ohio's State Historic Preservation Office (SHPO). Sections 4 to 6 are reserved for agencies, consultants, or applicants that have defined an Area of Potential Effects, identified consulting parties and historic properties, and have made a determination of effect.

DO NOT USE THIS FORM for projects requiring a license from the **Federal Communications Commission**. Please submit the FCC Forms 620 or 621.

Questions can be directed to section106@ohiohistory.org.

All fields that are applicable must be completed to prevent delays in the review process. Please note that SHPO will not accept a PSF without a federal or state agency contact provided.

SECTION 1: PROJECT CONTACT INFORMATION

A. Applicant Contact Information:
   a. Name: Jeffrey Nagle, Project Historian
   b. Agency/Company: The Mannik & Smith Group, Inc.
   c. Mailing Address: 20600 Chagrin Blvd. Suite 500, Shaker Heights, Ohio 44122
   d. Phone Number: 301-412-6365
   e. Email Address: jnagle@manniksmithgroup.com

B. Project Name and Basic Information
   a. Project Name: Cleveland West Veterans
   b. Is this a new project submittal to SHPO? **YES** or NO
      If NO, please provide the SHPO Reference Number from previous submission.
   c. Reference number used by Federal/State Agency to identify this project.

C. Project Address or vicinity: 3311 W. 73rd St

D. City/Township: Cleveland

E. County: Cuyahoga

F. Is this a submission for Section 106? If YES, complete G & H. If NO, complete I, J, & K.

G. Federal Agency/Agency Name and Contact Information. (HUD Entitlement Communities acting under delegated environmental review authority should list their own contact information). **Housing & Urban Development**

Ohio Housing Finance Agency
Rachel Nelson
Project Administration Section Chief
2600 Corporate Exchange Dr., Suite 300
Columbus, OH 43231
Ph: 614-644-7592
Fax: 614-644-5393
RNelson@ohiohome.org

H. Type of Federal Assistance. List all known sources of federal funding, and permits. **HOME funds**

I. Is this submission for Ohio Revised Code 149.53? No

J. State Agency and Contact Person and Contact Information

K. Type of State Assistance

SECTION 2: PROJECT DESCRIPTION AND LOCATION

A. Provide a detailed description of the proposed work associated with the project.

The Project Area forms a parallelogram running approximately 450 feet east to west and 450 feet north to south between W. 73rd and the CSX line. The undertaking is a new permanent supportive housing development consisting of a single, approximately 55,000 square foot, multi-family 3-story apartment building with sixty-two (62) one-bedroom units. Depth of ground disturbing activity will be concomitant to the foundation of a three-story structure without basement.

B. If the project involves ground-disturbing construction activities, provide a description of the construction activity and the horizontal and vertical dimensions of the expected ground disturbance.

a. Provide photographs of the area expected to have ground disturbance.

b. Provide a narrative description of current land use and conditions.

The Project Area is currently vacant, in scrub cover with three strips of overgrown concrete from a parking lot.

c. If known, please provide a description of previous land use and past ground disturbance activities. Include historic aerials and maps if useful.

When the first detailed maps of this part of Cleveland were created in 1874, the Project Area was undeveloped, surrounded to the north, west, and northeast by subdivisions and to the south by the 3C&I rail line. By 1898, it had been subdivided and was occupied by six small dwellings: three timber and three brick. By 1927, the east end was

occupied by the Cleveland Cleaner & Paste Company and the west by a long iron building with brick fronts; by 1951, only Cleveland Cleaner & Paste remained, with the rest of the Project Area used as a parking lot. The Cleveland Cleaner & Paste building was razed between 1982 and 1994, and the lot has stood vacant since.

C. Provide a map depicting the location of the project; road names must be identified and legible. The use of Google maps is acceptable but any legible aerial, topographic, or county map will work. Please outline the work limits of your project or if it is a single house, a dot on the house will suffice.
D. Current color photographs of all buildings or structures that are directly or indirectly affected by the project. Include an approximate age of the buildings/structures.

SECTION 3: ASSOCIATED DOCUMENTATION

If available, provide any additional information such as plan or schematic sheets, renderings of the proposed building/structure/development, and/or agency correspondences. If a Phase I archaeology or reconnaissance level history architecture survey was completed, please provide the report.

Email the completed PSF form and supporting documentation to our office via section106@ohiohistory.org. Submission of the form does not constitute completion of the consultation process. Once the SHPO has received the information they will provide within 30 days one of the following recommendations in writing:

- A finding of *No Historic Properties Affected* [36 CFR § 800.4(d) (1)].
- A request for additional information or clarification.
- A request for a Phase I archaeology and/or reconnaissance level history architecture survey if not previously provided.
- A finding of *No Adverse Effect* on historic properties [36 CFR § 800.5(b)].
- A finding of *Adverse Effect* on historic properties [36 CFR § 800.5(d) (2)].

Note that the file size is limited to 20 MB. If your file sizes are larger, SHPO will be unable to receive your submission. To check your submission was received and logged in for our review, please visit https://www.ohiohistory.org/preserving-ohio/federal-state-reviews/project-status-check-for-106/

PLEASE READ BEFORE SUBMITTING YOUR PSF

If you are an agency or consultant working on behalf of an agency continue to SECTION 4: AREA OF POTENTIAL EFFECTS

SECTION 4: AREA OF POTENTIAL EFFECT

The Area of Potential Effect (APE) means the geographic area or areas within which an undertaking may directly or indirectly cause alterations in the character or use of historic properties, if any such properties exist. The APE is influenced by the scale and nature of an undertaking and may be different for different kinds of effects caused by the undertaking [36 CFR Part 800.16(d)].

A. Provide an aerial map depicting the undertaking's APE.
B. Provide a description of the horizontal and vertical extent of the APE that accounts for direct and indirect effects. Explain the steps taken to identify the APE, and your justification for the boundaries chosen.

The APE describes buildings within the viewshed of a three-story apartment building on the Project Area. It begins at the southwest corner of the boundary for 3344 W. 73rd and continues north-northeast paralleling W. 73rd to the northwest corner of 7402 Neville Avenue. At this point it turns east and continues parallel to Neville, crossing W. 73rd and passing through the vacant lot between 3279 W. 73rd and 3271-3269 W. 73rd. At the vacant former 7260 Neville it turns north and continues to Wentworth Avenue, continuing east along Wentworth to the CSX tracks. It turns southwest and follows the rail cut to a point parallel with 3344 W. 73rd, then turns west and returns to the beginning point.

SECTION 5: IDENTIFICATION OF HISTORIC PROPERTIES

Describe the cultural resources and properties listed in or eligible for listing in the National Register of Historic Places located within your APE and how they were identified. Identification efforts must be carried out by a qualified individual or individuals who meet the Secretary of the Interior's Professional Qualification Standards and have demonstrated familiarity with the range of historic properties that may be encountered, and their characteristics.

A. Include a SHPO GIS map depicting known resources within the APE.
B. Provide a clear description of the steps taken to determine the presence or absence of historic properties within the APE.

The SHPO's Online Mapping System was consulted. The APE includes seven standing sites listed to the Ohio Historic Inventory, and one site that is listed but has subsequently been razed. All OHI listed sites within the APE have been determined not to be eligible for the National Register individually or as

part of a district. MSG completed a site visit to photographically document conditions within the APE. No historic properties are present in the APE. The APE was developed around the turn of the twentieth century. The buildings within the APE are unexceptional examples of early twentieth century vernacular dwellings that have lost context due to demolition, later infill, alteration and replacement of materials that do not rise to the level of inclusion under Criteria A, B, or C, and are unlikely to contribute under Criterion D.

C. Provide a description of how you consulted with others (including American Indian Tribes) who may have knowledge of historic properties in the APE. Please provide any written responses that you may have received from the public and consulting parties.

On May 6, 2025, the Ohio Department of Development sent letters to the following tribes requesting comment on the project: the Delaware Nation, the Eastern Shawnee Tribe of Oklahoma, the Forest County Potawatomi Community, the Hannahville Indian Community, the Little Traverse Bay Bands of Odawa Indians, the Miami Tribe of Oklahoma, the Ottawa Tribe of Oklahoma, the Seneca Nation of Indians, the Seneca-Cayuga Nation, and the Wyandotte Nation. To date, none of the tribes have responded.

D. If applicable, include a pdf copy of your Phase I archaeology and/or reconnaissance level history architecture reports.
   a. Provide shapefiles for the area surveyed for archaeological and architectural properties.
   b. Ensue that all Ohio Archaeological and Historic Inventory forms are completed and entered into Survey 123.

SECTION 6: DETERMINATION OF EFFECT

If you believe that you have gathered enough information to conclude the Section 106 process, you may be ready to make a determination of effect and ask the SHPO for concurrence. Please select one of the following determinations, then explain the basis for your decision:

- **No Historic Properties Affected [36 CFR § 800.4(d) (1)].**

Seven properties within the APE were previously documented on the Ohio Historic Inventory. All seven were found to be ineligible for listing to the National Register either individually or as part of a district. All seven are unexceptional examples of residential or municipal infrastructural buildings from the first half of the twentieth century. All properties within the APE are unexceptional examples of development common to the region, many of which have lost context through alteration or demolition of surrounding buildings. None of the properties within the APE rise to the level of potential inclusion in the National Register under Criteria A, B, C, or D. There are no historic properties present within the APE to be affected by the undertaking.

- No Adverse Effect [36 CFR § 800.5(b)] on historic properties.
- Adverse Effect [36 CFR § 800.5(d) (2)] on historic properties. You may also include an explanation of how these adverse effects might be avoided, reduced, or mitigated.

Please email the completed form and supporting documentation to our office via section106@ohiohistory.org. Submission of the form does not constitute completion of the consultation process. Once the SHPO has received the information they will provide within 30 days one of the following recommendations in writing:

- Agree with your determination of effect
- Suggest a different determination of effect
- Request additional information or clarification.
- Require additional information gathering efforts such as a Phase II archaeology or history architecture evaluation.

Note that the file size is limited to 20 MB. If your file sizes are larger, SHPO will be unable to receive your submission. To check your submission was received and logged in for our review, please visit https://www.ohiohistory.org/preserving-ohio/federal-state-reviews/project-status-check-for-106/.

Re: Cleveland West Veterans Housing
3311 West 73rd Street
Cleveland, Cuyahoga County

HOME Funds: 1,000,000

Dear Katelyn Lucas,

The Ohio Department of Development is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the Ohio Department of Development has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The Ohio Department of Development will conduct a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize or mitigate potential adverse effects.

A search of the Ohio State Historic Preservation Office Online Mapping System revealed the project is in the vicinity of nine properties dating to the first half of the twentieth century listed to the Ohio Historic Inventory, none with recorded significant tribal association. There are no sites known to the Ohio SHPO to have significant tribal association in the project area, area of potential effects, or within a one-mile study radius.

To meet project timeframes, if you would like to be a consulting party on this project, can you please let us know of your interest within 30 days? If you have any initial concerns with

impacts of the project on religious or cultural properties, can you please note them in your response?

Enclosed is a map that shows the project area and, if applicable, an additional area of potential indirect effects.

The project consists of a new construction permanent supportive housing development consisting of a single, approximately 55,000 square foot, multi-family 3-story apartment building with sixty-two (62) one-bedroom units, located in the Stockyards neighborhood on Cleveland's west side. The development is designed to serve Veterans experiencing homelessness in Cuyahoga County. The Veterans Affairs Northeast Ohio Healthcare System will provide on-site supportive services to residents in a welcoming environment that is close in proximity to transportation, amenities, and medical services in the City of Cleveland.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, can you please inform us? If you do wish to consult, can you please include in your reply the name and contact information for the tribe's principal representative in the consultation? Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Sincerely,

Jennifer Griffin, Division Compliance Manager
Community Services Division

RE: Proposed Cleveland West Veterans
3311 W 73rd St, Cleveland, Ohio, 44102

Dear Mr. Nagle:

This letter is in response to correspondence received on July 15, 2025, regarding the proposed senior apartment construction in Preble County, Ohio. We appreciate the opportunity to comment on this project. The comments of the Ohio State Historic Preservation Office (SHPO) are submitted in accordance with the provisions of Section 106 of the National Historic Preservation Act of 1966, as amended (54 U.S.C. 306108 [36 CFR 800]). The United States Department of Housing and Urban Development (HUD) is the lead federal agency for the undertaking.

Under U.S. Department of Housing and Urban Development HOME funding, the applicant is proposing to construct a new permanent supportive housing development consisting of a single, approximately 55,000 square foot, multi-family 3-story apartment building with sixty-two (62) one-bedroom units. Twenty-one resources fifty years of age or older were recorded in the indirect APE, none of which were determined to be eligible for listing in the National Register of Historic Places (NRHP). The SHPO agrees with this recommendation.

No archaeological sites have been documented within or immediately adjacent to the project area. Based on our database, previous disturbances to the project area, and the nature of the project, it is the SHPO's opinion that, as proposed, the project would have no effect on historic properties.

If you have any questions, please contact me at arosenow@ohiohistory.org or Thomas Grooms at tgrooms@ohiohistory.org. Thank you for your cooperation.

Sincerely,

Abigail Rosenow
Project Reviews Manager – Architecture
Resource Protection and Review
State Historic Preservation Office

RPR Serial No. 1109958

"Please be advised that this is a Section 106 decision. This review decision may not extend to other SHPO programs."

APPENDIX N
NOISE

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the **Day/Night Noise Level Calculator Electronic Assessment Tool Overview (/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/)**.

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative**: Cancel the project at this location

- **Other Reasonable Alternatives**: Choose an alternate site
- **Mitigation**
    - **Contact your Field or Regional Environmental Officer (/programs/environmental-review/hud-environmental-staff-contacts/)**
    - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
    - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
    - Incorporate natural or man-made barriers. See ***The Noise Guidebook (/resource/313/hud-noise-guidebook/)***
    - Construct noise barrier. See the **Barrier Performance Module (/programs/environmental-review/bpm-calculator/)**

U. S. DOT CROSSING INVENTORY FORM

DEPARTMENT OF TRANSPORTATION
FEDERAL RAILROAD ADMINISTRATION

OMB No. 2130-0017

Instructions for the initial reporting of the following types of new or previously unreported crossings: For public highway-rail grade crossings, complete the entire inventory Form. For private highway-rail grade crossings, complete the Header, Parts I and II, and the Submission Information section. For public pathway grade crossings (including pedestrian station grade crossings), complete the Header, Parts I and II, and the Submission Information section. For Private pathway grade crossings, complete the Header, Parts I and II, and the Submission Information section. For grade-separated highway-rail or pathway crossings (including pedestrian station crossings), complete the Header, Part I, and the Submission Information section. For changes to existing data, complete the Header, Part I Items 1-3, and the Submission Information section, in addition to the updated data fields. Note: For private crossings only, Part I Item 20 and Part III Item 2.K. are required unless otherwise noted. An asterisk * denotes an optional field.

Submitted by _____ Organization _____ Phone _____ Date _____

Public reporting burden for this information collection is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed and completing and reviewing the collection of information. According to the Paperwork Reduction Act of 1995, a federal agency may not conduct or sponsor, and a person is not required to, nor shall a person be subject to a penalty for failure to comply with, a collection of information unless it displays a currently valid OMB control number. The valid OMB control number for information collection is 2130-0017. Send comments regarding this burden estimate or any other aspect of this collection, including for reducing this burden to: Information Collection Officer, Federal Railroad Administration, 1200 New Jersey Ave. SE, MS-25 Washington, DC 20590.

APPENDIX S
ZONING

40. Zoning

Zoning verification letter from the City of Cleveland is attached, demonstrating that the current zoning will permit the proposed development.

City of Cleveland
Justin Bibb, Mayor
City Planning Commission

Joyce Pan Huang, Director
Cleveland City Hall
601 Lakeside Avenue, Room 501
Cleveland, Ohio 44114
T: (216) 664-2210 F: (216) 664-3281 I http://planning.clevelandohio.gov

02/01/2024

RE: 3311 West 73rd Street, Cleveland, Ohio 44102 and 7275 Neville Avenue, Cleveland, Ohio 44102

Parcel # 00625028 and 00625027

Please be advised that the City Planning Commission staff has reviewed the City of Cleveland's Zoning Map with respect to **the parcel number listed above** in the City of Cleveland and I can now verify the following information:

The subject property at PPN # 006-25-028 and 006-25-027 are zoned:

Zoning District:	**Semi-Industry-SI**
Area District:	**B-Max Gross Floor Area-1/2 Lot Area**
Height District:	**3-115' Height Limit**

Parcel # 006-25-028 has an established ten (10) foot Specific Mapped Setback from the property line along West 73rd Street as indicated on the Building Zone Maps of the City. The Specific Mapped (or building line) is a required front yard space in which no structure may be located, except where specifically allowed by the Cleveland Zoning Code (§357.07).

Semi-Industry Use Districts: Residential uses no closer than two hundred (200) feet to adjacent General or Unrestricted Industry Districts, warehouses, auto repair garages, cold storage plants, garment factories, newspaper plants, trucking terminals, breweries, and other light manufacturing uses. However, if this proposed zoning change becomes effective, the law requires that the legal use of all existing buildings in the area be allowed to remain, but there can be no additions or expansions of these uses without a special permit from the Board of Zoning Appeals. (Section 345.03)

(The parcels listed in this letter are no closer than two hundred (200) feet to adjacent General or Unrestricted Industry Districts.)

For Any Variances, Special Permits or Conditions contact the Board of Zoning Appeals – 216.664.2581.

For Code Violations, Certificates of Occupancy, Code Compliance and site plans contact the Cleveland Building & Housing Department at 216.664.2910 or buildingandhousing@city.cleveland.oh.us.

Sincerely,

Xavier Bay

Instructions

2024 Design and Construction Features Form

Project Name Veterans West PSH *Project Number* 0

Instructions

1. The architectural entity with whom the owner and developer contracted with to provide architectural services will complete the form and obtain all required signatures for the certifications.
2. The project applicant will submit the completed and signed form with the proposal application.
3. If funded, the project applicant will complete and submit the form again at final application with all changes from what was submitted at proposal application clearly identified.
4. A copy of the final, completed form must also be included in the 80% percent plan sets, copied onto the page(s) following the cover sheet, submitted at final application.

Both a signed PDF and the excel file are required for submission.

All communications related to the architectural review, including submission of architectural plans, must be sent to arch@ohiohome.org

Provide an answer for all sections, do not skip or leave blank any question. Use the "Not Applicable" (N/A) option if a question does not apply to your project. Use the following color-code to determine your response type:

- Unrestricted answer
- Drop-down or other restricted answer. Do not leave blank, select N/A.
- Formula, auto-populate, or other locked cell
- Formula, auto-populate, blank, or other unlocked cell where overriding the formula is allowable but very unlikely

Submission Requirements Checklist

Prelim.	Final	
☑	☑	**The completed, signed Certification.**
☑	☑	**The completed excel file of the DCF form.**
☑	☑	**Scope of Work form.** *(must also be completed at 80DS)*
☐	☐	**Exception Request form(s), if applicable.**
	☐	**Asbestos, mold, lead-based paint considerations as required.**
	☐	**Items required to be completed per Phase I or II Environmental Site Assessment, or per applicable Environmental Review performed by OHFA.**
		Drawings/Plans, which must include all of the following:
☑	☑	Cover sheet with name of development, development address, development team, drawing index, code information, and table indicating unit schedule (including accessible, adaptable and sensory impaired units), types and sizes
☑	☑	Site plan
		Including adjacent parcel information (e.g. zoning, roads, railroad tracks, etc.)
		- clearly show the context of the neighborhood that the property will exist
		All site details, and parking data and layouts
☑	☑	Landscape intent
	☐	Demolition Plan
☐	☐	Historic features (adaptive reuse & historic rehabs) *including description at preliminary and plans at final*
☑	☑	Dimensioned floor plans with preliminary *including room designations and proposed finishes*
☑	☑	Exterior elevations with material notations
	☑	Interior elevations with material notations (casework, PGB and MR gypsum board locations, etc.)
☑		Schematic Drawings and/or specifications for HVAC, plumbing, and electrical or similar items included in the scope of work.
☑	☑	Wall sections (if applicable)
	☑	Structure (if applicable)
	☑	Finishes and schedules
	☑	Details
	☑	Mechanical Plans *(recommended to submit schematic or description of mechanical at preliminary submission)*
		Drawings must have a dimensioned plumbing plan and control points located for rough-in site verification. All pipes through-floor and the walls they are intended to be located within must be dimensioned relative to the foundation where they must align with walls and/or islands above.
		OHFA strongly encourages a surveyor to locate wall and through-slab pipe penetrations. Foundation over dig must be filled with insulation or forms and then back filled

Prelim.	Final	
☐	☑	**Electronic format (pdf)**
		Single PDF file for drawings including all site plans, dimensioned floor plans, elevations, wall sections, structure, finishes, details and mechanical plans.
	☑	Separate PDF file for specifications. *(no hard copy)*
		Electronic format (AutoCAD)
		Dimensioned floor plans only, submitted in DXF or DWG AutoCAD R-14 format.
		- Required to include the project architect's polylines used for the area calculations as required by BOMA.
		- If drawings are externally referenced (xref), submissions must be bound (xbind) prior to creating files for OHFA.
		- Proprietary authorship information such as title blocks, Architecture seals, etc. should be removed.
		- DXF should be generated from the base file and not a plan sheet file.
☑	☑	**Hard copy**
		Full set of architectural plans, 11"x17" scaled to fit. **Full-size architectural plans will be rejected.**
		- Do not submit printed set of specifications set with the drawings

** May use a Certified Engineer*

Project Narrative

Cleveland West Veterans Housing is a new construction permanent supportive housing development consisting of a single, approximately 55,000 square foot, multi-family 3-story apartment building with sixty-two (62) one-bedroom units, located in the Stockyards neighborhood on Cleveland's west side. The development is designed to serve Veterans experiencing homelessness in Cuyahoga County. The Veterans Affairs Northeast Ohio Healthcare System will provide on-site supportive services to residents in a welcoming environment that is close in proximity to transportation, amenities, and medical services in the City of Cleveland.

The development will feature on-site property management and a 24-hour front desk, as well as a community room, pantry/kitchen, laundry room, lobby/lounge, outdoor patio, exercise room, elevator, and mailbox area. CHN Housing

Design Exception Request Summary

Total Number of Design Exceptions Requested: 0

Provide the total number of exceptions for each category.

0 New Construction:

	Non-OHFA Requirement		Special Consideration		Supply Chain Issues

0 Rehabilitation or Adaptive Reuse:

	Universal Design		Accessibility		Replace Items with 75%+ RUL
	Durable Materials - Exterior		Main Entry		Outdoor Recreational Features
	Sidewalks		Durable Materials - Interior		Major Building Components
	Common Areas		Elevators		Interior Doors
	Floor Coverings		Unit Sizes		Bedroom Sizes
	Bathrooms		Kitchen & Appliances		Laundry Facilities
	Supply Chain Issues		Other:		

List of Exceptions Requested:

Summarize each exception requested with a short phrase (1-5 words each).

Wage Rate Requirements

If federal or state funds are utilized in the proposed development, select any regulations that apply to the proposed development.

☑ **Davis Bacon and related acts:**
Davis Bacon Act prevailing wage provisions apply to contractors and subcontractors performing on federally funded or assisted contracts in excess of $2,000 for construction, alteration or repair (including painting and decorating of public buildings or public works).

☐ **Ohio Prevailing Wage:**
Ohio's prevailing wage laws apply to all public improvements financed in whole or in part by public funds when the total overal project cost is fairely estimated to be more than $200,000 for new construction or $60,000 for reconstruction, enlargement, alteration, repair, remodeling, renovation, or painting.

☑ **HUD Section 3 Requirements:**
HUD Section 3 is a provision of the Housing and Urban Development (HUD) Act of 1968 requiring that recipients of certain HUD financial assistance, to the greatest extent feasible, provide job training, employment, and contracting opportunities for low- or very low-income residents in connection with projects and public works.

☐ **None of the above are applicable**

Sustainability

Are all energy efficiency requirements as stated in the **Ohio Building Code** or **Residential Code**?

☑ Yes, Development will meet all energy efficiency requirements as stated in the Ohio Building Code or Residential Code.
☐ No.

Third Party Certification selected:

Must specify full name of certification being sought. Exception requests must clearly articulate why the selected certification is equivalent or better to the three certifications.

☐ Enterprise Green Communities Certification or EGC Plus Certification
☑ LEED Residential - Silver Level Certification or higher — LEED Silver
☐ National Green Building Standard (NGBS) - Silver Level Certification or higher
With Energy Star Homes or Energy Star MFNC compliance verified by a HERS rater
☐ Exception for: *for the certification being selected.*

HERS Rater (organization): Sol Design and Consulting — Phone: 513-465-8226 — Email: sanyogi@solconsults.com

Amenities & Scope of Work Summary

2024 Design and Construction Features Form

Project Name Cleveland West Veterans Housing *Project Number* 0

Amenities

Amenities listed below are not required, and any amenities that are part of the project design must be identified below. Those required for competitive criteria are identified separately.

☐ Athletic Field	☑ Counseling Room(s)	☐ Indoor Play Area	☐ Security Gate(s)
☐ Basketball Court	☑ Covered Mailboxes	☑ Laundry Room(s)	☑ Service Coordinator Office
☑ Bike Racks	☐ Day Care	☐ Media/Library Room	☐ Splash Pads
☐ Bicycle Storage	☐ Dog Park(s)	☐ Outdoor Exercise Area	☐ Swimming Pool
☐ Clubhouse	☑ Exercise Room(s)	☑ Patio(s)	☐ Water Features
☐ Community Building	☐ Exterior Tenant Storage	☐ Playground Area(s)	☐ Walking Paths
☑ Community Room(s)	☐ Garage(s)	☐ Raised Garden Beds	☐ Wellness Center
☑ Computer Room(s)	☐ Gazebo/Pavilion	☐ Security Alarm System	

List any additional features that are included to benefit the population being served.

Covered outdoor space.

Design-Related Competitive Criteria *(for 9% LIHTC)*

Select the items below that the development is seeking competitive points for under the 2024 QAP.

☐ Property-wide Wi-Fi (no cost to residents)	☑ A minimum 400 sqft. Outdoor patio area for residents that is at least 50% covered
☐ Energy Star-certified washer and dryer in all units	☐ An outdoor playground area *(new affordability - general & preserved affordability)*
☑ Energy Star-certified dishwasher in all units	☐ Roll-in showers in at least 50% of the total units *(new affordability - senior)*
☑ Exercise Room	

Scope of Work Summary

Must also submit the Scope of Work Excel Workbook, available under the forms of the program webpage.

Provide an overview of the proposed improvements to be made involving site design, building design, mechanical and electrical systems and building components including building exterior, interior, and life safety items.

Site Design
• 6' high decorative metal perimeter fence and 6' high board-on-board fence to secure site and asphalt parking lot. 1 lots include a total of 32 parking spaces with the lot secured with decorative metal drive gates and boulevard entrance.
• Concrete sidewalks connecting all exterior building access to public right-of-way where indicated.
• Concrete patio and walks at designated outdoor recreation area. Outdoor areas of 400 SF minimum with minimum 50% covered dedicated shelter space.
Building Design
• New construction 3-story, apartment building with wood framed walls at slab-on-grade areas and upper floors. Engineered wood truss floor structure. Exterior finish materials will include brick veneer, cast stone trim, vinyl siding and fiber cement siding.
• Exterior windows will be vinyl, single-hung and fixed sash, Energy Star certified with insulated glazing.
• Building will consist of 62 one-bedroom apartments, eight of which will be ICC A117.1 type A wheelchair accessible with 2 typical units that will receive features for vision and hearing impaired persons.
• Building's occupancy is R-2 (Residential) as categorized by the Ohio Building Code.
• Ground floor resident common areas include community room and kitchen, common laundry room, trash room, public toilet rooms, property manager, staff conference room

Address any issues raised in the Phase I Environmental Site Assessment (ESA) report(s) in the space provided below. Include information for all single-site and scattered-site proposals, as required by applicable program funding guidelines.

Per the potential RECs identified regarding a former foundry on the property, as well as former manufacturing uses on adjacent properties, the development team will engage a consultant in a Limited Phase II investigation to verify current status.

Development Details & Floor Area Details

2024 Design and Construction Features Form

Project Name: Cleveland West Veterans Housing | Project Number: 0

Development Details

Number of sites:	1	Number of buildings that includes commerical space:	0
Site Acreage:	1.00		
Number of residential buildings:	1		
Number of accessory buildings:	0		
		Number of Units:	
		efficiency	0
		one-bedroom	82
Total Number of units:	82	two bedroom	0
Low-Income Units:	82	three-bedroom	0
		four bedroom	0

Date built:

For proposals involving acquisition/rehabilitation or adaptive reuse, please specify the year the building(s) were originally constructed. For multiple building proposals, a range of dates may be provided.

Date first occupied:

Year development was or will be occupied. For multiple building proposals or scattered site projects, a range of dates may be provided.

List detrimental land uses sufficiently close to impair residents' use. Include remedy addressing the land use.

List building/zoning variances, and identify if requested, pending or received:

N/A

Floor Area Details

Total Number of Low Income Units	82

Space	GSF	Notes
Gross Square Footage of all Buildings	86,845	Measured from exterior face of exterior building; includes structured exterior spaces (stair, balcony, portico).
Commercial Space Condominium Areas	0	Legally separate space under control of another program or condominimized. legal separation.
Commercial Areas and Fee-Driven Space	0	Includes spaces for which residents must pay a fee for use/access (garages, storage, etc.)
Market Rate Unit Area	0	Must include lofts, mezzanine and restricted headroom areas
Low Income Unit Area	38,319	Must include lofts, mezzanine and restricted headroom areas
Manager's Unit Area	0	Must include lofts, mezzanine and restricted headroom areas
Common Area (Public)	3,988	Public restrooms, community rooms, libaries, offices, meeting rooms, kitchens, car canopy, portico, fitness rooms, laundry, mailboxes.
Common Area (Circulation)	7,274	Public hallways, stairways, and corridors to residential units.
Dedicated Program Space	2,035	Counseling space, wellness and health clinic, day care centers, etc.
Limited Common Area (Private)	0	Exterior spaces with access only through residential unit, i.e. balcony/porch/deck (patios without roof are not included).
Support	3,201	Electrical, mechanical, elevator room, sprinkler room, janitorial, trash, maintenance, storage that is not for tenant use, free-standing maintenance buildings.
Tenant Storage	0	Tenant storage outside of unit.
Major Vertical Penetrations	1,840	Includes duct shafts, stair shaft, elevator shaft, space open to below
Structured Parking/Garage	0	Attached or detached garage that residents do not pay a fee for.
Basement	0	Includes spaces with a minimum of 7' clear head height. Spaces less than 7' clear head space are crawl spaces per RCO 305.
TOTALS		
Non Low-Income Floor Area	0	Commercial Space Condo Areas + Commercial Areas + Market Rate Unit Area
Low Income Floor Area	48,503	LI Unit Area + Common Area (Circulation) + Limited Common Area (Private) + Tenant Storage
% Common Area	19.88%	Common Area (Public) + Common Area (Circulation) / Gross Square Footage
Net Rentable Square Footage	86,845	Gross Square Footage - Non Low-Income Floor Area
Average net Rentable SQFT per LI Unit	913.4206325	Net Rentable Square Footage / Total Number of Low-Income Units

Accessibility Information

2024 Design and Construction Features Form

Project Name: Veterans West PSH | Project Number: 0

Adaptability & Accessibility

All developments must comply with all accessibility requirements as outlined in the Ohio Building Code, chapter 4101:1-11 for the design and construction of accessible project features, including site, common areas and units.

- ▫ Yes, the project will comply with the accessibility requirements as outlined in the Ohio Building Code.
- ▫ No.

Verify that the project will be designed and constructed to meet the requirements of the Fair Housing Act and that all units, other than the accessible units, will be designed and constructed as ANSI Type B units.

- ▫ Yes, the project will be designed and constructed to meet the requirements of the Fair Housing Act and all units, other than the accessible units, will be designed and constructed as ANSI Type B units.
- ▫ No.

504 Accessiblity

All developments receiving OHFA funding must meet the accessibility requirements of Section 504. Identify the implementing standard the development will utilize to demonstrate compliance with Section 504 requirements (select one)

- ▫ Uniform Federal Accessibility Standards (UFAS)
- ▫ 2010 ADA Standards for Accessible Design under Title II of the ADA, except for certain specific identified provisions, as detailed in HUD's Notice on "Instructions for use of alternative accessibility standard," published in the Federal Register on May 23, 2014 ("Deeming Notice").
- ▪ An equivalent standard as defined in HUD's Deeming Notice (such as ICC/ANSI A117.1-2009 with ICB/OCB), specify: ICC A117.1-2017

	Required	Provided		
504 Mobility Units*:	8	8	Number of accessible parking spaces:	4
504 Sensory Units:	2	2		

** Providing twice the number that is federally mandated under Section 504 as accessible for persons with mobility disabilities. To calculate the number of 504-mobility units needed to meet this threshold standard, first multiply the total number of units by 5%, roundup to the nearest whole unit, and multiply the result by two.*

Exception(s) Reqested for technical infeasiblity of full compliance with 504 accessiblity. (adaptive reuse or rehabiliation only)

- ▫ Yes, Number of non-conforming accessible units: Reason:
- ▫ No.
- ▫ N/A.

Universal Design Information

2024 Design and Construction Features Form

Project Name: Cleveland West Veterans Housing | Project Number: 0

Universal Design Components

Select all of the below items that will be included in the development. Refer to the Design and Architectural Standards that are effective at the time application. Mandatory items are marked with an R, please identify "exception" under "page or note" if an exception was requested for the item. Exceptions for mandatory items must include two non-mandatory items.

Additionally, specify the architecture page reference, or if it will be covered by a general/universal plan note, mark "Note"

Entry

Included?	Page or Note	Item
R	A-200	60" wide (minimum) entry door
		• On retrofit/adaptive reuse only, not required on all units if infeasibility can be proven
R	A-200, Typical	Entry door with lever-style handle
R	A-1621 to A-1626	Per primary entrance, minimum 5' x 5' level clear space inside and outside entry door
R	A-2001 to A-2005, A-2006	Adequate navigable lighting at walkways, accessible routes, and exterior spaces
R	A-2004, A-2006	Adequate lighting both inside and outside the building and unit entrance
R	A-1600	High visibility address numbers (both building and exterior units)
R	A-1600, A-1601	Overhead weather protection at entrances
		• On retrofit/adaptive reuse only, not required on all units if infeasibility can be proven

Included?	Page or Note	Item
	A-1621 to A-1626	Built-in shelf/laundry/large load bed available first floor
		Normally-used doors are walkways and entryways
		Primary unit entry with an accessible/usable ramp/route and level/ramped
		Door locks that are easy to operate, such as keyless locks with remote control or keypad
		No step entry (1/2" or less threshold) at main entrance

Interior Doors and Hallways

Included?	Page or Note	Item
R	A-2001 to A-2005, A-2006	Adequate lighting to illuminate all stairway(s), landings, and hallway(s)
R	A-1621 to A-1626	Hallways with a minimum width of 42"
R	A-1600s	Anti-slip strips on front edge of steps (contrast-colored material)
		Color contrast between stair treads and risers
		Handrails on both sides of interior stairs

Interior Doors

Included?	Page or Note	Item
R	A-1600, A-1601 to A-1606	32" visible (minimum) doors leading to habitable room, allowing for a 32" minimum clearance
R	A-1602, Typical	Lever-style door hardware on all interior doors
R	A-1600s	Interior maximum door threshold of ¼ inch beveled or flush
		Pocket doors with easy-to-grip handles

Faucets

Included?	Page or Note	Item
R	A-1621	Anti-scald faucets with lever handle for all sinks, bathtubs, and showers
R	A-1621	Pressure balanced faucets

Electrical

Included?	Page or Note	Item
R	M-1601	Thermostats and control panels that are easy to read and simple to operate
R	E-1621	Kitchen, laundry light, or fan/switches switches
R	A-1621, A-1622	Extra electrical outlets (for medical equipment or rechargeable items, etc.) placed 24" to 24" above finished floor (bedroom only)
		Lighted switches visible in the dark
		Switched outlets for lamps, etc. to be turned on with wall switch
		Electrical outlets, phone jacks, and data jacks at least 18" above finished floor
	M-1601, E-1621	Light switches between 42"-48" above finished floor; thermostats no more than 48" above finished floor
		Clear access space of 30" by 48" in front of switches, outlets, and controls
		Audible and visual alarms for smoke/fire/carbon monoxide in all code-required accessible areas and all units

Bathrooms

Included?	Page or Note	Item
R	A-1600	Countertops with beveled/radiused corners. Outside corners are suggested to be a (minimum) corner radius, waterfall edge with a minimum radius, or b
R	A-1621 to A-1626, A-1631	Adjustable-height aluminum/metal pin-mounted arm or sliding or hand-held showerhead with flexible hose and easily operable controls
R	A-1621, A-1622	Navigable lighting at vanities
R	A-1621 to A-1626	A flat or roll-in floor on the main floor with clear floor space of 30" x 48"
	A-1621, A-1622	Overhead light fixture in tub/shower
		Mirror(s) placed for both standing and sitting, such as a full-length or tilting mirror
R	A-1621 to A-1626	Toilet centered at least 18" from any side wall, tub, or cabinet
		In at least one bathroom per unit, including the following:
		• Lever-handled or push/wave shower at least 5' x 5' OR ADA bathtub with seat
		• Clear knee space (at least 27" high) under sink. May be open knee space or achieved by means of removable vanity or fold-back or self-closing doors. Pipe protection panels must be provided to prevent contact with hot or sharp surfaces.
		* Grab bars or wall blocking for future installation of grab bars, in tub/shower, and toilet. Grab bars must be properly anchored and accessible.

Kitchens

Included?	Page or Note	Item
R	A-1621 to A-1626	At least 18" clear space/"landing zone" on each side of stove and sink, and at least one side of refrigerator. This is countertop clear space and may be shared with another appliance and for required work surface if applicable.
R	A-1621 to A-1626	Loop handles on drawers and cabinets
R	A-1621, A-1622	Navigable task lighting to illuminate sink, stove, and work areas
R	A-1621 to A-1626	Adjustable-height shelves in wall cabinets
		Knee cabinets with pull-out drawers
		Pull-out work surface near the oven, refrigerator and/or microwave
		Visual contrast at front edge of countertop or between the counter top and the cabinets
		Side-by-side refrigerator/freezer
	A-1621 to A-1626, Typical	Cooktop/range with front or side-mounted controls (provide units only)
		Refrigerator for small apartments, efficiencies, etc.
	A-1621 to A-1626	Clear knee space (at least 27" high) under sink, counters, and/or work tops. If under sink, pipes must have protection and may not be in the required knee space. May be open knee space or achieved by means of removable base cabinets or fold-back or self-closing doors.

Closets

Included?	Page or Note	Item
R	A-1621, A-1622	Area is well-lit with a switch located outside the space
R	A-1621 to A-1626	Closet rod/shelves that are easy to operate. No bi-fold or accordion-type doors
		Adjustable-height shelving and/or closet rods (28 inches max) installed at multiple heights.
		Pull-out shelves, rotisol cabinets, and other easy to access storage components

Certifications

2024 Design and Construction Features Form

Project Name: Cleveland West Veterans Housing | Project Number: 0

Certifications

We represent, warrant and certify to OHFA that the following does and will apply to the proposed development:

The Development will be designed and constructed to meet the requirements of all applicable laws, codes, program guidelines, as well as the OHFA Design and Architectural Standards and specific features applicable to the project as outlined in this form. This includes any and all local, state, or federal accessibility laws that currently exist and apply to the project. Any additional cost of construction required for the Development to be in compliance with any of these laws has been included in the development budget.

By signing this document, the owner, architect, and general contractor certify that the plans, specifications, and features submitted as part of this application will become a minimum standard for the proposed development. This hereby becomes a binding agreement for the actual construction intent if the development is awarded OHFA funding. By signing this document, the owner, architect, and general contractor certify that the plans, specifications, and features submitted as part of this application will become a minimum standard for the proposed development. This hereby becomes a binding agreement for the actual construction intent if the development is awarded OHFA funding.

OHFA does not take responsibility for design, construction, and plan review or any other municipal or building department review or approval and in no way does this agreement supersede any requirement by such jurisdictions.

OHFA reserves the right to verify compliance with agreed-upon features including durability of materials, accessibility, universal design, green building requirements and energy efficiency components.

1. Architect or Professional Engineer

I certify that the plans, specifications, and scope of work for the Development meet, and will continue to meet, any and all requirements including those set forth in this form, the OHFA Design and Architectural Standards, and all other applicable laws, codes, program guidelines or policy documents.

I understand that I am contractually obligated to know the federal, state and local accessibility laws applicable to the Development and have applied them accordingly. To the best of my professional knowledge and belief, I agree that the Development as designed is in compliance with all applicable federal, state and local housing and accessibility laws and regulations.

Authorized Signatory — Date: 17-Sep-24

Brian Grambort — Print Name (Authorized Signatory) — Title: Associate

Hiti, DIFrancesco and Siebold, Inc. — Organization — Registration Number: 1215574

2. General Contractor

I certify that I have reviewed the plans, specifications, and scope of work for the Development and that the Development will be constructed in accordance with any and all requirements as set forth in this form, the OHFA Design and Architectural Standards, and all other applicable laws, codes, program guidelines or policy documents.

I understand that I am obligated to know the federal, state and local accessibility laws applicable to the Development and will build the project accordingly.

Authorized Signatory — Date

Dominic Ozanne II — Print Name (Authorized Signatory) — Title: Vice President

Ozanne Construction — Organization

3. Owner

I certify that I have reviewed the plans, specifications, and scope of work for the Development and that the Development shall be constructed in accordance with any and all requirements as set forth in this form, OHFA Design and Architectural Standards, and all other applicable laws, codes, program guidelines or policy documents.

The undersigned understands that any deviations from federal and state accessibility requirements are the responsibility of the Owner and, as such, Owner is responsible for such deviations.

Further, if for any reason, the features are not constructed in accordance with the requirements set forth above, the undersigned understands that OHFA may revoke or recapture the Development's funding and/or limit or prohibit the future participation of the undersigned, any subsidiaries or related entities in OHFA programs.

Authorized Signatory — Date

Mark E. Whipkey — Print Name (Authorized Signatory) — Title: Secretary of the General Partner

GYPSUM BOARD NOTES

1. AT FIRE RESISTANCE RATED ASSEMBLIES PROVIDE TYPE X OR TYPE C AS REQUIRED BY FIRE RESISTANCE RATED ASSEMBLY TO ACHIEVE FIRE RESISTANCE RATING LISTED.
2. PROVIDE 5/8" FIBERGLASS FACED TILE BACKER BOARD WHERE WALL TILE IS INDICATED TO OCCUR. SEE SPECIFICATIONS FOR ADDITIONAL INFORMATION.
3. PROVIDE 5/8" GLASS-FIBER FACED GYP. BD. IN ALL HOUSEKEEPING CLOSETS. PROVIDE LEVEL 5 FINISH WHERE PAINT FINISH IS INDICATED.
4. PAPERLESS GYPSUM BOARD TYPE SHALL BE USED AT MINIMUM IN THE FOLLOWING LOCATIONS:
   - A. BEHIND KITCHEN SINKS AND BATHROOM/TOILET ROOM SINKS TO A HEIGHT OF APPROXIMATELY INCHES ABOVE BASE CABINET
   - B. SHOWER WALLS WHERE THE PGB WILL NOT HAVE AN EXPOSED FINISH EXCEPT 6 INCHES BEYOND SHOWER AND TUB JAMBS (FLOOR TO TOP OF TUB SURROUND OR 6 INCHES ABOVE SHOWER NIPPLE AND THE MAY BE CASED WITH WATER AND ROT-RESISTANT TRIM).
   - C. BEHIND TOILETS AND THE SPACE BETWEEN A TUB/SHOWER ENCLOSURE TO THE TOP OF TOILET TANKS MUST BE COVERED AS IT IS A HIGH FAILURE POINT SPECIFICALLY COVERED BY PGB

GENERAL PARTITION NOTES

1. WHERE RATED ASSEMBLIES ARE INDICATED TO OCCUR, SEE REFERENCED FIRE TEST DESIGNATIONS FOR ASSEMBLY AND INSTALLATION REQUIREMENTS.
2. FIRE PARTITIONS: WHERE PARTITION IS INDICATED TO BE A FIRE PARTITION THE WALL ASSEMBLY SHALL EXTEND TO THE UNDERSIDE OF THE FIRE RESISTANCE RATED FLOOR CEILING ASSEMBLY AND/OR TO UNDERSIDE OF FLOOR/ROOF SHEATHING AS INDICATED. (DRAFT STOPPING OF ROOF TRUSS SHALL BE AS SHOWN ON ATTIC PLAN. DRAFT STOPPING OF FLOOR STRUCTURE SHALL OCCUR AT UNIT PERIMETERS).
3. FIRE BARRIER: WHERE PARTITION IS INDICATED TO BE A FIRE BARRIER THE WALL ASSEMBLY SHALL EXTEND THROUGH THE FRAMED CONCEALED SPACE TO THE UNDERSIDE OF THE ROOF AND/OR FLOOR SHEATHING UNLESS SPECIFICALLY DETAILED OTHERWISE.
4. FIRE STOP ALL DEVICES AND PENETRATIONS OCCURRING IN FIRE RESISTANCE RATED ASSEMBLIES. SEE TYPICAL FIRE STOPPING DETAILS, ELECTRICAL, MECHANICAL, AND PLUMBING DRAWINGS AND SPECIFICATIONS.
5. SEAL ALL PERIMETERS OF ALL RATED WALL ASSEMBLIES WITH FIRE RESISTANCE RATED JOINT ASSEMBLY. VERIFY NO GAPS OR VOIDS OCCUR.
6. WHERE FIRE RESISTANCE RATED WALL ASSEMBLIES OCCUR BEHIND FIBERGLASS SHOWERS, BATHTUBS, AND BATHTUB SURROUNDS IN APARTMENT UNITS. MAINTAIN CONTINUITY OF GYPSUM BOARD BY RUNNING CONTINUOUS BEHIND SHOWER. (USE MOISTURE RESISTANT TYPE). PROVIDE SHOWER MFR'S TRIMS DESIGNED TO CONCEAL INSTALLATION FLANGES OR PROVIDE ADDITIONAL LAYER ABOVE AND TO SIDES OF SHOWER SURROUNDS AS NEEDED TO COVER INSTALLATION FLANGES.
7. SEAL ALL UNIT PERIMETER DEMISING AND EXTERIOR FRAMING IN ACCORDANCE WITH THE SUSTAINABILITY SPECIFICATION REQUIREMENTS TO PASS BLOWER DOOR TESTING.
8. SEE STRUCTURAL DRAWINGS FOR SHEAR WALL AND BEARING WALLS LOCATIONS. PROVIDE FRAMING AND CONNECTION DETAILS PER STRUCTURAL DRAWINGS.

5D FIRST FLOOR PLAN
3/32" = 1'-0"

FIREBLOCKING/DRAFTSTOPPING GENERAL NOTES:

1. FIREBLOCKING SHALL CONSIST OF THE FOLLOWING:
   - 1.1. 2 INCH NOMINAL LUMBER
   - 1.2. ONE THICKNESS OF .75 INCH PARTICLEBOARD (OR WOOD STRUCTURAL PANELS) WITH JOINTS BACKED BY .719 INCH IN MATERIAL
   - 1.3. .5 INCH OF GYPSUM BOARD
   - 1.4. .25 INCH OF CEMENT BASED MILLBOARD
   - 1.5. BATTS OR BLANKETS OF MINERAL WOOD, OR MINERAL FIBER
2. FIREBLOCKING SHALL MINIMALLY BE PROVIDED IN THE FOLLOW LOCATIONS:
   - 2.1. CONCEALED SPACES OF STUD WALLS AND PARTITIONS, FURRED SPACES, AND PARALLEL ROWS OF STUDS OR STAGGERED STUDS AS FOLLOWS:
     - 2.1.1. VERTICALLY AT THE CEILING AND FLOOR LEVELS.
     - 2.1.2. HORIZONTALLY AT INTERVALS NOT EXCEEDING 10 FEET.
   - 2.2. INTERCONNECTIONS BETWEEN CONCEALED VERTICAL STUD WALL OR PARTITION SPACES AND CONCEALED HORIZONTAL SPACES CREATED BY AN ASSEMBLY OF FLOOR JOISTS OR TRUSSES, AND BETWEEN CONCEALED VERTICAL AND HORIZONTAL SPACES SUCH AS OCCUR AT SOFFITS, DROP CEILINGS, COVE CEILINGS AND SIMILAR LOCATIONS.
   - 2.3. CONCEALED SPACES BETWEEN STAIR STRINGERS AT THE TOP AND BOTTOM OF THE RUN.
   - 2.4. FLOOR PENETRATIONS CONTAINED AND LOCATED WITHIN THE CAVITY OF A WALL.
   - 2.5. ANNULAR SPACE AROUND VENTS, PIPES, DUCTS, AT CEILINGS AND FLOOR LEVELS.
   - 2.6. WITHIN CONCEALED SPACES OF EXTERIOR WALL COVERINGS AND OTHER EXTERIOR ARCHITECTURAL ELEMENTS WHERE ERECTED WITH COMBUSTIBLE FRAMES. FIREBLOCKING SHALL BE INSTALLED AT MAX INTERVALS OF 20 FEET IN EITHER DIRECTION WITH NO CONCEALED SPACE EXCEEDING 100 SF. WHERE WOOD FURRING STRIPS ARE USED, THEY SHALL BE OF APPROVED WOOD OF NATURAL DECAY RESISTANCE OR PRESERVATIVE-TREATED WOOD. IF NON-CONTINUOUS, SUCH ELEMENTS SHALL HAVE CLOSED ENDS, WITH NOT LESS THAN 4 INCHES OF SEPARATION BETWEEN SECTIONS.
3. PROVIDE DRAFTSTOPPING CONSISTING OF THE FOLLOWING:
   - 3.1. .5 INCH GYPSUM BOARD
   - 3.2. .375 INCH WOOD STRUCTURAL PANEL
   - 3.3. .375 INCH PARTICLE BOARD
   - 3.4. 1 INCH NOMINAL LUMBER
   - 3.5. CEMENT FIBERBOARD
   - 3.6. BATTS OR BLANKETS OF MINERAL WOOL OR GLASS FIBER OR OTHER MATERIAL ADEQUATELY SUPPORTED
4. PROVIDE DRAFTSTOPPING IN THE FOLLOWING LOCATIONS:
   - 4.1. IN FLOOR/CEILING ASSEMBLES ABOVE AND IN LINE WITH DWELLING UNIT SEPARATIONS
   - 4.2. IN ROOF/CEILING ASSEMBLIES AS INDICATED ON A-105 ROOF PLAN.

GENERAL NOTES

1. ALL EXTERIOR DIMENSIONS ARE TO EXTERIOR FACE OF STUDS OR MASONRY
2. ALL INTERIOR DIMENSIONS ARE TO FACE OF FINISH MATERIAL
3. COORDINATE SIZE AND LOCATION OF MECHANICAL AND ELECTRICAL EQUIPMENT, ROUTING OF UTILITIES, PADS, PENETRATIONS, AND SUPPORTS BETWEEN ARCHITECTURAL, MECHANICAL, PLUMBING, AND ELECTRICAL DRAWINGS
4. SLOPE FLOORS TO DRAINS AT 1/8" PER FOOT
5. BUILDING SHALL BE EQUIPPED WITH AN AUTOMATIC SPRINKLER SYSTEM THROUGHOUT IN ACCORDANCE WITH NFPA 13R WITH WHITE CONCEALED HEAD IN PUBLIC SPACES AND RESIDENT UNITS. SIDE WALL HEADS TO BE WHITE RECESSED.
6. SEE ENLARGED RESIDENT UNIT PLANS FOR TYPICAL UNIT DIMENSIONS.
7. WHERE SYMBOL IS INDICATED, PROVIDE ACCESSIBLE UNIT.
8. WHERE SYMBOL IS INDICATED, PROVIDE FEATURES FOR RESIDENTS WITH AUDIO/VISUAL IMPAIRMENTS. REFERENCE ELECTRICAL DRAWINGS FOR ADDITIONAL INFORMATION.
9. STRUCTURAL STEEL SHALL BE INDIVIDUALLY ENCASED IN 1 HR RATED CONSTRUCTION, U.N.O.
10. CONTRACTOR SHALL DESIGN AND PROVIDE A COMPLETE PASSIVE RADON MITIGATION - SUB-SLAB DEPRESSURIZATION (SSD) SYSTEM, AND PERFORM PRE-OCCUPANCY TESTING FOR RADON GAS. SYSTEM SHALL BE DESIGNED WITH CAPABILITIES TO CONVERT TO AN ACTIVE SYSTEM IF TESTING DETERMINES IT IS REQUIRED. SYSTEM SHALL BE DESIGNED AND INSTALLED TO COMPLY WITH APPLICABLE PROCEDURES IDENTIFIED IN APPLICABLE FEDERAL, STATE, AND LOCAL RULES AND REGULATIONS INCLUDING, BUT NOT LIMITED TO OHIO REVISED CODE SECTION 3723.02. CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING NECESSARY PERMITS AND APPROVALS FOR RELATED WORK AND FACILITIES. REFER TO SPECIFICATION 312113 'RADON MITIGATION' FOR ADDITIONAL REQUIREMENTS.
11. ALL EXTERIOR WINDOW DIMENSIONS ARE TO CENTERLINE OF WINDOW ROUGH OPENINGS. SEE WINDOW TYPES FOR ROUGH OPENINGS.
12. PROVIDE CONCRETE EQUIPMENT PADS. SEE MEP DRAWINGS FOR EQUIPMENT, LOCATIONS, AND SIZES. COORDINATE WITH MEP CONTRACTORS.

5D SECOND FLOOR PLAN
3/32" = 1'-0"

FIREBLOCKING/DRAFTSTOPPING GENERAL NOTES:

1. FIREBLOCKING SHALL CONSIST OF THE FOLLOWING:
   - 1.1. 2 INCH NOMINAL LUMBER
   - 1.2. ONE THICKNESS OF .75 INCH PARTICLEBOARD (OR WOOD STRUCTURAL PANELS) WITH JOINTS BACKED BY .719 INCH IN MATERIAL
   - 1.3. .5 INCH OF GYPSUM BOARD
   - 1.4. .25 INCH OF CEMENT BASED MILLBOARD
   - 1.5. BATTS OR BLANKETS OF MINERAL WOOD, OR MINERAL FIBER
2. FIREBLOCKING SHALL MINIMALLY BE PROVIDED IN THE FOLLOW LOCATIONS:
   - 2.1. CONCEALED SPACES OF STUD WALLS AND PARTITIONS, FURRED SPACES, AND PARALLEL ROWS OF STUDS OR STAGGERED STUDS AS FOLLOWS:
     - 2.1.1. VERTICALLY AT THE CEILING AND FLOOR LEVELS.
     - 2.1.2. HORIZONTALLY AT INTERVALS NOT EXCEEDING 10 FEET.
   - 2.2. INTERCONNECTIONS BETWEEN CONCEALED VERTICAL STUD WALL OR PARTITION SPACES AND CONCEALED HORIZONTAL SPACES CREATED BY AN ASSEMBLY OF FLOOR JOISTS OR TRUSSES, AND BETWEEN CONCEALED VERTICAL AND HORIZONTAL SPACES SUCH AS OCCUR AT SOFFITS, DROP CEILINGS, COVE CEILINGS AND SIMILAR LOCATIONS.
   - 2.3. CONCEALED SPACES BETWEEN STAIR STRINGERS AT THE TOP AND BOTTOM OF THE RUN.
   - 2.4. FLOOR PENETRATIONS CONTAINED AND LOCATED WITHIN THE CAVITY OF A WALL.
   - 2.5. ANNULAR SPACE AROUND VENTS, PIPES, DUCTS, AT CEILINGS AND FLOOR LEVELS.
   - 2.6. WITHIN CONCEALED SPACES OF EXTERIOR WALL COVERINGS AND OTHER EXTERIOR ARCHITECTURAL ELEMENTS WHERE ERECTED WITH COMBUSTIBLE FRAMES. FIREBLOCKING SHALL BE INSTALLED AT MAX INTERVALS OF 20 FEET IN EITHER DIRECTION WITH NO CONCEALED SPACE EXCEEDING 100 SF. WHERE WOOD FURRING STRIPS ARE USED, THEY SHALL BE OF APPROVED WOOD OF NATURAL DECAY RESISTANCE OR PRESERVATIVE-TREATED WOOD. IF NON-CONTINUOUS, SUCH ELEMENTS SHALL HAVE CLOSED ENDS, WITH NOT LESS THAN 4 INCHES OF SEPARATION BETWEEN SECTIONS.
3. PROVIDE DRAFTSTOPPING CONSISTING OF THE FOLLOWING:
   - 3.1. .5 INCH GYPSUM BOARD
   - 3.2. .375 INCH WOOD STRUCTURAL PANEL
   - 3.3. .375 INCH PARTICLE BOARD
   - 3.4. 1 INCH NOMINAL LUMBER
   - 3.5. CEMENT FIBERBOARD
   - 3.6. BATTS OR BLANKETS OF MINERAL WOOL OR GLASS FIBER OR OTHER MATERIAL ADEQUATELY SUPPORTED
4. PROVIDE DRAFTSTOPPING IN THE FOLLOWING LOCATIONS:
   - 4.1. IN FLOOR/CEILING ASSEMBLES ABOVE AND IN LINE WITH DWELLING UNIT SEPARATIONS
   - 4.2. IN ROOF/CEILING ASSEMBLIES AS INDICATED ON A-105 ROOF PLAN.

2B ROOF PLAN
3/32" = 1'-0"

GENERAL ROOF PLAN NOTES

1. PROVIDE MINIMUM SLOPE OF 1/4" PER FOOT AT LOW SLOPED ROOF. PROVIDE TAPERED INSULATION AS NEEDED TO ACHIEVE SLOPES TO DRAIN
2. CONNECT ROOF DRAINS TO STORM WATER MANAGEMENT SYSTEM VIA RAIN CONDUCTORS THROUGH BUILDING. OVERFLOW DRAINS SHALL ROUTE TO THE FIRST FLOOR EXTERIOR OF THE BUILDING AND BE PROVIDED WITH LAMB'S TONGUE NOZZLES.
3. CONNECT GUTTERS AND DOWNSPOUTS TO STORM WATER MANAGEMENT SYSTEM VIA PVC BOOTS AT PERIMETER OF BUILDING.
4. INSTALL DRAFTSTOPPING IN ATTIC AT LOCATIONS INDICATED ON ROOF PLAN. DRAFTSTOPPING SHALL CONSIST OF 1/2" OSB ON WOOD FRAMING.
5. ROOF SLOPES INDICATED BY ARROWS ARE DOWN SLOPE U.N.O
6. PROVIDE RIDGE VERNTS AT STEEP SLOPE RIDGES INDICATED.
7. PROVIDE METAL FLASHING AT ALL VALLEYS AND MTL DRI EDGE TRIMS AT GABLE END CONDITIONS. PROVIDE 6" GUTTER AND 3" x 4" SMOOTH SQUARE DOWNSPOUTS
8. PROVIDE ICE AND WATER GUARD IN ALL VALLEYS, ROOF EDGE PERIMETER
9. EXTENDING 24" MIN. INWARD FROM INTERIOR FACE OF EXTERIOR WALL MEASURED HORIZONTALLY AND AT ALL ROOF TO WALL LOCATIONS
10. MEP ROOF PENETRATIONS AND ROOF MTD EQUIPMENT MAY NOT ALL BE SHOWN. SEE MEP DRAWINGS FOR ROOF PENETRATION AND EQUIPMENT LOCATIONS. PROVIDE FLASHING, SLEEVES, AND INSULATED CURBS AS RECOMMENDED BY EQUIPMENT AND ROOFNG MANUFACTURERS' WRITTEN RECOMMENDATIONS AND DETAILS. PAINT ALL EXPOSED VENTS, DUCTS, PIPE AND EQUIPMENT
11. PROVIDE CRICKETS AT ALL ROOF MOUNTED EQUIPMENT, CURBS, OBSTRUCTIONS AND PENETRATIONS TO MAINTAIN ROOF DRAINAGE.

4C ROOF HATCH CURB

2B ATTIC PLAN
3/32" = 1'-0"

GENERAL ATTIC PLAN NOTES:

1. INSTALL DRAFTSTOPPING IN ATTIC AT LOCATIONS INDICATED ON ROOF PLAN. DRAFTSTOP PARTITION TO BE 3/4" PLYWD ON ONE SIDE OF 2X FRAMING. PANEL TO PANEL JOINTS TO BE TREATED WITH 3/4" PLYWD BACKERS LAPPING PANELS BY 2" MIN EACH SIDE.

2. NEW ATTIC ACCESS DOOR PANELS PROVIDED WITH PLATFORM FRAMING INSIDE ATTIC AS NOTED ON 1D/A400

3.REVIEW ATTIC VENTILATION CALCULATIONS AND DO NOT INSTALL MORE RIDGE/HIP VENTS THAN SPECIFIED IF THE ADDITIONAL VENTING WOULD MAKE THE NET FREE VENT AREA (NFVA) AT THE TOP VENT GREATER THAN THE NET FREE VENT AREA AT THE SOFFIT VENTS.

ATTIC PLAN LEGEND

- ATTIC DRAFT STOPPING PARTITION. ALIGN WITH UNIT DEMISING WALLS, CORRIDOR WALLS AND PARTITIONS AT THE THIRD FLOOR.
- ATTIC DRAFT STOP ACCESS DOOR. PROVIDE A 1 HOUR FIRE RATED DOORS AT FIRE BARRIERS WHERE "1HR IS INDICATED.
- ATTIC ACCESS DOOR - 1 HOUR FIRE RATED UPSWINGS 20X30 DOOR. COORDINATE POSITION WITH CEILING BELOW.
- RV RIDGE VENT

GENERAL NOTES

1. ALL UNIT LIGHT FIXTURES ARE TO BE NON-GLARE LED FIXTURES.
2. ALL GROUT TO BE TEC POWER GROUT.
3. ACCENT WALL AND FLOORING FINISHES INDICATED ON FINISH PLANS IN A-800 SERIES. ALL OTHER FINISHES NOTED IN THE FINISH SCHEDULE.
4. TYPICAL GYPSUM BOARD CEILINGS AND SOFFITS TO BE PAINTED WITH FLAT PAINT UNLESS OTHERWISE NOTED.
5. ACCESS PANELS TO BE PAINTED THE SAME COLOR AS THE SURFACE IN WHICH THEY OCCUR.
6. SUBMIT COLOR SAMPLES FOR ALL ELECTRICAL DEVICES AND COVER PLATES FOR ARCHITECTS SELECTION.
7. ALL FINISHES TO BE INSTALLED ACCORDING TO MANUFACTURER'S WRITTEN INSTRUCTIONS.
8. ELEVATOR CAB FINISHES TO BE SELECTED BY ARCHITECT FROM STANDARD OFFERING.
9. WALL TILE TO HAVE SCHLUTER TRIMS AT OUTSIDE CORNER, WHERE THE BASE MEETS RESILIENT FLOORING, AND WHERE TILE TRANSITIONS TO PAINTED GYP BD. ARCHITECT TO SELECT COLOR AND PROFILE.
10. FLOORING IN CLOSETS TO BE THE SAME AS THE ROOM THAT IT OCCURS IN UNLESS OTHERWISE NOTED.
11. ALL TRANSITIONS BETWEEN DIFFERENT TYPES OF FLOOR FINISHES TO HAVE TRANSTIONS INSTALLED TO CREATE FLUSH CONDITION.
12. FLOORING TRANSITIONS BETWEEN ROOMS ARE TO OCCUR UNDERNEATH THE DOOR. IF THERE IS NOT A DOOR THEN TO OCCUR IN THE CENTER OF THE OPENING.
13. ALL SHEET VINYL FLOORING IS TO HAVE WELDED SEAMS.
14. ALL BATHROOMS, KITCHENS, AND OTHER WET AREAS TO RECIEVE PAINT WITH A SEMI GLOSS FINISH, UNO.
15. SEAMS ARE NOT TO OCCUR AT DRAIN LOCATIONS.
16. CHAIR RAIL AND DOOR TRIM IN COMMON AREAS TO BE PNT-21.
17. HOLLOW METAL DOORS AND FRAMES TO BE PNT-9.
18. ALL DOOR DOORS AND TRIM IN RESIDENT UNITS TO BE PAINTED PNT-22.
19. USE APPROPRIATE PAINTS AND PRIMERS WHERE BLOCK MASONRY WALLS ARE TO BE PAINTED.
20. ALL PRODUCTS THAT ARE PART OF A TILE INSTALLATION SYSTEM ARE TO BE FROM THE SAME MANUFACTURER.
21. CORNER GUARDS TO BE INSTALLED ON ALL COMMON AREA OUTSIDE CORNERS FROM TOP OF WALL BASE TO UNDERSIDE OF CHAIR RAIL OR 4'-0" AFF.
22. CORNER GUARDS TO BE INSTALLED ON ALL ACCESSIBLE RESIDENT UNIT OUTSIDE CORNERS FROM TOP OF WALL BASE TO 4'-0" AFF.
23. ALL INTERIOR FINISHES TO HAVE CLASS A FIRE RATING.
24. PROVIDE RBST AT ALL STAIRS AND INTERMEDIATE RISERS.
25. WINDOW SILLS TO BE SSM-3.
26. ALL RESIDENT ENTRY NICHES TO HAVE ACCENT PAINT ABOVE AND BELOW CHAIR RAIL. ACCENT PAINTS VARY PER FLOOR, SEE FINISH LEGEND FOR COLOR PER FLOOR.
27. PROVIDE SEAMING DIAGRAMS FOR ALL FLOORING MATERIALS.
28. WHERE FRP & IFRK ARE TO BE INSTALLED, INSTALL FULL HEIGHT FROM TOP OF WALL BASE, INCLUDE ALL TRIM PIECES.
29. WALL PROTECTION TO OCCUR BELOW CHAIR RAIL. WALL PROTECTION VARIES PER FLOOR, SEE FINISH LEGEND FOR COLORS PER FLOOR.
30. SEE TYPICAL RESIDENT ROOM FINISH PLAN ON A-802. LVP TO BE INSTALLED PARALLEL TO THE COORIDOR DOOR OPENING.
31. FLOORING INSTALLATION PLAN REQUIRED.
32. STAIRWELL STRINGERS AND HANDRAIL TO BE PNT-18.

CODES AND STANDARDS

1. New construction has been designed to, and shall be constructed in accordance with the following building codes and standards:
   - A. 2024 Ohio Building Code (OBC 2024)
   - B. 2024 Ohio Existing Building Code (OEBC 2024)
   - C. City of Cleveland, Ohio, Code of Ordinances
   - D. ASCE 7-16, Minimum Design Loads and Associated Criteria for Buildings and Other Structures
2. Unless explicitly modified in the Contract Drawings and Specifications, the Contractor shall comply with provisions of:
   - A. ACI 301-20, Specifications for Structural Concrete
   - B. ACI 318-19, Building Code Requirements for Structural Concrete
   - C. TMS 402-16, Building Code Requirements for Masonry Structures
   - D. TMS 602-16, Specification for Masonry Structures
   - E. AISC 360-16, Specification for Structural Steel Buildings
   - F. AWS D1.1-15, Structural Welding Code - Steel
   - G. AWC NDS-2018, National Design Specification (NDS) for Wood Construction with 2018 Supplement
   - H. AWC SDWPS-21, Special Design Provisions for Wind and Seismic
   - I. TPI 1-2014, National Design Standard for Metal-plate-connected Wood Truss Construction
   - J. APA PDS-20, Panel Design Specification

DESIGN LOADS

Floor live load (unless otherwise noted)

(Designate areas and list accordingly) ---------- psf (1) (2)

(1) Live Loads are reduced per OBC section 1607.12 to a maximum reduction of 40%
(2) Plus 15 psf partition allowance, unreduced (OBC 1607.5)

Roof loads

Roof live load	psf
Weight of vegetative and landscaped roofs	psf (3)
Rain Intensity (OBC Figure 1611.1)	i = in/hr
Rain Load (OBC 1611.1) ponded water	psf min. not critical (4) (5) OR xxx psf (4) (5)
Ponding Instability (OBC 1611.2)	not critical (5)
Photovoltaic panel systems weight	psf
Allowance for hanging loads for roofs over:	
Mechanical equipment room	psf
Gymnasiums	psf
Catwalks	psf
Helipads (OBC 1607.6)	

(3) Landscaping materials and saturated soil as DL
(4) Architect has provided scuppers and/or secondary drainage system
(5) Assumes primary drainage is blocked and rain accumulates to depth of overflow (see Architect's detail) at 62.4 pcf

Roof snow load data

Minimum roof snow load (City of Cleveland)	30 psf
Ground snow load (OBC 1608.2)	p_g = psf
Flat-roof snow load (ASCE 7, 7.3)	p_f = psf (6)
Minimum snow load (ASCE 7, 7.3.4)	p_m = psf
Rain-on-snow surcharge (ASCE 7, 7.10)	psf
Snow exposure factor (ASCE 7, Table 7.3-1)	C_e =
Snow importance factor (ASCE 7, Table 1.5-2)	I_s =
Thermal factor (ASCE 7, Table 7.3-2)	C_t =
Slope Factor (ASCE 7, Figure 7.4-1)	C_s =

(6) Increased for snow buildup / unbalanced per ASCE 7, 7.6 to 7.9

Wind design data

Minimum wind load	20 psf
Ultimate design wind speed (OBC Figure 1609.3)	V_{ult} = mph
Nominal design wind speed (OBC 1609.3.1)	V_{asd} = mph
Risk category (OBC, Table 1604.5)	
Exposure category (OBC 1609.4)	
Internal pressure coefficient (ASCE 7, Table 26.13-1)	GCpi = ±
Components and Cladding	
Effective Wind Area	ft² (7)
Zone 1 (Roof Interior)	+XX.X, -XX.X psf
Zone 1' (Roof Interior)	+XX.X, -XX.X psf
Zone 2 (Roof Edge)	+XX.X, -XX.X psf
Zone 3 (Roof Corner)	+XX.X, -XX.X psf
Zone 4 (Wall Interior)	+XX.X, -XX.X psf
Zone 5 (Wall Corner)	+XX.X, -XX.X psf

(+) Indicates pressure acting toward the surface
(-) Indicates pressure acting away from the surface
Edge and corner zones are defined as areas within X'-X" of edge or corners

Uplift on canopies and overhangs ---------- psf

(7) Components and cladding engineer may calculate wind loads based on actual effective wind area per ASCE 7

Earthquake design data

Risk category (OBC, Table 1604.5)	
Seismic importance factor (ASCE 7, Table 1.5-2)	I_e =
Mapped spectral response acceleration parameters	
Short period	S_s = 0. g
1-second period	S_1 = 0. g
Site class (per Geotechnical Report)	
Design spectral response acceleration parameters	
Short period	S_{ds} = 0. g
1-second period	S_{d1} = 0. g
Seismic design category	
Basic seismic-force-resisting system (ASCE 7, Table 12.2-1) A. to H. and text 1. to X. and text	
Design base shear (ASCE 7, 12.8-1)	V = Kips
Seismic response coefficient (ASCE 7, 12.8-2)	C_s =
Response modification factor (ASCE 7, Table 12.2-1)	R =
Analysis procedure	Equivalent lateral force procedure

DESIGN STRESSES

Concrete minimum compressive strength in 28 days:	
Footings	f'_c = 3,000 psi
Interior slabs on grade	f'_c = 4,000 psi
Structural concrete subject to freezing and thawing	f'_c = 5,000 psi
Reinforcing bars (ASTM A615, Grade 60)	F_y = 60,000 psi
Welded wire reinforcement (ASTM A1064)	F_y = 70,000 psi
Structural steel W, WT and S shapes (ASTM A992 or ASTM A572/50)	F_y = 50,000 psi
Structural steel other shapes (ASTM A36)	F_y = 36,000 psi
Anchor rods (ASTM F1554, Grade 55 weldable)	F_y = 55,000 psi
Hollow structural sections (ASTM A500, Grade C) Rectangular	F_y = 50,000 psi
Masonry Load-bearing CMU (ASTM C55 or C90)	f'_m = 2,000 psi
Mortar (ASTM C270)	Type M or S
Grout (ASTM C476)	3,000 psi
Soil bearing pressure for foundations (Engineer note: describe bearing strata)	psf

GENERAL

1. All new construction shall comply with the Contract Documents and the Building Code.
2. Typical details and general notes apply to all parts of the work except where specifically detailed or unless otherwise noted.
3. The structural drawings illustrate structural members. Refer to architectural, mechanical, and electrical drawings for non-structural items which require special provisions during the construction of the structural members.
4. Drawings are not to be scaled.
5. Refer to architectural plans for floor depressions, openings, slopes, drains, curbs, pads, embedded items, non-bearing partitions, etc. Refer to mechanical and electrical plans for sleeves, openings, and hangers for pipes, ducts, and equipment.
6. No pipes or ducts shall be embedded into structural members unless so shown on the plans or approved by the Engineer.
7. The Contractor shall verify and be responsible for all dimensions and conditions which impact the work. Field verify sizes, elevations, hole locations, etc., prior to fabrication.
8. The Contractor shall carefully review the drawings to identify the scope of work required, visit the site to relate the scope of work to existing conditions and determine the extent to which those conditions and physical surroundings will impact the work.
9. Locate existing underground utilities in areas of construction. Coordinate with utility companies for any shut-off requirements of still active lines.
10. The Contractor shall resolve any conflicts on the drawings or in the specifications with the Architect/Engineer before proceeding with the work.
11. Any deviation, modification, or substitution from the approved set of structural drawings shall be submitted to the Owner, Architect, and Engineer for review/approval prior to its use or inclusion on the shop drawings.
12. The Contractor shall provide all necessary shores, braces, and guys required to support all loads to which the building structure and components, soils, other structures, and utilities may be subjected during construction. Shoring systems shall be designed, signed, and sealed by a professional engineer licensed in the jurisdiction where the project is located.
13. The Contractor shall provide means, method, techniques, sequence, and procedure of construction as required.
14. The Contractor shall protect all work, materials, and equipment from damage and shall provide proper storage facilities for materials and equipment during construction.
15. Site visits performed by the Architect/Engineer do not constitute inspections of means and methods of construction performed by the Contractor.
16. Structural observations performed by the Architect/Engineer during construction are not the continuous and special inspection services and do not waive the responsibility for the inspections required of the Building Department Inspector or the testing agency. Observations also do not guarantee the Contractor's performance and shall not be considered as supervision of construction.
17. The Contractor shall review shop drawings for completeness and compliance with contract documents. The Contractor shall stamp shop drawings prior to submission to the Architect and Engineer.
18. Review of the shop drawings by the Architect's Engineers shall not be construed as an authorization to deviate from the Contract Documents.
19. Shop drawings will not be processed if they are incomplete, lack coordination with relevant portion of contract documents, lack calculations if required, or if deviations, modifications, and substitutions are indicated without prior written approval from the Architect/Engineer.
20. Existing conditions as shown on these plans are for reference only. The Contractor is required to field verify all existing conditions prior to construction.

FOUNDATIONS AND SLABS ON GROUND

1. Ground supported building components including foundations, slabs-on-grade, foundation walls, and retaining walls are designed in accordance with recommendations provided in the Geotechnical Report prepared by _____, Geotechnical Engineers, dated _____. The Geotechnical Report is provided for reference as the source of information used to design ground supported building components. The Structural Engineer is not responsible or liable for the accuracy of information presented in the Geotechnical Report.
2. Footings: Elevations given are to top of footings and grade beams.
3. Slab on ground, ramps and steps: Slab elevations given are to top of structural slab. See Architect's drawings for layout of ramps and steps.
4. All footings must be supported on undisturbed soil capable of achieving the design soil bearing pressure without appreciable settlement. Where additional excavation is required to attain the design bearing pressure, backfill the overexcavated area with CLSM or lean concrete up to the design bearing elevation.
5. Controlled Low Strength Material (CLSM) shall meet the following requirements, unless specifically stated in the Geotechnical Report:
   - A. Unit weight between 90 pcf and 120 pcf per ASTM D6023.
   - B. Flowability of a minimum of 8" per ASTM D6103.
   - C. Unconfined compression strength = 200 psi per ASTM D4832.
   - D. CLSM shall be protected and not loaded until meeting ASTM D6024.
6. Provide (2) #5 minimum continuous in all footings directly under masonry walls.
7. Unless otherwise noted, compact all engineered fills to 95% of the maximum dry density per ASTM D1557 Modified Proctor Method.
8. In granular soils (sands and gravel) the soil shall be mechanically tamped to a hard surface immediately prior to placing footing.
9. Existing foundations:
   - A. Existing foundations shown on drawings are approximate. Exact conditions must be verified at time of construction.
   - B. When new footings meet existing footings, they shall be stepped at a ratio of 2 horizontal to 1 vertical.
   - C. Unless otherwise noted, new footings shall not bear below existing footings.
10. Before backfill, all walls must be adequately braced. For backfill requirements, see specifications and/or geotechnical report.
11. Provide a minimum of (4) #5 vertical bars and #3@12" on center horizontal ties for concrete piers under columns or beams.
12. Bearing into shale: elevations given are approximate and shall be adjusted to suit field conditions.
13. When excavations approach the ground water level, the water level shall be lowered by an acceptable dewatering system so that the water level is maintained continuously a minimum of 2'-0" below the excavation.
14. Shale containing pyrites must be protected as indicated on the drawings or in the project specifications.
15. The bottom of foundations shall be protected against freezing until backfill or other permanent protective cover is in place.

CONCRETE CONSTRUCTION

1. All concrete construction shall be in accordance with the latest Building Code Requirements for Structural Concrete ACI 318 and ACI Detailing Manual, except that construction and removal of forms and reshoring shall be inspected by the Contractor's engineer.
2. Reinforcing steel shall have the following minimum coverage in accordance with the following table. Place bars as near to the concrete surface as these minima permit wherever possible, unless noted otherwise:

Concrete Exposure	Member	Reinforcement	Specified cover, in.
Cast against and permanently in contact with ground	All	All	3
Exposed to weather or in contact with ground	All	No. 6 through No. 18 bars	2
		No. 5 bar and smaller	1 1/2
Not exposed to weather or in contact with ground	Slabs, joists and walls	No. 14 and No. 18 bars	1 1/2
		No. 11 bar and smaller	3/4
	Beams, columns, pedestals, and tension ties	Primary reinforcement, stirrups, ties, spirals, and hoops	1 1/2

3. Welded wire reinforcement for slabs on ground shall have a minimum top coverage of 1" and a maximum top coverage of 1 1/2", unless otherwise noted. Reinforcement shall be positively supported and maintained in this position during placement of concrete.
4. Furnish bar supports where necessary during construction.
5. Provide plastic-coated (not plastic-tipped) or stainless steel chairs in all concrete exposed to view in completed structure.
6. Provide pipe sleeves and inserts in concrete work where required. See architectural and mechanical drawings.
7. Unless noted otherwise, provide the following minimum reinforcing:
   - A. Slabs on ground, slabs on deck, and toppings (2" minimum): 6x6-W1.4xW1.4 welded wire reinforcement in flat sheets.
8. Construction joints shall be positioned so as not to change the structural design requirements. Framed floors and roofs shall have construction joints so that the ratio of length to width of a single pour shall not exceed 2. The location and size of all construction joints shall be approved by the Engineer. Submit proposed pour layout for Engineer's review and approval two weeks prior to placing concrete.
9. Welding of reinforcing bars (including tack welding) is not permitted without permission of Engineer in writing. Where and when permitted, welded rebars shall comply with ASTM A706 (Fy=60 ksi) and welding shall conform to AWS D1.4. Welding shall be performed by certified welders.
10. Provide horizontal keyways in construction joints in beams, joists, supported slabs, walls, and wall footings; minimum 1 1/2" depth with height equal to one-third of member depth, unless otherwise shown or noted.
11. Unless noted otherwise in project specifications or drawings, all exposed concrete subjected to freezing and thawing shall have a minimum cement content of 610 pounds per yard, a maximum water/cement ratio of 0.40, and 6%±1.5% of entrained air.
12. At footing corners, innermost reinforcing shall have 1'-0" long hook at far face. For outer reinforcing, provide corner bars with lap length of 36 bar diameters (2'-0" minimum).
13. Provide foundation dowels for all walls, piers, and columns same size and spacing as vertical steel.
14. All bars interrupted by structural steel shall extend to within 1" of structural steel flange or web and have a 90° hook unless otherwise shown.
15. Drawings show typical reinforcing conditions. Contractor shall prepare detailed placement drawings of all conditions showing quantity, spacing, sizes, clearances, laps, intersections, and coverage required by the structural details, applicable code, and trade standards. Contractor shall notify reinforcing inspector of any adjustments from typical conditions which are proposed in placement drawings to facilitate field placement of reinforcing steel and concrete.
16. Bar bends shall be made cold. Bars shall not be bent after any portion of the bar is encased in concrete.
17. Splices (grade 60 deformed bars):
   - A. Lap all compression splices 30 bar diameters of the larger bar.
   - B. Lap all tension splices in accordance with the following tables. Provide Class B Tension Lap Splices unless otherwise noted.
   - C. Increase tension or compression splice lengths by the following factors. Increases are Cumulative:
     1. Epoxy-coated with clear cover less than 3 bar diameters or clear spacing less than 6 bar diameters: 1.5
     2. Epoxy-coated other bars: 1.2
   - D. Top bars are defined as horizontal bars with more than 12" of fresh concrete below.

Bar Size	Class B Tension Lap Splice					
	f'_c = 3,000 psi		f'_c = 4,000 psi		f'_c = 5,000 psi	
	Top	Other	Top	Other	Top	Other
#3	28"	22"	24"	19"	22"	17"
#4	37"	29"	33"	25"	29"	23"
#5	47"	36"	41"	31"	36"	28"
#6	56"	43"	49"	37"	43"	34"
#7	81"	63"	71"	54"	63"	49"

Bar Size	Class A Development Length, l_d					
	f'_c = 3,000 psi		f'_c = 4,000 psi		f'_c = 5,000 psi	
	Top	Other	Top	Other	Top	Other
#3	22"	17"	19"	15"	17"	13"
#4	29"	22"	25"	19"	23"	17"
#5	36"	28"	31"	24"	28"	22"
#6	43"	33"	37"	29"	34"	26"
#7	63"	48"	54"	42"	49"	38"

MASONRY CONSTRUCTION

1. Masonry walls shown on structural drawings have been designed in accordance with TMS 402, Building Code Requirements for Masonry Structures.
2. Masonry walls shall be constructed in accordance with TMS 602, Specifications for Masonry Structures, and the project specifications.
3. Determine compressive strength of masonry (f'm) by the unit strength method (Article 1.4,B.2 of TMS 602).
   - A. Mortar shall meet the Property Specifications' requirements of ASTM C270, and shall be field tested according to ASTM C780.
   - B. The strength of grout shall be determined by tests in accordance with ASTM C1019.
4. Intersecting walls shall be anchored by one of the following methods (does not apply at control joints or where non-load-bearing partitions abut bearing walls):
   - A. Fifty percent of the units at the intersection shall be laid in an overlapping masonry bonding pattern, with alternate units having a bearing of not less than 3" on the unit below.
   - B. Walls shall be tied by galvanized steel straps 1 1/2" x 1/4" x 24" with 2" bend at 90° each end. Grout straps solid into cores of block at 24" maximum vertical spacing.
5. Corners of bearing walls shall be built in running bond.
6. Provide corner bars in bond beams at wall intersections and corners to match bond beam reinforcing.
7. Provide a minimum of 8" of solid masonry under the bearing ends of loose lintels.
8. Unless otherwise noted, provide galvanized ladder type joint reinforcement at 16" on center vertically per ASTM A951.
9. Welding of reinforcing bars (including tack welding) is not permitted without permission of Engineer in writing.
10. Provide shop drawings which indicate size, spacing, bending details, and type of all reinforcing bars placed in masonry walls.
11. Wall reinforcing shall be held in position during grouting.
12. For bars at face of wall, maintain 1/2" clearance from inside face of CMU to reinforcing.
13. Provide bond beam with (1) #4 continuous reinforcing bar at sill of all openings, unless otherwise noted.
14. Splices:
   - A. Lap all splices in accordance with the following table.
   - B. Increase splice length by 50% for epoxy-coated reinforcing.

Bar Size	Reinforcing Centered in Wall, f'_m = 2,000 psi, Nominal Wall Width					Reinforcing at Face 2" cover
	6"	8"	10"	12"	16"	
#3	15"	15"	15"	15"	15"	15"
#4	20"	20"	20"	20"	20"	22"
#5	28"	25"	25"	25"	25"	35"
#6	53"	38"	30"	30"	30"	64"

Bar Size	Reinforcing Centered in Wall, f'_m = 3,000 psi, Nominal Wall Width					Reinforcing at Face 2" cover
	6"	8"	10"	12"	16"	
#3	15"	15"	15"	15"	15"	15"
#4	20"	20"	20"	20"	20"	20"
#5	25"	25"	25"	25"	25"	28"
#6	43"	31"	30"	30"	30"	53"

LOOSE LINTEL SCHEDULE

1. Interior lintels shall be shop painted. Lintels exposed to weather shall be 3/8" minimum thickness and hot-dip galvanized.
2. Bottom plates in beam/plate assemblies shall be 1/2" less in width than the supported masonry wall. Stop end of bottom plates 1/2" from edge of opening.
3. Weld bottom plates to lintels with continuous fillet welds (exterior side).
4. Steel lintels and lintel plates in exterior walls shall be fabricated, followed by hot-dip galvanizing of the complete assembly.
5. Lintels shall have minimum bearing at each end of 1" per foot of opening (6" minimum) except as detailed.
6. Lintels shall have 8" minimum solid masonry below bearing points and shall extend beyond the full bearing area.
7. Lintel bearing plates shall be held back 1/2" minimum from face of masonry at opening. Provide flexible caulk between lintel and masonry at this location. Match mortar color.
8. The following schedules apply to all non-bearing masonry walls and to bearing walls where lintels are not indicated on the structural drawings. See drawings for other lintels in bearing walls.
   - A. For 4", 8", 12", and 16" walls, provide one angle for each 4" of masonry wall thickness with 3 1/2" leg horizontal as follows:

Span Limits	Angle Size
0'-0" to 4'-0"	L3 x 3 1/2 x 1/4
4'-1" to 5'-6"	L4 x 3 1/2 x 5/16
5'-7" to 7'-6"	L5 x 3 1/2 x 5/16
7'-7" to 9'-6"	L6 x 3 1/2 x 3/8

STEEL CONSTRUCTION

1. Steel detailing, fabrication, and erection shall conform to the AISC Specification for Structural Steel Buildings and Code of Standard Practice, and the AWS Structural Welding Code.
2. Stresses occurring during fabrication, shipment, and erection shall be temporary and not excessive. Stresses at all times shall be less than design and allowable stresses. The full design and load-carrying capacity of the steel work shall not be impaired due to fabrication, shipment, or erection procedures. Throughout the complete process, the stability of all individual members and assembles shall be maintained.
3. The Contractor shall be responsible for the control of all erection procedures and sequences with relation to temperature differentials and weld shrinkage.
4. All additional steel required for erection purposes shall be provided at no additional cost and shall be removed unless approved by the Owner in writing.
5. Connections - welded or high strength bolted:
   - A. Bolts shall be ASTM F3125 and shall be installed in accordance with "Specifications for Structural Joints Using High-Strength Bolts".
   - B. Provide slip critical bolts for all moment connections, wind connections, hangers, and other connections as noted on drawings.
   - C. Provide bearing type connections with thread included in the shear plane for all connections other than slip critical connections.
   - D. Provide hardened washers under nuts at all high-strength bolts, except where plate washers are used per AISC Specifications.
   - E. Unless snug tight connections are noted on the drawings as being permitted, all bolts should be tightened to full pretensioning load.
   - F. Use standard holes with the following exceptions: oversize holes are permitted when bolts are loaded in tension; short slotted holes are permitted for shear loading perpendicular to the slot.
   - G. Provide beveled washers on all connections to sloping flanges of I sections and channels where slope exceeds 1:20.
   - H. Where minimum AISC fillet weld thickness requirement exceeds welds shown on details, or weld size is not specified, provide minimum AISC weld.
   - I. The length of connection shall not be less than one-half of the T distance of the beam web.
   - J. Where reaction is noted, develop same. Where not noted, for non-composite beams, connections shall develop one-half of the total uniform load capacity of the beam; for composite beams, see table listed in typical details.
6. Welding electrodes shall be E70XX except where other electrodes are required for compatibility with material being welded.
7. All slip connections shall be provided with a means of preventing the nuts from unthreading.
8. Shop drawings are required and shall note type of electrodes, size of all welds, and type and size of all bolts. Shop drawings shall be prepared under the supervision of a professional engineer licensed in the jurisdiction where the project is located.
9. Primer, see specifications.
10. Beams bearing on masonry shall have angle wall anchors and bear a minimum of 8" onto the wall. Masonry shall be built tightly around beam unless otherwise noted.
11. See all contract drawings for miscellaneous steel requirements.
12. All shop and field welding shall be performed by a recently certified welder.
13. All welding and high strength bolting must be inspected by a qualified testing laboratory. Laboratory shall be approved by the Architect and/or Engineer.
14. At column base plates, provide a minimum of 1" grout with (4) 3/4" diameter anchor bolts with 1'-0" embedment.
15. At roof beam bearing plates, provide a minimum of 3/4" grout with (2) 3/4" diameter anchor bolts with 1'-0" embedment.
16. Provide 1/4" closure plates at all open ends of HSS members.
17. Miscellaneous hanging loads such as stair stringers, pipes, mechanical units, etc., supported by steel members shall be applied in such a manner that no torsional forces are induced in the steel members, i.e., loads shall pass through the centerline of wide flange sections and through the shear center of channels.

POST-INSTALLED ANCHORS

1. Anchorage to hardened concrete or masonry shall include torque controlled expansion anchors and adhesive anchors of size, number and spacing as shown on the drawings.
2. All anchors shall be installed in accordance with the Manufacturer's Printed Installation Instructions (MPII).
3. Existing reinforcing bars in the concrete or masonry may conflict with specific anchor locations. Reinforcing bars shall not be cut unless specifically noted on the drawings or approved by the Engineer of Record. The contractor shall review the structural drawings and shall locate the position of reinforcing bars in the vicinity of the anchors, by ground penetrating radar (GPR), x-ray, or other means.
4. Anchors shall be installed in holes drilled with a rotary impact hammer drill. Core drilling of holes is not permitted. Holes and anchor shall be thoroughly cleaned per the MPII prior to installation of the anchor.
5. Stainless steel anchors shall be used at all exterior locations and where specifically noted on the drawings.
6. Remove and replace mispla ced or malfunctioning anchors. Patch failed anchor locations with high-strength non-shrink, non-metallic grout.
7. Installed adhesive anchors shall be securely held in-place to prevent displacement while the adhesive cures.
8. All anchors supporting structural elements shall be enclosed with a fire-resistance-rated envelope or protected by approved fire-resistance rated materials.
9. Quality Control:
   - A. All anchors shall be periodically inspected to meet the requirements of MPII and the ICC-ES ESR report for the product.
   - B. All anchor installers shall be trained by the manufacturer or manufacturer's representative for each individual product being installed.
10. Submittals:
    - A. Technical product literature, highlighting each anchor and size to be used on the project.
    - B. Manufacturer's Printed Installation Instructions (MPII) for each anchor type.
    - C. Engineering Design Data: For each substitution request, provide calculations substantiating specified design requirements, sealed by a professional engineer licensed in the jurisdiction where project is located.
11. Where a specific type of anchorage is indicated on the drawings, substitution for a different type of anchorage shall meet the requirements of ACI 355.2 Category 1 or ACI 355.4 Category 1 for anchorage into concrete or shall have an ICC-ES ESR report for anchorage into masonry. Substitution shall not be permitted without prior written approval of the Engineer of Record.
12. Anchors to hardened concrete shall be supplied as an entire system and shall be as follows:
    - A. Torque Controlled Anchors (Expansion Anchors) in cracked and un-cracked concrete as indicated on the drawings shall be Hilti KWIK Bolt TZ2 Expansion Anchor (ICC-ES Evaluation Report: ESR# 4266).
    - B. Adhesive anchors in cracked and un-cracked concrete indicated on the drawings shall be Hilti HIT-HY 200 V3 Safe Set Adhesive Anchoring System (ICC-ES Evaluation Report: ESR# 4868). The following anchor rods shall be used with the system:
      1. Reinforcing bar meeting the requirements of ASTM A615/A706 Grade 60.
      2. All-threaded rod shall be Hilti HIT-Z rods.
13. Requirements and design parameters of post-installed anchors into hardened concrete:
    - A. Concrete shall have a minimum compressive strength of 2,500 psi and a minimum age of 21-days at the time of installation for adhesive anchors and 7-days for expansion anchors.
    - B. Concrete temperature at the time of installation of adhesive anchors shall be a minimum of 50°F.
    - C. Concrete may be water saturated or dry; water filled holes shall not be allowed.
    - D. Embedment depth and anchor projection shall be as detailed on the drawings. Unless otherwise noted, minimum embedment depths, spacing, and edge distance shall be by the table below.
14. Anchors into masonry shall be supplied as an entire system and shall be as follows:
    - A. Torque Controlled Expansion Anchors (Expansion Anchors) in solid or grout filled masonry as indicated on the drawings shall be Hilti KWIK Bolt TZ2 Expansion Anchor (ICC-ES Evaluation Report: ESR# 4561).
    - B. Adhesive anchors in hollow, solid or grout filled masonry as indicated on the drawings shall be Hilti HIT-HY 270 Hybrid for Masonry Construction (ICC-ES Evaluation Report: ESR# 4143). Screen tubes shall be used for all connections to hollow masonry. The following anchor rods shall be used with the system:
      1. All-threaded rod shall be Hilti HAS-E rod.
      2. Stainless steel anchor rods shall be AISI Type 304 or 316.
15. Requirements and design parameters of post-installed anchors into masonry:
    - A. Masonry grout shall have a minimum compressive strength of 2,000 psi and a minimum age of 21-days at the time of installation for adhesive anchors and 7-days for expansion anchors.
    - B. Masonry temperature at the time of installation of adhesive anchors shall be between 41°F, and 104°F.
    - C. Masonry may be water saturated or dry; water filled holes shall not be allowed.
    - D. Embedment depth and anchor projection shall be as detailed on the drawings. Unless otherwise noted, minimum embedment depths, spacing, and edge distance shall be by the table below.

Post-installed Concrete Anchors						
	Torque-controlled Anchors			Adhesive Anchors

WOOD CONSTRUCTION

1. Framing plans are schematic; see architectural drawings for dimensions.
2. Wood stress grades:
   - A. Structural Sawn Lumber: (Spruce-Pine-Fir No.1/No.2)
     - F_b = 875 psi, F_c = 425 psi
     - F_t = 450 psi, $F_{c\perp}$ = 1,150 psi
     - F_v = 135 psi, E = 1.4 x 10E6 psi
     - G = 0.42, E_{min} = 510,000 psi
   - B. Laminated Strand Lumber (LSL):
     - F_b = 1,700 psi, F_t = 1,075 psi
     - E = 1.3 x 10E6 psi, F_c = 710 psi
     - F_v = 425 psi, $F_{c\perp}$ = 1,835 psi
   - C. Laminated Veneer Lumber (LVL):
     - F_b = 2,600 psi, F_t = 1,555 psi
     - E = 2.0 x 10E6 psi, F_c = 750 psi
     - F_v = 285 psi, $F_{c\perp}$ = 2,510 psi
   - D. Parallel Strand Lumber (PSL):
     - F_b = 2,400 psi, F_t = 1,755 psi
     - E = 1.8 x 10E6 psi, F_c = 545 psi
     - F_v = 190 psi, $F_{c\perp}$ = 2,500 psi
3. Construction shall conform to the National Design Specification (NDS) for Wood Construction.
4. See drawings for headers at bearing walls.
5. Studs in bearing and shear walls shall be 2x6 spaced at 16" on center maximum, unless otherwise noted.
6. Sheathing on bearing walls, exterior walls, and shear walls shall be lapped on a common stud or top and bottom plate.
7. Cutting of joists and beams for pipes shall not be permitted without the approval of the Engineer.
8. Bolts shall conform to ASTM A307 with 1/16" oversized holes. Standard plain washers shall be used on all bearings of heads and nuts against wood, unless otherwise noted.
9. All metal fasteners, connectors or other hardware exposed to weather or in direct contact with preservation treated lumber shall be stainless steel, or have galvanized coating (per ASTM A123 or A153)
10. Unless otherwise noted, wood sills shall be anchored with 5/8" diameter anchor rods with 12" embedment spaced at 4'-0" on center maximum with a minimum of two bolts per sill. Bolts shall be ASTM A307 with washers.
11. Double plates shall lap a minimum of 4'-0" at splices and be nailed with no less than (8) 16d nails except as otherwise noted or shown. All cuts in plates shall occur over a bearing.
12. At double plates, provide 16d nails at 16" on center unless noted otherwise.
13. Holes in wood sills or plates of shear and bearing walls shall be placed in the center of the piece and shall be no larger in diameter than one-third the width of the sill or plate. Notching is not allowed. Holes larger than noted above may be bored into the sill provided the sill is considered cut at the holes and anchor bolts are placed at each side of the holes.
14. Horizontal bridging for stud walls shall be installed in all walls and partitions where studs are greater than 8'-0" in height.
15. At stud walls intersecting with concrete or masonry walls, the end stud shall be bolted to the concrete or masonry wall with 1/2" diameter sleeve anchors at 4'-0" on center.
16. Joist hangers, sheet metal framing clips and angles, straps, etc. shall be as manufactured by the Simpson Company or other approved.
17. Ceiling joists with no attic live load:

Span Limits	Joist Size
0'-0" to 8'-0"	2 x 4 at 16" on center
8'-1" to 14'-0"	2 x 6 at 16" on center
14'-1" to 20'-0"	2 x 8 at 16" on center

18. Headers over openings in non-bearing walls (provide 3 members for 2 x 6 walls):

Span Limits	Header Size
0'-0" to 4'-0"	(2) 2 x 4
4'-1" to 6'-0"	(2) 2 x 6
6'-1" to 10'-0"	(2) 2 x 8
10'-1" to 12'-0"	(2) 2 x 10

19. Stud walls supporting wood beams or headers shall have posts under bearing. Provide one 2x stud at each end of wood beam or header for every 2'-8" of beam or header span, unless otherwise noted. Depth of post to match depth of the stud wall.

SHOP-FABRICATED WOOD TRUSS CONSTRUCTION

1. Trusses to be designed in accordance with ANSI/TPI 1 "National Design Standard for Metal Plate Connected Wood Truss Construction".
2. Truss manufacturer shall be an approved fabricator per Section 1704.2.5.1 of the Building Code.
3. Framing plans are schematic; see architectural drawings for dimensions, work points, overhangs, etc.
4. Trusses are to be spaced at 24" on center maximum. Web arrangement is to be the manufacturer's standard unless otherwise noted on drawings. Coordinate web arrangement with architectural and mechanical drawings.
5. Cutting of trusses for pipes, conduits, or other utilities shall not be permitted without the approval of the Engineer and must be in accordance with the manufacturer's requirements. Obtain approval in writing before proceeding. Notching of members is not allowed.
6. All connections shall be of galvanized steel and shall comply with the ANSI/TPI National Design Standard for Metal Plate Connected Wood Truss Construction. Trusses exposed to weather shall have connections of type 304 stainless steel.
7. Trusses shall be designed under the supervision of a professional engineer licensed in the jurisdiction where project is located.
8. All truss-to-truss connections shall be by truss manufacturer.
9. Do not install roof sheathing below piggyback trusses. Truss manufacturer shall indicate top chord blocking for the lower truss and piggyback attachment details.
10. Lower gable end trusses for construction of outrigger framing.
11. Truss manufacturer shall supply the following information for approval prior to fabrication:
    - A. Truss configuration, including span, pitch, and spacing of panel points, including piggyback, truss-to-truss, and falsework framing.
    - B. Species, stress grade, and nominal size of lumber used.
    - C. Design dead and live loads, including panel point loads and reactions.
    - D. Calculations of member axial forces and flexural stresses, including the design for combined loading, as applicable.
    - E. Joint and splice connection design and details.
    - F. Drawings to indicate truss layout, configuration, and permanent individual truss member restraint/bracing.
    - G. Calculations sealed by a professional engineer licensed in the jurisdiction where project is located.
    - H. Relevant sections of the Building Component Safety Information (BCSI) publications.
    - I. All referenced standard industry details.
12. Verify that supports are ready to receive trusses.
13. Install members level and plumb and within tolerances of ANSI/TPI 1.
14. Temporary bracing shall be provided as indicated in the latest Building Component Safety Information (BCSI).
15. Permanent/individual truss member restraint shall be installed as required by the truss manufacturer. Restraint/bracing shall follow BCSI-B3 - "Permanent restraint/bracing of chords and web members", unless the truss manufacturer specifies more stringent requirements.
16. The truss manufacturer shall provide design and details of temporary installation restraint/bracing and permanent individual truss member/restraint bracing for all trusses with clear spans 60 feet or greater. Calculations and drawings shall be sealed by a professional engineer licensed in the jurisdiction where the project is located.
17. Provide header/girder trusses at roof openings. Coordinate locations with architectural and mechanical drawings.
18. Frame openings between trusses with visually graded lumber.
19. See Design Loads section for required snow, wind and seismic design criteria. See below for minimum design loads (in addition to weight of truss) and maximum deflections, unless otherwise noted.
20. Roof trusses:
    - A. Top Chord
      - Dead Load ---------- 15 psf
      - Live Load ---------- 30 psf
    - B. Bottom Chord
      - Dead Load ---------- 10 psf
      - Live Load (non-concurrent w/ roof LL) ------ 20 psf
    - C. Deflection
      - 50% Dead Load + 100% Live Load -------- L/360, 3/4" max.
21. Floor trusses:
    - A. Top Chord
      - Dead Load ---------- 25 psf
      - Live Load ---------- As noted
    - B. Bottom Chord
      - Dead Load ---------- 5 psf
      - Live Load ---------- 0 psf
    - C. Deflection
      - Live Load ---------- L/480
      - Total Load ---------- L/360

STRUCTURAL TESTING AND SPECIAL INSPECTIONS

Structural testing and special inspections are required. The owner shall engage a qualified independent testing agency to conduct structural testing and special inspections. Special inspectors shall be employed or retained by the approved testing agency and have the recommended experience and certifications as summarized in Appendix C of the current International Code Counsel (ICC) Special Inspection Manual. The testing agency may employ or retain multiple special inspectors with differing areas of expertise as required for the project.

Structural observations performed by the Architect/Enginere during construction are not special inspection services and do not waive the responsibility of the inspections required of the Building Department Inspector or the testing agency. Obersavations by the Architect/Engineer do not guarantee the Contractor's performance and shall not be considered as supervision of construction.

At or before project completion, the qualified testing agency shall submit a written summary statement indicating that applicable structural testing and special inspections have been completed. The written summary statement shall clearly identify non-compliant test and inspection results. The written summary statement shall be sealed by the testing agencies supervising professional engineer and be submitted to the owner, building official, and design professionals. The required testing and inspections are indicated in the following table.

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Soils: Foundation Bearing & Engineered Fill Placement				
Verify materials below shallow foundations are adequate to achieve the design bearing capacity.	Periodic	Geotechnical Report	N/A	
Verify excavations are extended to proper depth and have reached proper material.	Periodic	Geotechnical Report	N/A	
Perform classification and testing of compacted fill materials.	Periodic	Geotechnical Report	N/A	
Verify use of proper materials, densities and lift thicknesses during placement and compaction of compacted fill.	Continuous	Geotechnical Report	N/A	
Prior to placement of compacted fill, observe subgrade and verify that site has been prepared properly.	Periodic	Geotechnical Report	N/A	
Verify all requirements of geotechnical report are met.	Periodic	Geotechnical Report	N/A	
Controlled Low-Strength Material (CLSM) Placement				
Verify excavations are extended to proper depth and have reached proper material.	Periodic	Geotechnical Report	N/A	
Verify materials below CLSM are adequate to achieve the design bearing capacity.	Periodic	Geotechnical Report	N/A	
Sample fresh CLSM: One composite sample shall include four 6" diameter cylinders for strength, one flowability test, one air content test, and one unit weight test.	Obtain composite samples not less than once a day, nor less than once for each 150 cy.	ASTM D 5971	1803.5.9	
Obtain test cylinders of CLSM.	One set of four 6" diameter cylinders for each composite sample.	ASTM D 4832	1803.5.9	
Perform slump / flowability tests of CLSM.	One test at point of discharge for each composite sample.	ASTM D 6103	1803.5.9	
Perform air content tests of CLSM.	One test at point of discharge for each composite sample.	ASTM D6023	1803.5.9	
Determine the unit weight of fresh CLSM.	One test at point of discharge for each composite sample.	ASTM D6023	1803.5.9	
Laboratory test CLSM cylinders for compressive strength.	Two specimen tested at 7 days, two specimens tested at 28 days.	ASTM D 4832	1803.5.9	
Field test CLSM for suitability of load application.	Periodic	ASTM D 6024	1803.5.9	

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Cast-In-Place Concrete				
Inspect reinforcing steel including prestressing tendons: a. Verify reinforcing bar grade. b. Verify reinforcing bars are free of dirt, excessive rust, and damage. c. Verify reinforcing bars are adequately tied, chaired, and supported to prevent displacement during concrete placement. d. Verify proper clear distances between bars and to surfaces of concrete. e. Verify reinforcing bar size and placement. f. Verify bar laps for proper length and stagger. g. Verify mechanical splices placement and attachment. h. Verify epoxy or galvanized coating and coating damage is repaired.	Periodic - Prior to each pour.	ACI 318: Ch 20, 25.2, 25.3, 26.1-26.6.3	1908.4	
Inspection of reinforcing steel welding: a. Verify weldabilty of reinforcing steel. b. Verify proper electrodes and storage of electrodes. c. Verify proper joint preparation. d. Inspect single- pass fillet welds, maximum 5/16". e. Inspect all other welds. f. Review welder certifications for both fabricator's shop staff and field erectors.	Periodic Periodic Continuous Periodic Continuous Each welder	AWS D1.4 ACI 318: 26.6.4		
Inspect embedments, bolts, headed bolts, and headed studs to be installed in concrete prior to and during concrete placement.	Periodic	ACI 318: 17.8.2	N/A	
Verify use of required mix design: a. Verify mixer truck trip ticket conforms to approved mix design. b. Verify that total water added to mix on site does not exceed that allowed by the concrete mix design. c. Verify that concrete quality is indicative of adequate mixing time, consistency, and relevant time limits.	Periodic - Prior to each pour.	ACI 318: 26.4.3 ACI 301	1904.1 1904.2 1908.2 1908.3	
Inspect formwork for cleanliness, shape, location and dimensions of the concrete member being formed.	Periodic - Prior to each pour.	ACI 318: 26.11.1.2(b)	N/A	
Inspect concrete and shotcrete placement for proper application techniques, including proper consolidation, reinforcement remains at proper location, and conveyance and depositing avoid segregation and contamination.	Continuous	ACI 318: 26.5	1908.6 1908.7 1908.8	
Sample fresh concrete:	Obtain one composite sample of each class of concrete placed each day shall be taken not less than once a day, nor less than once for each 150 cy. of concrete nor less than once for each 5,000 sqft. of surface area for slabs or walls. If the total volume of concrete is such that frequency of testing required would provide less than five composite samples for a given class of concrete, tests shall be made from at least five randomly selected batches (per ASTM D3665) or from each batch if fewer than five batches are used.	ACI 318: 26.4 ASTM C 172	1908.10	A composite sample shall consist of the following: five 4" diameter cylinders, or four 6" diameter cylinders.
Obtain test cylinders of concrete.	One set of five 4" diameter cylinders or four 6" diameter cylinders for each composite sample.	ACI 318: 26.12 ASTM C 31	N/A	Cast additional cylinders at contractor's request and expense for field cured specimens to determine shoring removal, early strength for post-tensioning, etc.
Obtain grout cubes for deferred placed concrete toppings	One set of three 2" molded-cube for each composite sample.	ASTM C 109	N/A	
Perform slump tests.	One test at point of discharge for each composite sample.	ASTM C 143	N/A	
Perform air content tests.	One test at point of discharge for each composite sample.	ASTM C 231, pressure method for normalweight concrete; ASTM C 173, volumetric method for lightweight concrete	N/A	
Determine the temperature of fresh concrete.	One test for each composite sample, and test hourly and when air temperature is below 40°F or when above 80°F.	ASTM C 1064	N/A	
Determine the unit weight of fresh lightweight concrete.	One test at point of discharge for each composite sample of lightweight concrete.	ASTM C567	N/A	
Review and inspect cold weather concrete procedures and placement.	Periodic - Prior to each pour.	ACI 306.1 ACI 318 26.5.4		
Review and inspect hot weather concrete procedures and placement.	Periodic - Prior to each pour.	ACI 305.1 ACI 318 26.5.5		
Inspect for maintenance of specified curing temperature and techniques.	Periodic - After each pour.	ACI 318: 26.5.3-26.5.5	1908.9	
Laboratory test concrete cylinders for compressive strength.	One specimen tested at 7 days, two specimens tested at 28 days, and one specimen retained in reserve for later testing if required.	ACI 318: 26.12 ASTM C 39	N/A	Three specimens shall be tested at 28 days if using 4" diameter cylinders. Test additional cylinders at contractor's request and expense.
Laboratory test concrete cubes for compressive strength for deferred placement toppings.	Test one set of three specimens at 28 days.	ASTM C 109	N/A	
Inspect anchors post- installed into hardened concrete a. Adhesive anchors installed in horizontally or upwardly inclined orientations to resist sustained tension loads. b. All other Mechanical anchors and adhesive anchors not defined in a.	Continuous Periodic	ACI 318: 17.8.2.4 ACI 318: 17.8.2	N/A	
Measure & report floor slab levelness (F_L) and flatness (F_F) for shored, non-cambered, and non-inclined surfaces.	Measure all floors within 24 hours of finishing.	ACI 117 4.8.5 ASTM E1155	N/A	
Measure & report floor slab flatness for cambered, unshored, and inclined surfaces.	Measure the gap under a freestanding (unleveled) 10 ft. straightedge.	ACI 117: 4.8.6	N/A	
Deferred placement floor toppings shall be tested for delamination by dragging a steel chain over the surface.	All floor areas after 28 days.	N/A	N/A

Verify sample panel construction	Periodic	Continuous	TMS 602: Art. 1.6 D	N/A	
Prior to grouting, the following shall be verified to ensure compliance:					
Verify grout space is clean.	Periodic	Continuous	TMS 602: Art. 3.2 D, 3.2 F	N/A	
Verify placement of reinforcement, connectors, and anchor bolts.	Periodic	Continuous	TMS 602: Art. 3.2 E, 3.4	N/A	
Verify proportions of site-prepared grout.	Periodic	Periodic	TMS 602: Art. 2.6 B	N/A	
During construction the inspection program shall verify:					
Materials and procedures with the approved submittals	Periodic	Periodic	TMS 602: Art. 1.5	N/A	
Placement of masonry units and mortar joint construction	Periodic	Periodic	TMS 602: Art. 3.3 B	N/A	
Size and locations of structural members	Periodic	Periodic	TMS 602: Art. 3.3 F	N/A	
Type, size, and location of reinforcement and anchors, including other details of anchorage of masonry to structural members, frames, or other construction	Periodic	Continuous	TMS 402: Sec. 1.2.1 (e), 6.2.1, 6.3.1	N/A	
Verify welding of reinforcing bars.	Continuous	Continuous	TMS 402: Sec. 6.1.6.1.2	N/A	
Verify preparation, construction and protection of masonry during cold weather (temperature below 40°F)	Periodic	Periodic	TMS 602: Art. 1.8C	N/A	
Verify preparation, construction and protection of masonry during hot weather (temperature above 90°F)	Periodic	Periodic	TMS 602: Art. 1.8D	N/A	
Verify placement of grout and grouting procedures	Continuous	Continuous	TMS 602: Art. 3.5	N/A	
Verify placement of AAC masonry units and construction of thin-bed mortar joints	Continuous	Continuous	TMS 602: Art. 3.3 B.9, 3.3 F.1.b	N/A	
Observe preparation of grout specimens, mortar specimens and/or prisms.	Periodic	Continuous	TMS 602: Art. 1.4 B.2.a.3, 1.4 b.2.b.3, 1.4 B.2.c.3, 1.4 B.3, 1.4 B.4	N/A

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Structural Steel				
Inspection Tasks Prior to Welding:		AISC 360 Table N5.4-1	2204.1	
Welder qualification records and continuity records	Observe	AISC 360 Section N5.4		
Verify procedure specifications (WPS) available	Perform	AISC 360 Section N5.4		
Manufacturer certifications for welding consumables available	Perform	AISC 360 Section N5.4		
Material identification (type/grade)	Observe	AISC 360 Section N5.4		
Welder identification system	Observe	AISC 360 Section N5.4		
Fit up of groove welds and CJP welds of HSS joints (including joint geometry) a. Joint preparation b. Dimensions (alignment, root opening, root face, bevel) c. Cleanliness (condition of steel surface) d. Tacking (tack weld quality and location) e. Backing type and fit (if applicable)	Observe	AISC 360 Section N5.4		
Configuration and finish of access holes	Observe	AISC 360 Section N5.4		
Fit up of fillet welds a. Dimensions (alignment,gaps at root) b. Cleanliness (condition of steel surface) c. Tacking (tack weld quality and location)	Observe			
Inspection Tasks During Welding:		AISC 360 Table N5.4-2	2204.1	
Control and handling of welding consumables a. Packing b. Exposure control	Observe	AISC 360 Section N5.4		
No welding over cracked tack welds	Observe	AISC 360 Section N5.4		
Environmental conditions a. Wind speed within limits b. Precipitation and temperature	Observe	AISC 360 Section N5.4		
WPS followed a. Settings on welding equipment b. Travel speed c. Selected welding material d. Shielding gas type/flow rate e. Preheat applied f. Interpass temperature maintained g. Proper position (F,V,H,OH)	Observe	AISC 360 Section N5.4		
Welding techniques a. Interpass and final cleaning b. Each pass within profile limitations c. Each pass meets quality requirements	Observe	AISC 360 Section N5.4		
Inspection Tasks After Welding:		AISC 360 Table N5.4-3	2204.1	
Welds cleaned	Observe	AISC 360 Section N5.4		
Size,length and location of welds	Perform	AISC 360 Section N5.4		
Welds meet visual acceptance criteria a. Crack prohibition b. Weld/base-metal fusion c. Crater cross section d. Weld profiles e. Weld size f. Undercut g. Porosity	Perform	AISC 360 Section N5.4		
Arc strikes	Perform	AISC 360 Section N5.4		
k-Area (When welding of doubler plate, continuity plates or stiffeners in k-area, visually inspect the weld k-area for crack with in 3 in.)	Perform	AISC 360 Section N5.4		
Weld access holes in rolled heavy shapes and built-up heavy shapes (visually inspect the weld access hole for cracks)	Perform	AISC 360 Section N5.4		
Backing removed and weld tabs removed (if required)	Perform	AISC 360 Section N5.4		
Repair activities	Perform	AISC 360 Section N5.4		
Document acceptance or rejection of welded joint or member	Perform	AISC 360 Section N5.4		
No prohibited welds have been added without the approval of the EOR	Observe	AISC 360 Section N5.4		
Inspection of Welding in Field and in Non AISC Certified Shops: a. Complete joint penetration groove welds subject to transversely applied tension loading in butt, T and corner joints with materials 5/16 inches or thicker. b. Welder qualifications.	Test 100% of welds by ultrasonic testing for risk category III or IV. Test 10% of welds by ultrasonic testing for risk category II.	AISC 360 Section N5.5		All welds subject to non-destructive testing shall also meet visual acceptance criteria per AWS Table 6.1.
Inspection Tasks Prior to Bolting:		AISC 360 Table N5.6-1	2204.2	
Manufacturer's certifications available for fastener materials	Perform	AISC 360 Section N5.6		
Fasteners marked in accordance with ASTM requirements	Observe	AISC 360 Section N5.6		
Correct fasteners selected for the joint detail (grade, type, bolt length if threads are to be excluded from shear plane)	Observe	AISC 360 Section N5.6		
Correct bolting procedure selected for joint detail	Observe	AISC 360 Section N5.6		
Connecting elements, including the appropriate faying surface condition and hole preparation, if specified, meet applicable requirements	Observe	AISC 360 Section N5.6		
Pre-Installation verification testing by installation personnel observed and documented for fastener assemblies and methods used	Observe	AISC 360 Section N5.6		
Protected storage provided for bolts,nuts washers and other fastener components	Observe	AISC 360 Section N5.6		
Inspection Tasks During Bolting:		AISC 360 Table N5.6-2	2204.2	
Fastener assemblies, of suitable condition, placed in all holes and washers (if required) are positioned as required	Observe	AISC 360 Section N5.6		
Joint brought to the snug- tight condition prior to the pretensioning operation	Observe	AISC 360 Section N5.6		
Fastener component not turned by the wrench prevented from rotating	Observe	AISC 360 Section N5.6		
Fasteners are pretensioned in accordance with the RCSC specification, progressing systematically from the most rigid point toward the free edges	Observe	AISC 360 Section N5.6 AISC 348		
Inspection Tasks After Bolting:		AISC 360 Table N5.6-3	2204.2	
Document acceptance or rejection of bolted connections	Perform	AISC 360 Section N5.6		
Inspection of Steel Frame: a. Verify installation of all members. b. Verify proper application of details to each joint and connection. c. Verify bracing and stiffening of framing members. d. Verify members and detail critical to frame stability.	Perform	AISC 360 Section N5.8		
Verify Material Grade of Structural Steel: a. Verify identification markings conform to AISC 360 for materials specified in the approved construction documents. b. Manufacturer's certificate of compliance required.	Observe	AISC 360 Section N5.8		
Inspection of anchor rods and other embedments supporting structural steel: a. Verify the diameter, grade, type and length of anchor rod or embedded item b. Verify the extent or depth of embedment into concrete prior to placement of concrete.	Observe	AISC 360 Section N5.8		
Inspection of Welding and Bolting in AISC Certified Shop: a. Review Fabricator's Certificate of Compliance for certified fabricators shop.	Once for Each Fabricator	AISC 360 Section N6	1704.2	

Description of Structural Special Inspection & Testing Requirements

Verification and Inspection	Frequency	Referenced Standard	BC Reference	Additional Notes
Wood Construction				
Review manufacturer's Certificate of Compliance for certified fabricators.	Once per manufacturer.	N/A	1704.2	Shop inspection is required if the manufacturer is not certified.
Verify temporary installation restraint/bracing and permanent individual truss member restraint/bracing.	Continuous for truss spans greater than 60'-0"	N/A	1705.5.2	
Verify drag struts, braces, and shear wall strapping, hold-downs, end posts, sheathing thickness, attachment size, quantity, and pattern.	Continuous	N/A	1705.5.1

FOUNDATION PLAN

3/32" = 1'-0"

NOTES:

1. FIRST FLOOR ELEVATION = 0'-0" ± = REFERENCE ELEVATION (0'-0").
2. ELEVATIONS GIVEN ARE TO TOP OF FOOTING OR GRADE BEAM AND ARE AT (-1'-4") UNLESS OTHERWISE NOTED.
3. FOUNDATION DEPTHS NOTED ARE MINIMUM. BOTTOM OF FOOTING SHALL BE AT A MINIMUM OF 3'-6" BELOW FINAL GRADE AT EXTERIOR FOOTINGS.
4. SEE TYPICAL DETAILS FOR ELEVATOR PIT DETAILS.
5. PROVIDE ADDITIONAL REINFORCING BARS (TYP.) AT ALL RE-ENTRANT CORNERS PER TYPICAL DETAIL.
6. COORDINATE FINISHED FLOOR ELEVATIONS, SLAB DEPRESSIONS, AND SLOPES WITH ARCHITECTURAL DRAWINGS.
7. COORDINATE FROST SLAB DIMENSIONS WITH LANDSCAPE/CIVIL DRAWINGS.
8. FOUNDATIONS WERE DESIGNED WITH THE ASSUMED BEARING PRESSURE OF 2,000 PSF. CHANGES IN FOUNDATION SIZES, REQUIREMENTS, AND OVEREXCAVATIONS MAY OCCUR AFTER GEOTECHNICAL REPORT IS RECIEVED.

LEGEND:

4" S.O.G.	4" SLAB ON GROUND WITH 6x6-W2.9xW2.9 WELDED WIRE REINFORCEMENT. SEE TYPICAL DETAIL.
FFS	FROST FREE SLAB. SEE DETAIL. COORDINATE DIMENSIONS WITH ARCHITECTURAL, LANDSCAPE AND CIVIL DRAWINGS.
FXX	SPREAD FOOTING. SEE SCHEDULE.
BP-X	BEARING PLATE. SEE TYPICAL DETAIL.
SW-X	WOOD-FRAMED SHEAR WALL. SEE SCHEDULE FAND TYPICAL DETAILS FOR ADDITIONAL INFORMATION.
	CMU WALL OR CURB - SEE SECTIONS FOR SIZE AND REINFORCING. CELLS BELOW GRADE WSHALL BE GROUTED SOLID. STAIR/ELEVATOR SHAFT AND INTERIOR MASONRY WALLS TO BE 8" WITH #X@X" O.C. VERTICAL REINFORCEMENT WITH (X) #X AT ENDS OF WALLS, JAMBS, AND CORNERS. GROUT REINFORCED CELLS.
CP-1	X"xX" CONCRETE PIER WITH (X)#X VERTICAL BARS (EQUALLY SPACED) - SEE TYPICAL DETAILS FOR MORE INFORMATION.
MSW	MASONRY SHEAR WALL WITH #X AT X" O.C. (VERTICAL) AND (X) #X VERTICAL AT EACH END OF WALL. TOP OF WALL = X" FROM TOP OF SHEATHING U.N.O.
SC-1	HSS 5x5x5/16
SC-2	HSS 7x5x5/16
SC-3	W10x49

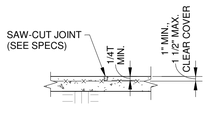
CONSTRUCTION JOINT



SAWED CONTRACTION JOINT

NOTES:
1. CONTRACTION JOINTS SHALL BE INSTALLED IN SLABS ON GROUND AT A MAXIMUM SPACING IN FEET OF 3 TIMES THE SLAB THICKNESS IN INCHES IN EACH DIRECTION (15'-0" MAXIMUM) BY EITHER OF THE METHODS SHOWN. MAXIMUM LENGTH OF ANY SLAB ON GROUND POUR TO BE 50'-0" BETWEEN CONSTRUCTION JOINTS. THIS SPACING OF JOINTS SHALL APPLY UNLESS SPECIFICALLY SHOWN OTHERWISE ON DRAWINGS.
2. REINFORCING TO BE DISCONTINUOUS THROUGH CONSTRUCTION JOINTS.

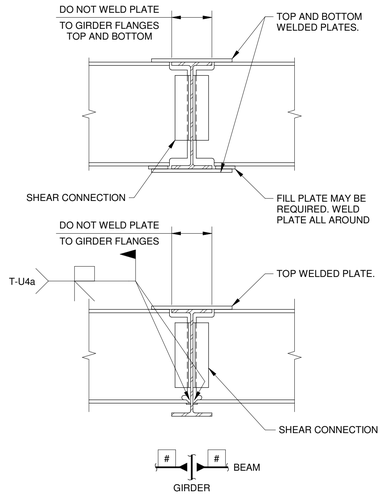
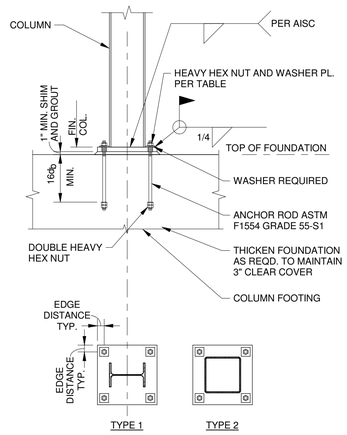
TYPICAL MOMENT CONNECTION DETAIL - BEAM TO COLUMN FLANGE (WELDED)



TYPICAL MOMENT CONNECTION DETAIL - BEAM TO GIRDER

MOMENT CONNECTION NOTES:

1. THIS BUILDING HAS BEEN DESIGNED UNDER THE AISC 360-05 SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS (ALLOWABLE STRENGTH DESIGN) WITH FULLY RESTRAINED (FR) MOMENT CONNECTIONS.
2. THE DESIGN OF MOMENT CONNECTIONS, INCLUDING ANY REQUIRED BEAM OR COLUMN REINFORCING, IS THE RESPONSIBILITY OF THE STRUCTURAL STEEL FABRICATOR. SUPPORTING CALCULATIONS, SEALED BY A PROFESSIONAL ENGINEER LICENSED IN THE JURISDICTION WHERE THE PROJECT IS LOCATED, SHALL BE SUBMITTED FOR REVIEW AND APPROVAL 2 WEEKS PRIOR TO THE CREATION/SUBMISSION OF SHOP DRAWINGS.
3. THE (UNFACTORED) DESIGN MOMENTS FOR THESE CONNECTIONS ARE INDICATED. WHERE NOT INDICATED, MOMENT CONNECTIONS SHALL DEVELOP THE FULL FLEXURAL CAPACITY OF THE BEAM.
4. AT CANTILEVERED MOMENT CONDITIONS, DESIGN MOMENTS SHALL BE ASSUMED TO ACT IN OPPOSITE DIRECTIONS ON EACH SIDE OF THE SUPPORT.
5. FOR MOMENT CONNECTIONS TO COLUMNS, DESIGN MOMENTS SHALL BE ASSUMED TO ACT IN THE SAME DIRECTION ON EACH SIDE OF THE COLUMN FOR COLUMN PANEL ZONE SHEAR CHECKS. DESIGN MOMENTS SHALL BE ASSUMED TO ACT IN OPPOSITE DIRECTIONS ON EACH SIDE OF THE COLUMN FOR COLUMN STIFFENER CHECKS.
6. UNLESS SPECIFICALLY NOTED TO BE A SLIP-CRITICAL JOINT, BOLTED MOMENT CONNECTIONS SHALL MEET THE REQUIREMENTS OF FULLY PRETENSIONED JOINTS. BOLTED MOMENT CONNECTIONS MAY BE PROPORTIONED AS BEARING-TYPE CONNECTIONS.
7. FOR BEARING-TYPE MOMENT CONNECTIONS, OVERSIZED HOLES OR SLOTS PARALLEL TO THE LINE OF FORCE ARE NOT PERMITTED UNLESS MOMENT CONNECTIONS ARE PROPORTIONED AS SLIP-CRITICAL ON THE BASIS OF SLIP AS A STRENGTH LIMIT STATE.
8. THE SHEAR PORTION OF MOMENT CONNECTION JOINTS SHALL BE DESIGNED FOR THE SHEAR VALUES INDICATED, OR AS DEFINED IN THE STEEL CONSTRUCTION GENERAL NOTES. SHEAR CONNECTIONS THAT ARE PART OF A MOMENT CONNECITON JOINT MAY BE PROPORTIONED AS BEARING-TYPE CONNECTIONS.



NOTES:

1. GROUT TO BE 5000 psi MIN., NON-SHRINK, NON-METALLIC.
2. LEVELING PLATES OR LEVELING NUTS CAN BE USED AT CONTRACTOR'S DISCRETION.
3. SEE COLUMN SCHEDULE FOR BASE PLATE AND ANCHOR RODS.

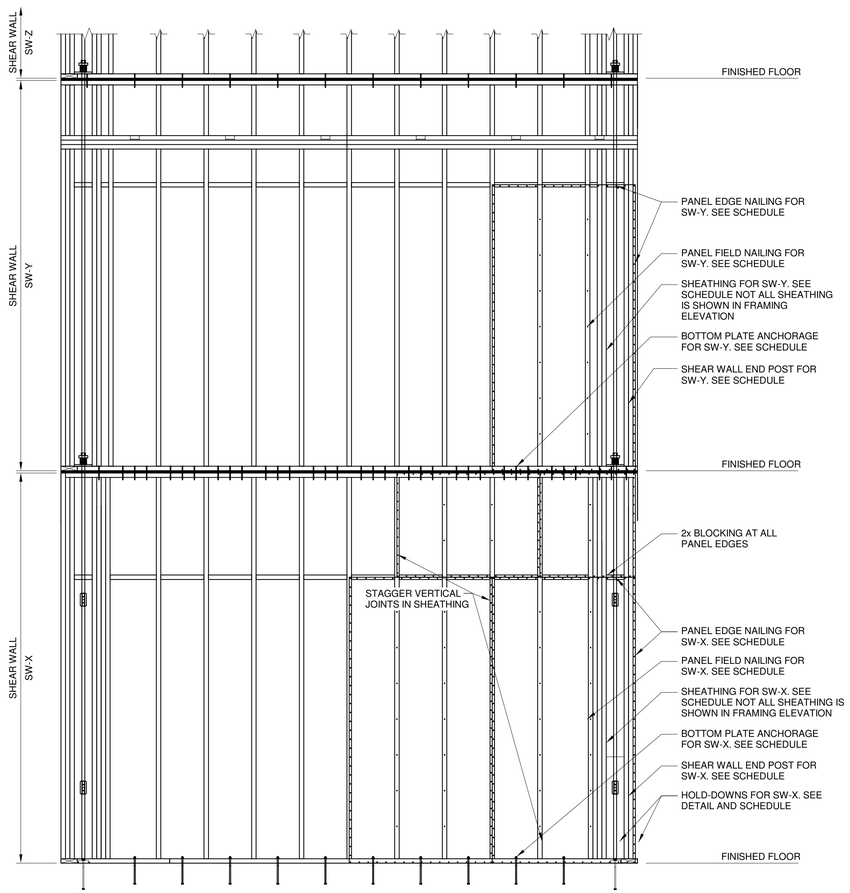
TYPICAL DRAG STRUT DETAIL



TYPICAL MULTI-STORY SHEAR WALL FRAMING ELEVATION

SHEAR WALL SCHEDULE NOTES:

1. ALL LUMBER FOR SHEAR WALLS, INCLUDING BOTTOM PLATE, BLOCKING, BRIDGING, STUDS, TOP PLATES, ETC. SHALL BE SPRUCE-PINE-FIR NO. 1/NO. 2 UNLESS OTHERWISE NOTED.
2. ALL NAILS FROM SHEATHING INTO STUDS ARE TO BE 8d (0.131"ø) COMMON WIRE NAILS WITH A 1 3/8" MINIMUM PENETRATION.
3. WHERE MULTIPLE 2x END POSTS ARE SPECIFIED, PLIES SHALL BE FACE NAILED TOGETHER WITH (2) 16d (0.162"ø) COMMON WIRE NAILS AT 6" O.C.
4. WHERE STUD EDGE NAILING OCCURS WITH 10d NAILS AT ANY SPACING, OR 8d NAILS AT SPACING LESS THAN 3" O.C., STUDS AND BOTTOM PLATE SHALL BE 3x MEMBERS OR DOUBLE 2x MEMBERS FACE NAILED (2) 16d (0.162"ø) COMMON WIRE NAILS AT 6" O.C.

SIMPSON STRONG-ROD ANCHOR TIEDOWN SYSTEM (ATS) NOTES:

1. ATS IS AN ASSEMBLAGE OF STEEL COMPONENTS, WHICH INCLUDE RODS, PLATES, COUPLER NUTS, TAKE-UP DEVICES AND NUTS. NO SUBSTITUTION OF PIECES IS PERMITTED WITHOUT WRITTEN APPROVAL OF THE ENGINEER OF RECORD.
2. FOLLOW ALL COMPONENT MANUFACTURER'S INSTALLATION INSTRUCTIONS.
3. DO NOT WELD TO ANY ATS ASSEMBLAGE COMPONENTS UNLESS SPECIFICALLY SHOWN ON THE STRUCTURAL DRAWINGS.
4. THE MAXIMUM CUT OF PLUMB OF STRONG-ROD SHALL BE 2" FROM FLOOR TO FLOOR.
5. FULLY ENGAGE EACH ROD INTO THE SPECIFIED COUPLING NUT OR TAKE UP THE DEVICE UNTIL EACH ROD CAN BE SEEN FULLY IN THE WITNESS HOLES.
6. INSTALL NUTS AND ISOLATOR NUTS SNUG TIGHT, PLUS AN ADDITIONAL 1/2 TURN.
7. NO SPLICE IN TOP PLATE IS PERMITTED WITHIN 8" OF EDGE OF STRONG-ROD TAKE UP DEVICE.
8. SOLID BLOCKING IS REQUIRED AT FLOOR ASSEMBLIES TO MATCH THE STUD QUANTITY, SIZE AND SPECIES OF THE END POST BELOW.
9. END POSTS COMPRISE OF A MINIMUM OF (4) STUDS. ASYMMETRIC STUD PLACEMENT HAS BEEN DESIGNED. PROVIDE (2) STUDS AT END OF SHEAR WALL, AND BALANCE OF STUDS ON OTHER SIDE OF STRONG ROD.
10. SHEAR WALL EDGE NAILING SHALL OCCUR ON EACH OF THE (2) STUDS ON EACH SIDE OF THE STRONG-ROD. NAILING TO ADDITIONAL STUDS OF THE END POSTS SHALL BE AT 12" O.C.

ALTERNATE TIEDOWN SYSTEM NOTES:

1. AN ALTERNATE TIEDOWN SYSTEM MAY BE INSTALLED IN LIEU OF THE SIMPSON ATS SYSTEM, GIVEN SEALED CALCULATIONS CAN BE PROVIDED (FOR REVIEW BY THE ENGINEER) BASED ON THE FOLLOWING ALLOWABLE (ASD) CUMULATIVE TENSION LOADS (KIPS) AND CRITERIA:

CUMULATIVE TENSION LOAD (KIPS) PER LEVEL				
WALL	**4TH**	**3RD**	**2ND**	**1ST**
SW-1	5.0	8.0	12.0	16.0
SW-1A	7.0	13.0	19.0	-

DESIGN CRITERIA

1. Applicable Building Codes
   A. Building: OBC 2024
      a. Construction classification type: TYPE V A
      b. Primary use and occupancy classification:
         • Residential: Group R-2
      c. Accessory Occupancies:
   B. Mechanical: OMC 2024
   C. Plumbing: OPC 2024
   D. Fire Protection: OFC 2024
      a. Fully suppressed with wet sprinkler system.
   E. Electrical: NEC 2024
   F. Energy: ASHRAE 90.1 - 2019
   G. Gas: OFGC 2024
   H. NFPA: latest edition 13R.
   I. Local Building Code and Revisions.
   J. Seismic Design Category
      a. Occupancy Category: II
      b. Design Category: B
      c. Importance Factor: 1.0

2. ASHRAE Design Requirements
   A. Heating/Cooling Loads
      a. Heating
         • Outside air temperatures: 1 degrees F DB (ASHRAE 99.6%).
      b. Cooling
         • Outside air temperatures: 86.3 degrees F DB / 72.4 degrees F WB (ASHRAE 99%).
   B. Building Design
      a. ASHRAE and Energy Code guidelines.
      b. Indoor relative humidity at 50 percent RH for cooling loads only.
         • Humidity is not being controlled or maintained in the heating or cooling equipment modes.

3. Design Ventilation
   A. Use ASHRAE 62 Standard.
   B. See Ventilation Schedule on drawings.

GENERAL

1. The term General Contractor (GC), as used in these documents, refers to the Contractor / Construction Manager in responsible charge of the project in terms of coordination, scheduling, subcontractor coordination, etc. This term refers to, but is not limited to, General Contractor, Construction Manager, Design Build Contractor, Prime Contractor, etc. The term is referencing the entity that coordinates the work of other trades.

2. These drawings are diagrammatic and indicate the general extent of the work. The contractor shall be responsible for the coordination and proper installation of all mechanical systems. The contractor shall provide all necessary offsets and fittings which may be required due to space constraints or other conditions.

3. The mechanical systems or its modifications are designed to be a complete operating system and stable after the building or its modifications are fully completed. It is solely the contractor's responsibility to determine construction, installation, and programming procedures and sequences to have a complete and working system and to insure the safety of the construction personnel, public, building and its component parts, and adjacent buildings and properties. This includes the addition of whatever temporary or permanent bracing, etc. that may be necessary to brace new or existing construction, walls, and framing to remain so that the structure is braced for construction loads, etc. and that no horizontal or vertical settlement or any damage occurs to the adjacent new or permanent supports and bracing that are installed. Design of these supports shall be provided by the contractor. Provide all materials, labor, equipment, and accessories required to furnish and install the systems identified in specifications and drawings.

4. It is the contractor's responsibility to enforce all applicable safety codes and regulations during all phases of construction.

5. Construction loads shall not exceed structural design live loads. The contractor shall be responsible for all design required to support construction equipment used in constructing this project. Verify and coordinate with structural drawings.

6. The contractor shall perform all construction for the project in a manner and sequence that are based on accepted industry standards that recognize the interaction of the components that comprise the systems, without causing distress, unanticipated movements or irregular load paths as a result of the construction means and methods employed.

7. The contractor shall provide all miscellaneous supporting steel, etc. for the proper installation of all mechanical systems.

8. Before fabrication and/or installing any work, contractor shall see that it does not interfere with clearance required for finish on beams, columns, pilasters, walls, or other structural or architectural members, as shown on architectural drawings. If any work is so installed and it later develops that architectural design cannot be followed, contractor shall, at his own expense, make such changes in his work as architect may direct to permit completion of architectural work in accordance with plans and specifications.

9. All piping shall be protected as required by the applicable Mechanical, Plumbing, Fire Protection and Building Codes: " General Regulations" and other Code Chapters.

10. Pipes passing through or under walls shall be protected from breakage. Pipes passing through studs, joist, rafters or similar members less than 1-1/2" from the nearest edge of the members shall be protected by steel shield plates.

11. Piping shall be installed to prevent strains and stresses that exceed the structural strength of the pipe. Where necessary, provisions shall be made to protect piping from the damage resulting from pipe expansion and contraction and structural/soil settlement. Expansion joint fittings shall be used where necessary to provide for expansion and contraction of the pipes. Sleeved openings shall be sized appropriately to accommodate pipe movement and structural/soil settlement. Expansion joint fittings shall be of the typical material suitable for use with the type of piping in which fittings are installed. At a minimum install rubber mechanical joint couplings or CSA-certified expansion joints on all vertical piping at every other floor of the building and rigidly support the stack pipe on alternating floors to direct any movement into the appropriate expansion compensator. Design of these expansion fittings shall be provided by the contractor. Any analysis which requires additional support or expansion detailing shall be shared with the mechanical design professional and any stresses or point loads created by the engineered system shall be shared with the structural designer for review.

12. Install additional offsets on piping or ductwork where required to obtain maximum headroom or to avoid conflict with other work without additional cost to owner.

13. Report any interferences between work under this division and that of any other contractors to architect as soon as they are discovered. Architect will determine which equipment shall be relocated, regardless of which was first installed, and his decision shall be final.

14. The contractor shall coordinate floor, wall, and roof penetrations, louver sizes, etc. with general trades.

15. Principal openings on these drawings through the framing are shown on the structural drawings. The mechanical contractor shall examine the structural and mechanical drawings for the required openings and shall verify size and location of all openings with the general contractor. General contractor shall provide all openings required through the framing by the mechanical, electrical, plumbing, or other trades, whether or not shown on the structural drawings. Any deviation from the openings shown on the structural drawings shall be brought to the engineer's attention for review.

16. All mechanical and electrical work: Ductwork, plumbing, piping, wiring, lighting, etc. and all architectural items that need to be removed during the modification of or reinforcing of, existing structure shall be replaced in kind by the respective contractor. The contractors shall keep all existing systems in operation during the construction phase of the project.

17. All contractors are required to examine the drawings and specifications carefully, visit the site and fully inform themselves as to all existing conditions and limitations, prior to agreeing to perform the work. Failure to visit the site and familiarize themselves with the existing conditions and limitations will in no way relieve the contractor from furnishing any materials or performing any work in accordance with drawings and specification without additional cost to the owner to have a complete and working system.

18. Details labeled "Typical Details" or "Typical" on drawings apply to situations occurring on the whole project that are the same or similar to those specifically detailed. Such details apply whether or not details are referenced at each location on drawings. Notify engineer for clarifications regarding applicability of "Typical Details".

19. Work and coordinate these drawings with architectural, civil, structural, mechanical, plumbing, fire protection, electrical, and technology drawings.

20. Do not scale drawings.

21. Any discrepancies between mechanical and architectural drawings shall be brought to the attention of the architect and mechanical engineer.

22. Should any of the general notes conflict with any details or instructions on plans, or in the specifications, the strictest provision shall govern.

23. Shop drawings and submittals
   A. Shop drawings and submittals shall be checked and coordinated with other materials and contracts by the general, mechanical and electrical contractors and shop drawings and submittals shall bear the prime contractor's review stamp with the checker's initials before being submitted to the architect for approval.
   B. When the contractor has been authorized to use the architect and engineer's drawings as construction coordination drawings, the contractor must remove all title blocks, professional seals and any other references to the architect and engineer from those drawings. The contractors name and title shall be placed on the drawings.
   C. Where voltage, amp draw, dimensions and elevations of existing construction could affect the new construction, it is the contractor's responsibility to make field verifications and measurements in time for their incorporation into the shop drawings.

24. Refer to architectural and electrical reflected ceiling plans for exact location of light fixtures. Contractors to coordinate locations of lighting, speakers, air diffusers, grilles, sprinkler heads and the like, with reflected ceiling lay-outs as required and directed by the architect.

25. Ductwork or piping shall not be located over the top of any electrical panels or equipment.

26. Contractor shall include in his bid all cutting, trenching, and patching associated with the installation of this projects work.

27. Cutting, Patching and Drilling
   A. All cutting and patching of the building construction required for this work shall be by this contractor unless shown on architectural drawings and confirmed as to size and location prior to new construction. Cutting shall be in a neat and workmanlike manner.
   B. Neatly saw cut all rectangular openings, set sleeve through opening, and finish patch or provide trim flange around opening.
   C. Neatly saw cut floors and patch floor to match existing, including floor covering.
   D. Contractor shall field verify slab-on-grade or supported floor construction type prior to cutting. Under no circumstances shall this contractor cut a floor thicker than 4 inches, a structural floor slab, whether on grade or supported, without prior written approval from the architect. If floor slab indicated to be cut on mechanical plans is found to be structural in nature, do not cut. Contact architect immediately for further directions.
   E. Core drill and sleeve all round openings.
   F. Do not cut any structural components without architect's written approval, including, but not limited to roof joists, columns, floor joists, beams, girders, structural floor slabs, rebar, etc.
   G. Patch, and finish to match adjacent areas that have been cut, damaged or modified as a result of the installation of the mechanical systems. Fire-stop all penetrations of fire rated construction in a code approved manner.
   H. All contractors shall confirm with owner, prior to bid, times available for noise producing work such as cutting and core drilling of floors, walls, etc. as well as times for work which requires access into adjoining tenant spaces. Include any premium time in bid.
   I. The mechanical contractor shall coordinate work with the general contractor prior to construction. The mechanical contractor shall provide information regarding openings in walls, floors, etc., concrete equipment pads and foundations to the general contractor. If the mechanical contractor fails to comply with this request, or if incorrect information is given, the necessary cutting and patching will be performed by the general contractor at the mechanical contractor's expense.
   J. All openings required for this branch of work shall be accomplished in time to be incorporated in, and be compatible with the construction program; otherwise this contractor shall be responsible and pay for all changes made necessary for his failure to do so. Pipe holes in floors and walls shall be core drilled if not sleeved during construction.
   K. Existing slabs shall be core drilled at reentrant corners of new floor openings to prevent overcutting.

28. Refer to mechanical, plumbing, fire protection, and electrical plans for location of mechanical, plumbing, and electrical equipment. Coordinate location of disconnect switch associated with each piece of mechanical and plumbing equipment with electrical contractor.

29. Installation requirements for all HVAC, plumbing, and fire protection systems shall be reviewed and coordinated with all other trades involved prior to rough-in. Give equipment shop drawings from installer/supplier/contractor equipment, as required, for review and coordination to all other trades involved. Contact architect/engineer with any discrepancies found between construction drawings and equipment being furnished prior to rough-in.

30. The contractor shall furnish all access panels or doors in hard ceilings and walls with a size as required for servicing and testing, for equipment, valves and/or devices furnished under this contract. The general contractor shall install access panels. The contractor shall coordinate the size and location of each access panel with the architect and general contractor prior to rough-in.

31. Firestopping
   A. The contractor shall review all architectural drawings for type of walls, fire ratings, & firestopping details and shall provide all fire dampers and firestopping required for these walls whether shown or not on the mechanical plans.
   B. All penetrations through fire rated walls associated with the installation shall be sleeved and fire-stopped using a UL approved method. UL approved method shall meet or exceed fire rating of structure being penetrated. Reference architectural plans for fire rated structures. If shown, reference architectural, mechanical and electrical drawings for penetration details.
   C. All openings through fire rated walls, floors, and/or roofs for ductwork, piping, conduit, etc., shall be fire sealed with a calcium salicate, silicone "RTV" foam, "3M" fire rated sealants, Hilti Firestop Systems, or approved equal to maintain the intended fire rating and associated UL ratings as recommended by the architect and/or sealant manufacturer.
   D. All fire stopping sealants shall be thixotropic so as not so slump or sag and shall be trowelable. Fire stopping sealants shall be intumescent and shall be free of asbestos, halogens, and volatile solvents.
   E. Fire stopping materials shall be classified in the Underwriters Laboratories (UL) fire resistance directory or listed in the Warnock Hersey International Directory.

32. All equipment and devices for this project must be UL listed. Devices, equipment, systems shall be installed per National Electrical Code requirements and manufacturer's instructions.

33. All conduit and cabling shall be properly supported as required by the National Electrical Code. For existing installations, the contractor shall be responsible to replace and/or rework existing conduit and/or cabling that is not in compliance with this requirement.

34. All materials and work in the return air plenum shall be approved for plenum rated application in accordance to the current building code. Where open wiring methods for low voltage systems is permitted by the contract documents and local authority, the conductor insulation must be plenum rated.

35. Shop Areas and Material Storage
   A. No plumbing or mechanical trade is permitted to use as shop working area, any concrete slab that is to receive metallic waterproofing, asphalt tile, plastic tile, etc., except by express permission of the architect.
   B. The contractor shall make provisions for the delivery and safe storage of his materials and equipment in coordination with the work of others. Materials and equipment shall be delivered at such stages of the work as will expedite the work as a whole and shall be marked and stored in such a way as to be easily checked and inspected. The arrival and placing of large equipment items shall be scheduled early enough to permit entry and setting when there is no restriction or problem due to size and weight.

36. Temporary Heat
   A. The HVAC contractor under this division shall set up temporary heat and other services as may be required and/or requested by the general contractor. See "General Conditions" and "Special Conditions." This contractor shall pay expenses resulting from temporary heat and services used solely by him.

EXCAVATING / BACKFILLING

1. The contractor shall familiarize himself with the survey and the geotechnical investigation report before starting construction. All underground work shall be in accordance with the recommendations of the geotechnical report except where noted otherwise on drawings or specifications.

2. All building pad preparation and patching shall follow the recommendations of the geotechnical report and the structural drawings and architectural drawings (uno).

3. All objectionable materials encountered are to be removed from excavated areas of the site per the geotechnical report.

4. If unstable subgrade sectors cannot be stabilized by excavation and re-compaction, then crushed stone or similar coarse aggregate materials shall be rolled into the subgrade until a firm subgrade reaction is achieved.

5. The geotechnical engineer shall determine on site or off site imported material that can be used for engineered fill. All fill material shall be approved by the geotechnical engineer.

6. The proposed engineered fill materials are to be placed in lifts not exceeding eight (8) inches in loose measured thickness. Each lift is to be compacted as follows:
   A. Slab on grade: Minimum of 95 percent maximum density by ASTM D698.

7. All fill materials shall be free of organic contaminations and other deleterious matter.

8. For back fill against basement walls, retaining walls, footings, etc., place in 8 inch thick layers, with each lift compacted at near optimum moisture content, until a minimum in place density of 95 percent of the maximum density as determined by ASTM D698 is achieved.

9. All soil surrounding and under footing shall be protected from frost action and freezing during the course of construction.

10. Notify structural engineer of any unusual soil conditions that are in variance with the geotechnical report.

CONCRETE PADS

1. This contractor shall provide to the general contractor, dimensions for the concrete foundations or bases under all equipment that rests on floors in mechanical equipment rooms or outside on grade. He shall follow drawings and/or manufacturer's literature with regard to design and construction of same. In the absence of more specific information, either on drawings or manufacturer's literature, the bases shall be level, shall have a minimum height above finished floor of 4 inches and extend 3 inches beyond the skids, feet or bed plate of the item of equipment.

2. Concrete pedestals and/or saddles for support of piping and/or tanks shall be designed to withstand stresses to which they may be subjected and to distribute properly the load and impact over building areas.

3. Concrete shall be a of mix producing compressive strength after 28 days of 3,000 psi minimum reinforcing and bolts shall be provided as required and work shall be done in accordance with applicable articles covering concrete work.

4. Space approximately 1 inch thick between bottom of equipment and top of concrete foundation or base which remains after shimming, shall be filled completely with grouting. Grout shall be made up with sand and cement designed for the purpose which does not shrink on setting up. Exposed surface of grouting shall be finished to make a neat appearance.

MECHANICAL LEGEND

- CD — CONDENSATE DRAIN PIPING
- CW — DOMESTIC COLD WATER PIPING
- HW — DOMESTIC HOT WATER PIPING
- RHW — DOMESTIC RECIRCULATING HOT WATER PIPING
- G — GAS PIPING
- SAN — SANITARY SEWER PIPING
- ST — STORM PIPING
- V — VENT PIPING
- PIPING ABOVE GRADE/FLOOR
- PIPING BELOW GRADE/FLOOR
- VALVE - BALANCE VALVE
- VALVE - SHUTOFF VALVE
- M — UTILITY METER
- ROOMS OR AREAS SHOWN SHADED ON THIS PLAN, WITH THE FOLLOWING SHADE TYPE ▒ ARE DEDICATED FOR A SPECIFIC USE. EXAMPLES INCLUDE ELECTRICAL ROOMS, TECHNOLOGY/DATA CLOSETS, EXIT STAIRWELLS, AND ELEVATOR EQUIPMENT ROOMS. UNDER NO CIRCUMSTANCES SHALL PIPING, DUCTWORK, OR EQUIPMENT BE INSTALLED IN OR ROUTED THROUGH THESE ROOMS OR AREAS EXCEPT FOR BRANCH PIPING OR DUCTWORK SPECIFICALLY SERVING THE ROOM OR AREA. DEDICATED SPACE SHALL EXTEND VERTICALLY FROM FLOOR TO STRUCTURAL CEILING.
- DS — DUCT-TYPE SMOKE DETECTOR WITH REMOTE TEST STATION AND AUXILIARY RELAY FURNISHED AND WIRED BY ELECTRICAL CONTRACTOR; INSTALLED IN DUCTWORK BY MECHANICAL CONTRACTOR PER CODE. COORDINATE EXACT LOCATION WITH MECHANICAL CONTRACTOR AND MANUFACTURER. PROVIDE CONDUIT AND WIRING NECESSARY TO SHUT DOWN HVAC UNIT UPON ACTIVATION OF SMOKE DETECTOR.
- CRD — CEILING RADIATION DAMPER
- MFSD — MOTORIZED FIRE/SMOKE DAMPER
- FD — FIRE DAMPER
- SD — SMOKE DAMPER
- MOD — MOTOR OPERATED DAMPER
- BDD — BACKDRAFT DAMPER
- CO — CARBON MONOXIDE DETECTOR, MOUNT 48" AFF, UNLESS OTHERWISE NOTED
- T AC-1 — THERMOSTAT, MOUNT 48" AFF, UNLESS OTHERWISE NOTED
- S — SENSOR, MOUNT 48" AFF, UNLESS OTHERWISE NOTED
- POINT OF CONNECTION
- XX / XX — EQUIPMENT TAG
- UC — 3/4" DOOR UNDERCUT
- AIRFLOW DIRECTION

SUBMITTAL	NOTES ON SUBMISSION	RESPONSIBLE PARTY
MEP COORDINATION DRAWINGS – SHEETMETAL HVAC EQUIPMENT PLUMBING PIPING SPRINKLER PIPING CONDUIT, PANELS & J-BOXES CRITICAL STRUCTURAL..	DRAWN TO SCALE, SHOWING AT MINIMUM ELEVATIONS, ACCESS AND SERVICE CLEARANCES, STRUCTURAL AND ELECTRICAL (LIGHTING AND CONDUIT) MEMBERS FOR COORDINATION, ACCESS PANELS AND ANY POTENTIAL COORDINATION ISSUES THAT NEED TO BE ADDRESSED.	MECHANICAL CONTRACTOR ELECTRICAL CONTRACTOR PLUMBING CONTRACTOR SPRINKLER CONTRACTOR GENERAL CONTRACTOR
PLUMBING FIXTURES AND EQUIPMENT	TO BE SUBMITTED IN ONE COMBINED PACKAGE (NOT INDIVIDUAL FIXTURE COMPONENTS) WITH FIXTURES INDIVIDUALLY LABELED AS INDICATED IN THE DRAWING DOCUMENTS.	PLUMBING CONTRACTOR
PLUMBING PIPING AND INSULATION MATERIALS	MARKED WITH EQUIPMENT OR FIXTURE TAGS AND APPLICABLE SPECIFICATION FOR REFERENCE. PROVIDE INSOLATION THICKNESS.	PLUMBING CONTRACTOR

NOTES:

1. PREPARE SUBMITTALS AS PDF PACKAGE, INCORPORATING COMPLETE INFORMATION INTO EACH PDF FILE. NAME PDF FILE WITH SUBMITTAL NUMBER. ALL SUBMITTALS FOR A GROUP OF FIXTURES SHALL BE PROVIDED IN A SINGLE REVIEWABLE DOCUMENT, NOT MULTIPLE PACKAGES, FOR REVIEW.
2. EACH SUBMITTAL SHALL BE PROVIDED WITH A COVER IDENTIFYING THE FOLLOWING:...
   a. NAME OF THE JOB
   b. LOCATION OF THE JOB, ADDRESS, CITY AND STATE.
   c. NAME AND ADDRESS OF THE COMPANY ISSUING THE SUBMITTAL.
   d. DATE OF THE SUBMITTAL
   e. GENERAL CONTRACTOR'S REVIEW AND APPROVAL STAMP
3. SHOP DRAWINGS WILL NOT BE REVIEWED BY THE ENGINEER UNLESS THE GC'S APPROVAL IS NOTED AND COVER SHEET WITH ITEMS INDICATED ABOVE ARE COMPLETE. CATALOG CUT SHEETS THAT DO NOT IDENTIFY SPECIFIC ITEMS WILL NOT BE REVIEWED. DO NOT START WORK OR FABRICATION UNTIL SHOP DRAWINGS HAVE BEEN REVIEWED BY THE ENGINEER AND RETURNED TO THE CONTRACTOR.
4. THE CONTRACTOR IS RESPONSIBLE TO HIGHLIGHT (IN BOLD TEXT OR HIGHLIGHTED COLOR) TO THE DESIGN TEAM ANY DIFFERENCES IN PERFORMANCE, DIMENSION, WEIGHT, POWER REQUIREMENTS, ACCESS ETC. BETWEEN THE BASIS OF DESIGN OR SCHEDULED EQUIPMENT AND THE SUBMITTED EQUIPMENT.
5. SUBMITTALS WILL BE REVIEWED ONLY FOR GENERAL COMPLIANCE WITH THE CONTRACT DOCUMENTS AND NOT FOR DIMENSIONS, SERVICE, ACCESS OR QUANTITIES. THE DESIGN TEAM WILL MAKE EVERY EFFORT TO DETECT AND NOTE ERRORS, OMISSIONS, AND/OR INACCURACIES IN SUBMITTED SHOP DRAWINGS, BUT THE FAILURE TO DETECT ERRORS, OMISSIONS, AND/OR INACCURACIES SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR THE PROPER AND COMPLETE PERFORMANCE, APPLICATION AND INSTALLATION IN ACCORDANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS. THE SUBMITTAL REVIEW SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR PURCHASE OF ANY ITEM IN FULL COMPLIANCE WITH THE CONTRACT DOCUMENTS OR ITS COMPLETE AND PROPER INSTALLATION AND PERFORMANCE.
6. EACH CONTRACTOR MUST CHECK THE APPLICATION OF THEIR SUBMITTED EQUIPMENT AND CERTIFY AT TIME OF SHOP DRAWING SUBMITTAL THAT THE EQUIPMENT OR PRODUCT SPECIFIED HAS BEEN PROPERLY APPLIED AND CAN BE INSTALLED, SERVICED, AND MAINTAINED WHERE INDICATED ON THE DRAWINGS. ADVISE THE ENGINEER IN WRITING WITH SUBMITTAL DRAWINGS OF ANY POTENTIAL PROBLEMS, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY FIELD CHANGES THAT MIGHT BE NECESSARY BECAUSE OF PHYSICAL CHARACTERISTICS OF EQUIPMENT THAT HAVE NOT BEEN CALLED TO THE ENGINEER'S ATTENTION AT THE TIME OF SUBMITTAL.
7. IF SUBSTITUTIONS ARE SUBMITTED, NOTIFY ALL OTHER CONTRACTORS, SUBCONTRACTORS, ETC., AFFECTED BY THE SUBSTITUTION AND FULLY COORDINATE WITH THEM. ANY ADDITIONAL COSTS RESULTING FROM SUBSTITUTION, WHETHER BY THIS CONTRACTOR OR OTHERS, SHALL BE THE RESPONSIBILITY OF AND PAID FOR BY THE SUBSTITUTING CONTRACTOR. SUBMITTED AND REVIEWED SHOP DRAWINGS DO NOT ABSOLVE THIS CONTRACTOR FROM THIS RESPONSIBILITY.

PLUMBING FIXTURE CONNECTION SCHEDULE

DESIGNATION	MANUFACTURER	MODEL	CW	HW	SAN	VENT	DESCRIPTION
WATER CLOSET							
WC-1	AMERICAN STANDARD	"CADET PRO" 215CA.104	1/2"	-	4"	2"	VITREOUS CHINA, ELONGATED BOWL, SIPHON JET FLUSH ACTION, 1.28 GPF, WATER SENSE LABELED, FLOOR MOUNTED, CHURCH MODEL 585CEC000 HEAVY DUTY PLASTIC, CLOSED FRONT SEAT WITH COVER AND SELF-SUSTAINING CHECK HINGE.
WC-2 ADA	AMERICAN STANDARD	"CADET PRO" 215AA.104	1/2"	-	4"	2"	VITREOUS CHINA, ELONGATED BOWL, SIPHON JET FLUSH ACTION, 1.28 GPF, WATER SENSE LABELED, FLOOR MOUNTED, CHURCH MODEL 585CEC000 HEAVY DUTY PLASTIC, CLOSED FRONT SEAT WITH COVER AND SELF-SUSTAINING CHECK HINGE FIXTURE TO CONFORM TO ADA REQUIREMENTS.
WC-3 ADA	AMERICAN STANDARD	"MADERA" 3043.001	1/2"	-	4"	2"	VITREOUS CHINA, WALL MOUNTED, ELONGATED BOWL WATER COSET, TOP SPUD. AMERICAN STANDARD SELECTRONIC MODEL 6065.121.002 EXPOSED, SENSOR-OPERATED FLUSH VALVE, FACTORY INSTALLED CR-P2 LITHIUM BATTERY, SELF-CLEANING PISTON, MANUAL OVERRIDE BUTTON, 1.28 GPF, WATERSENSE LABELED, CHURCH MODEL 2955SCT HEAVY DUTY PLASTIC, OPEN FRONT SEAT LESS COVER. FIXTURE TO CONFORM TO ADA REQUIRMENTS.
LAVATORY							
LAV-1	AMERICAN STANDARD	"AQUALYN" 0476.028	1/2"	1/2"	1-1/2"	1-1/2"	VITREOUS CHINA, 20" x 17" COUNTERTOP SELF-RIMMING LAVATORY, AMERICAN STANDARD MODEL 7385.003-V10 DECK MOUNTED SINGLE LEVER FAUCET, 1.0 GPM, WATERSENSE LABELED. PROVIDE WITH POP UP DRAIN.
LAV-2 ADA	AMERICAN STANDARD	"AQUALYN" 0476.028	1/2"	1/2"	1-1/2"	1-1/2"	VITREOUS CHINA, 20" x 17" COUNTERTOP SELF-RIMMING LAVATORY, AMERICAN STANDARD MODEL 7385.003-V10 DECK MOUNTED SINGLE LEVER FAUCET, 1.0 GPM, PROVIDE WITH POP UP DRAIN. INSULATE ALL EXPOSED WAST AND WATER SUPPLY PIPING UNDER LAVATORY WITH SAFETY COVERINGS PER ADA REQUIREMENTS AS MANUFACTURED BY PLUMBEREX, MCGUIRE, OR TRUEBRO. MOUNT FIXTURE AT HANDICAP HEIGHT.
LAV-3 ADA	AMERICAN STANDARD	"LUCERNE" 0355.012	1/2"	1/2"	1-1/2"	1-1/2"	VITREOUS CHINA, 20" X 18" WALL HUNG LAVATORY BACK DRILLED FOR CONCEALED ARMCHAIR CARRIER, SLOAN MODEL OPTIMA EBF-650 BATTERY POWERED DECK MOUNTED FAUCET, 0.5 GPM, WATERSENSE LABELED. PROVIDE WITH GRID DRAIN AND TAILPIECE. INSULATE ALL EXPOSED WASTE AND WATER SUPPLY PIPING UNDER LAVATORY WITH SAFETY COVERS PER ADA REQUIREMENTS AS MANUFACTURED BY PLUMBEREX, MCGUIRE, OR TRUEBRO. PROVIDE ASSE-1070 TEMPERING VALVE SET AT 90°. MOUNT FIXTURE AT HANDICAP HEIGHT.
SHOWER							
SH-1	BEST BATH	5LRS26036FB75 FTB	1/2"	1/2"	2"	1-1/2"	60" x 36" x 81-1/4" MOLDED, FIVE-PIECE GELCOAT/FIBERGLASS SHOWER, 3/4" THRESHOLD, FRONT TRENCH DRAIN, TILE WALL PATERN FINISH. PROVIDE WITH MOEN MODEL 52710EP15 HANDHELD SHOWER ASSEMBLY WITH 30" SLIDE BAR AND 72" HOSE, PRESSURE BALANCING MIXING VALVE, CHROME FINISH, 1.50 GPM WATERSENSE.
SH-2 ADA	BEST BATH	5LRS26032FB75 FTB	1/2"	1/2"	2"	1-1/2"	60" x 32" x 81-1/4" MOLDE, FIVE PIECE GELCOAT/FIBERGLASS SHOWER, 3/4" THRESHOLD, FRONT TRECH DRAIN, TILE WALL PATERN FINISH. PROVIDE WITH ONE 24" SIDE WALL AND ONE 40" BACK WALL PRE-INSTALLED DESIGNER GRAB BARS AND SEAT. PROVIDE WITH MOEN MODEL 52710EP15 HANDHELD SHOWER ASSEMBLY WITH 30" SLIDE BAR AND 72" HOSE, PRESSURE BALANCING MIXING VALVE, CHROME FINISH, 1.50 GPM, WATERSENSE LABELED.
BATHTUB							
BT-1	STERLING	ENSEMBLE	1/2"	1/2"	2"	1-1/2"	60" x 30" VIKRELL, HIGH GLOSS, BATH/SHOWER INSERT WITH MOLDED IN SHELVES. SHOWER TRIM TO BE MOEN MODEL T9389EP15, 1.50 GPM SHOWERHEAD WITH DIVERTER TUB SPOUT, VANDAL RESISTANT LEVER HANDLE, WATER SENSE LABELED. MIXING VALVE TO BE MOEN MODEL 8373HD WITH INTEGRAL STOPS.
SINK							
SK-1	JUST	SL2133A-J	1/2"	1/2"	1-1/2"	1-1/2"	33" x 22" x 7-5/8" TYPE 304 STAINLESS STEEL SINK, SINGLE BOWL, 3 HOLES ON 8" CENTER, SELF-RIMMING, INSTALL IN COUNTERTOP, JUST J-ADA-35 STAINLESS STEEL CRUMB CUP, CHICAGO MODEL 431-ABCP DECK MOUNTED SINGLE LEVER FAUCET, 1.5 GPM.
SK-2 ADA	JUST	SLADA2133A453-J	1/2"	1/2"	1-1/2"	1-1/2"	33" x 22" x 4-1/2" TYPE 304 STAINLESS STEEL SINK, SINGLE BOWL, 3 HOLES ON 8" CENTER, SELF RIMMING, INSTALL IN COUNTERTOP, JUST J-ADA-35 STAINLESS STEEL CRUMB CUP, CHICAGO MODEL 431-ABCP DECK MOUNTED SINGLE LEVER FAUCET, 1.5 GPM. FIXTURE TO CONFORM TO ADA REQUIREMENTS.
SK-3 ADA	JUST	SLADA2131A45-J	1/2"	1/2"	1-1/2"	1-1/2"	31" x 21-1/4" x 4-1/2" TYPE 304 STAINLESS STEEL SINK, SINGLE BOWL, 3 HOLES ON 8" CENTER, SELF RIMMING, INSTALL IN COUNTERTOP, JUST J-ADA-35 STAINLESS STEEL CRUMB CUP, CHICAGO MODEL 431-ABCP DECK MOUNTED SINGLE LEVER FAUCET, 1.5 GPM. FIXTURE TO CONFORM TO ADA REQUIREMENTS.
WATER COOLER							
EWC-1	ELKAY	LZSTLG8WSSK	1/2"	-	1-1/2"	1-1/2"	BI-LEVEL, WALL MOUNTED, STAINLESS STEEL, ADA WATER COOLER WITH BOTTLE FILLING STATION. INCLUDE WITH HIGH EFFICIENCY FILTER, CHILLING CAPACITY OF 8.0 GPH AT 50ºF DRINKING WATER, ELECTRONIC BOTTLE FILLER SENSOR WITH ELECTRONIC FRONT AND SIDE BUBBLER PUSHBAR, 120V/1Ø, 60 HZ
DISHWASHER							
DW-1	BY ARCHITECT	BY ARCHITECT	-	HOSE	HOSE	-	PROVIDED BY G.C. AND CONNECTED BY E.C.
MOP BASIN							
MB-1	FIAT	MSB-2424	1/2"	1/2"	3"	1-1/2"	MOLDED STONE BASIN WITH TILING FLANGES, STAINLESS STEEL SPLASH PANELS, MOP HANGER, HOSE WITH WALL HOOK, 3" DRAIN WITH DOME STRAINER AND LINT BASKET, CHICAGO MODEL 897 FAUCET WITH VACUUM BREAKER SPOUT, ADJUSTABLE WALL BRACE, PAIL HOOK AND 3/4" HOSE THREAD OUTLET.
LAUNDRY TUB							
LT-1	MUSTEE	14CP	1/2"	1/2"	1-1/2"	1-1/2"	23" x 25" x 13" SINGLE BASIN COMBO LAUNDRY/UTILITY TUB, 20 GALLON CAPACITY. PROVIDE WITH MUSTEE LAUNDRY TUB FAUCET93.600, CHROME FINISH, 4" CENTER SET FAUCET, 7" SWING SPOUNT WITH 1.5 GPM AERATOR.
SHUT OFF VALVE BOX							
SOVB-1	OATEY	38540	1/2"	1/2"	2"	1-1/2"	LAUNDRY SUPPLY AND DRAIN UNITWITH SINGLE LEVER BRASS SHUT-OFF, 3/4" HOSE END FITTINGS, 2" DRAIN.
SOVB-2	OATEY	38688	1/2"	-	-	-	METAL ICE MAKER OUTLET BOX, 1/4" TURN BRASS BALL HAMMER VALVE-COPPER SWEAT. SUPPLY LINES SHALL BE MOUNTED FROM TOP OR BOTTOM ON THE LEFT OR RIGHT SIDE.
HYDRANT							
WH-1	J.R. SMITH	5509QT	3/4"	-	-	-	CONCEALED, CHROME PLATED QUARTER TURN NON-FREEZE HYDRANT WITH 3/4" HOSE CONNECTION, BACKER PLATE, VACUUM BREAKER, "T" HANDLE KEY.
HOSE BIBB							
HB-1	CHICAGO	952-XKCP	3/4"	-	-	-	EXPOSED INTERIOR HOSE BIBB, 3/4" HOSE THREAD, INTERNAL VACUUM BREAKER, REMOVABLE "T" HANDLE, POLISHED CHROME FINISH.
ROOF DRAIN							
OD-1	J.R. SMITH	1080	-	-	-	-	DUCO CAST IRON BODY WITH ADJUSTABLE EXTENSION SLEEVE, FLASHING CLAMP AND GRAVEL STOP, UNDERDECK CLAMP, SUMP RECEIVER, CAST IRON WATER DAM, CAST IRON DOME.
RD-1	J.R. SMITH	1015	-	-	-	-	DUCO CAST IRON BODY WITH ADJUSTABLE EXTENSION SLEEVE, REVERSIBLE COLLAR, COMBINED FLASHING CLAMP AND GRAVEL STOP, UNDERDECK CLAMP, SUMP RECEIVER, CAST IRON DOME.
DRAIN OUTLET							
DO-1	J.R. SMITH	1770	-	-	-	-	CAST BRONZE BODY, REMOVABLE STAINLESS STEEL BIRD SCREEN.
FLOOR DRAIN							
FD-1	J.R. SMITH	2005	-	-	SEE PLANS	SEE PLANS	DUCO CAST IRON BODY WITH FLASHING COLLAR AND ADJUSTABLE ROUND NICKEL BRONZE STRAINER HEAD, TRAP PRIMER CONNECTION.
FD-2	J.R. SMITH	2005-F37	-	-	SEE PLANS	SEE PLANS	DUCO CAST IRON BODY WITH FLASHING COLLAR AND ADJUSTABLE ROUND NICKEL BRONZE STRAINER TOP ANTIFLOOD RIM STRAINER HEAD, TRAP PRIMER CONNECTION.

DESIGN CRITERIA

1. Applicable Building Codes
   A. Building: OBC 2024
      a. Construction classification type: TYPE V A
      b. Primary use and occupancy classification:
         • Residential: Group R-2
      c. Accessory Occupancies:
   B. Mechanical: OMC 2024
   C. Plumbing: OPC 2024
   D. Fire Protection: OFC 2024
      a. Fully suppressed with wet sprinkler system.
   E. Electrical: NEC 2024
   F. Energy: ASHRAE 90.1 - 2019
   G. Gas: OFGC 2024
   H. NFPA: latest edition 13R.
   I. Local Building Code and Revisions.
   J. Seismic Design Category
      a. Occupancy Category: II
      b. Design Category: B
      c. Importance Factor: 1.0

2. ASHRAE Design Requirements
   A. Heating/Cooling Loads
      a. Heating
         • Outside air temperatures: 1 degrees F DB (ASHRAE 99.6%).
      b. Cooling
         • Outside air temperatures: 86.3 degrees F DB / 72.4 degrees F WB (ASHRAE 99%).
   B. Building Design
      a. ASHRAE and Energy Code guidelines.
      b. Indoor relative humidity at 50 percent RH for cooling loads only.
         • Humidity is not being controlled or maintained in the heating or cooling equipment modes.

3. Design Ventilation
   A. Use ASHRAE 62 Standard.
   B. See Ventilation Schedule on drawings.

GENERAL

1. The term General Contractor (GC), as used in these documents, refers to the Contractor / Construction Manager in responsible charge of the project in terms of coordination, scheduling, subcontractor coordination, etc. This term refers to, but is not limited to, General Contractor, Construction Manager, Design Build Contractor, Prime Contractor, etc. The term is referencing the entity that coordinates the work of other trades.

2. These drawings are diagrammatic and indicate the general extent of the work. The contractor shall be responsible for the coordination and proper installation of all mechanical systems. The contractor shall provide all necessary offsets and fittings which may be required due to space constraints or other conditions.

3. The mechanical systems or its modifications are designed to be a complete operating system and stable after the building or its modifications are fully completed. It is solely the contractor's responsibility to determine construction, installation, and programming procedures and sequences to have a complete and working system and to insure the safety of the construction personnel, public, building and its component parts, and adjacent buildings and properties. This includes the addition of whatever temporary or permanent bracing, etc. that may be necessary to brace new or existing construction, walls, and framing to remain so that the structure is braced for construction loads, etc. and that no horizontal or vertical settlement or any damage occurs to the adjacent new or permanent supports and bracing that are installed. Design of these supports shall be provided by the contractor. Provide all materials, labor, equipment, and accessories required to furnish and install the systems identified in specifications and drawings.

4. It is the contractor's responsibility to enforce all applicable safety codes and regulations during all phases of construction.

5. Construction loads shall not exceed structural design live loads. The contractor shall be responsible for all design required to support construction equipment used in constructing this project. Verify and coordinate with structural drawings.

6. The contractor shall perform all construction for the project in a manner and sequence that are based on accepted industry standards that recognize the interaction of the components that comprise the systems, without causing distress, unanticipated movements or irregular load paths as a result of the construction means and methods employed.

7. The contractor shall provide all miscellaneous supporting steel, etc. for the proper installation of all mechanical systems.

8. Before fabrication and/or installing any work, contractor shall see that it does not interfere with clearance required for finish on beams, columns, pilasters, walls, or other structural or architectural members, as shown on architectural drawings. If any work is so installed and it later develops that architectural design cannot be followed, contractor shall, at his own expense, make such changes in his work as architect may direct to permit completion of architectural work in accordance with plans and specifications.

9. All piping shall be protected as required by the applicable Mechanical, Plumbing, Fire Protection and Building Codes: " General Regulations" and other Code Chapters.

10. Pipes passing through or under walls shall be protected from breakage. Pipes passing through studs, joist, rafters or similar members less than 1-1/2" from the nearest edge of the members shall be protected by steel shield plates.

11. Piping shall be installed to prevent strains and stresses that exceed the structural strength of the pipe. Where necessary, provisions shall be made to protect piping from the damage resulting from pipe expansion and contraction and structural/soil settlement. Expansion joint fittings shall be used where necessary to provide for expansion and contraction of the pipes. Sleeved openings shall be sized appropriately to accommodate pipe movement and structural/soil settlement. Expansion joint fittings shall be of the typical material suitable for use with the type of piping in which fittings are installed. At a minimum install rubber mechanical joint couplings or CSA-certified expansion joints on all vertical piping at every other floor of the building and rigidly support the stack pipe on alternating floors to direct any movement into the appropriate expansion compensator. Design of these expansion fittings shall be provided by the contractor. Any analysis which requires additional support or expansion detailing shall be shared with the mechanical design professional and any stresses or point loads created by the engineered system shall be shared with the structural designer for review.

12. Install additional offsets on piping or ductwork where required to obtain maximum headroom or to avoid conflict with other work without additional cost to owner.

13. Report any interferences between work under this division and that of any other contractors to architect as soon as they are discovered. Architect will determine which equipment shall be relocated, regardless of which was first installed, and his decision shall be final.

14. The contractor shall coordinate floor, wall, and roof penetrations, louver sizes, etc. with general trades.

15. Principal openings on these drawings through the framing are shown on the structural drawings. The mechanical contractor shall examine the structural and mechanical drawings for the required openings and shall verify size and location of all openings with the general contractor. General contractor shall provide all openings required through the framing by the mechanical, electrical, plumbing, or other trades, whether or not shown on the structural drawings. Any deviation from the openings shown on the structural drawings shall be brought to the engineer's attention for review.

16. All mechanical and electrical work: Ductwork, plumbing, piping, wiring, lighting, etc. and all architectural items that need to be removed during the modification of or reinforcing of, existing structure shall be replaced in kind by the respective contractor. The contractors shall keep all existing systems in operation during the construction phase of the project.

17. All contractors are required to examine the drawings and specifications carefully, visit the site and fully inform themselves as to all existing conditions and limitations, prior to agreeing to perform the work. Failure to visit the site and familiarize themselves with the existing conditions and limitations will in no way relieve the contractor from furnishing any materials or performing any work in accordance with drawings and specification without additional cost to the owner to have a complete and working system.

18. Details labeled "Typical Details" or "Typical" on drawings apply to situations occurring on the whole project that are the same or similar to those specifically detailed. Such details apply whether or not details are referenced at each location on drawings. Notify engineer for clarifications regarding applicability of "Typical Details".

19. Work and coordinate these drawings with architectural, civil, structural, mechanical, plumbing, fire protection, electrical, and technology drawings.

20. Do not scale drawings.

21. Any discrepancies between mechanical and architectural drawings shall be brought to the attention of the architect and mechanical engineer.

22. Should any of the general notes conflict with any details or instructions on plans, or in the specifications, the strictest provision shall govern.

23. Shop drawings and submittals
   A. Shop drawings and submittals shall be checked and coordinated with other materials and contracts by the general, mechanical and electrical contractors and shop drawings and submittals shall bear the prime contractor's review stamp with the checker's initials before being submitted to the architect for approval.
   B. When the contractor has been authorized to use the architect and engineer's drawings as construction coordination drawings, the contractor must remove all title blocks, professional seals and any other references to the architect and engineer from those drawings. The contractors name and title shall be placed on the drawings.
   C. Where voltage, amp draw, dimensions and elevations of existing construction could affect the new construction, it is the contractor's responsibility to make field verifications and measurements in time for their incorporation into the shop drawings.

24. Refer to architectural and electrical reflected ceiling plans for exact location of light fixtures. Contractors to coordinate locations of lighting, speakers, air diffusers, grilles, sprinkler heads and the like, with reflected ceiling lay-outs as required and directed by the architect.

25. Ductwork or piping shall not be located over the top of any electrical panels or equipment.

26. Contractor shall include in his bid all cutting, trenching, and patching associated with the installation of this projects work.

27. Cutting, Patching and Drilling
   A. All cutting and patching of the building construction required for this work shall be by this contractor unless shown on architectural drawings and confirmed as to size and location prior to new construction. Cutting shall be in a neat and workmanlike manner.
   B. Neatly saw cut all rectangular openings, set sleeve through opening, and finish patch or provide trim flange around opening.
   C. Neatly saw cut floors and patch floor to match existing, including floor covering.
   D. Contractor shall field verify slab-on-grade or supported floor construction type prior to cutting. Under no circumstances shall this contractor cut a floor thicker than 4 inches, a structural floor slab, whether on grade or supported, without prior written approval from the architect. If floor slab indicated to be cut on mechanical plans is found to be structural in nature, do not cut. Contact architect immediately for further directions.
   E. Core drill and sleeve all round openings.
   F. Do not cut any structural components without architect's written approval, including, but not limited to roof joists, columns, floor joists, beams, girders, structural floor slabs, rebar, etc.
   G. Patch, and finish to match adjacent areas that have been cut, damaged or modified as a result of the installation of the mechanical systems. Fire-stop all penetrations of fire rated construction in a code approved manner.
   H. All contractors shall confirm with owner, prior to bid, times available for noise producing work such as cutting and core drilling of floors, walls, etc. as well as times for work which requires access into adjoining tenant spaces. Include any premium time in bid.
   I. The mechanical contractor shall coordinate work with the general contractor prior to construction. The mechanical contractor shall provide information regarding openings in walls, floors, etc., concrete equipment pads and foundations to the general contractor. If the mechanical contractor fails to comply with this request, or if incorrect information is given, the necessary cutting and patching will be performed by the general contractor at the mechanical contractor's expense.
   J. All openings required for this branch of work shall be accomplished in time to be incorporated in, and be compatible with the construction program; otherwise this contractor shall be responsible and pay for all changes made necessary for his failure to do so. Pipe holes in floors and walls shall be core drilled if not sleeved during construction.
   K. Existing slabs shall be core drilled at reentrant corners of new floor openings to prevent overcutting.

28. Refer to mechanical, plumbing, fire protection, and electrical plans for location of mechanical, plumbing, and electrical equipment. Coordinate location of disconnect switch associated with each piece of mechanical and plumbing equipment with electrical contractor.

29. Installation requirements for all HVAC, plumbing, and fire protection systems shall be reviewed and coordinated with all other trades involved prior to rough-in. Give equipment shop drawings from installer/supplier/contractor equipment, as required, for review and coordination to all other trades involved. Contact architect/engineer with any discrepancies found between construction drawings and equipment being furnished prior to rough-in.

30. The contractor shall furnish all access panels or doors in hard ceilings and walls with a size as required for servicing and testing, for equipment, valves and/or devices furnished under this contract. The general contractor shall install access panels. The contractor shall coordinate the size and location of each access panel with the architect and general contractor prior to rough-in.

31. Firestopping
   A. The contractor shall review all architectural drawings for type of walls, fire ratings, & firestopping details and shall provide all fire dampers and firestopping required for these walls whether shown or not on the mechanical plans.
   B. All penetrations through fire rated walls associated with the installation shall be sleeved and fire-stopped using a UL approved method. UL approved method shall meet or exceed fire rating of structure being penetrated. Reference architectural plans for fire rated structures. If shown, reference architectural, mechanical and electrical drawings for penetration details.
   C. All openings through fire rated walls, floors, and/or roofs for ductwork, piping, conduit, etc., shall be fire sealed with a calcium salicate, silicone "RTV" foam, "3M" fire rated sealants, Hilti Firestop Systems, or approved equal to maintain the intended fire rating and associated UL ratings as recommended by the architect and/or sealant manufacturer.
   D. All fire stopping sealants shall be thixotropic so as not so slump or sag and shall be trowelable. Fire stopping sealants shall be intumescent and shall be free of asbestos, halogens, and volatile solvents.
   E. Fire stopping materials shall be classified in the Underwriters Laboratories (UL) fire resistance directory or listed in the Warnock Hersey International Directory.

32. All equipment and devices for this project must be UL listed. Devices, equipment, systems shall be installed per National Electrical Code requirements and manufacturer's instructions.

33. All conduit and cabling shall be properly supported as required by the National Electrical Code. For existing installations, the contractor shall be responsible to replace and/or rework existing conduit and/or cabling that is not in compliance with this requirement.

34. All materials and work in the return air plenum shall be approved for plenum rated application in accordance to the current building code. Where open wiring methods for low voltage systems is permitted by the contract documents and local authority, the conductor insulation must be plenum rated.

35. Shop Areas and Material Storage
   A. No plumbing or mechanical trade is permitted to use as shop working area, any concrete slab that is to receive metallic waterproofing, asphalt tile, plastic tile, etc., except by express permission of the architect.
   B. The contractor shall make provisions for the delivery and safe storage of his materials and equipment in coordination with the work of others. Materials and equipment shall be delivered at such stages of the work as will expedite the work as a whole and shall be marked and stored in such a way as to be easily checked and inspected. The arrival and placing of large equipment items shall be scheduled early enough to permit entry and setting when there is no restriction or problem due to size and weight.

36. Temporary Heat
   A. The HVAC contractor under this division shall set up temporary heat and other services as may be required and/or requested by the general contractor. See "General Conditions" and "Special Conditions." This contractor shall pay expenses resulting from temporary heat and services used solely by him.

EXCAVATING / BACKFILLING

1. The contractor shall familiarize himself with the survey and the geotechnical investigation report before starting construction. All underground work shall be in accordance with the recommendations of the geotechnical report except where noted otherwise on drawings or specifications.

2. All building pad preparation and patching shall follow the recommendations of the geotechnical report and the structural drawings and architectural drawings (uno).

3. All objectionable materials encountered are to be removed from excavated areas of the site per the geotechnical report.

4. If unstable subgrade sectors cannot be stabilized by excavation and re-compaction, then crushed stone or similar coarse aggregate materials shall be rolled into the subgrade until a firm subgrade reaction is achieved.

5. The geotechnical engineer shall determine on site or off site imported material that can be used for engineered fill. All fill material shall be approved by the geotechnical engineer.

6. The proposed engineered fill materials are to be placed in lifts not exceeding eight (8) inches in loose measured thickness. Each lift is to be compacted as follows:
   A. Slab on grade: Minimum of 95 percent maximum density by ASTM D698.

7. All fill materials shall be free of organic contaminations and other deleterious matter.

8. For back fill against basement walls, retaining walls, footings, etc., place in 8 inch thick layers, with each lift compacted at near optimum moisture content, until a minimum in place density of 95 percent of the maximum density as determined by ASTM D698 is achieved.

9. All soil surrounding and under footing shall be protected from frost action and freezing during the course of construction.

10. Notify structural engineer of any unusual soil conditions that are in variance with the geotechnical report.

CONCRETE PADS

1. This contractor shall provide to the general contractor, dimensions for the concrete foundations or bases under all equipment that rests on floors in mechanical equipment rooms or outside on grade. He shall follow drawings and/or manufacturer's literature with regard to design and construction of same. In the absence of more specific information, either on drawings or manufacturer's literature, the bases shall be level, shall have a minimum height above finished floor of 4 inches and extend 3 inches beyond the skids, feet or bed plate of the item of equipment.

2. Concrete pedestals and/or saddles for support of piping and/or tanks shall be designed to withstand stresses to which they may be subjected and to distribute properly the load and impact over building areas.

3. Concrete shall be a of mix producing compressive strength after 28 days of 3,000 psi minimum reinforcing and bolts shall be provided as required and work shall be done in accordance with applicable articles covering concrete work.

4. Space approximately 1 inch thick between bottom of equipment and top of concrete foundation or base which remains after shimming, shall be filled completely with grouting. Grout shall be made up with sand and cement designed for the purpose which does not shrink on setting up. Exposed surface of grouting shall be finished to make a neat appearance.

NOTES:
1. PREPARE SUBMITTALS AS PDF PACKAGE, INCORPORATING COMPLETE INFORMATION INTO EACH PDF FILE. NAME PDF FILE WITH SUBMITTAL NUMBER. ALL SUBMITTALS FOR A GROUP OF FIXTURES SHALL BE PROVIDED IN A SINGLE REVIEWABLE DOCUMENT, NOT MULTIPLE PACKAGES, FOR REVIEW.
2. EACH SUBMITTAL SHALL BE PROVIDED WITH A COVER IDENTIFYING THE FOLLOWING:...
   a. NAME OF THE JOB
   b. LOCATION OF THE JOB, ADDRESS, CITY AND STATE.
   c. NAME AND ADDRESS OF THE COMPANY ISSUING THE SUBMITTAL.
   d. DATE OF THE SUBMITTAL
   e. GENERAL CONTRACTOR'S REVIEW AND APPROVAL STAMP
3. SHOP DRAWINGS WILL NOT BE REVIEWED BY THE ENGINEER UNLESS THE GC'S APPROVAL IS NOTED AND COVER SHEET WITH ITEMS INDICATED ABOVE ARE COMPLETE. CATALOG CUT SHEETS THAT DO NOT IDENTIFY SPECIFIC ITEMS WILL NOT BE REVIEWED. DO NOT START WORK OR FABRICATION UNTIL SHOP DRAWINGS HAVE BEEN REVIEWED BY THE ENGINEER AND RETURNED TO THE CONTRACTOR.
4. THE CONTRACTOR IS RESPONSIBLE TO HIGHLIGHT (IN BOLD TEXT OR HIGHLIGHTED COLOR) TO THE DESIGN TEAM ANY DIFFERENCES IN PERFORMANCE, DIMENSION, WEIGHT, POWER REQUIREMENTS, ACCESS ETC. BETWEEN THE BASIS OF DESIGN OR SCHEDULED EQUIPMENT AND THE SUBMITTED EQUIPMENT.
5. SUBMITTALS WILL BE REVIEWED ONLY FOR GENERAL COMPLIANCE WITH THE CONTRACT DOCUMENTS AND NOT FOR DIMENSIONS, SERVICE, ACCESS OR QUANTITIES. THE DESIGN TEAM WILL MAKE EVERY EFFORT TO DETECT AND NOTE ERRORS, OMISSIONS, AND/OR INACCURACIES IN SUBMITTED SHOP DRAWINGS, BUT THE FAILURE TO DETECT ERRORS, OMISSIONS, AND/OR INACCURACIES SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR THE PROPER AND COMPLETE PERFORMANCE, APPLICATION AND INSTALLATION IN ACCORDANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS. THE SUBMITTAL REVIEW SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR PURCHASE OF ANY ITEM IN FULL COMPLIANCE WITH THE CONTRACT DOCUMENTS OR IT'S COMPLETE AND PROPER INSTALLATION AND PERFORMANCE.
6. EACH CONTRACTOR MUST CHECK THE APPLICATION OF THEIR SUBMITTED EQUIPMENT AND CERTIFY AT TIME OF SHOP DRAWING SUBMITTAL THAT THE EQUIPMENT OR PRODUCT SPECIFIED HAS BEEN PROPERLY APPLIED AND CAN BE INSTALLED, SERVICED, AND MAINTAINED WHERE INDICATED ON THE DRAWINGS. ADVISE THE ENGINEER IN WRITING WITH SUBMITTAL DRAWINGS OF ANY POTENTIAL PROBLEMS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY FIELD CHANGES THAT MIGHT BE NECESSARY BECAUSE OF PHYSICAL CHARACTERISTICS OF EQUIPMENT THAT HAVE NOT BEEN CALLED TO THE ENGINEER'S ATTENTION AT THE TIME OF SUBMITTAL.
7. IF SUBSTITUTIONS ARE SUBMITTED, NOTIFY ALL OTHER CONTRACTORS, SUBCONTRACTORS, ETC., AFFECTED BY THE SUBSTITUTION AND FULLY COORDINATE WITH THEM. ANY ADDITIONAL COSTS RESULTING FROM SUBSTITUTION, WHETHER BY THIS CONTRACTOR OR OTHERS, SHALL BE THE RESPONSIBILITY OF AND PAID FOR BY THE SUBSTITUTING CONTRACTOR. SUBMITTED AND REVIEWED SHOP DRAWINGS DO NOT ABSOLVE THIS CONTRACTOR FROM THIS RESPONSIBILITY.

2. COORDINATE REFRIGERANT RUNS WITH MANUFACTURER PRIOR TO INSTALLATION. REFRIGERANT TO BE INSTALLED IN FIRE RATED ENCLOSURE PER NEW REGRIGERANT REQUIREMENTS. REFER TO ARCHITECTURAL PLANS FOR SHAFT ENCLOSURE LOCATION AND DETAILS.
3. PROVIDE WITH WIND BAFFLES AND LOW AMBIENT CONTROL FOR COOLING OPERATION DOWN TO 0°F.

DUCT MATERIAL, LINING, AND INSULATION SCHEDULE

TYPE NO.	DESCRIPTION	SMACNA PRESSURE CLASSIFICATION	DUCT MATERIAL	INSULATION	REMARKS
GENERAL DUCTWORK:					
1	SUPPLY AIR	RECTANGULAR - 2" ROUND - 4"	GALVANIZED STEEL (SPIRAL WHERE EXPOSED TO VIEW)	1" THICK INTERNAL LINING TO 10' DOWNSTREAM OF EQUIPMENT, EXTERNAL FIELD APPLIED 1" THICK FLEXIBLE INSULATION WHERE NOT INTERNALLY LINED. (NO EXTERNAL WRAP WHERE EXPOSED TO VIEW)	1,2,4
2	RETURN AIR	2"	GALVANIZED STEEL	1" THICK INTERNAL LINING WITHIN 10' OF EQUIPMENT	1,2,4
3	EXHAUST AIR	2"	GALVANIZED STEEL	1" THICK INTERNAL LINING WITHIN 10' OF EQUIPMENT	2,3,4
4	OUTDOOR AIR	2"	GALVANIZED STEEL	EXTERNAL FIELD APPLIED 2" THICK FLEXIBLE INSULATION	NONE

GENERAL NOTE:
- DUCTWORK SHALL BE CONSTRUCTED & INSULATED AS NOTED IN THIS SCHEDULE. SEE SPECIFICATIONS FOR ADDITIONAL INFORMATION, FOR ANY DUCTS NOT LISTED IN SCHEDULE, AND FOR DUCT CONNECTION THAT REQUIRE A HIGHER PRESSURE AND BETTER INSULATION VALUE.
- INSULATE EQUIPMENT (DUCT FURNACE, ETC.), THAT IS NOT INSULATED BY THE MANUFACTURE WITH INSULATION SHOWN IN SCHEDULE ABOVE FOR DUCTWORK.

REMARKS:
1. ALL EXPOSED SUPPLY AND RETURN DUCTWORK SHALL BE PAINTED A COLOR SELECTED BY THE ARCHITECT.
2. SIZES OF INTERNALLY LINED DUCTWORK INDICATED ON THE PLANS ARE INSIDE CLEAR DIMENSIONS.
3. INSULATE ALL DUCTWORK BETWEEN MOTOR OPERATED DAMPERS (MOD) AND BUILDING ENVELOPE (ROOF LINE OR EXTERIOR WALL).
4. DUCTWORK EXPOSED TO EXTERIOR (OUTDOOR) TEMPERATURES EITHER IN UNCONDITIONAL SPACE OR OUTSIDE SHALL BE WRAPPED WITH A MINIMUM 2" THICK FIBERGLASS INSULATION. DUCTS EXPOSED TO WEATHER SHALL BE WRAPPED WITH VENTURECLAD ALUMINUM FACING.

VIBRATION ISOLATION SCHEDULE

EQUIPMENT TYPE	HP AND OTHER	RPM	FLOOR SPAN UP TO 20 FT: BASE TYPE	ISOLATOR TYPE	MIN. DEFLECTION (IN.)	REMARKS
CENTRIFUGAL FANS						
UP TO 22 IN. DIAMETER	ALL	ALL	B	3	0.75	1, 2
HEAT PUMPS, FAN-COILS AND CEILING HUNG COMPUTER ROOM AC UNITS						
ALL	ALL	ALL	A	1	0.75	
CONDENSING UNITS						
ALL	ALL	ALL	A	2	0.75	

BASE TYPES:
A. NO BASE, ISOLATORS ATTACHED DIRECTLY TO EQUIPMENT
B. STRUCTURAL STEEL RAILS OR BASE

ISOLATOR TYPES:
1. SPRING FLOOR ISOLATOR OR HANGER
2. RESTRAINED SPRING ISOLATOR

REMARKS:
1. TO LIMIT UNDESIRABLE MOVEMENT, THRUST RESTRAINTS (TYPE 5) ARE REQUIRED FOR ALL CEILING-SUSPENDED AND FLOOR-MOUNTED UNITS OPERATING AT 2 IN. OF WATER OR MORE TOTAL STATIC PRESSURE.
2. CONSIDER THE FOLLOWING WHEN SELECTING ISOLATION SYSTEMS FOR FANS AND AIR-HANDLING EQUIPMENT:
   A. FANS WITH WHEEL DIAMETERS OF 22 IN. AND LESS AND ALL FANS OPERATING AT SPEEDS UP TO 300 RPM DO NOT GENERATE LARGE VIBRATORY FORCES. FOR FANS OPERATING UNDER 300 RPM, SELECT ISOLATOR DEFLECTION SO THE ISOLATOR NATURAL FREQUENCY IS 40% OR LESS THAN THE FAN SPEED. FOR EXAMPLE, FOR A FAN OPERATING AT 275 RPM, 0.4 x 275 = 110 RPM. THEREFORE, AN ISOLATOR NATURAL FREQUENCY OF 110 RPM OR LOWER IS REQUIRED. THIS CAN BE ACCOMPLISHED WITH A 3 IN. DEFLECTION ISOLATOR (TYPE 3).
   B. FLEXIBLE DUCT CONNECTORS SHOULD BE INSTALLED AT THE INTAKE AND DISCHARGE OF ALL FANS AND AIR-HANDLING EQUIPMENT TO REDUCE VIBRATION TRANSMISSION TO AIR DUCT STRUCTURES.
   C. INERTIA BASES (TYPE C) ARE RECOMMENDED FOR ALL CLASS 2 AND 3 FANS AND AIR-HANDLING EQUIPMENT BECAUSE EXTRA MASS ALLOWS THE USE OF STIFFER SPRINGS, WHICH LIMIT HEAVING MOVEMENTS.
   D. THRUST RESTRAINTS (TYPE 5) THAT INCORPORATE THE SAME DEFLECTION AS ISOLATORS SHOULD BE USED FOR ALL FAN HEADS, ALL SUSPENDED FANS, AND ALL BASE-MOUNTED AND SUSPENDED AIR-HANDLING EQUIPMENT OPERATING AT 2 IN. TOTAL OR MORE STATIC PRESSURE. RESTRAINT MOVEMENT ADJUSTMENT MUST BE MADE UNDER NORMAL OPERATIONAL STATIC PRESSURES.

PART 1 - VERTICAL DUCTS

MAXIMUM SIDE OF RECTANGULAR DUCT	METAL STRAP OR ANGLE BRACKET	MAXIMUM DIAMETER OF ROUND DUCTS	STRAPS
24"	1" x 1/8" (STRAP)[1]	10"	0.047" (NO. 18 GAGE) GALVANIZED STEEL 2" WIDE[1]

PART 2 - HORIZONTAL DUCTS

18"	1" x 18 GAGE[2]	10"	SAME GAGE AS GALVANIZED STEEL DUCT, 1" WIDE OR (NO. 18 GAGE GALVANIZED STEEL WIRE) ON 10' CENTERS

FIRST FLOOR FIRE PROTECTION PLAN

1/16" = 1'-0"

SHOP DRAWING SCHEDULE

SUBMITTAL	NOTES ON SUBMISSION	RESPONSIBLE PARTY
SPRINKLER SHOP DRAWINGS	DRAWN TO SCALE, SHOWING AT MINIMUM ELEVATIONS WITH ALL HEAD LOCATIONS AND TYPES NOTED. PROVIDE HYDRAULIC CALCULATIONS FOR REVIEW.	SPRINKLER CONTRACTOR

NOTES:

1. PREPARE SUBMITTALS AS PDF PACKAGE, INCORPORATING COMPLETE INFORMATION INTO EACH PDF FILE. NAME PDF FILE WITH SUBMITTAL NUMBER. ALL SUBMITTALS FOR A GROUP OF FIXTURES SHALL BE PROVIDED IN A SINGLE REVIEWABLE DOCUMENT, NOT MULTIPLE PACKAGES, FOR REVIEW.
2. EACH SUBMITTAL SHALL BE PROVIDED WITH A COVER IDENTIFYING THE FOLLOWING:...
   a. NAME OF THE JOB
   b. LOCATION OF THE JOB, ADDRESS, CITY AND STATE.
   c. NAME AND ADDRESS OF THE COMPANY ISSUING THE SUBMITTAL.
   d. DATE OF THE SUBMITTAL
   e. GENERAL CONTRACTOR'S REVIEW AND APPROVAL STAMP
3. SHOP DRAWINGS WILL NOT BE REVIEWED BY THE ENGINEER UNLESS THE GC'S APPROVAL IS NOTED AND COVER SHEET WITH ITEMS INDICATED ABOVE ARE COMPLETE. CATALOG CUT SHEETS THAT DO NOT IDENTIFY SPECIFIC ITEMS WILL NOT BE REVIEWED. DO NOT START WORK OR FABRICATION UNTIL SHOP DRAWINGS HAVE BEEN REVIEWED BY THE ENGINEER AND RETURNED TO THE CONTRACTOR.
4. THE CONTRACTOR IS RESPONSIBLE TO HIGHLIGHT (IN BOLD TEXT OR HIGHLIGHTED COLOR) TO THE DESIGN TEAM ANY DIFFERENCES IN PERFORMANCE, DIMENSION, WEIGHT, POWER REQUIREMENTS, ACCESS ETC. BETWEEN THE BASIS OF DESIGN OR SCHEDULED EQUIPMENT AND THE SUBMITTED EQUIPMENT.
5. SUBMITTALS WILL BE REVIEWED ONLY FOR GENERAL COMPLIANCE WITH THE CONTRACT DOCUMENTS AND NOT FOR DIMENSIONS, SERVICE, ACCESS OR QUANTITIES. THE DESIGN TEAM WILL MAKE EVERY EFFORT TO DETECT AND NOTE ERRORS, OMISSIONS, AND/OR INACCURACIES IN SUBMITTED SHOP DRAWINGS, BUT THE FAILURE TO DETECT ERRORS, OMISSIONS, AND/OR INACCURACIES SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR THE PROPER AND COMPLETE PERFORMANCE, APPLICATION AND INSTALLATION IN ACCORDANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS. THE SUBMITTAL REVIEW SHALL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR PURCHASE OF ANY ITEM IN FULL COMPLIANCE WITH THE CONTRACT DOCUMENTS OR ITS COMPLETE AND PROPER INSTALLATION AND PERFORMANCE.
6. EACH CONTRACTOR MUST CHECK THE APPLICATION OF THEIR SUBMITTED EQUIPMENT AND CERTIFY AT TIME OF SHOP DRAWING SUBMITTAL THAT THE EQUIPMENT OR PRODUCT SPECIFIED HAS BEEN PROPERLY APPLIED AND CAN BE INSTALLED, SERVICED, AND MAINTAINED WHERE INDICATED ON THE DRAWINGS. ADVISE THE ENGINEER IN WRITING WITH SUBMITTAL DRAWINGS OF ANY POTENTIAL PROBLEMS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY FIELD CHANGES THAT MIGHT BE NECESSARY BECAUSE OF PHYSICAL CHARACTERISTICS OF EQUIPMENT THAT HAVE NOT BEEN CALLED TO THE ENGINEER'S ATTENTION AT THE TIME OF SUBMITTAL.
7. IF SUBSTITUTIONS ARE SUBMITTED, NOTIFY ALL OTHER CONTRACTORS, SUBCONTRACTORS, ETC., AFFECTED BY THE SUBSTITUTION AND FULLY COORDINATE WITH THEM. ANY ADDITIONAL COSTS RESULTING FROM SUBSTITUTION, WHETHER BY THIS CONTRACTOR OR OTHERS, SHALL BE THE RESPONSIBILITY OF AND PAID FOR BY THE SUBSTITUTING CONTRACTOR. SUBMITTED AND REVIEWED SHOP DRAWINGS DO NOT ABSOLVE THIS CONTRACTOR FROM THIS RESPONSIBILITY.

GENERAL NOTES:

1. THESE DRAWINGS ARE DIAGRAMMATIC AND INDICATE THE GENERAL EXTENT OF WORK. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE COORDINATION AND PROPER INSTALLATION OF ALL FIRE PROTECTION SYSTEMS.
2. THE CONTRACTOR SHALL PROVIDE ALL MISCELLANEOUS SUPPORTING STEEL ETC. FOR THE PROPER INSTALLATION OF ALL FIRE PROTECTION SYSTEMS.
3. THE CONTRACTOR SHALL COORDINATE FLOOR, WALL AND ROOF PENETRATIONS WITH THE GENERAL TRADES CONTRACTOR.
4. PIPING SHALL NOT BE LOCATED OVER THE TOP OF ANY ELECTRICAL PANELS OR EQUIPMENT.
5. THE CONTRACTOR SHALL COORDINATE THE LOCATION OF SPRINKLER HEADS WITH THE ARCHITECTURAL REFLECTED CEILING PLANS. ALL SPRINKLER HEADS ARE TO BE LOCATED IN THE CENTER OF CEILING TILES IN LAY-IN AREAS UNLESS OTHERWISE INDICATED.
6. PROVIDE GUARDS FOR SPRINKLERS IN STORAGE OR HAZARDOUS AREAS.
7. SPRINKLER HEADS ARE SHOWN FOR COORDINATION ONLY. A REGISTERED SPRINKLER CONTRACTOR SHALL BE RESPONSIBLE FOR FINAL DESIGN AND INSTALLATION OF COMPLETE SPRINKLER SYSTEM ALL IN ACCORDANCE WITH NFPA-13R AND LOCAL FIRE PREVENTION AUTHORITY. REFER TO ARCHITECTURAL CEILING DEVICE PLAN TO LOCATE SPRINKLER HEADS.
8. FIRE PROTECTION CONTRACTOR SHALL VERIFY EXACT LOCATION OF ALL OBSTRUCTIONS INCLUDING: PIPING, STRUCTURAL STEEL, CONDUIT, DUCTWORK, EQUIPMENT AND MISCELLANEOUS ITEMS BEFORE INSTALLATION OF SPRINKLER SYSTEM TO AVOID INTERFERENCES.
9. FABRICATION, ERECTION AND TESTING OF ALL PIPING SYSTEMS SHALL BE IN ACCORDANCE WITH OWNERS GENERAL REQUIREMENTS, NFPA-13R AND LOCAL CODE & AUTHORITIES.
10. FIRE PROTECTION CONTRACTOR SHALL MAKE ALL DRAWINGS, SUBMITTALS, TEST CERTIFICATE SUBMITTALS AND PAY ALL REQUIRED FEES TO THE OWNERS INSURING AGENT AND LOCAL AUTHORITIES FOR REQUIRED PERMITS.
11. FIRE SPRINKLER SYSTEM TO PROVIDE COVERAGE BELOW CEILINGS IN ALL AREAS PER THE STATE AND LOCAL FIRE MARSHALL.
12. CONTRACTOR TO PROVIDE SHOP DRAWINGS AND CALCULATIONS FOR BUILDING DEPARTMENT APPROVAL PRIOR TO INSTALLATION OF SPRINKLER SYSTEM. FIRE SPRINKLER SYSTEM TO MEET REQUIREMENTS OF OWNER, NFPA-13R ,THE STATE AND LOCAL FIRE MARSHALL OR WHICHEVER IS MORE STRINGENT.
13. FIRE PROTECTION PLANS (SPRINKLER DRAWINGS) MUST BE ENGINEERED AND WET SEALED BY A LICENSED REGISTERED FIRE PROTECTION CONTRACTOR IN THE LOCAL JURISDICTION.
14. ALL PIPE, FITTINGS, VALVES, HANGER MATERIAL, ALARM DEVICES, AND SPRINKLER DEVICES SHALL BE INSTALLED PER NFPA-13R AND LOCAL CODE REQUIREMENTS.
15. TESTING OF THE SPRINKLER SYSTEM SHALL CONFORM WITH NFPA-13R REQUIREMENTS.
16. ALL PIPE 2" AND SMALLER SHALL BE SCHEDULE 40 WITH SCREWED CAST IRON FITTINGS.
17. ALL PIPE 2-1/2" AND LARGER SHALL BE SCHEDULE 10 WITH GROOVED FITTINGS AND GROOVED RIGID COUPLINGS.
18. ALARMS SHALL BE INSTALLED PER LOCAL CODE REQUIREMENTS.
19. FIRE CAULK ALL PENETRATIONS THROUGH FIRE RATED ASSEMBLIES.

THIS DRAWINGS IS FOR REFERENCE ONLY. FIRE PROTECTION CONTRACTOR FOR THIS PROJECT SHALL PROVIDE FULLY DETAILED SPRINKLER PLANS AND CALCULATIONS.

APPROVAL IS CONTINGENT UPON LOCAL FIRE MARSHAL AND OWNER'S INSURANCE UNDERWRITER'S APPROVAL.

FIRE SPRINKLER CONTRACTOR TO VERIFY FLOW TEST INFORMATION IS CURRENT AND WATER PRESSURE ON SITE IS ADEQUATE TO MEET THE DEMAND OF THE FIRE SPRINKLER SYSTEM. IF PRESSURE IS NOT ADEQUATE, FIRE SPRINKLER CONTRACTOR SHALL PROVIDE AN ALTERNATE TO ADD A FIRE PUMP IN THE BIDDING PHASE AND NOTIFY THE ENGINEER ON RECORD IMMEDIATELY.

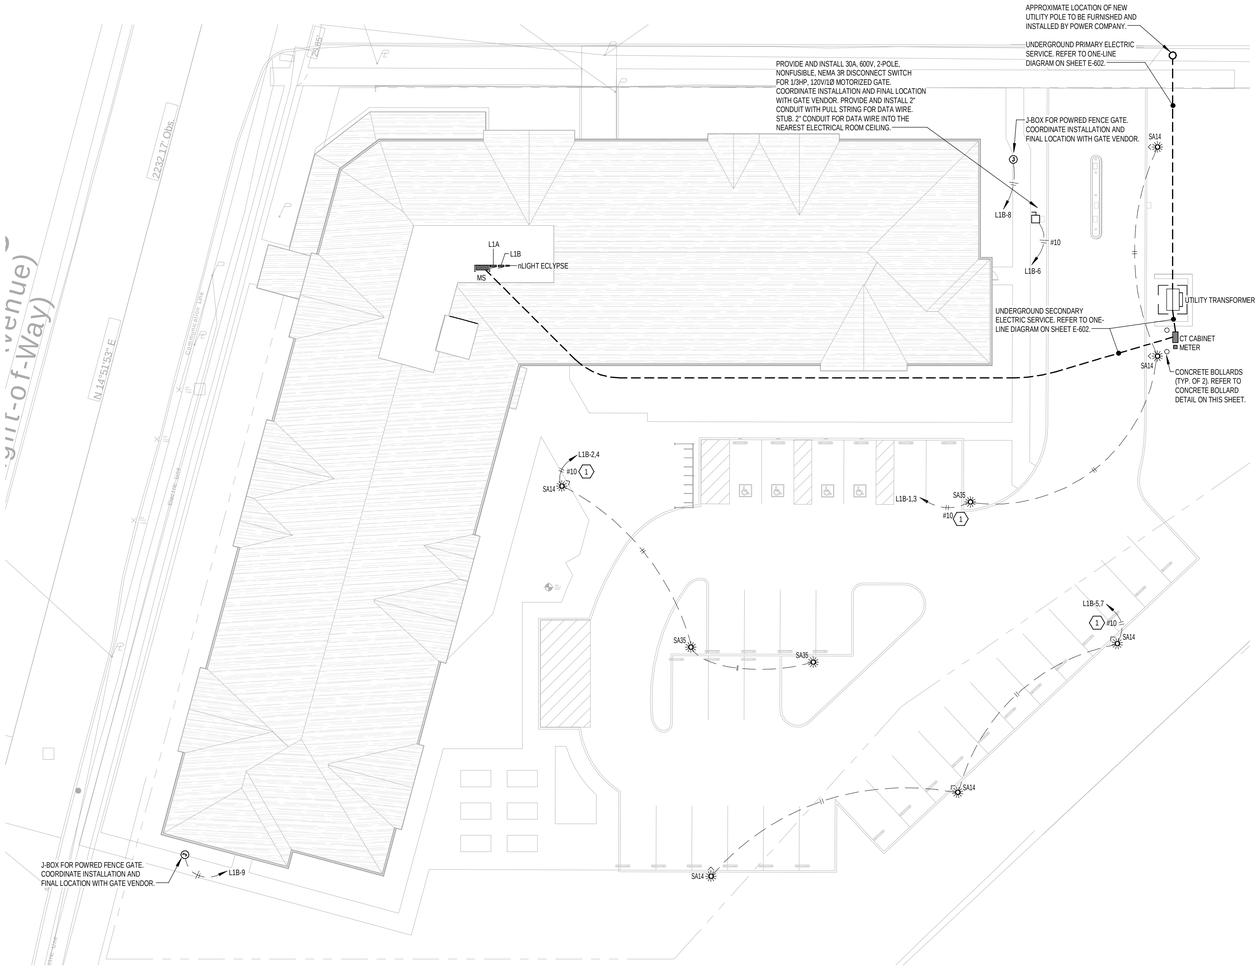
WIRELESS SITE LIGHTING CONTROL DIAGRAM

nLIGHT AIR SYSTEM NOTES:

1. nLIGHT IS SHOWN AS THE BASIS OF DESIGN. REFER TO SPECIFICATIONS FOR ADDITIONAL INFORMATION AND OTHER ACCEPTABLE MANUFACTURERS. IF ANY OF THE OTHER ACCEPTABLE MANUFACTURERS ARE USED, NOTE THAT THEIR EXACT REQUIREMENTS, COMPONENTS AND WIRING WILL LIKELY DIFFER AND THE CONTRACTOR IS RESPONSIBLE TO PROVIDE A COMPLETE, OPERATIONAL SYSTEM EQUIVALENT TO THAT SHOWN.
2. WIRING DIAGRAMS ARE DIAGRAMMATIC AND SHOWN FOR REFERENCE ONLY. REFER TO MANUFACTURER'S WIRING DIAGRAMS FOR ALL REQUIRED COMPONENTS AND WIRING.
3. INSTALL LOW VOLTAGE WIRING IN 3/4" CONDUIT (MIN.).
4. REFER TO MANUFACTURER'S LATEST LITERATURE FOR REQUIRED WIRING SIZES. INCREASE AS REQUIRED FOR VOLTAGE DROP.
5. MOUNT POWER PACK IN DEEP JUNCTION BOX IF REQUIRED PER LOCAL AHJ. LOCATE POWER PACKS ABOVE ACCESSIBLE CEILING (NOT SHOWN ON PLANS).
6. LOW VOLTAGE WIRING IS NOT SHOWN ON PLANS AND NOT ALL LINE VOLTAGE WIRING IS SHOWN ON PLANS. PROVIDE ALL REQUIRED LINE AND LOW VOLTAGE WIRING FOR A COMPLETE, FUNCTIONAL SYSTEM.
7. INITIAL NETWORKED NLIGHT AIR DEVICES SHOULD BE LOCATED WITHIN 100 FEET OF AN NLIGHT AIR ADAPTER IN INDOOR APPLICATIONS, UNLESS A SITE SURVEY HAS BEEN DONE TO CONFIRM OTHERWISE.
8. FOR MAXIMUM RANGE, THE NLIGHT AIR ADAPTER, WHICH IS USED FOR NETWORK COMMUNICATION, SHOULD BE MOUNTED IN AN OPEN INDOOR AREA (SUCH AS A CORRIDOR) AND SHOULD NOT BE LOCATED IN AN ENCLOSED SPACE (SUCH AS AN ELECTRICAL CLOSET).
9. A MAXIMUM 1,000-FOOT, LINE-OF-SIGHT DISTANCE SHOULD BE USED FOR OUTDOOR APPLICATIONS WHERE LINE OF SIGHT IS AVAILABLE BETWEEN THE NLIGHT AIR ADAPTER AND DEVICES RECEIVING AN INITIAL BROADCAST.
10. AN NLIGHT ECLYPSE WITH CONNECTED NLIGHT AIR ADAPTER CAN SUPPORT 750 DEVICES TOTAL. STANDALONE NLIGHT AIR GROUPS CAN CONTAIN UP TO 128 NLIGHT AIR DEVICES, AND ALL DEVICES SHOULD BE LOCATED WITHIN A MAXIMUM OF 1,000 FEET CLEAR LINE-OF-SIGHT OF EACH DEVICE WITHIN THE GROUP.
11. NLIGHT AIR DEVICES MUST BE PROGRAMMED THROUGH THE CLARITY PRO MOBILE APPLICATION BEFORE THEY CAN BE CONTROLLED OR NETWORKED TO AN NLIGHT ECLYPSE WITH CORRESPONDING NLIGHT AIR ADAPTER.



ELECTRICAL SITE PLAN

1" = 20'-0"

SITE PLAN GENERAL NOTES:

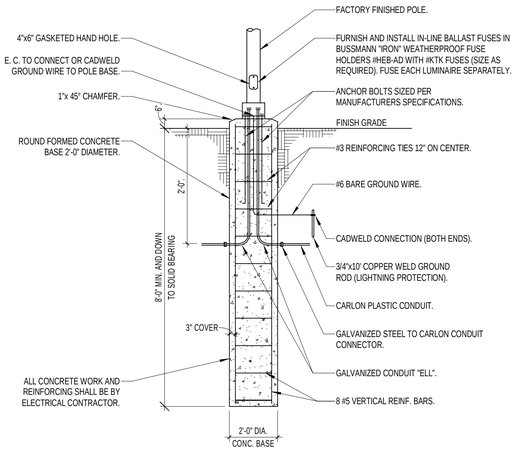
1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION.
2. REFERENCE MECHANICAL, PLUMBING, FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL WORK WITH OTHER TRADES.
3. WHERE THE UTILITY TRANSFORMER, SWITCHING AND/OR METERING EQUIPMENT SHALL BE INSTALLED PAD-MOUNTED IN OR NEAR A PAVED AREA ACCESSIBLE TO VEHICULAR TRAFFIC, THE ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL CONCRETE FILLED BOLLARDS AROUND ALL SUCH ELECTRICAL EQUIPMENT. PROVIDE BOLLARDS AT ALL ACCESSIBLE CORNERS OF EQUIPMENT WITH ADDITIONAL BOLLARDS IN BETWEEN AS REQUIRED FOR A MAXIMUM SPACING OF 4'-0" O.C. VERIFY EXACT LOCATION OF BOLLARDS WITH ENGINEER PRIOR TO INSTALLATION. MAINTAIN ALL REQUIRED CLEARANCE AND ACCESS REQUIREMENTS PER POWER COMPANY, CODE AND LOCAL AUTHORITY HAVING JURISDICTION. REFER TO DETAIL ON THIS SHEET.
4. MINIMUM UNDERGROUND CONDUIT SIZE SHALL BE 1 INCH, UNLESS OTHERWISE INDICATED.
5. TELEPHONE, DATA, CABLE TV, AND ELECTRIC SERVICE DUCT BANKS SHALL BE INSTALLED PER RESPECTIVE UTILITY COMPANY'S REQUIREMENTS.
6. CAP ALL SPARE OR EMPTY CONDUIT STUBS AND MARK ENDS WITH IRON PINS.
7. PROVIDE PULL-WIRE IN ALL DUCT BANKS.
8. PROVIDE METALLIC MARKING TAPE OVER ALL DUCT BANKS.
9. TOP OF ELECTRICAL UNDERGROUND DUCT BANKS SHALL BE A MINIMUM OF 36" BELOW FINISHED GRADE. TOP OF TELEPHONE, DATA, CABLE TV (COMMUNICATIONS) UNDERGROUND DUCT BANKS SHALL BE A MINIMUM OF 24" BELOW FINISHED GRADE, UNLESS OTHERWISE REQUIRED BY RESPECTIVE UTILITY COMPANIES.
10. CONCRETE ENCASE DUCT BANKS AND/OR CONDUIT WHERE ROUTED UNDER DRIVEWAYS, ROADWAYS OR PARKING AREAS.
11. COORDINATE ROUTING AND INSTALLATION OF PROPOSED ELECTRIC PRIMARY, ELECTRIC SECONDARY, AND COMMUNICATION DUCT BANKS. WHERE DUCT BANKS CROSS PATHS MAKE NECESSARY ADJUSTMENTS TO BURIAL DEPTH AND DUCT BANK CONFIGURATION TO MAINTAIN CODE REQUIRED DEPTHS FROM TOP OF DUCT BANK TO FINISHED GRADE.
12. WHERE NEW UNDERGROUND CONDUITS ARE INDICATED CROSSING EXISTING WALKWAYS, DRIVEWAYS, OR ROADWAYS, THIS CONTRACTOR SHALL PROVIDE AN ALTERNATE PRICE TO OWNER TO BORE CONDUITS UNDER EXISTING CONDITIONS IN LIEU OF CUTTING AND PATCHING.
13. WHERE NEW WORK IS TO BE PERFORMED IN EXISTING AREAS TO REMAIN, THE CONTRACTORS SHALL RETURN THE EXISTING AREAS BACK TO ITS ORIGINAL CONDITIONS.
14. CONTRACTOR SHALL OBTAIN THE SERVICES OF A LICENSED SURVEYOR TO IDENTIFY, COORDINATE AND RECORD EXACT LOCATIONS OF UNDERGROUND UTILITIES. RECORD DRAWINGS (HARD COPIES AND ELECTRONIC CAD FILES) SHALL BE PROVIDED TO OWNER.
15. REFERENCE CIVIL UTILITY PLANS FOR SITE UTILITY DESIGN INFORMATION. COORDINATE WORK WITH OTHER TRADES.
16. ALL TRENCHING AND BACKFILLING ASSOCIATED WITH ELECTRICAL WORK SHALL BE INCLUDED IN THE ELECTRICAL CONTRACTORS BID.
17. WHERE DEVICES AND EQUIPMENT ARE SUBJECT TO WATER AND OR MOISTURE, THE DEVICE OR ASSOCIATED CIRCUIT SHALL BE GFI PROTECTED. EQUIPMENT ENCLOSURES SHALL BE NEMA 3R RATED AT A MINIMUM.
18. REFERENCE SITE ELECTRICAL NOTES, ON THIS SHEET.
19. COORDINATE FINAL LOCATION OF ALL ELECTRICAL DEVICES AND EQUIPMENT WITHIN LANDSCAPED AND HARDSCAPED AREAS WITH ARCHITECT AND LANDSCAPE/HARDSCAPE ARCHITECT DRAWINGS PRIOR TO INSTALLATION.
20. REFER TO ONE-LINE DIAGRAM ON SHEET E-602 FOR CONDUIT SIZES AND QUANTITIES ASSOCIATED WITH THE UNDERGROUND PRIMARY AND SECONDARY SERVICE LATERAL DUCT BANKS.
21. ALL CONDUIT IN UNDERGROUND DUCT BANKS SHALL BE SUPPORTED WITH BASE AND INTERMEDIATE DUCT SPACERS.

SITE LOW VOLTAGE/TECHNOLOGY SYSTEM PATHWAY REQUIREMENTS:

1. CONDUIT RUNS FOR UNDERGROUND DUCT BANKS MAY EXTEND 300 FEET (MAX) BEFORE A PULL BOX, HAND HOLE OR MANHOLE IS REQUIRED.
2. PROVIDE PULL BOX, HAND HOLE OR MANHOLE AFTER EVERY TWO (2) 90 DEGREE BENDS OR 180 DEGREES OF BENDS, INCLUDING OFFSETS.
3. BENDS TO BE LONG-SWEEP BENDS, BUT IN NO CASE SHALL A BEND BE LESS THAN 10 TIMES OUTSIDE DIAMETER OF CONDUIT.
4. ALL 90 DEGREE BENDS TO BE EITHER PVC CONCRETE ENCASED OR GALVANIZED RIGID STEEL.
5. SLOPE CONDUITS AWAY FROM BUILDING TOWARD MANHOLE OR HAND HOLE.
6. PVC DUCT SHALL STOP 5 FEET FROM CONCRETE MANHOLE AND TRANSITION TO RIGID GALVANIZED STEEL CONDUIT TO PENETRATE MANHOLE. ALTERNATIVELY, IF PVC CONDUIT PROCEEDS TO MANHOLE, CONCRETE DUCT SHALL BE PINNED WITH REBAR TO MANHOLE FACE TO PREVENT SHEARING OR SEPARATION OF DUCT FROM MANHOLE.
7. CONCRETE DUCT ENCASING CONDUIT SHALL BE PINNED TO FOUNDATION WALL TO PREVENT SHEARING.
8. WHERE SMALLER HAND HOLES ARE USED, CONCRETE AND PINNING ARE NOT REQUIRED.
9. FLEXIBLE NONMETALLIC INNERDUCT AND FITTINGS SHALL BE USED;
   A. TO SEGMENT CONDUITS
   B. AS PROTECTION TO FIBER OPTIC CABLES WHEN INSTALLED IN CABLE TRAY OR BUILDING STRUCTURE.
   C. AS PROTECTION TO FIBER OPTIC CABLES WITHIN MDF AND TRS
10. INNERDUCT SHALL EXTEND TO EQUIPMENT RACKS AT SYSTEM ENDPOINTS.
11. WHERE NOT INSTALLED IN CONTINUOUS LENGTH, SPLICE INNERDUCT SEGMENTS USING COUPLINGS DESIGNED FOR THAT PURPOSE.
12. EMPTY INNERDUCT SHALL BE EQUIPPED WITH PULL CORD AND CAPPED AT BOTH ENDS. PULL CORD TO EXTEND BEYOND CAP FOR ACCESSIBILITY. PULL CORD TO BE LABELED AT EACH END.

CODED NOTES: ⟨#⟩

1. WIRE SIZE TO RUN THROUGH ENTIRE LENGTH OF CIRCUIT.

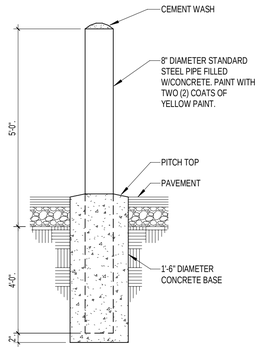


NOTES:

1. 3500 P.S.I. MIN. 28 DAY COMPRESSIVE STRENGTH CONCRETE WITH GRADE 60 REINFORCING STEEL.
2. IF WATER IS PRESENT IN HOLE, REMOVE BEFORE POURING CONCRETE.
3. FOUNDATION EXCAVATION SHALL BE BY 24" AUGER IN UNDISTURBED OR PROPERLY COMPACTED FILL PER SPECIFICATIONS. USE TEMPORARY SLEEVE IF REQUIRED.
4. FOUNDATION SHALL HAVE A MINIMUM ALLOWABLE END BEARING OF 2000 P.S.F. (TO BE VERIFIED BY ON-SITE GEOTECH). INCREASE BASE DEPTH AS REQUIRED.
5. THIS POLE BASE DETAIL MUST BE REVIEWED AND APPROVED BY THE STRUCTURAL ENGINEER PRIOR TO INSTALLATION.

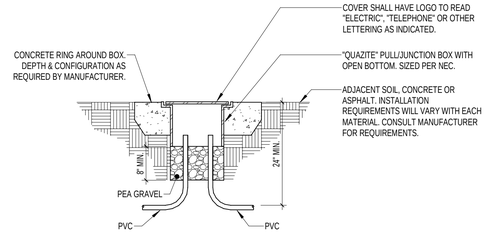
POLE BASE DETAIL- TYPES SA14 & SA35

N.T.S.



BOLLARD DETAIL

N.T.S.



NOTES:

1. SPLICES SHALL BE AVOIDED WHERE POSSIBLE. WHERE REQUIRED, SPLICES SHALL BE MADE WITH WATERPROOF CONNECTORS.
2. CONCRETE ENCASEMENT TO BE 3,000 PSI MINIMUM.
3. DO NOT LOCATE BOXES IN HIGH VOLUME TRAFFIC APPLICATIONS.
4. COMPACT SOIL AROUND BOX TO MANUFACTURERS RECOMMENDATIONS.
5. THIS DETAIL IS INTENDED TO SHOW GENERAL DESIGN INTENT ONLY. THE ELECTRICAL CONTRACTOR MUST VERIFY ALL INSTALLATION REQUIREMENTS WITH THE MANUFACTURER PRIOR TO THE BIDDING AND INSTALL ALL BOXES ACCORDINGLY.

IN-GRADE PULL/JUNCTION BOX DETAIL

N.T.S.

SITE ELECTRICAL NOTES

1. EXACT LOCATIONS OF PARKING LOT LIGHTING FIXTURES SHALL BE COORDINATED WITH APPROVED ARCHITECTURAL SITE PLAN AND PARKING LOT LAYOUT.
2. ALL LIGHTING FIXTURES PROJECTING TOWARD ADJACENT RESIDENTIAL AREAS MUST BE PROPERLY SHIELDED TO PREVENT LIGHT SOURCE FROM EXTENDING INTO THIS AREA.
3. THE LUMINAIRE MANUFACTURER SHALL PROVIDE COMPUTER GENERATED POINT BY POINT FOOTCANDLE CALCULATIONS ALONG WITH THEIR SHOP DRAWINGS SUBMITTAL. THE FORMAT OF THIS POINT BY POINT CALCULATION SHALL BE IN THE FORM OF AN OVERLAY OF THE ENTIRE PARKING AREA WITH CALCULATED POINTS 25 FEET ON CENTER.
4. ALL SITE LIGHTING POLES SHALL BE DESIGNED TO WITHSTAND WIND LOADS SPECIFIED BY THE APPLICABLE BUILDING CODES AND / OR LOCAL JURISDICTION.
5. ELECTRICAL CONTRACTOR SHALL INSTALL EACH LIGHTING POLE PLUMB AND TRUE. ELECTRICAL CONTRACTOR SHALL PROVIDE NECESSARY LEVELING SHIMS.
6. ELECTRICAL CONTRACTOR SHALL BACKFILL ALL ELECTRICAL TRENCHES USING CLEAN FILL MATERIAL FREE OF ORGANIC CONTAMINATIONS AND OTHER DELETERIOUS MATTER. PLACE BACKFILL MATERIAL IN 8" THICK LAYERS WITH EACH LIFT COMPACTED AT NEAR OPTIMUM MOISTURE CONTENT. COMPACT LIFTS TO ACHIEVE A MINIMUM IN PLACE DENSITY OF 95% OF THE MAXIMUM DENSITY AS DETERMINED BY ASTM D698.
7. ELECTRICAL CONTRACTOR SHALL COORDINATE LOCATION OF EASEMENTS, UNDERGROUND UTILITIES, AND DRAINAGE PRIOR TO TRENCHING OR AUGERING FOR POLE BASE (TYPICAL).

FIRST FLOOR LIGHTING PLAN

3/32" = 1'-0"

LIGHTING PLAN GENERAL NOTES:

1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION. COORDINATE LIGHT FIXTURE LOCATIONS AND MOUNTING OPTIONS WITH CEILING TYPE BEING INSTALLED.
2. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER MEP DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATION WITH ARCHITECTURAL DRAWINGS.
3. REFERENCE MECHANICAL, PLUMBING, FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL CONDUIT, WIRE, LIGHT FIXTURE AND EQUIPMENT LOCATIONS WITH MECHANICAL, PLUMBING AND FIRE PROTECTION EQUIPMENT.
4. WHERE EMERGENCY AND EXIT FIXTURES WITH AN INTEGRAL BATTERY PACK ARE USED, WIRE FIXTURES AHEAD OF ALL SWITCHING ON CIRCUIT INDICATED. EMERGENCY BATTERY BALLAST'S ASSOCIATED WITH THE LIGHT FIXTURES SHALL BE WIRED FOR SWITCHED OPERATION, UNLESS INDICATED OTHERWISE. PROVIDE AN ADDITIONAL HOT WIRE TO EMERGENCY BALLAST FOR SWITCHED OPERATION.
5. LIGHT FIXTURES DESIGNATED AS NIGHT LIGHTS (NL) SHALL BE WIRED FOR 24 HOUR OPERATION (NON-SWITCHED).
6. FURNISH AND INSTALL OCCUPANCY SENSORS PER MANUFACTURER'S RECOMMENDATIONS. COORDINATE WITH THE G.C., OWNER AND/OR OWNER'S REPRESENTATIVE TO COMMISSION AND ADJUST THE SETTINGS OF EACH SENSOR.
7. PROVIDE TEMPORARY POWER AND TEMPORARY EMERGENCY, EXIT AND GENERAL LIGHTING FOR ALL AREAS OF CONSTRUCTION AS REQUIRED. COORDINATE REQUIREMENTS WITH GENERAL CONTRACTOR.
8. REFERENCE LIGHTING CONTROL DETAILS AND NOTES, DRAWINGS E-502 THRU E-503.

CODED NOTES: (#)

1. REFERENCE ENLARGED UNIT PLANS ON E4 SERIES DRAWINGS FOR ELECTRICAL WORK WITHIN DWELLING UNIT.
2. STAIRWELL LIGHT FIXTURES TO BE CONTROLLED BY INTEGRAL OCCUPANCY SENSOR. REFER TO FIXTURE SCHEDULE ON SHEET E-502 FOR MORE INFORMATION.
3. EXTERIOR LIGHTING / EXTERIOR SIGNAGE CONTROLLED VIA PHOTOCELL AND TIME OF DAY THROUGH nLIGHT LIGHTING CONTROL SYSTEM. E.C. SHALL PROVIDE ALL COMPONENTS REQUIRED FOR INTERCONNECTION OF FIXTURE TO LIGHTING CONTROL SYSTEM. REFER TO LIGHTING CONTROL DIAGRAM "X" ON SHEET E-502.

LIGHTING FIXTURE TAG LEGEND

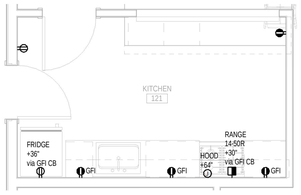
FIRST FLOOR POWER PLAN
3/32" = 1'-0"

POWER PLAN GENERAL NOTES:

1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION. COORDINATE FLOOR BOX AND DEVICE LOCATIONS WITH SYSTEMS FURNITURE AND EQUIPMENT BEING PROVIDED OTHERS.
2. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER MEP DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATIONS WITH ARCHITECTURAL DRAWINGS. REFERENCE ARCHITECTURAL ELEVATIONS AND TYPICAL DEVICE MOUNTING DETAILS AND NOTES.
3. REFERENCE MECHANICAL, PLUMBING, FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL CONDUIT, WIRE, LIGHT FIXTURES AND EQUIPMENT LOCATIONS WITH MECHANICAL, PLUMBING AND FIRE PROTECTION EQUIPMENT.
4. REFER TO "I" SERIES DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ROUGH-IN LOCATIONS PRIOR TO INSTALLATION.
5. PRIOR TO ROUGH-IN, COORDINATE EXACT POWER REQUIREMENTS AND LOW VOLTAGE ROUGH-IN REQUIREMENTS FOR EQUIPMENT AND SYSTEMS FURNISHED BY THE OWNER.
6. NEW CONDUIT/RACEWAY BEING INSTALLED SHALL BE CONCEALED WITHIN NEW CONSTRUCTION. WHEN THERE IS NO AVAILABLE OPTION BUT TO SURFACE MOUNT A VISIBLE CONDUIT/ RACEWAY, CONSULT ARCHITECT/ENGINEER FOR APPROVAL PRIOR TO INSTALLATION.
7. PROVIDE TEMPORARY POWER AND TEMPORARY EMERGENCY, EXIT AND GENERAL LIGHTING FOR AREAS OF CONSTRUCTION, AS REQUIRED.
8. REFER TO FURNITURE SYSTEM DETAILS & NOTES ON SHEET E-505.

CODED NOTES: (#)

1. REFERENCE ENLARGED UNIT PLANS ON E4 SERIES DRAWINGS FOR ELECTRICAL WORK WITHIN DWELLING UNIT.
2. PROPOSED LOCATION OF TECHNOLOGY CENTRAL WIRING PANEL WITHIN DWELLING UNIT.
3. TRASH COMPACTOR. PROVIDE POWER AND CONTROL WIRING PER MANUFACTURER'S INSTRUCTIONS. VERIFY RATINGS PRIOR TO ROUGH-IN. BASIS OF DESIGN: 5HP, 208V, 3Ø.
4. OVERHEAD DOOR MOTOR. PROVIDE POWER AND CONTROL WIRING PER MANUFACTURER'S INSTRUCTIONS. VERIFY RATINGS PRIOR TO ROUGH-IN. BASIS OF DESIGN: 1HP, 208V, 3Ø
5. PROVIDE 120V POWER AT JUNCTION BOX ABOVE ACCESSIBLE CEILING FOR POWER TO DOOR HARDWARE. COORDINATE REQUIREMENTS AND LOCATIONS WITH SECURITY VENDOR PRIOR TO ROUGH-IN.
6. SPACE ALLOWED FOR SOLAR PV EQUIPMENT, DESIGNED BY OTHERS. REFER TO SOLAR SOLAR PHOTOVOLTAIC VENDER DRAWINGS. PROVIDE AND INSTALL SETS OF (2) 2" CONDUITS FROM THIS LOCATION TO 3RD FLOOR PULL BOX ON SHEET E-203. VERIFY CONDUIT SIZE AND QTY PRIOR TO ROUGH-IN.



2 E-201 ENLARGED KITCHEN POWER PLAN
1/4" = 1'-0"

KITCHEN ELECTRICAL NOTES:

1. ALL COVERPLATES IN KITCHEN AREA SHALL BE WHITE.
2. ALL ELECTRICAL WORK FOR FOOD SERVICE EQUIPMENT SHALL BE COMPLETELY INTERWIRED BY ELECTRICAL CONTRACTOR. FINAL CONNECTIONS TO EQUIPMENT JUNCTION BOX OR PULL BOX, AND ALL ELECTRICAL WORK FROM PANEL BOARDS, TO BE BY THE ELECTRICAL CONTRACTOR.
3. THE ELECTRICAL CONTRACTOR SHALL PROVIDE ALL ROUGH-IN AND FINAL CONNECTION TO THE FOOD SERVICE EQUIPMENT. ALL WORK TO BE IN COMPLIANCE WITH ALL NATIONAL, STATE AND LOCAL CODES APPLICABLE.
4. VERIFY OUTLET RATING AND CONFIGURATION WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN.
5. VERIFY EXACT LOCATION AND MOUNTING HEIGHTS OF ALL OUTLETS WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN.
6. ELECTRICAL CONTRACTOR TO FURNISH AND INSTALL ALL PLUGS AND CORDS REQUIRED. ALL CORDS SHALL BE NEMA RATED AND UL APPROVED FOR MANUFACTURER AND EQUIPMENT.
7. ELECTRICAL CONTRACTOR TO FURNISH AND INSTALL ALL JUNCTION BOXES, PVC OR METAL CONDUIT, CONVENIENCE OUTLETS WITH COVERS, SWITCHES CONNECTORS, CONTROLS, AND OTHER ACCESSORIES THAT ARE NOT AN INTEGRAL PART OF THE FOOD SERVICE EQUIPMENT AS REQUIRED TO MAKE FINAL CONNECTIONS TO THE FOOD SERVICE EQUIPMENT FOR A COMPLETE AND FUNCTIONAL OPERATION MEETING ALL APPLICABLE NATIONAL, STATE, AND LOCAL CODES AND ORDINANCES.
8. ELECTRICAL CONTRACTOR TO FURNISH AND INSTALL ALL DISCONNECTS OR CIRCUIT BREAKERS AS REQUIRED BY CODES FOR EACH CONNECTION. COORDINATE LOCATION WITH THE KITCHEN EQUIPMENT CONTRACTOR.
9. ALL SINGLE-PHASE RECEPTACLES RATED 150 VOLTS TO GROUND OR LESS, 50 AMPERES OR LESS AND THREE PHASE RECEPTACLES RATED 150 VOLTS TO GROUND OR LESS, 100 AMPERES OR LESS INSTALLED IN THE KITCHEN AREA SHALL HAVE GROUND-FAULT CIRCUIT-INTERRUPTER PROTECTION FOR PERSONNEL PER N.E.C. 210-8(B). WHERE DEVICE IS READILY ACCESSIBLE, THE DEVICE SHALL BE PROVIDED WITH INTEGRAL GROUND FAULT PROTECTION. WHERE THE DEVICE IS NOT READILY ACCESSIBLE AND/OR NOT AVAILABLE WITH INTEGRAL GROUND FAULT PROTECTION, THE BRANCH CIRCUIT BREAKER SERVING THE DEVICE(S) SHALL BE GROUND FAULT TYPE.

SYSTEMS PLAN GENERAL NOTES:

1. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE ELECTRICAL INSTALLATION. COORDINATE DEVICE LOCATIONS WITH FURNITURE AND EQUIPMENT BEING PROVIDED.
2. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER MEP DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATIONS WITH DIMENSIONS INDICATED ON ARCHITECTURAL DRAWINGS. REFERENCE ARCHITECTURAL ELEVATIONS AND TYPICAL DEVICE MOUNTING DETAILS AND NOTES.
3. REFERENCE MECHANICAL, PLUMBING AND FIRE PROTECTION DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE ELECTRICAL CONDUIT, WIRE, LIGHT FIXTURES, DEVICES AND EQUIPMENT LOCATIONS WITH MECHANICAL, PLUMBING AND FIRE PROTECTION EQUIPMENT.
4. PRIOR TO ROUGH-IN, COORDINATE EXACT POWER REQUIREMENTS AND LOW VOLTAGE ROUGH-IN REQUIREMENTS FOR ALL EQUIPMENT AND SYSTEMS BEING FURNISHED BY OWNER AND OTHER TRADES.
5. REFERENCE FIRE ALARM SYSTEM DETAILS, DIAGRAMS AND NOTES, SHEET E-504.
6. REFER TO MECHANICAL DRAWINGS FOR EXACT LOCATIONS OF THERMOSTATS AND SENSORS. E.C. SHALL PROVIDE CONDUIT AND ROUGH-IN AS REQUIRED BY M.C..

CODED NOTES: (4)

1. REFERENCE ENLARGED UNIT PLANS ON E4 SERIES DRAWINGS FOR ELECTRICAL WORK WITHIN DWELLING UNIT.
2. POWER SUPPLIED FROM RESPECTIVE DWELLING UNIT LOAD CENTER PANEL. CONTROL BRANCH CIRCUIT WITHIN BUILDING AND WALL CONSTRUCTION. REFERENCE MECHANICAL EQUIPMENT ELECTRICAL CONNECTION SCHEDULE.
3. EXTERIOR AND INTERIOR SPRINKLER ALARM BELL FURNISHED AND INSTALLED BY FIRE PROTECTION CONTRACTOR, WIRED BY E.C. COORDINATE EXACT LOCATION AND ELECTRICAL REQUIERMENTS PRIOR TO ROUGH-IN.
4. VERIFY EXACT QUANTITY AND LOCATION WITH FIRE PROTECTION CONTRACTOR.
5. COORDINATE TRASH CHUTE INSTALLATION REQUIREMENTS WITH G.C. REFERENCE TRASH CHUTE SHOP DRAWINGS FOR INTERCONNECTION OF TRASH CHUTE SYSTEM TO BUILDING FIRE ALARM SYSTEM AS REQUIRED. E.C. TO PROVIDE ALL WORK AS REQUIRED.
6. LOCATE ADJACENT TO HVAC EQUIPMENT'S FIRST SUPPLY DIFFUSER. COORDINATE WITH M.C. ASSOCIATED UNIT SHALL BE SHUT DOWN UPON DETECTION OF CARBON MONOXIDE WITH TROUBLE ALARM AT FACP. VERIFY REQUIREMENTS WITH AHJ.

MECHANICAL EQUIPMENT CIRCUIT SCHEDULE

SYMBOL	DESCRIPTION
HI	PUSH BUTTON FOR THE (HEARING IMPAIRED) DOOR ALARM ACTIVATING FLASHING LIGHT IN ROOM.
HI	HEARING IMPAIRED LOW VOLTAGE FLASHING AMBER STROBE LOCATED ABOVE DOOR SHALL FLASH WHEN ACTIVATED BY PUSH BUTTON AT HALLWAY DOOR.
$HI	DOOR ALARM CONTROL SWITCH FOR TURNING ANNUNCIATOR SYSTEM ON OR OFF.

VERIFY ALL HEARING IMPAIRED ROOM LOCATIONS WITH ARCHITECTURAL DRAWINGS. PROVIDE DOOR ANNUNCIATOR SYSTEM FOR EACH UNIT.

- ACCESSIBLE UNITS (PER ARCHITECT): U-104, U-122, U-211, U-218, U-311, U-318, U-411, U-418
- HEARING IMPAIRED UNITS (PER ARCHITECT): U-XXX

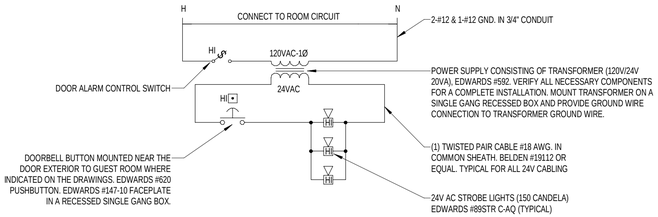
HEARING IMPAIRED DOOR ANNUNCIATOR SYSTEM DETAIL NOTES:

STOBE:
THE EDWARDS #89STR ADAPTA BEACON SERIES IS A BRIGHT 150 CANDELA, LOW CURRENT, STROBE FOR INDOOR USE. THE STROBE HAS BEEN DESIGNED FOR FLUSH MOUNTING. THE LAMP IS RATED AT 1,000 HOURS. THE HOUSING IS GRAY THERMOPLASTIC. THE LENS IS CLEAR. THE STROBE MOUNTS TO A STANDARD SINGLE GANG, 2" DEEP BOX VIA SPECIAL (SUPPLIED) MOUNTING PLATE.

TRANSFORMER:
TRANSFORMER HAS GROUNDING WIRE, PRE-STRIPPED PIGTAILS, AND SCREW TERMINAL CONNECTIONS ON THE SECONDARY. PRIMARY VOLTAGE IS 120V AC, AND THE SECONDARY VOLTAGE IS 24V AC. IT CAN BE MOUNTED TO PLASTIC OR METAL BACK BOXES. CAN ALSO BE USED WITH THE EDWARDS #593 MOUNTING PLATE FOR ENCLOSED MOUNTING IN A STANDARD TWO GANG OUTLET BOX.

PUSH BUTTON AND PLATE:
THE PUSH BUTTON IS MOMENTARY CONTACT TYPE AND IS FASTENED TO A STAINLESS STEEL PLATE DESIGNED FOR MOUNTING TO A SINGLE GANG BOX. THE PLATE IS 2 3/4" WIDE AND 4 1/2" HIGH. THE TEXT ON THE PLATE ABOVE THE PUSH BUTTON READS: ROOM FOR HANDICAPPED. THE TEXT BELOW THE PUSH BUTTON READS: PLEASE DEPRESS BUTTON FOR 5 SECONDS.

DOOR ALARM CONTROL SWITCH:
A STANDARD WHITE COLORED SINGLE POLE TOGGLE SWITCH TO BE USED FOR TURNING THE HEARING IMPAIRED ANNUNCIATOR SYSTEM ON OR OFF INSIDE THE GUEST ROOM. IT SHALL BE LOCATED ADJACENT TO THE DOOR AND LOCATED WITHIN THE ROOM. THE COVER PLATE SHALL BE ETCHED WITH THE FOLLOWING TEXT: "HEARING IMPAIRED DOOR ALARM CONTROL"



HEARING IMPAIRED DOOR ANNUNCIATOR SYSTEM DETAIL

MECHANICAL CIRCUIT SCHEDULE - ENLARGED UNIT ROOMS

MARK		VOLTS	PH	KVA	MCA	FAN (IF APPLICABLE) HP	FLA	PANEL-CIRCUIT	OCP AMPS	POLES	TYPE	DISC. BY	CONNECTION	FEEDER SIZE	COMMENTS
EF	A	120 V	1	0.00						1					
EF	B	120 V	1	0.01						1					
VTHP	A	208 V	1	6.24	30.0					2					

UNIT PLAN GENERAL NOTES:

1. WHEN POSSIBLE, GANG SWITCHES, RECEPTACLES OR COMBINATION OF BOTH UNDER ONE COVERPLATE.
2. REFERENCE ARCHITECTURAL DETAILS, SECTIONS AND PLANS FOR MOUNTING LOCATIONS AND INSTALLATION REQUIREMENTS OF DEVICES AND LIGHT FIXTURES.
3. PLANS ARE DIAGRAMMATIC, THE INSTALLATION OF RECEPTACLES SHALL COMPLY WITH THE NEC SPACING REQUIREMENTS. FOR UNITS DESIGNATED AS ADA ACCESSIBLE OR HEARING IMPAIRED, DEVICES WITHIN UNITS SHALL COMPLY WITH ADA REQUIREMENTS FOR DEVICE LOCATIONS AND MOUNTING HEIGHTS. REFERENCE ARCHITECTURAL PLANS FOR QUANTITY AND LOCATION OF ADA AND HEARING IMPAIRED UNIT.
4. COORDINATE EXACT LOCATION OF DEVICES SERVING APPLIANCES BEING FURNISHED. MOUNT DEVICE AT LOCATION AS REQUIRED BY MANUFACTURER'S INSTRUCTIONS.
5. ALL RECEPTACLES IN DWELLING UNIT SHALL BE ARC-FAULT PROTECTED, EXCEPT AS STATED BY NEC 210.12 (BATHROOMS). FURNISH AND INSTALL ARC-FAULT BREAKERS FOR ALL DWELLING UNIT RECEPTACLE AND LIGHTING CIRCUITS.
6. ALL RECEPTACLES IN DWELLING UNITS SHALL BE TAMPER RESISTANT RATED.
7. ALL TELEPHONE/DATA/CATV CABLING HOMERUNS FROM DEVICE TO DWELLING UNIT HALL CLOSET STRUCTURED MEDIA ENCLOSURE SHALL BE WITHIN 1"CONDUIT, UNLESS OTHERWISE NOTED.
8. MINIMUM WIRE SIZE SHALL BE #12 AWG. MINIMUM DEVICE RATING SHALL BE 20A.
9. FOR DWELLING UNITS IDENTIFIED ON ARCHITECTURAL PLANS AS BEING ADA ACCESSIBLE AND/OR HEARING IMPAIRED UNITS, PROVIDE FIRE ALARM AND SINGLE STATION DEVICES WITH VISUAL NOTIFICATION DEVICES AS REQUIRED BY CODE, FIRE ALARM VISUAL NOTIFICATION DEVICES IN BATHROOMS AS REQUIRED BY CODE. PROVIDE VISUAL NOTIFICATION DOORBELL/ENTRY SYSTEM, PER DETAIL ON THIS SHEET.
10. SMOKE DETECTORS AND HORN/STROBES FOR SLEEPING AREAS SHALL UTILIZE A LOW FREQUENCY SOUNDER WITH A 520HZ(+/-10%) SQUARE WAVE IN COMPLIANCE WITH NFPA 72 SECTION 18.4.5.
11. REFER TO MECHANICAL DRAWINGS FOR EXACT LOCATIONS OF THERMOSTATS AND SENSORS. E.C. SHALL PROVIDE CONDUIT AND ROUGH-IN AS REQUIRED BY M.C..

UNIT PLAN CODED NOTES: (#)

1. POWER BRANCH WIRING TO EQUIPMENT SUPPLIED FROM RESPECTIVE UNIT PANEL. VERIFY EQUIPMENT LOCATION, DESIGNATION AND ELECTRICAL RATINGS WITH MECHANICAL DRAWINGS AND CONTRACTOR. INSTALLATION PER MANUFACTURER'S INSTRUCTIONS.
2. FACTORY PAINT LOAD CENTER & TECHNOLOGY PANEL COVER TO BE WHITE. COORDINATE COLOR SELECTION AND SHEEN WITH ARCHITECT PRIOR TO ORDERING. E.C. TO COORDINATE DEPTH OF WALL WITH G.C. TO ACCOMMODATE RECESSED PANEL. RECESSED PANEL SHALL BE MOUNTED SO THAT TOP-MOST OVERCURRENT DEVICE IS NO MORE THAN 48" A.F.F. COMPLY WITH ALL NEC AND ADA REQUIREMENTS.
3. EACH TELEPHONE, DATA, AND CABLE TV OUTLET, LOCATED WITHIN DWELLING UNITS, SHALL BE RUN AS OPEN CABLING CONCEALED WITHIN WALLS TO THE STRUCTURED MEDIA ENCLOSURE LOCATED IN THE BEDROOM CLOSET OF EACH RESPECTIVE UNIT. STUB 1" ENT CONDUIT FROM THE STRUCTURED MEDIA ENCLOSURE IN THE BEDROOM TO THE RESPECTIVE MDF/IDF FOR COMMUNICATIONS CABLING INSTALLATION. ALL CABLING IS TO TERMINATE IN THE STRUCTURED MEDIA ENCLOSURE. REFER TO TECHNOLOGY DRAWINGS T-202, T-304.
4. FOR TYPE "B" ADA UNITS, E.C. SHALL PROVIDE ADA RANGE HOOD CONTROLS LOCATED ABOVE COUNTERTOP. REFERENCE ARCHITECTURAL ELEVATIONS AND APPLIANCE SPECIFICATIONS FOR ADDITIONAL INFORMATION, VERIFY LOCATION PRIOR TO ROUGH-IN.
5. THE BATHROOM EXHAUST FAN SHALL BE CONNECTED TO AN UNSWITCHED LIGHTING CIRCUIT. THE EXHAUST FAN IS A 2-SPEED HI-LOW FAN THAT SHALL OPERATE CONTINUOUSLY ON LOW SPEED. WHEN THE EXHAUST FAN SWITCH IS FLIPPED ON THE "ON" POSITION, THE FAN IS TO OPERATE AT ITS HIGH SPEED. WHEN THE EXHAUST FAN IS IN THE "OFF" POSITION, THE FAN WILL OPERATE AT ITS LOW SPEED. FURNISH AND INSTALL SWITCHING DEVICE TO COMPLY WITH THE ABOVE OPERATIONAL REQUIREMENTS AND EXHAUST FAN MANUFACTURER'S WIRING DIAGRAMS. COORDINATE REQUIREMENTS WITH MECHANICAL CONTRACTOR AND CONFIRM MAKE AND MODEL OF EXHAUST FAN BEING FURNISHED FOR THIS PROJECT.
6. CIRCUIT COMBINATION SMOKE / CO DETECTOR TO UNIT LIGHTING CIRCUIT. ALL SMOKE / CO DETECTORS WITHIN UNIT TO BE INTERCONNECTED PER MANUFACTURER'S INSTRUCTIONS.
7. RECEPTACLE FURNISHED AND INSTALLED BY E.C. SHALL BE SURGE PROTECTION STYLE, MOUNTED WITHIN TECHNOLOGY PANEL

"DECORA"-STYLE DEVICES AND FACEPLATES SHALL BE FURNISHED AND INSTALLED WITHIN DWELLING UNITS. COLOR/FINISH OF DEVICES AND FACEPLATES AS REQUIRED BY ARCHITECT.

REPRESENTATIVE UNIT TYPES GENERAL NOTE:
THE ENLARGED DWELLING UNIT PLANS SHOWN ON THIS DRAWING ARE REPRESENTATIVE OF THE PROJECT'S UNIT TYPES. WHERE VARIATIONS OCCUR WITHIN A SPECIFIC SPACE OR UNIT TYPE THAT ARE NOT CAPTURED BY THE REPRESENTATIVE ENLARGED DWELLING UNIT PLANS, FURNISH AND INSTALL ALL NECESSARY LABOR AND MATERIALS TO COMPLY WITH NEC DEVICE SPACING REQUIREMENTS AND ALSO MAINTAIN THE CONSISTENCY BETWEEN SIMILAR SPACE AND UNIT TYPES. SUBMIT COORDINATED INSTALLATION DRAWINGS SHOWING PROPOSED LOCATION OF DEVICES AND EQUIPMENT AS WELL AS ASSOCIATED BRANCH WIRING FOR DESIGN TEAM'S REVIEW AND COMMENT PRIOR TO PROCEEDING WITH WORK.

CIRCUITING NOTE:
NUMBERS NEXT TO ELECTRICAL DEVICES AND LIGHT FIXTURES INDICATE CIRCUIT THAT EQUIPMENT OR FIXTURE IS CONNECTED TO IN ITS UNIT'S RESPECTIVE LOAD CENTER. REFER TO UNIT ELECTRICAL PANEL SCHEDULES ON SHEET E-702 (TYPICAL FOR ALL DWELLING UNITS)

TO ACCOMMODATE RECESSED PANEL. RECESSED PANEL SHALL BE MOUNTED SO THAT TOP-MOST OVERCURRENT DEVICE IS NO MORE THAN 48" A.F.F. COMPLY WITH ALL NEC AND ADA REQUIREMENTS.
3. EACH TELEPHONE, DATA, AND CABLE TV OUTLET, LOCATED WITHIN DWELLING UNITS, SHALL BE RUN AS OPEN CABLING CONCEALED WITHIN WALLS TO THE STRUCTURED MEDIA ENCLOSURE LOCATED IN THE BEDROOM CLOSET OF EACH RESPECTIVE UNIT. STUB 1" ENT CONDUIT FROM THE STRUCTURED MEDIA ENCLOSURE IN THE BEDROOM TO THE RESPECTIVE MDF/IDF FOR COMMUNICATIONS CABLING INSTALLATION. ALL CABLING IS TO TERMINATE IN THE STRUCTURED MEDIA ENCLOSURE. REFER TO TECHNOLOGY DRAWINGS T-202, T-304.
4. FOR TYPE "B" ADA UNITS, E.C. SHALL PROVIDE ADA RANGE HOOD CONTROLS LOCATED ABOVE COUNTERTOP. REFERENCE ARCHITECTURAL ELEVATIONS AND APPLIANCE SPECIFICATIONS FOR ADDITIONAL INFORMATION, VERIFY LOCATION PRIOR TO ROUGH-IN.
5. THE BATHROOM EXHAUST FAN SHALL BE CONNECTED TO AN UNSWITCHED LIGHTING CIRCUIT. THE EXHAUST FAN IS A 2-SPEED HI-LOW FAN THAT SHALL OPERATE CONTINUOUSLY ON LOW SPEED. WHEN THE EXHAUST FAN SWITCH IS FLIPPED ON THE "ON" POSITION, THE FAN IS TO OPERATE AT ITS HIGH SPEED. WHEN THE EXHAUST FAN IS IN THE "OFF" POSITION, THE FAN WILL OPERATE AT ITS LOW SPEED. FURNISH AND INSTALL SWITCHING DEVICE TO COMPLY WITH THE ABOVE OPERATIONAL REQUIREMENTS AND EXHAUST FAN MANUFACTURER'S WIRING DIAGRAMS. COORDINATE REQUIREMENTS WITH MECHANICAL CONTRACTOR AND CONFIRM MAKE AND MODEL OF EXHAUST FAN BEING FURNISHED FOR THIS PROJECT.
6. CIRCUIT COMBINATION SMOKE / CO DETECTOR TO UNIT LIGHTING CIRCUIT. ALL SMOKE / CO DETECTORS WITHIN UNIT TO BE INTERCONNECTED PER MANUFACTURER'S INSTRUCTIONS.
7. RECEPTACLE FURNISHED AND INSTALLED BY E.C. SHALL BE SURGE PROTECTION STYLE, MOUNTED WITHIN TECHNOLOGY PANEL

"DECORA"-STYLE DEVICES AND FACEPLATES SHALL BE FURNISHED AND INSTALLED WITHIN DWELLING UNITS. COLOR/FINISH OF DEVICES AND FACEPLATES AS REQUIRED BY ARCHITECT.

REPRESENTATIVE UNIT TYPES GENERAL NOTE:
THE ENLARGED DWELLING UNIT PLANS SHOWN ON THIS DRAWING ARE REPRESENTATIVE OF THE PROJECT'S UNIT TYPES. WHERE VARIATIONS OCCUR WITHIN A SPECIFIC SPACE OR UNIT TYPE THAT ARE NOT CAPTURED BY THE REPRESENTATIVE ENLARGED DWELLING UNIT PLANS, FURNISH AND INSTALL ALL NECESSARY LABOR AND MATERIALS TO COMPLY WITH NEC DEVICE SPACING REQUIREMENTS AND ALSO MAINTAIN THE CONSISTENCY BETWEEN SIMILAR SPACE AND UNIT TYPES. SUBMIT COORDINATED INSTALLATION DRAWINGS SHOWING PROPOSED LOCATION OF DEVICES AND EQUIPMENT AS WELL AS ASSOCIATED BRANCH WIRING FOR DESIGN TEAM'S REVIEW AND COMMENT PRIOR TO PROCEEDING WITH WORK.

CIRCUITING NOTE:
NUMBERS NEXT TO ELECTRICAL DEVICES AND LIGHT FIXTURES INDICATE CIRCUIT THAT EQUIPMENT OR FIXTURE IS CONNECTED TO IN ITS UNIT'S RESPECTIVE LOAD CENTER. REFER TO UNIT ELECTRICAL PANEL SCHEDULES ON SHEET E-702 (TYPICAL FOR ALL DWELLING UNITS)

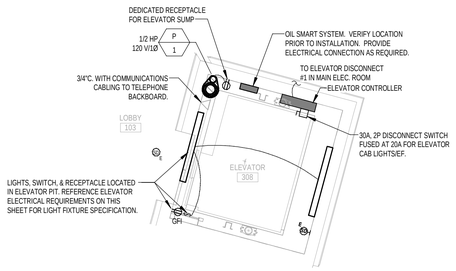
2 E-203 ELEVATOR TOP OF HOISTWAY ELECTRICAL PLAN

1/4" = 1'-0"

NOTE:
THE ELECTRICAL CONTRACTOR MUST VERIFY THE ELECTRICAL REQUIREMENTS & ROUGH-IN LOCATIONS OF THE ELEVATOR EQUIPMENT WITH THE ELEVATOR SUPPLIER PRIOR TO ROUGH-IN.



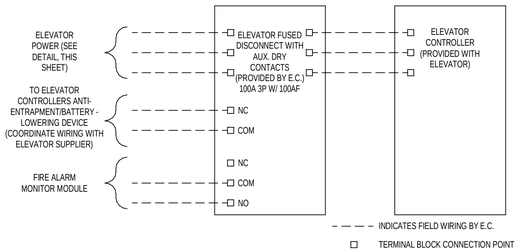
1 E-201 ELEVATOR PIT/LOBBY ELECTRICAL PLAN

1/4" = 1'-0"

NOTE:
THE ELECTRICAL CONTRACTOR MUST VERIFY THE ELECTRICAL REQUIREMENTS & ROUGH-IN LOCATIONS OF THE ELEVATOR EQUIPMENT WITH THE ELEVATOR SUPPLIER PRIOR TO ROUGH-IN.

MECHANICAL CIRCUIT SCHEDULE

MARK		VOLTS	PH	KVA	FAN (IF APPLICABLE) HP	FLA	PANEL-CIRCUIT	OCP AMPS	OCP POLES	OCP TYPE	DISC. BY	CONNECTION	FEEDER SIZE	COMMENTS
P	1	120 V	1	1.33	1/2				1					



ELEVATOR SWITCH GENERAL NOTE:
VERIFY AND COORDINATE RATINGS OF ELEVATOR AND REQUIRED INTERFACES OF SYSTEM PRIOR TO FURNISHING AND INSTALLING ELEVATOR SWITCHES. THE ABOVE INFORMATION IS FOR BIDDING PURPOSES ONLY. SWITCHES TO BE FURNISHED WITH REQUIRED RATINGS AND ACCESSORIES FOR ELEVATORS AND EQUIPMENT BEING FURNISHED.

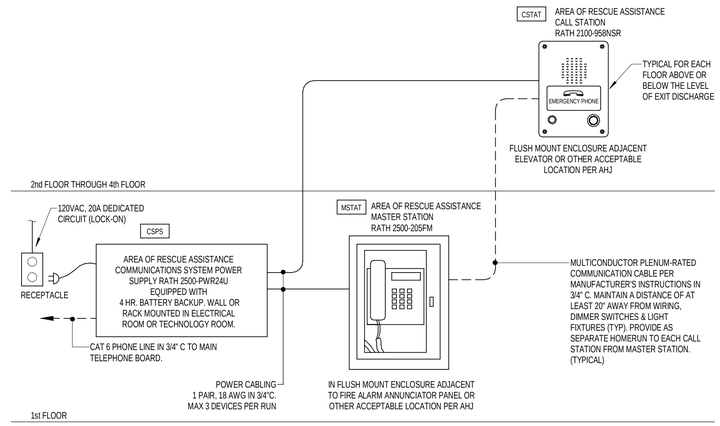
ELEVATOR CONTROL SWITCH DIAGRAM

N.T.S.

ELEVATOR SCHEDULE

ELEVATOR DESIGNATION	ELEVATOR HP	VOLTAGE	SWITCH SPECIFICATION	FUSE SIZE	FEEDER SIZE	PANEL DESIGNATION
ELEVATOR #1	25 HP	208V /3Ø	PER DETAIL	PER DETAIL	(4) #1 & (1) #6 GND. IN 2"C.	SEE PLAN & PANEL SCHEDULES

NOTES:
- ELEVATOR DISCONNECT SWITCH CONTACTOR COIL VOLTAGE SHOULD MATCH RELAY OUTPUT OF THE FIRE ALARM PANEL. ELECTRICAL CONTRACTOR SHALL COORDINATE WITH FIRE ALARM VENDOR PRIOR TO ORDERING.
- THE ELECTRICAL CONTRACTOR MUST VERIFY THE ELECTRICAL REQUIREMENTS & ROUGH-IN LOCATIONS OF THE ELEVATOR EQUIPMENT WITH THE ELEVATOR SUPPLIER PRIOR TO ROUGH-IN.
- COORDINATE TECHNOLOGY CABLING REQUIREMENTS WITHIN ELEVATOR TRAVELER CABLE WITH GC, OWNER, AND TECHNOLOGY ENGINEER / VENDOR.
- CONTRACTORS TO FURNISH AND INSTALL TEMPORARY POWER AND LIGHTING PER ELEVATOR MANUFACTURER'S REQUIREMENTS



AREA OF RESCUE ASSISTANCE NOTES:
1. THE CONTRACTOR SHALL BE RESPONSIBLE TO FURNISH AND INSTALL A COMPLETE TWO-WAY COMMUNICATION SYSTEM BETWEEN EACH ELEVATOR LANDING (OTHER THAN THE LEVEL OF EXIT DISCHARGE AND ONE PER ELEVATOR LOBBY) AND THE CENTRAL CONTROL POINT MASTER STATION. IN ADDITION, THE CONTRACTOR MUST FURNISH AND INSTALL A COMPLETE TWO-WAY COMMUNICATION SYSTEM BETWEEN EACH AREA OF REFUGE AND THE CONTROL POINT MASTER SYSTEM. REFER TO ARCHITECTURAL PLANS FOR LOCATIONS OF AREAS OF REFUGE.
2. THE CONTRACTOR MUST COORDINATE THE LOCATION OF THE CENTRAL CONTROL POINT MASTER STATION WITH THE LOCAL FIRE DEPARTMENT PRIOR TO ROUGH-IN.
3. THE CONTRACTOR MUST SUBMIT SYSTEM SHOP DRAWINGS INCLUDING FLOOR PLANS AND WIRING DIAGRAMS SIMULTANEOUSLY WITH THE FIRE ALARM SHOP DRAWINGS.
4. THE TWO-WAY COMMUNICATION SYSTEM MUST INCLUDE BOTH AUDIBLE AND VISUAL SIGNALS.
5. THE TWO-WAY COMMUNICATION SYSTEM MUST BE CAPABLE OF TWO-WAY OFF-SITE PERSON TO PERSON VOICE COMMUNICATION VIA LANDLINE **AND** CELLULAR DEVICE OR IP. CONFIRM FINAL CONNECTION REQUIREMENTS WITH OWNER. CONTRACTOR SHALL PROVIDE ADDITIONAL COMPONENTS AS REQUIRED.
6. EACH SYSTEM DEVICE MUST BE RATED FOR THE ENVIRONMENT WHICH IT IS INSTALLED. (I.E. COMPONENTS LOCATED IN UNHEATED AREAS MUST BE RATED ACCORDINGLY.) FURNISH AND INSTALL CONDUIT SEALS WHERE RACEWAYS PASS BETWEEN CONDITIONED AND UNCONDITIONED SPACES.
7. THIS DETAIL IS BASED ON THE USE OF RATH AS THE SYSTEM MANUFACTURER. SYSTEMS MANUFACTURED BY CORNELL OR JERON ARE ALSO ACCEPTABLE PROVIDED THEY MEET OR EXCEED THE REQUIREMENTS OF THIS DETAIL AND THE PERFORMANCE & QUALITY OF THE RATH SYSTEM IDENTIFIED AS THE BASIS OF DESIGN. THE CONTRACTOR SHALL BE RESPONSIBLE TO CONFIRM ALL ROUGH-IN AND CABLING REQUIREMENTS WITH THE MANUFACTURER THEY INTEND TO USE PRIOR TO BIDDING AND INCLUDE ALL COSTS FOR A COMPLETE SYSTEM IN THEIR BASE BID.
8. THIS PLAN IS FOR REFERENCE ONLY AND IS NOT INTENDED TO SHOW EXACT QUANTITIES. VERIFY EXACT LOCATIONS AND QUANTITIES WITH PLAN DRAWINGS AND/OR ARCHITECT PRIOR TO BID.
9. THE CONTRACTOR SHALL CONFIRM AND PROVIDE ALL SIGNAGE AS REQUIRED BY AUTHORITY HAVING JURISDICTION. INCLUDE A MINIMUM OF (1) 120/277V ILLUMINATED SIGN AND ASSOCIATED POWER FROM NEAREST EXIT SIGN FOR EACH STATION IN THE BASE BID.

AREA OF RESCUE ASSISTANCE (TWO-WAY COMMUNICATION) SYSTEM DIAGRAM

N.T.S.

ELEVATOR ELECTRICAL REQUIREMENTS

GENERAL REQUIREMENTS:
THE ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL ALL LABOR & MATERIALS REQUIRED FOR THE COMPLETE ELECTRICAL INSTALLATION OF THE ELEVATOR(S) ELECTRICAL EQUIPMENT PER NEC ARTICLE 620, ASME A17.1 ELEVATOR CODE, NFPA 72, & ALL APPLICABLE FEDERAL, STATE, & LOCAL CODES. ELECTRICAL DEVICE & EQUIPMENT LOCATIONS & REQUIREMENTS SHALL BE VERIFIED WITH THE ELEVATOR EQUIPMENT MANUFACTURER'S SHOP DRAWINGS PRIOR TO ROUGHING IN OR PLACING FINAL PURCHASE ORDERS FOR ANY ELECTRICAL DEVICES, EQUIPMENT, ETC.

1. PROVIDE A SEPARATE BRANCH CIRCUIT FOR CAR LIGHTS, RECEPTACLE(S), AUXILIARY LIGHTING POWER SOURCE, & VENTILATION FOR EACH ELEVATOR CAR, VIA A 30A-2P LOCKABLE DISCONNECT SWITCH WITH (1) 20A FUSE. MOUNT THE DISCONNECT SWITCH(ES) IN THE ELEVATOR MACHINE ROOM/MACHINERY SPACE PER NEC & MANUFACTURER'S REQUIREMENTS, & SHALL BE LOCATED WHERE IT IS READILY ACCESSIBLE TO QUALIFIED PERSONS, NEAR THE JAMB SIDE OF THE MACHINE ROOM/MACHINERY SPACE DOOR. PROVIDE A MINIMUM OF ONE (1) 120VAC, 20A, 1Ø GFI TYPE DUPLEX RECEPTACLE FOR THE TOP OF EACH ELEVATOR CAR, UNLESS PROVIDED WITH THE ELEVATOR.
2. PROVIDE A SEPARATE BRANCH CIRCUIT FOR THE AIR CONDITIONING & HEAT UNITS ON EACH ELEVATOR CAR AS APPLICABLE. VERIFY THE DISCONNECT & FUSE SIZES PER THE ELEVATOR SHOP DRAWINGS & MOUNT THE DISCONNECT SWITCH(ES) IN THE ELEVATOR MACHINE ROOM/MACHINERY SPACE PER NEC & MANUFACTURER'S REQUIREMENTS.
3. PROVIDE A SEPARATE BRANCH CIRCUIT FOR THE MACHINE ROOM/MACHINERY SPACE LIGHTING. PROVIDE A WALL MOUNTED TOGGLE STYLE 120VAC, 20A WALL SWITCH TO CONTROL THE LIGHTING AT THE POINT OF ENTRY TO THE MACHINE ROOM/MACHINERY SPACE.
4. PROVIDE A SEPARATE BRANCH CIRCUIT FOR THE MACHINE ROOM/MACHINERY SPACE RECEPTACLES. PROVIDE A MINIMUM OF ONE (1) 120VAC, 20A, 1Ø GFI TYPE DUPLEX RECEPTACLE IN EACH MACHINE ROOM/MACHINERY SPACE.
5. PROVIDE A SEPARATE BRANCH CIRCUIT TO SUPPLY THE HOISTWAY PIT LIGHTING. PROVIDE A WALL MOUNTED 120VAC, 20A WALL SWITCH LOCATED SO AS TO BE READILY ACCESSIBLE FROM THE PIT ACCESS DOOR ADJACENT TO THE PIT LADDER FOR HOISTWAY PIT LIGHTING. PROVIDE (2) LED WALL MOUNTED VAPORTITE FIXTURE WITH 6000 LUMENS, 3500K, MEDIUM DISTRIBUTION, 15% DR INTERNAL PRISMATIC LENS, ENCLOSED AND GASKETED HOUSING, WET LOCATION LISTED AND 0-10V DIMMING DRIVER, METALUX #4VT2-LD4-6-DR-UNV-L835-CD1-WL OR EQUAL. REQUIRED LIGHTING SHALL NOT BE CONNECTED TO THE LOAD SIDE OF THE GROUND FAULT INTERRUPTER. EXACT LOCATIONS OF LIGHT FIXTURES SHALL BE COORDINATED WITH THE ELEVATOR MANUFACTURER AS TO NOT INTERFERE WITH EQUIPMENT, ETC., CLEARANCES.
6. PROVIDE A SEPARATE BRANCH CIRCUIT TO SUPPLY THE HOISTWAY PIT RECEPTACLE. PROVIDE A MINIMUM OF ONE (1) 120VAC, 20A, 1Ø GFI TYPE DUPLEX RECEPTACLE IN THE HOISTWAY PIT.
7. PROVIDE A SEPARATE BRANCH CIRCUIT TO SUPPLY THE TOP HOISTWAY LIGHTING. PROVIDE A WALL MOUNTED 120VAC, 20A WALL SWITCH LOCATED SO AS TO BE READILY ACCESSIBLE FROM THE ACCESS DOOR ADJACENT TO THE LADDER FOR HOISTWAY LIGHTING. PROVIDE LED WALL MOUNTED VAPORTITE FIXTURE WITH 6000 LUMENS, 3500K, MEDIUM DISTRIBUTION, 15% DR INTERNAL PRISMATIC LENS, ENCLOSED AND GASKETED HOUSING, WET LOCATION LISTED AND 0-10V DIMMING DRIVER, METALUX #4VT2-LD4-6-DR-UNV-L835-CD1-WL OR EQUAL. REQUIRED LIGHTING SHALL NOT BE CONNECTED TO THE LOAD SIDE OF THE GROUND FAULT INTERRUPTER. EXACT LOCATIONS OF LIGHT FIXTURES SHALL BE COORDINATED WITH THE ELEVATOR MANUFACTURER AS TO NOT INTERFERE WITH EQUIPMENT, ETC., CLEARANCES.
8. HOISTWAY LIGHTING: WHEN FIREFIGHTERS' EMERGENCY OPERATION IS ACTIVE, THE ENTIRE HEIGHT OF THE HOISTWAY SHALL BE ILLUMINATED AT NOT LESS THAN 1 FOOT-CANDLE (11 LUX) AS MEASURED FROM THE TOP OF THE CAR OF EACH FIRE SERVICE ACCESS ELEVATOR. FOR ELEVATORS SERVING THREE STORIES OR MORE, PROVIDE INTERMEDIATE HOISTWAY LIGHTING AT EVERY OTHER FLOOR.
9. PROVIDE A SEPARATE BRANCH CIRCUIT FOR A HYDRAULIC FLUID TANK STRIP HEATER AND/OR OIL COOLER. VERIFY THE DISCONNECT & FUSE SIZES PER THE ELEVATOR SHOP DRAWINGS & MOUNT THE DISCONNECT SWITCH(ES) IN THE ELEVATOR MACHINE ROOM/MACHINERY SPACE PER NEC & MANUFACTURER'S REQUIREMENTS.
10. PROVIDE A LOCKABLE MEANS OF DISCONNECT IN THE MACHINE ROOM/ MACHINERY SPACE FOR THE MAIN POWER SUPPLY TO THE ELEVATOR CONTROLLER. THE MEANS OF DISCONNECT SHALL BE SIZED PER THE ELEVATOR MANUFACTURER'S REQUIREMENTS, & SHALL BE LOCATED WHERE IT IS READILY ACCESSIBLE TO QUALIFIED PERSONS, NEAR THE JAMB SIDE OF THE MACHINE ROOM/MACHINERY SPACE DOOR.
11. PROVIDE A DOUBLE-GANG DEEP JUNCTION BOX WITH SINGLE GANG PLASTER RING MOUNTED AT 48" AFF WITH A 3/4"C. CONDUIT WITH PULLWIRE STUBBED INTO THE NEAREST ACCESSIBLE CEILING SPACE FOR A TELEPHONE CONNECTION BY OTHERS. FIELD LOCATE THE EXACT ROUGH-IN LOCATION WITHIN THE MACHINE ROOM/MACHINERY SPACE & COORDINATE WITH OTHER EQUIPMENT LOCATIONS.
12. PROVIDE FIRE ALARM SYSTEM SMOKE DETECTORS DEDICATED FOR ELEVATOR RECALL PER NFPA 72 PART 3-8.14, PROPERLY LOCATED IN THE FOLLOWING AREAS:
    A. ELEVATOR LOBBY (EACH FLOOR)
    B. ELEVATOR MACHINE ROOM/MACHINERY SPACE
    C. EACH SMOKE DETECTOR DEDICATED FOR ELEVATOR RECALL SHALL BE CONNECTED TO THE BUILDING FIRE ALARM SYSTEM OR DEDICATED SUPERVISORY ALARM SYSTEM CONTROL PANEL. SMOKE DETECTORS SHALL NOT BE INSTALLED WITHIN 3' OF HVAC SUPPLY OR RETURN DIFFUSERS.
13. PROVIDE FIRE ADDRESSABLE RELAYS AT THE ELEVATOR CONTROLLER FOR EACH ELEVATOR.
14. PROVIDE ONE ADDRESSABLE RELAY NEAR THE TOP OF THE ELEVATOR SHAFT TO CONTROL MOTORIZED DAMPER.

CITY OF CLEVELAND FIRE DEPARTMENT ELEVATOR REQUIREMENTS (AMENDMENTS):

1. SPRINKLERS SHALL NOT BE INSTALLED IN THE ELEVATOR SHAFTS.
2. THE ELEVATOR BELTS SHALL ALL BE NFPA FIRE RATED. THE ELEVATOR INSPECTOR WILL NOT BE LOOKING FOR THE SHAFT TO BE SPRINKLED.
3. SMOKE DETECTORS ONLY SHOULD BE INSTALLED IN THE ELEVATOR SHAFT. NO SHUNT TRIP BREAKERS/SWITCHES OR HEAT DETECTORS CAN BE USED.

GENERAL NOTES:

1. MOUNTING HEIGHT SHOWN ON THIS DETAIL ARE TYPICAL UNLESS OTHERWISE NOTED ON THE PLANS.
2. SEE ARCHITECTURAL ELEVATIONS FOR SPECIAL CONDITIONS. NOTIFY ARCHITECT/ENGINEER IMMEDIATELY OF ANY CONFLICTS.
3. ALL INSTALLATIONS SHALL COMPLY WITH ADA GUIDELINES.
4. IF POSSIBLE; WHEN DEVICES ARE STACKED, ALIGN DEVICES VERTICALLY ON WALL FOR THE AESTHETICS OF FINISHING. IF CMU OR TILE WALL, ALIGN DEVICES WITH GROUT LINES.
5. SEE ELECTRICAL SYMBOL LEGEND FOR ADDITIONAL INFORMATION.
6. ALL DEVICES MAY NOT APPLY TO THIS PROJECT.

CODED NOTES: (x)

1. VISUAL FIRE ALARM NOTIFICATION DEVICES - LOCATE DEVICE SO THE BOTTOM OF DEVICE IS BETWEEN 80" AFF AND 96" AFF (NFPA) OR 6" BELOW FINISHED CEILING, WHICHEVER IS LOWER. (ADA)
2. AUDIBLE FIRE ALARM NOTIFICATION DEVICES - LOCATE DEVICE SO THE BOTTOM OF DEVICE IS AT 80" AFF OR NOT LESS THAN 6" BELOW FINISHED CEILING. (NFPA)
3. MANUAL ACTIVATION DEVICE (PULL STATION) - LOCATE SO THE TOP OF DEVICE IS NOT MORE THAN 48" AFF (ADA) AND NOT LESS THAN 42" AFF (NFPA)
4. POWER, DATA, TELEPHONE, COMMUNICATION DEVICES - OUTLETS SHALL BE 18" AFF TO TOP OF BOX. ABOVE COUNTER DEVICES TO BE MOUNTED 6" ABOVE TOP OF COUNTER/BACKSPLASH TO THE TOP OF BOX. VERIFY WITH ARCHITECTURAL DETAILS AND ELEVATIONS.
5. WALL MOUNTED OPERABLE DEVICES - OPERABLE DEVICES SHALL BE LOCATED NOT GREATER THAN 48" AFF TO TOP OF BOX. WALL MOUNTED OPERABLE DEVICES INCLUDE, BUT ARE NOT LIMITED TO THE FOLLOWING:
   - LIGHT SWITCH, DIMMERS, CONTROLS, ETC.
   - PUSH BUTTONS
   - OTHER CONTROL OR "CALL" DEVICES
   - CARD READER
   - ADA PUSH BUTTONS
6. FURNITURE SYSTEM DEVICE - MOUNT DEVICE 12" AFF TO TOP OF BOX. VERIFY WITH MANUFACTURER.
7. CEILING MOUNTED DEVICE - DO NOT INSTALL SENSORS WITHIN 36" OF ANY SUPPLY OR RETURN GRILLE.
8. DISCONNECTS/BREAKERS - DISCONNECTS AND CIRCUIT BREAKERS SHALL NOT BE HIGHER THAN 6' 7" AFF TO CENTER OF HANDLE/BREAKER IN THE TOP MOST POSITION. THE SAME APPLIES TO COMMERCIAL PANELBOARDS/DISTRIBUTION CENTERS. FOR DWELLING OCCUPANCIES, ADA REQUIRES 48" AFF MAX.

TYPICAL DEVICE MOUNTING & PLACEMENT DETAIL

N.T.S.

WIRE SIZE GUIDELINES FOR 20A/1Ø CIRCUITS

THE FOLLOWING ARE WIRE SIZE GUIDELINES FOR 20A/1Ø, 120V CIRCUITS. THE FOLLOWING SCHEDULE ASSUMES COPPER CONDUCTORS WITH 75° RATING USED AND 20A BRANCH CIRCUITS ARE LOADED TO 80% OF THE OVER-CURRENT PROTECTIVE DEVICE RATING. THE ELECTRICAL CONTRACTOR MAY, AT HIS OPTION, CALCULATE THE WIRE SIZE REQUIRED TO MAINTAIN VOLTAGE DROP TO 3% OR LESS FOR EACH 20A/1P BRANCH CIRCUIT BASED ON THE ACTUAL/NEC LOAD CONNECTED PLUS 25% SPARE CAPACITY ON A SPECIFIC CIRCUIT OR 10 AMPS MINIMUM, WHICHEVER LOADING IS MORE STRINGENT.

120 VOLT:

A. #12 AWG FOR BRANCH CIRCUITS UP TO 55 FEET.
B. #10 AWG FOR BRANCH CIRCUITS OVER 55 FEET AND UP TO 90 FEET.
C. #8 AWG FOR BRANCH CIRCUITS OVER 90 FEET AND UP TO 145 FEET.
D. #6 AWG FOR BRANCH CIRCUITS OVER 145 FEET AND UP TO 230 FEET.
E. #4 AWG FOR BRANCH CIRCUITS OVER 230 FEET AND UP TO 375 FEET.
F. #3 AWG FOR BRANCH CIRCUITS OVER 375 FEET AND UP TO 460 FEET.
G. #2 AWG FOR BRANCH CIRCUITS OVER 460 FEET AND UP TO 580 FEET.

SHOULD A BRANCH CIRCUIT LENGTH EXCEED 500 FEET, THE BRANCH CIRCUIT WIRING SHALL BE SIZED TO LIMIT THE VOLTAGE DROP TO 3%.

ELECTRICAL SYMBOL LEGEND

SYMBOL	DESCRIPTION
^{M}	MANUAL MOTOR STARTER TOGGLE SWITCH WITH THERMAL OVERLOAD PROTECTION - TYPE AND RATING PER EQUIPMENT BEING SERVED. PROVIDE ENCLOSURE WITH LOCK-OUT ACCESSORY. THERMAL OVERLOADS SIZED PER EQUIPMENT NAMEPLATE RATING.
^{D}	DISCONNECT SWITCH - TYPE AND RATING AS INDICATED ON PLANS
^{M}	COMBINATION MAGNETIC STARTER/FUSED DISCONNECT SWITCH WITH HAND-OFF-AUTO SWITCH, (2) NO & (2) NC CONTACTS - TYPE AND RATING AS REQUIRED FOR EQUIPMENT BEING SERVED.
C	CONTACTOR - TYPE AND RATING AS INDICATED ON PLANS. REFER TO CONTACTOR SCHEDULE.
	MOTOR - TYPE AND RATING AS INDICATED ON PLANS
MOD	MOTOR OPERATED DAMPER - FURNISHED AND INSTALLED BY MECHANICAL CONTRACTOR AND WIRED BY ELECTRICAL CONTRACTOR. TYPE AND RATING AS INDICATED ON PLANS. SEE MECHANICAL PLANS FOR CONTROL REQUIREMENTS. E.C. SHALL PROVIDE 120V/1P CIRCUIT.
T	THERMOSTAT - COORDINATE INSTALLATION REQUIREMENTS WITH MECHANICAL CONTRACTOR AT THE START OF PROJECT. PROVIDE ROUGH-IN OF J-BOX WITH CONDUIT STUBBED UP TO ABOVE ACCESSIBLE CEILING. LOW VOLTAGE CABLING BY MECHANICAL CONTRACTOR. IF THERMOSTAT IS LINE VOLTAGE CONTROLLED, FURNISH AND INSTALL WIRING FROM THERMOSTAT TO EQUIPMENT BEING SERVED. REFERENCE MECHANICAL PLANS, SCHEDULES AND NOTES.
FACP	FIRE ALARM CONTROL PANEL - RECESSED MOUNTED IN WALL
FAAP	FIRE ALARM ANNUNCIATOR PANEL - RECESSED MOUNTED IN WALL
NAC	FIRE ALARM NOTIFICATION APPLIANCE CIRCUIT (NAC) EXTENDER PANEL - SURFACE MOUNTED ON WALL
F	FIRE ALARM MANUAL PULL STATION MOUNTED 48" AFF TO TOP.
V	FIRE ALARM VISUAL (STROBE) NOTIFICATION APPLIANCE MOUNTED FLUSH IN FINISHED WALL AT THE LESSOR OF 80" AFF TO BOTTOM OR 6" BELOW FINISHED CEILING.
S	FIRE ALARM AUDIO (HORN) NOTIFICATION APPLIANCE MOUNTED FLUSH IN FINISHED WALL AT THE LESSOR OF 80" AFF TO BOTTOM OR 6" BELOW FINISHED CEILING.
F	FIRE ALARM AUDIO/VISUAL (HORN/STROBE) NOTIFICATION APPLIANCE MOUNTED FLUSH IN FINISHED WALL AT THE LESSOR OF 80" AFF TO BOTTOM OR 6" BELOW FINISHED CEILING.
SD	SMOKE DETECTOR - SURFACE MOUNTED ON CEILING.
SD E	SMOKE DETECTOR - SURFACE MOUNTED ON CEILING. PROGRAM FIRE ALARM SYSTEM, AS REQUIRED, TO ACTUATE FIRE ALARM RELAY MODULE LOCATED AT ELEVATOR CONTROL PANEL FOR ELEVATOR RECALL.
SD S	SINGLE STATION COMBINATION SMOKE AND CO DETECTOR WITH SOUNDER BASE. WIRE DEVICES WITHIN EACH DWELLING UNIT SUCH THAT ACTIVATION OF ONE DEVICE WILL ACTUATE ALL DEVICES WITHIN DWELLING UNIT. SMOKE DETECTOR SHALL BE WIRED FOR 120V OPERATION AND BE BATTERY BACKED-UP. WHERE LOCATED WITHIN A HANDICAP ACCESSIBLE DWELLING UNIT, DETECTOR SHALL BE FURNISHED WITH VISUAL ALARM NOTIFICATION IN ADDITION TO SPECIFIED FEATURES. DEVICE SHALL BE UL 217 LISTED AND MARKED FOR LOW FREQUENCY NOTIFICATION.
SD D	DUCT-TYPE SMOKE DETECTOR WITH REMOTE TEST STATION AND AUXILIARY RELAY FURNISHED AND WIRED BY ELECTRICAL CONTRACTOR; INSTALLED IN DUCTWORK BY MECHANICAL CONTRACTOR PER CODE. COORDINATE EXACT LOCATION WITH MECHANICAL CONTRACTOR AND MANUFACTURER. PROVIDE CONDUIT AND WIRING NECESSARY TO SHUT DOWN HVAC UNIT UPON ACTIVATION OF SMOKE DETECTOR.
MD	MULTI-CRITERIA DETECTOR (SMOKE, HEAT, CARBON MONOXIDE) WITH AUXILIARY RELAY AND WHERE REQUIRED, SOUNDER BASE. DETECTOR CEILING MOUNTED AND UL 268 AND UL 2075 LISTED. FURNISHED AND INSTALLED PER CODE. COORDINATE LOCATION WITH MECHANICAL CONTRACTOR AND FIRE ALARM VENDOR. IN GENERAL, LOCATE IN ROOMS OR AREAS CONTAINING EQUIPMENT OR APPLIANCES SUPPLIED BY GASEOUS FUELS. LOCATE ADJACENT TO FIRST SUPPLY DIFFUSER OFF OF EQUIPMENTS' MAIN DUCT RUN. PROVIDE CONDUIT,WIRING, FIRE ALARM MODULES, AND SYSTEM PROGRAMMING NECESSARY TO SHUT DOWN HVAC UNITS UPON ALARM SIGNAL FROM DETECTOR.
MSTAT	TWO-WAY COMMUNICATION / AREA OF RESCUE ASSISTANCE MASTER STATION. MOUNT ADJACENT TO MAIN ENTRY OR AS REQUIRED BY LOCAL AUTHORITY HAVING JURISDICTION.
CSTAT	TWO-WAY COMMUNICATION / AREA OF RESCUE ASSISTANCE CALL STATION. MOUNT AT EACH LOBBY AND/OR AREA OF RESCUE ASSISTANCE ABOVE OR BELOW GRADE OF ADA EGRESS, OR AS REQUIRED BY LOCAL AUTHORITY HAVING JURISDICTION.
^{EF}	20A - 120V/277V SINGLE POLE "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE, FOR CONTROL OF ASSOCIATED EXHAUST FAN ONLY.
^{x}	20A - 120V/277V SINGLE POLE "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. IF APPLICABLE, LOWER CASE SUBSCRIPT "x" - KEYS SWITCH TO FIXTURES BEING CONTROLLED (TYPICAL OF ALL SWITCH SYMBOLS)
^{3}	20A - 120V/277V THREE WAY "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE.
^{4}	20A - 120V/277V FOUR WAY "DECORA-STYLE" ROCKER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE.
^{D}	DESIGNER GRADE PRESET DIMMER SWITCH MOUNTED 48" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. SWITCH SHALL BE RATED PER LOAD BEING SERVED. INSTALL PER MANUFACTURER'S INSTRUCTIONS. ADJUST SETTINGS AND COMMISSION PER OWNER REQUIREMENTS. BASIS OF DESIGN IS LUTRON "DIVA" OR "MAESTRO" SERIES. DE-RATING SHALL BE PER MANUFACTURER'S REQUIREMENTS.
^{OC}	LINE VOLTAGE PASSIVE INFRARED WALL SWITCH OCCUPANCY SENSOR MOUNTED 48"AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE (OC2 = DUAL RELAY). MANUFACTURER SHALL BE WATTSTOPPER, HUBBELL, SENSOR SWITCH, COOPER CONTROLS, OR LUTRON.
OC x	LOW VOLTAGE CEILING MOUNTED OCCUPANCY SENSOR. LOCATE AS DIRECTED PER MANUFACTURER AND PROVIDE STANDARD VS. EXTENDED COVERAGE RANGE AS DIRECTED BY MANUFACTURER. REFER TO TYPICAL LOW VOLTAGE LIGHTING CONTROL DETAILS ON SHEETS E-502 & E-503 FOR MORE INFORMATION.
$_{x}$ $_{Kx}$	LOW VOLTAGE SWITCH FOR LIGHTING CONTROL SYSTEM MOUNTED 48" AFF TO TOP OF BOX, NUMBER OF BUTTONS PER GANG AND NUMBER OF GANGS AS REQUIRED FOR SWITCHES (X) INDICATED. REFER TO TYPICAL LOW VOLTAGE LIGHTING CONTROL DETAILS ON SHEETS E-502 & E-503 FOR MORE INFORMATION. (x = AREA CONTROLLED, Kx = KEYSWITCH STYLE)
B	BELL ASSEMBLY. MOUNTING, TYPE, RATINGS AS INDICATED ON PLANS. MAKE CONNECTIONS PER MANUFACTURER'S INSTRUCTIONS.
	OPEN/CLOSE/STOP SWITCH ASSEMBLY MOUNTED AT 48" AFF TO TOP OF BOX. TYPE AND RATINGS PER LOAD BEING SERVED. MAKE CONNECTIONS TO EQUIPMENT PER MANUFACTURER'S INSTRUCTIONS.
	EPO (EMERGENCY POWER OFF) BUTTON MOUNTED AT 48" AFF TO TOP OF BOX. TYPE AND RATINGS PER LOAD BEING SERVED. INTERCONNECT DEVICE WIRING TO DEACTIVATE POWER TO EQUIPMENT BEING SERVED. MAKE CONNECTIONS TO EQUIPMENT PER MANUFACTURER'S INSTRUCTIONS. PROVIDE WITH HAND GUARD OR COVER.
T	LOW VOLTAGE TRANSFORMER MOUNTED IN J-BOX SIZED PER NEC. TYPE AND RATINGS PER LOAD BEING SERVED.
TC	TIME CLOCK WITH ENCLOSURE RATED FOR APPLICATION. PROVIDE 120V CIRCUIT TO POWER EQUIPMENT. INSTALL AND WIRE PER MANUFACTURER'S INSTRUCTIONS. TYPE AND RATINGS AS INDICATED ON PLANS. ADJUST SETTINGS PER OWNER'S REQUIREMENTS.
PC	PHOTOCELL MOUNTED ON ROOF OF BUILDING AND RATED FOR APPLICATION. INSTALL AND WIRE PER MANUFACTURER'S INSTRUCTIONS. TYPE AND RATINGS AS INDICATED ON PLANS. ADJUST SETTINGS PER OWNER'S REQUIREMENTS.

ELECTRICAL SYMBOL LEGEND

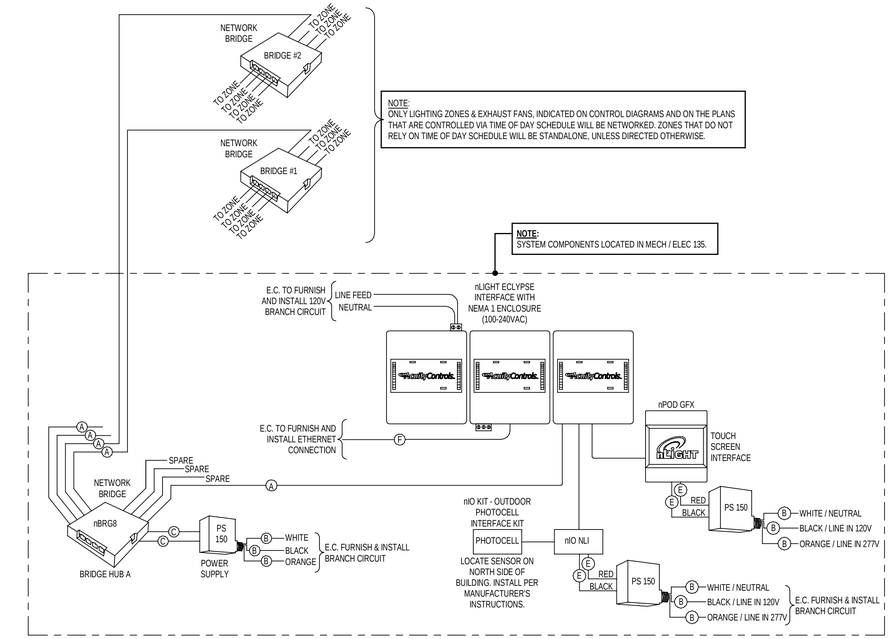
SYMBOL	DESCRIPTION
	SWITCHBOARD FLOOR MOUNTED ON 4" HIGH CONCRETE HOUSING KEEPING PAD. SEE SPECIFICATIONS, PANEL SCHEDULES AND ONE-LINE DIAGRAM FOR ADDITIONAL INFORMATION.
	PANELBOARD RECESSED MOUNTED 6'-6" TO TOP. SEE PANEL SPECIFICATIONS, PANEL SCHEDULES AND ONE-LINE DIAGRAM FOR ADDITIONAL INFORMATION.
	PANELBOARD SURFACE MOUNTED 6'-6" TO TOP. SEE SPECIFICATIONS, PANEL SCHEDULES AND ONE-LINE DIAGRAM FOR ADDITIONAL INFORMATION.
	CONDUIT WITH WIRING RUN CONCEALED IN OR ABOVE CEILING OR WALL, OR RUN EXPOSED IN UNFINISHED AREAS. CROSS HATCHING INDICATES NUMBER OF CONDUCTORS (#12 AWG - MINIMUM). PROVIDE A CODE-SIZED GROUND WIRE IN ALL CONDUITS IN ADDITION TO THE CONDUCTORS SHOWN.
	CONDUIT WITH WIRING RUN CONCEALED BELOW FLOOR. CROSS HATCHING INDICATES NUMBER OF CONDUCTORS (#12 AWG - MINUMUM). PROVIDE A CODE-SIZED GROUND WIRE IN ALL CONDUITS IN ADDITION TO THE CONDUCTORS SHOWN.
	20A - 125V GROUNDING TYPE SIMPLEX RECEPTACLE MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
	20A - 125V GROUNDING TYPE DUPLEX RECEPTACLE MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
	20A - 125V GROUNDING TYPE QUADRAPLEX RECEPTACLE MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
GFI/WP	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE, WEATHER RESISTANT LISTED WITH DIE-CAST ALUMINUM "WHILE IN-USE COVER" AND MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE
GFI	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE MOUNTED 6" ABOVE TOP OF COUNTER/BACKSPLASH TO TOP OF BOX, UNLESS NOTED OTHERWISE. COORDINATE LOCATION WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
	20A - 125V GROUNDING TYPE DUPLEX RECEPTACLE MOUNTED 6" ABOVE TOP OF COUNTER/BACKSPLASH TO TOP OF BOX, UNLESS NOTED OTHERWISE. COORDINATE LOCATION WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
USB	20A - 125V GROUNDING TYPE DUPLEX RECEPTACLE WITH (2) USB PORTS MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. VERIFY TYPE & QUANTITY OF USB PORTS WITH OWNER PRIOR TO ORDERING.
	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE FOR MICROWAVE. MOUNT RECEPTACLE RECESSED IN REAR WALL OF ABOVE CABINET AND PROVIDE EXTENSION RING AS REQUIRED. COORDINATE LOCATION WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
	30A - 250V GROUNDING TYPE SIMPLEX RECEPTACLE FOR DRYER MOUNTED 36" AFF TO TOP OF BOX, UNLESS OTHERWISE NOTED. VERIFY EXACT MOUNTING HEIGHT AND LOCATION OF DEVICE WITH DRYER MANUFACTURER'S INSTALLATION INSTRUCTIONS PRIOR TO ROUGH-IN. FURNISH AND INSTALL MATCHING CORD AND PLUG.
	50A - 250V GROUNDING TYPE SIMPLEX RECEPTACLE FOR RANGE MOUNTED 30" AFF TO TOP OF BOX, UNLESS OTHERWISE NOTED. VERIFY EXACT MOUNTING HEIGHT AND LOCATION OF DEVICE WITH RANGE MANUFACTURER'S INSTALLATION INSTRUCTIONS PRIOR TO ROUGH-IN. FURNISH AND INSTALL MATCHING CORD AND PLUG.
	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE FOR DISHWASHER MOUNTED 18" AFF TO TOP OF BOX, UNLESS OTHERWISE NOTED. VERIFY EXACT MOUNTING HEIGHT AND LOCATION OF DEVICE WITH DISHWASHER MANUFACTURER'S INSTALLATION INSTRUCTIONS PRIOR TO ROUGH-IN. FURNISH AND INSTALL MATCHING CORD AND PLUG.
$	20A - 125V GROUND FAULT INTERRUPTING TYPE DUPLEX RECEPTACLE FOR DISPOSAL WITH CONTROL SWITCH LOCATED IN ABOVE THE TOP OF THE COUNTERBACKSPLASH TO TOP OF DEVICE. FURNISH AND INSTALL MATCHING CORD AND PLUG. COORDINATE LOCATIONS OF DEVICES WITH INTERIOR ELEVATIONS INDICATED ON ARCHITECTURAL PLANS.
	SPECIAL PURPOSE RECEPTACLE - RATING AND NEMA CONFIGURATION AS REQUIRED FOR EQUIPMENT BEING PROVIDED. MOUNT 18" AFF, UNLESS OTHERWISE NOTED.
	BACKBOX FOR TELEPHONE AND DATA DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
W	BACKBOX FOR TELEPHONE DEVICE MOUNTED 54" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
	BACKBOX FOR DATA DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
HTV	BACKBOX FOR TV DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. REFERENCE AUDIO/VISUAL VENDOR DRAWINGS FOR EXACT ROUGH-IN REQUIREMENTS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
HAV	BACKBOX FOR AV DEVICE(S) MOUNTED 18" AFF TO TOP OF BOX, UNLESS NOTED OTHERWISE. PROVIDE 1"C WITH PULLWIRE FROM J-BOX WITH SINGLE GANG PLASTER RING TO ACCESSIBLE CEILING SPACE. FURNISH AND INSTALL CONDUIT BUSHINGS. REFERENCE AUDIO/VISUAL VENDOR DRAWINGS FOR EXACT ROUGH-IN REQUIREMENTS. IF MOUNTED NEXT TO A RECEPTACLE, SWITCH, ETC MOUNT BOTH DEVICES AT THE SAME HEIGHT.
J	J-BOX - TYPE AND SIZE AS REQUIRED BY NEC
	FURNISH AND INSTALL A COMPLETE FLOOR BOX SYSTEM WHICH INCLUDES, BUT IS NOT LIMITED TO THE FOLLOWING: 2-GANG, CAST IRON, FULLY ADJUSTABLE FLOOR BOX RECESSED IN CONCRETE FLOOR SLAB WITH (2) 20A DUPLEX RECEPTACLES AND FLUSH ALUMINUM FINISHED CARPET FLANGE AND COVERS. FOR TILE FLOOR INSTALLATION, PROVIDE APPROPRIATE FLANGE SO THAT TOP COVER OF FLOOR BOX IS FLUSH WITH TILE. COORDINATE EXACT LOCATION WITH ARCHITECT PRIOR TO INSTALLATION. FLOOR BOX IS CAPABLE OF ACCEPTING MULTIPLE 1"CONDUITS. FURNISH AND INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS. WIREMOLD #880CS2-1, #828TCAL, #828R-TCAL.
	FURNISH AND INSTALL A COMPLETE FLOOR BOX SYSTEM WHICH INCLUDES, BUT IS NOT LIMITED TO THE FOLLOWING: 3-GANG, CAST IRON, FULLY ADJUSTABLE MULTI-SERVICE FLOOR BOX RECESSED IN CONCRETE FLOOR SLAB WITH (2) 20A DUPLEX RECEPTACLE, (1) 6-PORT TELE/DATA MOUNTING BEZEL, FLUSH ALUMINUM FINISHED CARPET FLANGE AND COVERS, AND VOLTAGE DIVIDER. THE FURNISHED FLOOR BOX SHALL BE SIZED TO ACCEPT THE QUANTITY AND SIZE OF CONDUITS REQUIRED FOR THE TELE/DATA CABLING. FOR TILE FLOOR INSTALLATION, PROVIDE APPROPRIATE FLANGE SO THAT TOP COVER OF FLOOR BOX IS FLUSH WITH TILE. COORDINATE EXACT LOCATION WITH ARCHITECT PRIOR TO INSTALLATION. COORDINATE BRACKET AND TELE/DATA DEVICE REQUIREMENTS WITH TECHNOLOGY INSTALLER PRIOR TO ORDERING MATERIALS. FLOOR BOX IS CAPABLE OF ACCEPTING (6) 1"CONDUITS. FURNISH AND INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS. WIREMOLD #880CS3-1, #828TCAL, #828R-TCAL, #828COMTCAL
P	DEEP J-BOX WITH SINGLE GANG PLASTER RING AND BLANK COVER PLATE WITH KNOCK-OUT, RECESSED IN WALL TO SUPPLY POWER TO FURNITURE SYSTEM. MOUNT J-BOX 12" AFF. PROVIDE CONNECTIONS TO FURNITURE SYSTEM. COORDINATE LOCATION OF J-BOX WITH FURNITURE SYSTEM INSTALLER PRIOR TO ROUGH-IN. SEE FURNITURE SYSTEM CONNECTION DETAILS AND NOTES ON SHEET E-505.
T	DEEP J-BOX WITH SINGLE GANG PLASTER RING AND BLANK COVER PLATE WITH KNOCK-OUT, RECESSED IN WALL TO SUPPLY TELE/DATA CABLING TO FURNITURE SYSTEM. MOUNT J-BOX 12" AFF. PROVIDE FLEXIBLE CONDUIT FROM J-BOX TO FURNITURE SYSTEM. PROVIDE (2) 1"C WITH PULL WIRE FROM J-BOX TO ABOVE ACCESSIBLE CEILING. FURNISH AND INSTALL CONDUIT BUSHINGS. COORDINATE LOCATION OF J-BOX WITH FURNITURE SYSTEM INSTALLER PRIOR TO ROUGH-IN. SEE FURNITURE SYSTEM CONNECTION DETAILS AND NOTES ON SHEET E-505.

GENERAL NOTES

1. FINAL CONNECTIONS TO LIGHT FIXTURES SHALL BE MADE WITH GREENFIELD FLEXIBLE CONDUIT. MAXIMUM LENGTH OF FLEXIBLE CONDUIT SHALL BE 6'-0".
2. REFER TO ARCHITECTURAL REFLECTED CEILING PLANS FOR EXACT LOCATION OF LIGHT FIXTURES. CONTRACTORS TO COORDINATE LOCATIONS OF LIGHTING, SPEAKERS, AIR DIFFUSERS, GRILLES, SPRINKLER HEADS, ETC., WITH REFLECTED CEILING LAY-OUTS AS REQUIRED & DIRECTED BY THE ARCHITECT.
3. ALL DEVICES, EQUIPMENT, FIXTURES, ETC., MUST BE GROUNDED BY USE OF A PROPERLY SIZED GROUNDING CONDUCTOR. MECHANICAL/ELECTRICAL BONDS OF THE METALLIC RACEWAY SYSTEM SHALL ALSO BE MAINTAINED.
4. REFER TO MECHANICAL, PLUMBING, AND FIRE PROTECTION PLANS FOR EXACT LOCATION OF MECHANICAL AND PLUMBING EQUIPMENT. COORDINATE LOCATION OF DISCONNECT SWITCH ASSOCIATED WITH EACH PIECE OF EQUIPMENT WITH RESPECTIVE CONTRACTOR AND INSTALL IN ACCORDANCE WITH THE NEC.
5. REFER TO DIVISION 21, 22 & 23 SPECIFICATIONS, HVAC, PLUMBING & FIRE PROTECTION PLANS FOR ADDITIONAL ELECTRICAL WORK REQUIREMENTS & COORDINATION.
6. ALL RECEPTACLES SHOWN BACK-TO-BACK IN WALLS SHALL BE SEPARATED HORIZONTALLY BY 8" MINIMUM.
7. WHERE OPEN WIRING METHODS FOR LOW VOLTAGE SYSTEMS ARE PERMITTED BY THE CONTRACT DOCUMENTS, OWNER AND LOCAL AUTHORITY, THE CABLE/CONDUCTOR INSULATION SHALL BE RATED PER NEC FOR ENVIRONMENT (I.E. PLENUM RATED, ETC.) BEING INSTALLED.
8. BRANCH CIRCUIT CONDUCTOR SIZES (& CONDUITS) SHALL BE INCREASED FROM THOSE INDICATED ON THE PLANS TO PREVENT EXCESSIVE VOLTAGE DROP. BRANCH CIRCUITS SHALL BE INSTALLED WITH WIRES OF SUFFICIENT SIZE SO THAT VOLTAGE DROP BETWEEN THE PANEL & THE LOADS DO NOT EXCEED A LIMIT OF 3%.
9. REGARDLESS OF THE TEMPERATURE RATING OF THE CONDUCTOR INSULATION, ALL CONDUCTOR AMPACITY RATINGS FOR THIS PROJECT SHALL BE DETERMINED FROM THE 75°C CONDUCTOR TEMPERATURE RATINGS INDICATED IN THE NEC TABLES. WHERE EQUIPMENT OR DEVICES ARE PROVIDED WITH TERMINALS/LUGS RATED FOR 60°C, THE AMPACITY RATING OF THE 75°C CONDUCTOR SHALL BE LIMITED TO ITS ASSOCIATED 60°C RATING AS INDICATED IN THE NEC TABLES. THE ELECTRICAL CONTRACTOR SHALL BE RESPONSIBLE TO INCREASE THE CONDUCTORS AND CONDUIT SIZE AS REQUIRED.
10. ALL 120V BRANCH CIRCUITS SHALL BE PROVIDED WITH SEPARATE NEUTRAL CONDUCTORS. SHARED NEUTRALS WILL NOT BE PERMITTED FOR MULTI-CIRCUIT INSTALLATIONS. WHERE MULTIPLE CIRCUITS ARE RUN IN A COMMON RACEWAY, THE AMPACITY OF THE CONDUCTORS SHALL BE PROPERLY DERATED & CONDUIT SHALL BE SIZED PER CODE. UNDER NO CIRCUMSTANCES SHALL MORE THAN SIX (6) CURRENT CARRYING CONDUCTORS BE RUN IN A SINGLE CONDUIT. REFERENCE NEC ARTICLE AND TABLE 310.15(B)(3)(a).
11. ALL CONDUITS SHALL CONTAIN A GROUND CONDUCTOR SIZED PER NEC TABLE #250.122. IN ADDITION, WHERE AN ISOLATED, INSULATED GROUND IS REQUIRED, A SEPARATE GROUND CONDUCTOR WITH GREEN INSULATION SHALL BE RUN FROM THE PANEL GROUND BUS TO THE ISOLATED GROUND CONNECTION OF THE DEVICE. IN NO CASE SHALL THE SYSTEM GROUND (CONDUCTOR & ASSOCIATED OUTLET BOXES, CONDUIT & BUILDING STEEL) BE ALLOWED TO CONTACT THE ISOLATED GROUND (CONDUCTOR & DEVICE). WHERE CIRCUIT CONDUCTORS ARE INCREASED IN SIZE FOR ANY REASON (I.E. VOLTAGE DROP, DERATING, ETC.), THE GROUND CONDUCTOR SIZE SHALL BE INCREASED PROPORTIONATELY (ACCORDING TO CIRCULAR MIL AREA) FROM THE SIZE REQUIRED BY NEC TABLE #250.122.
12. ELECTRICAL INSTALLATION REQUIREMENTS FOR ALL HVAC, PLUMBING, FIRE PROTECTION, SPECIAL SYSTEMS AND OWNER EQUIPMENT BEING FURNISHED BY OTHERS SHALL BE REVIEWED AND COORDINATED WITH OTHER TRADES PRIOR TO ROUGH-IN. OBTAIN EQUIPMENT SHOP DRAWINGS FROM INSTALLER/SUPPLIER/CONTRACTOR/OWNER FURNISHING EQUIPMENT, AS REQUIRED, FOR REVIEW AND COORDINATION. CONTACT ARCHITECT/ENGINEER WITH ANY DISCREPANCIES FOUND BETWEEN CONSTRUCTION DRAWINGS AND EQUIPMENT BEING FURNISHED PRIOR TO ROUGH-IN.
13. THE ELECTRICAL CONTRACTOR SHALL FURNISH ALL ACCESS PANELS, AS REQUIRED FOR SERVICING AND TESTING, FOR EQUIPMENT AND/OR DEVICES FURNISHED UNDER HIS CONTRACT. THE GENERAL CONTRACTOR SHALL INSTALL ACCESS PANELS. THE EL

LIGHTING CONTROL SYSTEM GENERAL NOTES

1. BASIS-OF-DESIGN: ACUITY BRANDS nLIGHT CONTROLS. ALTERNATE LIGHTING CONTROLS PACKAGE MAY BE SUBMITTED PROVIDED THAT THE LIGHTING CONTROLS SUBMITTED MEET OR EXCEED THE QUALITY, PERFORMANCE, AND AESTHETICS OF THE BASIS-OF-DESIGN LIGHTING CONTROLS. LIGHTING CONTROLS MUST BE REVIEWED & APPROVED BY THE ENGINEER, ARCHITECT, & OWNER PRIOR TO ACCEPTANCE. DEVICE PLACEMENT / LAYOUT DRAWINGS MAY BE REQUIRED TO CONFIRM PERFORMANCE OF ALTERNATE LIGHTING CONTROLS. IF AN ALTERNATE LIGHTING CONTROLS PACKAGE IS USED, THEIR EXACT REQUIREMENTS, COMPONENTS, AND WIRING WILL LIKELY DIFFER AND THE CONTRACTOR IS RESPONSIBLE TO PROVIDE A COMPLETE & OPERATIONAL SYSTEM EQUIVALENT TO THAT SHOWN.
2. LIGHTING CONTROL DIAGRAMS SHOW GENERAL INTENT ONLY. E.C. SHALL PROVIDE QUANTITY & TYPES OF DEVICES AS REQUIRED TO ACCOMMODATE FUNCTIONALITY & NUMBER OF ZONES SHOWN ON PLANS. REFER TO MANUFACTURER'S WIRING DIAGRAMS FOR ALL REQUIRED COMPONENTS AND WIRING.
3. FURNISH AND INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS. OBTAIN THE SERVICES OF THE MANUFACTURER'S REPRESENTATIVE TO PROGRAM, COMMISSION, TEST SYSTEM AND TRAIN OWNER'S PERSONNEL.
4. LOW VOLTAGE WIRING IS NOT SHOWN ON PLANS AND NOT ALL LINE VOLTAGE WIRING IS SHOWN ON PLANS. PROVIDE ALL REQUIRED LINE AND LOW VOLTAGE WIRING FOR A COMPLETE, FUNCTIONAL SYSTEM.
5. EXIT LIGHTING, EMERGENCY LIGHTING UNITS, AND NIGHT LIGHTS SHALL NOT BE CONTROLLED BY THE LOW VOLTAGE LIGHTING CONTROL SYSTEM. PROVIDE UNSWITCHED HOT LEG AND WIRE AHEAD OF ALL CONTROLS.
6. AFTER HOURS, TIMECLOCK SHALL REPEATEDLY SWEEP OFF LIGHTING EVERY TWO HOURS.
7. DURATION OF TIME BETWEEN FLICK WARN AND OFF SWEEP BY TIMECLOCK SHALL BE AS DESIGNATED BY OWNER. OVERRIDE SWITCHES TO BE LOCATED IN COMMON AREA AT SECURED LOCATION.
8. LIGHTING CONTROL SYSTEM SHALL INCLUDE, BUT NOT LIMITED TO POWER PACKS, DIMMING AND NON-DIMMING RELAY MODULES, WALL STATIONS, SENSORS, TIME CONTROLLER, INTERFACES, BRIDGES, PROGRAMMING AND ALL REQUIRED COMPONENTS AND WIRING TO ACCOMMODATE DESIGN INTENT OF LIGHTING CONTROL SYSTEM.



A / E-502 LIGHTING CONTROL NETWORK BACKBONE DIAGRAM (ACUITY BRANDS nLIGHT CONTROLS)

NOTE:
DIAGRAM SHOWS GENERAL INTENT ONLY. E.C. SHALL PROVIDE QUANTITY & TYPES OF DEVICES AND NETWORK BRIDGES AS REQUIRED TO ACCOMODATE FUNCTIONALITY & NUMBER OF ZONES SHOWN ON PLANS.

LIGHTING FIXTURE SCHEDULE NOTES

1. REFER TO ARCHITECTURAL REFLECTED CEILING PLAN AND/OR ROOM FINISH SCHEDULE TO DETERMINE PROPER TYPE OF LIGHT FIXTURE REQUIRED FOR THE CEILING CONSTRUCTION PRIOR TO ORDERING THE FIXTURES & PROVIDE FIXTURES THAT ARE COMPATIBLE WITH THE CEILING SYSTEM.
2. REFER TO ARCHITECTURAL INTERIOR AND EXTERIOR ELEVATIONS FOR EXACT LOCATIONS AND MOUNTING HEIGHTS OF LIGHT FIXTURES.
3. PROJECT-SPECIFIC PHOTOMETRIC CALCULATIONS MAY BE REQUIRED FOR SOME FIXTURE TYPES AS PART OF SHOP DRAWING SUBMITTALS AS DETERMINED BY THE ENGINEER.
4. BASIS-OF-DESIGN LIGHT FIXTURE PACKAGE IS INDICATED IN LIGHTING FIXTURE SCHEDULE. UNLESS OTHERWISE NOTED, AN ALTERNATE LIGHT FIXTURE PACKAGE MAY BE SUBMITTED PROVIDED THAT THE LIGHT FIXTURES SUBMITTED MEET OR EXCEED THE QUALITY, PERFORMANCE, AND AESTHETICS OF THE BASIS-OF-DESIGN LIGHT FIXTURES AS DETERMINED BY ENGINEER AND ARCHITECT. LIGHT FIXTURES MUST BE REVIEWED AND APPROVED BY THE ENGINEER, ARCHITECT, AND OWNER PRIOR TO ACCEPTANCE. PROJECT-SPECIFIC PHOTOMETRIC CALCULATIONS PLANS MAY BE REQUIRED TO CONFIRM PERFORMANCE OF ALTERNATE LIGHT FIXTURE PACKAGE.
5. WHERE LIGHT FIXTURES ARE NOTED TO HAVE EMERGENCY BACKUP, THE EMERGENCY BACKUP SHALL PROVIDE A MINIMUM OF NINETY (90) MINUTES OF CODE REQUIRED EMERGENCY LIGHTING. EACH EMERGENCY BACKUP PROVIDED SHALL PRODUCE THE MAXIMUM LUMEN OUTPUT AVAILABLE FOR THE FIXTURE.
6. WHERE APPLICABLE, ALL EMERGENCY BACKUP CONFIGURATIONS SHALL INCLUDE AN INDEPENDENT SECONDARY DRIVER WITH AN INTEGRAL RELAY TO IMMEDIATELY DETECT AC POWER LOSS, MEETING INTERPRETATIONS OF NEC - 700.16.
7. VERIFY VOLTAGE REQUIREMENTS WITH RESPECT TO PLAN CIRCUITING, PANEL SCHEDULES, REMOTE POWER SUPPLIES, AND CONTROLS.
8. COORDINATE DIMMING DRIVER TYPE WITH LIGHTING CONTROLS PRIOR TO ORDERING. DIMMING DRIVERS SHALL BE CAPABLE OF DIMMING DOWN TO 1% UNLESS OTHERWISE NOTED.
9. ALL FIXTURE FINISHES ARE TO BE SELECTED BY ARCHITECT.
10. ALL LIGHTING FIXTURES ARE TO BE PROVIDED WITH REQUIRED HARDWARE FOR MOUNTING AND ANY AUXILIARY DRIVERS/DEVICES/ACCESSORIES FOR A FULLY FUNCTIONING LIGHT FIXTURE.
11. ALL PENETRATIONS IN OR THROUGH FIRE RATED ASSEMBLIES ASSOCIATED WITH THE ELECTRICAL INSTALLATION (INCLUDING LIGHT FIXTURES) SHALL BE FIRE-STOPPED USING A UL LISTED APPROVED METHOD (MEETING OR EXCEEDING RATING OF STRUCTURE PENETRATED AS INDICATED ON ARCHITECTURAL PLANS) TO COMPLY WITH CODE FOR PROJECT CONDITIONS.

SCOPE NOTE:
CONTRACTOR SHALL FURNISH, INSTALL, AND WIRE ADDITIONAL EXIT SIGNS TYPE "EX" AND EMERGENCY LIGHTING FIXTURE TYPES "EMH" FOR ADDITIONAL FIXTURES THAT MAY BE REQUIRED BY THE AUTHORITY HAVING JURISDICTION. TURNOVER ANY UNUSED FIXTURES TO THE OWNER. QUANTITY OF ADDITIONAL FIXTURES SHALL BE 5% OF EACH TYPE, MINIMUM OF ONE (1) OF EACH TYPE.

LIGHTING FIXTURE SCHEDULE

TYPE	APPARENT LOAD	VOLTAGE	LAMP(S) NO.	LAMP	COLOR TEMP (K)	LUMENS	DIMMING	TBA CRI	MANUFACTURER	CATALOG NUMBER	DESCRIPTION

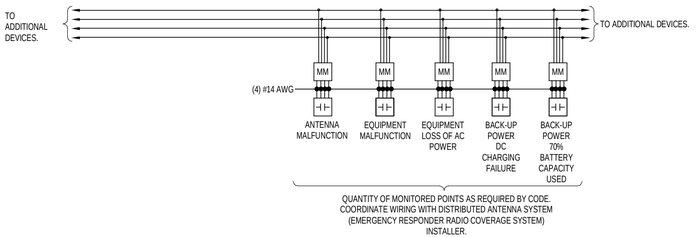
TYPICAL FIRE ALARM DEVICE WIRING DIAGRAM

N.T.S.

NOTE:
NOT ALL SYMBOLS AND NOTES MAY APPLY TO THIS PROJECT.



TYPICAL FIRE ALARM DEVICES FOR DISTRIBUTED ANTENNA SYSTEM / EMERGENCY RESPONDER RADIO COVERAGE SYSTEM MONITORING

N.T.S.

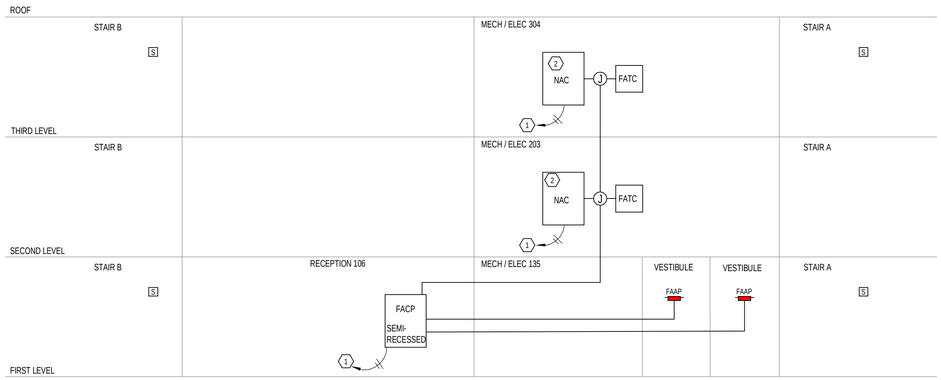
FURNISH AND INSTALL AN EMERGENCY RESPONDER RADIO COVERAGE SYSTEM FOR THIS PROJECT PER OBC 916.1 AND OFC 510.THE SYSTEM SHALL BE DESIGNED, INSTALLED, TESTED AND COMMISSIONED BY A COMPANY THAT SPECIALIZES IN SUCH SYSTEMS TO COMPLY WITH CODE REQUIREMENTS. THE QUALIFIED/CERTIFIED COMPANY SHALL PREPARE AND SUBMIT SYSTEM INSTALLATION/SHOP DRAWINGS INCLUDING REQUIRED CALCULATIONS TO THE AUTHORITY HAVING JURISDICTION FOR REVIEW AND APPROVAL OF SYSTEM PRIOR TO START OF WORK.

FIRE ALARM SYSTEM NOTES:

1. THE FIRE ALARM SYSTEM MUST BE INSTALLED IN ACCORDANCE WITH PLANS AND SPECIFICATIONS AND MUST MEET ALL STATE & LOCAL CODE REQUIREMENTS. THE ELECTRICAL CONTRACTOR SHALL BE RESPONSIBLE TO PROVIDE ALL CODE REQUIRED DOCUMENTS INCLUDING, BUT NOT LIMITED TO THE FOLLOWING:
   A. A FLOOR PLAN WHICH INDICATES THE USE OF ALL ROOMS.
   B. LOCATIONS OF ALARM-INITIATING AND NOTIFICATION APPLIANCES.
   C. ALARM CONTROL AND TROUBLE SIGNALING EQUIPMENT.
   D. ANNUNCIATION.
   E. POWER CONNECTION.
   F. BATTERY CALCULATIONS.
   G. CONDUCTOR TYPE AND SIZES.
   H. VOLTAGE DROP CALCULATIONS.
   I. MANUFACTURERS, MODEL NUMBERS AND LISTING INFORMATION FOR EQUIPMENT, DEVICES AND MATERIALS.
   J. DETAILS OF CEILING HEIGHT AND CONSTRUCTION.
   K. THE INTERFACE OF FIRE SAFETY CONTROL FUNCTIONS.
      - THESE DOCUMENTS MUST BE PREPARED BY A CERTIFIED FIRE ALARM DESIGNER AND MUST BE SUBMITTED TO THE LOCAL AUTHORITIES FOR REVIEW AND APPROVAL PRIOR TO START OF WORK.
2. A STAMPED SET OF APPROVED FIRE ALARM DRAWINGS SHALL BE AT THE JOB SITE AND SHALL BE USED FOR INSTALLATION.
3. UPDATE AN AS-BUILT DRAWING SET DAILY WITH JOB PROGRESS. PROVIDE AN AS-BUILT DRAWING SET TO OWNER NO LATER THAN 7 DAYS AFTER FINAL TEST.
4. EQUIPMENT: WHERE THE PROJECT REQUIRES NON-ALARM AUDIO SYSTEMS (MUSIC, PAGING OR THE LIKE) TO BE IINTERCONNECTED TO THE FIRE ALARM SYSTEM, FURNISH AND INSTALL ALL REQUIRED STANDARD AND OPTIONAL FIRE ALARM SYSTEM EQUIPMENT AND PROGRAMMING TO SUPPORT AND FUNCTION WITH SUCH SYSTEMS. PROVIDE THE REQUIRED CONSTANT SUPERVISION MODULES, INTERFACES AND SYSTEM WIRING AND INTERCONNECTIONS AS REQUIRED. COORDINATE INTEGRATION OF SUCH SYSTEMS WITH RESPECTIVE SYSTEM INSTALLERS AND VENDORS PRIOR TO START OF WORK.
5. EQUIPMENT: ZONING OF THE AUDIO NOTIFICATION APPLIANCES SHALL COMPLY WITH CODE AND LOCAL AUTHORITY REQUIREMENTS. CONFIRM ZONING OF SYSTEM WITH OWNER'S PROJECT REQUIREMENTS FOR NON-ALARM AUDIO SYSTEMS, IF APPLICABLE, AND WITH AUTHORITY HAVING JURISDICTION PRIOR TO DRAWING SUBMISSION TO LOCAL AUTHORITY AND START OF WORK.
6. EQUIPMENT: WHERE THE PROJECT INCLUDES BUT IS NOT LIMITED TO THE FOLLOWING: HOIST-WAY PRESSURIZATION, STAIRWELL PRESSURIZATION, CONTROL AND MONITORING OF HVAC DAMPERS, MONITORING OF GENERATOR, MONITORING OF FIRE PUMP, CONTROL OF HVAC DAMPERS, CONTROL OF ACCESS CONTROL AND SECURITY SYSTEMS, AND SMOKE CONTROL SYSTEMS TO BE INTEGRATED INTO THE FIRE ALARM SYSTEM, FURNISH AND INSTALL ALL REQUIRED STANDARD AND OPTIONAL FIRE ALARM SYSTEM EQUIPMENT AND PROGRAMMING TO SUPPORT AND FUNCTION WITH SUCH SYSTEMS.
7. EQUIPMENT: WHERE THE PROJECT INCLUDES BUT IS NOT LIMITED TO THE FOLLOWING: CONTROL AND MONITORING OF DISTRIBUTED ANTENNA SYSTEM / EMERGENCY RESPONDER RADIO COVERAGE SYSTEM. CONTROL AND MONITORING OF FIRE FIGHTERS WIRED 2-WAY COMMUNICATIONS TO BE INTEGRATED INTO THE FIRE ALARM SYSTEM, FURNISH AND INSTALL ALL REQUIRED STANDARD AND OPTIONAL FIRE ALARM SYSTEM EQUIPMENT AND PROGRAMMING TO SUPPORT AND FUNCTION WITH SUCH SYSTEMS.
8. EQUIPMENT: ALL DEVICES, COMBINATIONS OF DEVICES, APPLIANCES AND EQUIPMENT SHALL BE LISTED FOR THE PURPOSE FOR WHICH THEY ARE USED AND SHALL BE INSTALLED IN COMPLIANCE WITH APPLICABLE CODES, STANDARDS AND MANUFACTURER'S INSTRUCTIONS.
9. SYSTEM DEVICES, BACK-BOXES, AND ENCLOSURES MUST BE RATED FOR THE ENVIRONMENT WHICH IT IS INSTALLED. FURNISH AND INSTALL CONDUIT SEALS WHERE RACEWAYS PASS BETWEEN CONDITIONED AND UNCONDITIONED SPACES.
10. NOTIFICATION DEVICE COVERS SHALL BE WHITE WITH RED LETTERING, UNLESS OTHERWISE REQUIRED.
11. ALL WIRING SHALL BE IN CONDUIT, UNLESS DIRECTED OTHERWISE. DO NOT RUN ANY OTHER WIRING IN THE SAME CONDUIT WITH ALARM WIRING. DO NOT RUN 120VAC WIRING WITH ALARM WIRING. ALL WIRE TO BE SHIELDED CABLE. ALL J-BOXES ASSOCIATED WITH THE FIRE ALARM SYSTEM SHALL BE SPRAY PAINTED "FIRE ENGINE" RED.
12. OPEN WIRING METHODS ARE ACCEPTABLE FOR FIRE ALARM SYSTEM WIRING WHERE PERMITTED BY CODE, AHJ, OWNER, AND PROJECT. OPEN WIRING METHODS MAY BE USED WHERE WIRING IS ACCESSIBLE, NOT SUBJECT TO PHYSICAL DAMAGE OR VISIBLE TO SIGHT. THE CONDUCTOR INSULATION FOR OPEN WIRING SHALL BE RATED PER APPLICATION & ENVIRONMENT BEING INSTALLED. PROVIDE BACK-BOXES AND CONDUIT STUB-UPS TO NEAR UNDERSIDE OF STRUCTURE, ABOVE ACCESSIBLE CEILINGS, FOR ALL WALL MOUNTED DEVICES. FIRE ALARM WIRING SHALL BE INSTALLED IN CONDUIT WHERE ROUTED UNDERGROUND, THROUGH FLOOR SLABS, AND FROM FINISHED FLOOR TO A HEIGHT OF 10'-0" ABOVE FINISHED FLOOR.
13. FIRE ALARM SYSTEM WIRING SHALL BE INSTALLED IN CONDUIT WHERE OPEN WIRING IS NOT ACCESSIBLE, OR IS SUBJECT TO PHYSICAL DAMAGE, OR IS VISIBLE TO SIGHT. IF LOCATED IN FINISHED AREAS, CONDUIT SHALL BE PAINTED TO MATCH FINISHED AREA. DO NOT RUN ANY OTHER WIRING IN THE SAME CONDUIT WITH FIRE ALARM WIRING. DO NOT RUN 120VAC WIRING WITH FIRE ALARM WIRING. ALL WIRE TO BE SHIELDED CABLE. ALL J-BOXES ASSOCIATED WITH THE FIRE ALARM SYSTEM SHALL BE SPRAY PAINTED "FIRE ENGINE" RED.
14. ALL WIRE & CABLE MUST BE RATED PER THE LATEST REVISION OF THE NATIONAL ELECTRIC CODE SECTION 760.
15. CONFIRM ALL WIRING REQUIREMENTS WITH THE MANUFACTURER OF THE PROPOSED FIRE ALARM EQUIPMENT BEING FURNISHED PRIOR TO BID AND PROVIDE IN ACCORDANCE THEREWITH. WIRING SHOWN ON THIS DIAGRAM REPRESENTS THE MINIMUM SIZE REQUIRED. WIRE SIZES SHALL BE INCREASED AS REQUIRED FOR VOLTAGE DROP.
16. FIRE ALARM CIRCUITS SHALL BE IDENTIFIED IN ACCORDANCE WITH APPROPRIATE SECTION OF NEC 760. MARK ALL FIRE ALARM WIRES IN ACCORDANCE WITH NEC 760 SECTIONS FOR POWER LIMITED AND NON-POWER LIMITED WIRE.
17. WIRING SHALL BE CONTINUOUS FROM ONE DEVICE TO THE NEXT. SPLICING IS PROHIBITED.
18. THE TYPICAL WIRING DIAGRAM IS NOT INTENDED TO SHOW QUANTITIES OF DEVICES. REFER TO PLANS FOR QUANTITIES.
19. WHERE PROPOSED ROUTING OF SYSTEM CONDUIT AND WIRING IS INDICATED ON PLANS, DETAILS AND DIAGRAMS, SAID ROUTING IS DIAGRAMMATIC. EXACT ROUTING OF CONDUITS AND WIRING TO BE DETERMINED IN THE FIELD BY THE INSTALLING CONTRACTOR TO SUIT CONDITIONS. INSTALLATION SHALL COMPLY WITH CODE AND PROJECT REQUIREMENTS. ALL MODIFICATIONS SHALL BE CLEARLY INDICATED ON THE RECORD DRAWINGS.
20. PROTECTION OF SYSTEM WIRING AND CABLING: VERTICAL RISER WIRING AND CABLING SHALL BE PROTECTED BY CONSTRUCTION HAVING A MINIMUM 2-HOUR FIRE-RESISTANCE RATING OR SHALL BE UL LISTED CABLING HAVING A MINIMUM 2-HOUR FIRE-RESISTANCE RATING..

FIRE ALARM SYSTEM NOTES CONTINUED:

21. ALL CONDUCTORS INCLUDING SHIELDS MUST TEST FREE OF OPENS, SHORTS & GROUNDS BEFORE MAKING CONNECTIONS TO THE FIRE ALARM CONTROL PANEL.
22. EACH FIRE ALARM PANEL AND ANCILLARY EQUIPMENT REQUIRES A DEDICATED 120VAC CIRCUIT. RUN 3-#12 (INCLUDES THE GREEN GROUND WIRE) FROM A 20 AMP CIRCUIT BREAKER. PROVIDE A LOCK-ON CLIP & RED MARKING ON THE BREAKER AND IDENTIFY AS "FIRE ALARM CIRCUIT CONTROL." THE LOCATION OF THE CIRCUIT DISCONNECTING MEANS (CIRCUIT BREAKER) SHALL BE PERMANENTLY IDENTIFIED AT THE FIRE ALARM CONTROL PANEL AND ANCILLARY EQUIPMENT.
23. DO NOT APPLY POWER TO SYSTEM EXCEPT IN THE PRESENCE OF A FACTORY TRAINED TECHNICAL REPRESENTATIVE.
24. INSTALLATION OF SYSTEM DEVICES SHALL BE IN ACCORDANCE WITH MANUFACTURER'S INSTRUCTIONS. POWER LIMITED AND NON-POWER LIMITED FIELD WIRING MUST BE INSTALLED WITHIN EQUIPMENT ENCLOSURES IN ACCORDANCE WITH MANUFACTURER'S INSTRUCTIONS AND NEC
25. SMOKE DETECTOR SOUNDER BASES AND HORN/STROBES FOR SLEEPING AREAS SHALL UTILIZE A LOW FREQUENCY SOUNDER WITH A 520HZ(+/-10%) SQUARE WAVE IN COMPLIANCE WITH NFPA 72 SECTION 18.4.5.
26. IN GROUP R-2 OCCUPANCIES REQUIRED TO HAVE A FIRE ALARM SYSTEM, ALL DWELLING UNITS AND SLEEPING UNITS SHALL BE PROVIDED WITH THE CAPABILITY TO SUPPORT VISIBLE ALARM NOTIFICATION APPLIANCES, IN ACCORDANCE WITH APPLICABLE CODE. SUCH CAPABILITY SHALL BE PERMITTED TO INCLUDE THE POTENTIAL FOR FUTURE INTERCONNECTION OF THE BUILDING FIRE ALARM SYSTEM WITH THE UNIT SMOKE ALARMS, REPLACEMENT OF AUDIBLE APPLIANCES WITH COMBINATION AUDIBLE/VISIBLE APPLIANCES, OR FUTURE EXTENSION OF THE EXISTING WIRING FROM THE UNIT SMOKE ALARM LOCATIONS TO REQUIRED LOCATIONS FOR VISIBLE APPLIANCES.
27. STROBES SHALL BE WIRED SEPARATELY FOR SYNCHRONOUS OPERATION. PROVIDE SYNCHRONIZATION MODULES AS REQUIRED TO COMPLY WITH CODE.
28. SMOKE DETECTOR HEADS MUST BE INSTALLED FREE OF DUST OR ANY OTHER CONTAMINATION. SMOKE DETECTORS SHALL NOT BE MOUNTED WITHIN 3'-0" OF A SUPPLY OR RETURN AIR GRILLE. COORDINATE SMOKE DETECTOR LOCATIONS WITH MECHANICAL CONTRACTOR PRIOR TO INSTALLATION.
29. IN ALL ROOMS REQUIRING SMOKE DETECTION, IF THERE IS NOT A SMOOTH, FLAT CEILING, THEN DETECTION SHALL BE SPACED PER NFPA 72. IF THERE ARE BEAM DEPTHS LESS THAN 10% OF THE CEILING HEIGHT (0.1 X H). SMOOTH CEILING SPACES SHALL BE PERMITTED. IF THERE ARE BEAM DEPTHS EQUAL OR GREATER THAN 10% OF THE CEILING HEIGHT (0.1 X H), AND THE BEAM SPACING IS EQUAL TO OR GREATER THAN 40% OF THE CEILING HEIGHT (0.4 X H), SPOT SMOKE DETECTORS SHALL BE LOCATED ON THE CEILING IN EACH BEAM POCKET PER NFPA 72 2007, 5.7.3.2.4.
30. DUCT DETECTORS SHALL HAVE REMOTE TEST STATIONS INSTALLED IN AN ACCESSIBLE LOCATION AND BE CLEARLY LABELED TO INDICATE THEIR FUNCTION AND THE MECHANICAL UNIT ASSOCIATED WITH EACH DETECTOR. DUCT DETECTOR TEST STATIONS SHALL BE LOCATED AS CLOSE TO THE APPLIANCES AS POSSIBLE FOR EASE IN LOCATING AND UNLESS ASSOCIATED WITH ROOF TOP MECHANICAL UNITS
   A. IF THERE IS A DROP CEILING, THE REMOTE TEST STATIONS SHALL BE MOUNTED IN CEILING TILES BELOW THE DUCT DETECTORS.
   B. IF THERE IS A HARD CEILING, THE REMOTE TEST STATIONS SHALL BE LOCATED IN THE CEILING NEXT TO A MINIMUM OF A 2'x4' OR 3'x3' ACCESS PANEL LOCATED BELOW THE DUCT DETECTOR.
   C. IF THERE IS NO CEILING, THE REMOTE TEST STATIONS SHALL BE MOUNTED ON A PILLAR OR WALL AS CLOSE TO THE DEVICE AS POSSIBLE.
31. THE LOCATION OF ALL DETECTORS IN AIR DUCT SYSTEMS SHALL BE PERMANENTLY AND CLEARLY IDENTIFIED AND RECORDED.
32. ALL DETECTORS NOT ACCESSIBLE STANDING AT FINISHED FLOOR SHALL BE PROVIDED WITH A REMOTE TEST SWITCH WITH INDICATOR LIGHT. LOCATIONS OF ALL FIRE ALARM REMOTE TEST STATIONS SHALL BE LABELED PER LOCAL LOCAL AUTHORITY REQUIREMENTS. TEST STATION LOCATIONS SHALL BE FIELD VERIFIED WITH LOCAL AUTHORITY PRIOR TO ROUGH-IN.
33. DUCT DETECTORS SHALL BE INSTALLED AND POSITIONED TO ALLOW EASY ACCESS FOR PERIODIC INSPECTION AND TESTING.
34. FURNISH AND INSTALL A KNOX BOX AS REQUIRED BY LOCAL FIRE DEPARTMENT. EXACT QUANTITIES AND LOCATIONS AS DETERMINED BY LOCAL AUTHORITY. KNOX BOX MANUFACTURER SHALL BE AS REQUIRED BY LOCAL AUTHORITY. PROVIDE AN ADDRESSABLE MONITOR MODULE WHEN REQUIRED.
35. THE FIRE ALARM SUPPLIER SHALL PROVIDE A COPY OF THE PROGRAMMING CODES AND OPERATION MANUALS IN A SLEEVED BINDER ATTACHED TO THE FIRE ALARM CONTROL PANEL.
36. PROVIDE CONNECTION TO REMOTE SUPERVISION AS DIRECTED FOR SUPERVISION OF SYSTEM IN COMPLIANCE WITH LOCAL AUTHORITY & OWNER. PROVIDE ALL INTERFACE REQUIRED TO INITIATE REMOTE SUPERVISION.
37. PROVIDE & INSTALL A CEILING MOUNTED SMOKE DETECTOR IN FRONT OF FIRE ALARM CONTROL PANEL AND EACH REMOTE MOUNTED AUXILIARY PANEL IN ADDITION TO THE DEVICES SHOWN ON THE FLOOR PLANS.
38. PROVIDE & INSTALL MANUAL STATIONS WHERE REQUIRED BY LOCAL AUTHORITIES TO MEET THE REQUIREMENTS OF NFPA-72 SECTION 3-8.1.2 IN ADDITION TO THE DEVICES SHOWN ON THE PLANS. VERIFY WITH LOCAL AUTHORITY PRIOR TO BIDDING & INDICATE COST IN BID PRICE.
39. INCLUDE ON-SITE SERVICES OF A CERTIFIED TECHNICIAN TO PROVIDE TECHNICAL INSTALLATION SUPPORT FOR EQUIPMENT START UP, PROGRAM EDITING, TROUBLESHOOTING OF THE SYSTEM, AND ASSISTANCE TO THE INSTALLER FOR ONE COMPLETE FINAL SYSTEM CHECKOUT.
40. THE COMPLETED FIRE ALARM SYSTEM SHALL BE FULLY TESTED IN ACCORDANCE WITH NFPA-72, AND LOCAL AND STATE CODE REQUIREMENTS. BY THE INSTALLER, IN THE PRESENCE OF THE G.C., OWNER'S REPRESENTATIVE AND AUTHORITY HAVING JURISDICTION. UPON COMPLETION OF A SUCCESSFUL TEST, THE INSTALLER SHALL SO CERTIFY, IN WRITING, TO THE OWNER AND GENERAL CONTRACTOR.



FIRE ALARM RISER DIAGRAM

N.T.S.

CODED NOTES: (#)

1. FURNISH AND INSTALL A 20A, 120V CIRCUIT.
2. FURNISH AND INSTALL ANCILLARY EQUIPMENT AS REQUIRED FOR COMPLETE AND CODE COMPLIANT SYSTEM.

FIRE ALARM RISER DIAGRAM GENERAL NOTES:

1. REFERENCE FIRE ALARM SYSTEM NOTES, ON THIS SHEET.
2. PROVIDE ALL REQUIRED WIRING, INITIATING DEVICE CIRCUIT CARDS, RELAYS, PROGRAMMING, POWER EXTENDERS, POWER SUPPLIES, ANCILLARY DEVICES, ETC. PER MANUFACTURER'S DIRECTION FOR A COMPLETE FUNCTIONING SYSTEM.
3. ALL WIRING SHALL BE INSTALLED IN EMT CONDUIT, 3/4" MINIMUM, UNLESS OTHERWISE NOTED.
4. ALL FIRE ALARM A/V DEVICES SHALL BE WHITE IN COLOR, UNLESS DIRECTED OTHERWISE BY LOCAL AUTHORITY HAVING JURISDICTION. WHERE SUBJECT TO EXTERIOR ENVIRONMENT, A/V DEVICES SHALL BE RATED AND BE CONTAINED WITHIN RATED WEATHERPROOF ENCLOSURES. PROVIDE ANY AND ALL ANCILLARY DEVICES REQUIRED DUE TO ENVIRONMENTAL CONDITIONS.
5. LICENSED FIRE ALARM DESIGNER/CONTRACTOR SHALL COORDINATE AND SELECT FINAL DEVICE LOCATIONS AND QUANTITIES PER BEST DESIGN PRACTICES AND PERFORMANCE DATA OF SYSTEM EQUIPMENT BEING PROVIDED CONSTRUCTION DRAWINGS SHOW EQUIPMENT AND DEVICES FOR DESIGN INTENT ONLY.

ELECTRICAL SYMBOL LEGEND

SYMBOL	DESCRIPTION
FACP	FIRE ALARM CONTROL PANEL - RECESSED MOUNTED ON WALL
FAAP	FIRE ALARM ANNUNCIATOR PANEL - RECESSED MOUNTED IN WALL
FATP	FIRE ALARM TRANSPONDER PANEL WITH POWER SUPPLIES, NACs, FATCs - SURFACE MOUNTED ON WALL
NAC	FIRE ALARM NOTIFICATION APPLIANCE CIRCUIT (NAC) EXTENDER PANEL - SURFACE MOUNTED ON WALL
FATC	FIRE ALARM TERMINAL CABINET - SURFACE MOUNTED ON WALL

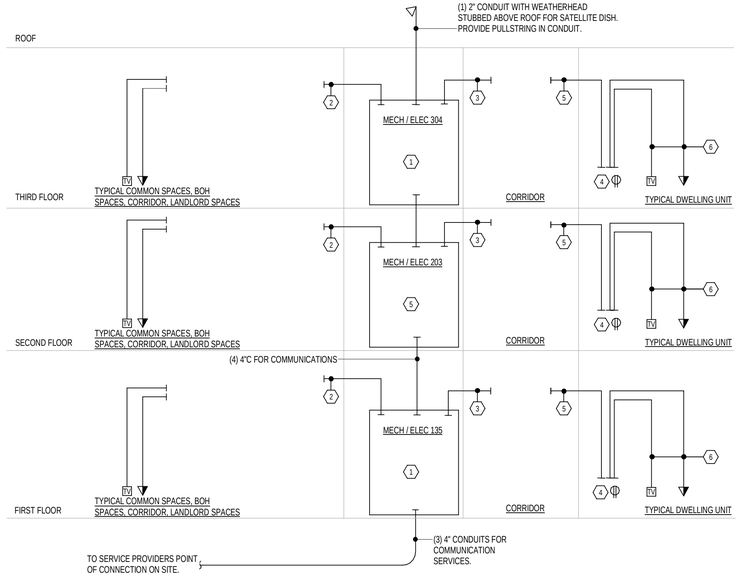
TYPICAL DATA/TELEPHONE/TV/OUTLET DETAIL

N.T.S.



COMMUNICATIONS AND TV ROUGH-IN ONE-LINE DIAGRAM

N.T.S.

REFER TO TECHNOLOGY DRAWINGS FOR ADDITIONAL INFORMATION.

CODED NOTES: ⟨#⟩

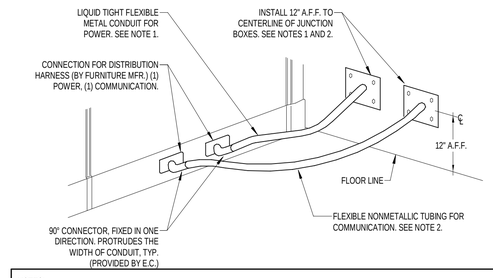
1. FIRE RETARDANT PLYWOOD BACKBOARD FROM FINISHED FLOOR TO 8'-0" AFF BY E.C. REFERENCE PLANS FOR LOCATIONS.
2. (2) 2" CONDUIT SLEEVES FOR COMMUNICATION AND TV CABLING. SLEEVE LENGTH TO BE FROM BACKBOARD AND STUBBED UP TO ABOVE ACCESSIBLE CEILING. PROVIDE PLASTIC BUSHINGS ON ENDS OF SLEEVES.
3. (4) 2" CONDUIT SLEEVES FROM UTILITY ROOM TO CORRIDOR. PROVIDE PLASTIC BUSHINGS ON ENDS OF SLEEVES. FIRESTOP PENETRATION THRU PARTITION WALL.
4. PROVIDE A 120V DUPLEX RECEPTACLE AT 18" AFF IN UNIT HALL CLOSET.
5. (1) 1"C. FROM UNIT HALL CLOSET TO ABOVE ACCESSIBLE COMMON PUBLIC CORRIDOR CEILING.
6. QUANTITY & LOCATIONS SHALL BE VERIFIED WITH OWNER PRIOR TO INSTALLATION. PROVIDE PATHWAYS FROM DEVICES TO UNIT HALL CLOSET. COORDINATE WITH TECHNOLOGY CONTRACTOR.

GENERAL NOTES - TECHNOLOGY SYSTEMS ROUGH-IN:

1. PROVIDE SLEEVES, J-HOOKS, PATHWAYS, BASKET TRAY FOR LOW VOLTAGE CABLING AND SYSTEMS FROM DEVICE TO SOURCE, UNLESS NOTED OR DIRECTED OTHERWISE. COORDINATE ROUTING AND PATHWAY SYSTEM WITH OWNER / OWNER'S VENDOR / TECHNOLOGY INSTALLER AND OTHER TRADES PRIOR TO ROUGH-IN. QUALIFY EXTENT OF PATHWAY SYSTEM BEING PROVIDED IN BID PROPOSAL.
2. WHERE CEILINGS DO NOT EXIST TO STUB CONDUITS ABOVE, CONDUITS SHALL BE STUBBED UP TO ABOVE STRUCTURE. IN FINISHED AREAS, PROVIDE COMPLETE CONDUIT PATHWAYS, INCLUDING PULL-BOXES, UNLESS OTHERWISE DIRECTED. CONDUIT, J-BOXES AND THE LIKE SHALL BE PAINTED TO MATCH AREA FINISHES.
3. WHERE HARD INACCESSIBLE CEILINGS EXIST, PROVIDE COMPLETE CONTINUOUS CONDUIT PATHWAYS, INCLUDING PULL-BOXES, ACCESS PANELS, UNLESS OTHERWISE DIRECTED. PROVIDE CONDUIT SLEEVES TRAVERSING OVER INACCESSIBLE CEILINGS BETWEEN AREAS WITH ACCESSIBLE CEILINGS, AS REQUIRED.
4. MAXIMUM SPACING OF J-HOOKS SHALL BE 5'-0" SPACING. SLEEVES AND ASSOCIATED FIRE STOPPING SHALL BE PROVIDED FROM ROOM TO ROOM TO ACCOMMODATE PATHWAYS FROM DEVICES TO SOURCE. SLEEVE SIZES SHALL EITHER BE 2" OR 4" DEPENDING ON THE CONCENTRATION OF CABLING IN THE AREA. ALLOW FOR AT LEAST (1) SPARE SLEEVE FOR FUTURE USE AT EACH LOCATION OF PENETRATION. FIRE STOP AND PROVIDE TEMPORARY SEAL FOR SPARE SLEEVES.

ELECTRICAL NOTES FOR TECHNOLOGY SYSTEMS

1. THE TERM "TECHNOLOGY" IMPLIES TELEPHONE/DATA SYSTEMS, AUDIO/VISUAL SYSTEM, CCTV SYSTEM, SECURITY/ACCESS CONTROL SYSTEM, PA SYSTEM, MUSAK/NOISECANCELING SYSTEM, EMERGENCY COMMUNICATION SYSTEMS, INTERCOM SYSTEM, ENTRY CALL SYSTEM, NURSE CALL SYSTEM AND THE LIKE.
2. COORDINATE SCOPE OF WORK WITH OWNER AND OWNER'S TECHNOLOGY SYSTEMS VENDORS. REFERENCE TECHNOLOGY DRAWINGS AND SPECIFICATIONS FOR INSTALLATION AND ROUGH-IN REQUIREMENTS OF SYSTEMS. THE TECHNOLOGY DRAWINGS AND SPECIFICATIONS SHALL BE CONSIDERED PART OF THE ELECTRICAL CONSTRUCTION DOCUMENTS.
3. E.C. TO PROVIDE TECHNOLOGY GROUNDING SYSTEM INCLUDING, BUT NOT LIMITED TO, GROUND CONDUCTORS, COPPER BUS BARS AND ALL ASSOCIATED HARDWARE REQUIRED FOR A COMPLETE GROUNDING SYSTEM.
4. E.C. TO PROVIDE BONDING OF ENTIRE CABLE TRAY & LADDER RACK SYSTEMS TO THE BUILDING ELECTRICAL GROUNDING SYSTEM, INCLUDING BUT NOT LIMITED TO, BONDING JUMPERS BETWEEN CABLE TRAY & LADDER RACK SECTIONS NECESSARY TO PROVIDE ELECTRICAL CONTINUITY.
5. E.C. TO PROVIDE BONDING OF ALL TECHNOLOGY RACKS & EQUIPMENT INCLUDING, BUT NOT LIMITED TO, BONDING JUMPERS AND ASSOCIATED HARDWARE.
6. E.C. TO FURNISH AND INSTALL CABLE TRAY, LADDER RACK AND J-HOOK SYSTEM THROUGH-OUT PROJECT AREA FOR TECHNOLOGY SYSTEMS.
7. E.C. TO PROVIDE SLEEVES AND CONDUIT PATHWAYS. WHETHER OR NOT INDICATED ON THE DOCUMENTS, CONDUIT SLEEVES MUST BE PROVIDED FOR EACH ROOM CONTAINING TECHNOLOGY DEVICES OR OUTLETS. THE SLEEVES SHALL EXTEND FROM THE ROOM SERVED TO THE CABLE TRAY, SLEEVES CROSSING HARD INACCESSIBLE CEILINGS OR ABOVE THE CORRIDOR ACCESSIBLE CEILING SPACE. COORDINATE SLEEVE REQUIREMENT AND LOCATIONS WITH TECHNOLOGY CONTRACTOR(S) PRIOR TO ROUGH-IN.
8. E.C. SHALL PROVIDE COMPLETE CONDUIT PATHWAY SYSTEM FROM BUILDING DMARK TO SERVER ROOM, AND FLOOR TO FLOOR PATHWAYS.
9. PATHWAY SYSTEM SHALL INCLUDE, BUT NOT BE LIMITED TO, CONDUIT, PULL BOXES, J-BOXES, OUTLET BOXES, PLASTER RINGS, BUSHINGS, PULL WIRES, ETC.
10. E.C. SHALL PROVIDE FIRE-RATED PLYWOOD BACKBOARDS FOR TECHNOLOGY USE.
11. E.C. SHALL PROVIDE BLANK FACEPLATES FOR TECHNOLOGY OUTLETS IDENTIFIED AS "FUTURE USE", "ROUGH-IN ONLY", OR SIMILAR NOTATION.
12. E.C. SHALL PROVIDE FLOOR BOXES AND ASSOCIATED FLOOR BOX MOUNTING HARDWARE FOR TECHNOLOGY DEVICES. COORDINATE TECHNOLOGY DEVICE QUANTITIES AND CONFIGURATIONS WITH TECHNOLOGY CONTRACTORS PRIOR TO ORDERING MATERIALS.
13. ALL CORING FOR INSTALLATION OF TECHNOLOGY PATHWAYS AND FLOOR BOXES TO BE COMPLETED BY E.C.
14. ALL POWER DEVICES, AND ASSOCIATED BRANCH CIRCUITS SERVING TECHNOLOGY EQUIPMENT SHALL BE FURNISHED AND INSTALLED BY E.C.
15. PROVIDE SLEEVES, J-HOOKS, PATHWAYS, BASKET TRAY FOR LOW VOLTAGE CABLING AND SYSTEMS FROM DEVICE TO SOURCE, UNLESS NOTED OR DIRECTED OTHERWISE. COORDINATE ROUTING AND PATHWAY SYSTEM WITH OWNER / OWNER'S VENDOR / TECHNOLOGY INSTALLER AND OTHER TRADES PRIOR TO ROUGH-IN. QUALIFY EXTENT OF PATHWAY SYSTEM BEING PROVIDED IN BID PROPOSAL.
16. WHERE CEILINGS DO NOT EXIST TO STUB CONDUITS ABOVE, CONDUITS SHALL BE STUBBED UP TO ABOVE STRUCTURE. IN FINISHED AREAS, PROVIDE COMPLETE CONDUIT PATHWAYS, INCLUDING PULL-BOXES, UNLESS OTHERWISE DIRECTED. CONDUIT, J-BOXES AND THE LIKE SHALL BE PAINTED TO MATCH AREA FINISHES.
17. WHERE HARD INACCESSIBLE CEILINGS EXIST, PROVIDE COMPLETE CONTINUOUS CONDUIT PATHWAYS, INCLUDING PULL-BOXES, ACCESS PANELS, UNLESS OTHERWISE DIRECTED. PROVIDE CONDUIT SLEEVES TRAVERSING OVER INACCESSIBLE CEILINGS BETWEEN AREAS WITH ACCESSIBLE CEILINGS, AS REQUIRED.
18. MAXIMUM SPACING OF J-HOOKS SHALL BE 5'-0" SPACING. SLEEVES AND ASSOCIATED FIRE STOPPING SHALL BE PROVIDED FROM ROOM TO ROOM TO ACCOMMODATE PATHWAYS FROM DEVICES TO SOURCE. SLEEVE SIZES SHALL EITHER BE 2" OR 4" DEPENDING ON THE CONCENTRATION OF CABLING IN THE AREA. ALLOW FOR AT LEAST (1) SPARE SLEEVE FOR FUTURE USE AT EACH LOCATION OF PENETRATION. FIRE STOP AND PROVIDE TEMPORARY SEAL FOR SPARE SLEEVES.



NOTES:

1. PROVIDE A 2-GANG DEEP JUNCTION BOX WITH SINGLE GANG TRIM RING, BLANK COVER AND KNOCKOUT FOR POWER TO FURNITURE SYSTEM. BRANCH TO PARTITION VIA LIQUID-TIGHT FLEXIBLE METALLIC RACEWAY FOR POWER. VERIFY CONNECTION REQUIREMENTS AND ROUGH-IN LOCATION WITH FURNITURE SYSTEM CONTRACTOR.
2. PROVIDE A 2-GANG DEEP JUNCTION BOX WITH SINGLE GANG TRIM RING, BLANK COVER AND KNOCKOUT FOR COMMUNICATION WIRING TO FURNITURE SYSTEM. PROVIDE LENGTH(S) OF YELLOW FLEXIBLE NONMETALLIC TUBING (AS MANUFACTURED BY CARLON) FOR COMMUNICATION CABLING. COORDINATE SIZE AND QUANTITY OF TUBING WITH COMMUNICATION SYSTEM WIRING REQUIREMENTS. VERIFY CONNECTION REQUIREMENTS AND ROUGH-IN LOCATION WITH FURNITURE SYSTEM CONTRACTOR. ROUTE CONDUIT UP WALL OR COLUMN TO CEILING SPACE AND OVER TO CABLE TRAY. SIZE AS NOTED ON PLANS.

CODED NOTES: #

1. GYPSUM WALL ASSEMBLY (UL/ULC CLASSIFIED U300 OR U400 SERIES) (1-HR. OR 2-HR. FIRE-RATING, 2-HR. SHOWN).
2. (NOT SHOWN). WOOD STUDS TO CONSIST OF NOMINAL 2" x 4" LUMBER. STEEL STUDS TO BE MINIMUM 2-1/2" WIDE.
3. PENETRATING ITEM TO BE ONE OF THE FOLLOWING :
   a. MAXIMUM 30" DIAMETER STEEL PIPE (SCHEDULE 10 OR HEAVIER).
   b. MAXIMUM 30" DIAMETER CAST IRON PIPE.
   c. MAXIMUM 6" NOMINAL DIAMETER COPPER PIPE.
   d. MAXIMUM 6" NOMINAL DIAMETER STEEL CONDUIT.
   e. MAXIMUM 4" NOMINAL DIAMETER EMT.
4. HILTI FS-ONE HIGH PERFORMANCE INTUMESCENT FIRESTOP SEALANT :
   a. MINIMUM 5/8", FOR A 1-HR. FIRE-RATING.
   b. MINIMUM 1-1/4" DEPTH, FOR A 2-HR. FIRE-RATING.
5. MINIMUM 1/2" BEAD HILTI FS-ONE HIGH PERFORMANCE INTUMESCENT FIRESTOP SEALANT AT POINT OF CONTACT.

GENERAL NOTES:

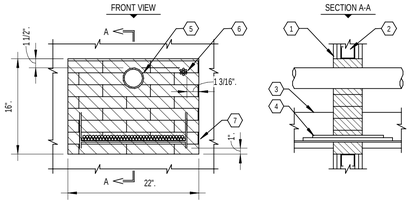
1. MAXIMUM DIAMETER OF OPENING :
   a. 32-1/4" FOR STEEL STUD WALLS.
   b. 14-1/2" FOR WOOD STUD WALLS.
2. ANNULAR SPACE = MINIMUM 0", MAXIMUM 2-1/2".

UL/cUL SYSTEM NO. W-L-1054

F-RATING = 1-HR. OR 2-HR.
T-RATING = 0-HR.
L-RATING AT AMBIENT = LESS THAN 1 CFM/SQ.
FT. L-RATING AT 400°F = 4 CFM/SQ. FT.

METAL PIPE THROUGH GYPSUM WALL ASSEMBLY

N.T.S.



CODED NOTES: #

1. GYPSUM WALL ASSEMBLY (UL/ULC CLASSIFIED U300 OR U400 SERIES) (1-HR. OR 2-HR. FIRE-RATING) (2-HR. SHOWN).
2. (NOT SHOWN). WOOD STUDS TO CONSIST OF NOMINAL 2" x 4" LUMBER. STEEL STUDS TO BE MINIMUM 2-1/2" WIDE.
3. OPEN LADDER CABLE TRAY (MAXIMUM 18" x 6", STEEL OR ALUMINUM).
4. ANY OF THE FOLLOWING CABLES MAY BE USED WITH MAXIMUM 30% FILL OF CABLE TRAY :
   a. MAXIMUM 350 KCMIL SINGLE CONDUCTOR POWER CABLE.
   b. MAXIMUM 7/C NO. 12 AWG COPPER CONDUCTOR CABLE.
   c. MAXIMUM 100 PAIR NO. 24 AWG TELEPHONE CABLE.
5. MAX. 3" NOMINAL DIAMETER PVC PLASTIC PIPE (SCHEDULE 40) (CLOSED OR VENTED PIPING SYSTEM) (SEE NOTE NO. 1 BELOW).
6. MAXIMUM 1-1/2" DIAMETER CABLE BUNDLE TO CONSIST OF ANY OF THE FOLLOWING :
   a. FIBER-OPTIC CABLE (24 FIBER).
   b. RG 59 COAXIAL CABLE.
   c. MAX. 25 PAIR NO. 24 AWG TELEPHONE CABLE
   d. MAX. 7/C NO. 12 AWG COPPER CONDUCTOR.
7. HILTI FS 657 FIRE BLOCKS (2" THICK x 8" WIDE x 5" DEEP, REFERENCE : FRONT VIEW).

GENEAL NOTES:

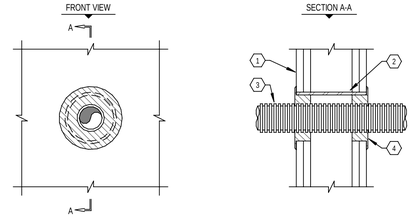
1. (NOT SHOWN). PENETRATING ITEMS MAY ALSO INCLUDE A MAX. 6" NOM. DIA. STEEL PIPE, MAX. 6" NOM. DIA. STEEL CONDUIT; MAX. 4" NOM. DIA. COPPER PIPE, OR MAX. 4" NOM. DIA. EMT.
2. (NOT SHOWN): MAX. 1-1/2" GLASS-FIBER INSULATION MAY BE USED ON ANY OR ALL METALLIC PIPES.
3. ANNULAR SPACE = MINIMUM 1", MAXIMUM 9-1/4".
4. APPLY HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT IN ANY VOID THAT MAY EXIST (AROUND PENETRANTS, INTO INTERSTICES OF CABLES, BETWEEN CABLES AND CABLE TRAY, OR BETWEEN FIRE BLOCKS) TO MAXIMUM EXTENT POSSIBLE.

UL/cUL SYSTEM NO. W-L-8013

L-RATING AT AMBIENT = 5 CFM/SQ. FT.
2-HR. L-RATING AT 400°F = 2 CFM/SQ. FT.
F-RATING = 1-HR. OR T-RATING = 0-HR.

MULTIPLE PENETRATIONS THROUGH 1-HOUR OR 2-HOUR GYPSUM WALL ASSEMBLY

N.T.S.



CODED NOTES: #

1. GYPSUM WALL ASSEMBLY (U.L. CLASSIFIED U300 OR U400 SERIES) (1-HR OR 2-HR FIRE-RATING, 2-HR SHOWN).
2. OPTIONAL: MAXIMUM 4" NOMINAL DIAMETER STEEL PIPE SLEEVE (SCHEDULE 40 OR THINNER).
3. MAXIMUM 2" NOMINAL DIAMETER ENT.
4. HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT:
   a. MINIMUM 5/8" DEPTH, FOR A 1-HR FIRE-RATING.
   b. MINIMUM 1-1/4" DEPTH, FOR A 2-HR FIRE-RATING.

GENERAL NOTES:

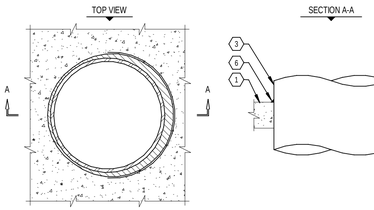
1. MAXIMUM DIAMETER OF OPENING = 4".
2. ANNULAR SPACE = 3/4".

U.L. SYSTEM NO. WL2075

F-RATING = 1-HR. AND 2-HR.
T-RATING = 0-HR. AND 2-HR. (FOR 1-HR. AND 2-HR. WALLS, RESPECTIVELY) L RATING AT AMBIENT = LESS THAN 1 CFM/SQ. FT.
L RATING AT 400°F = 4 CFM/SQ. FT.

ENT THROUGH GYPSUM WALL ASSEMBLY

N.T.S.



CODED NOTES: #

1. CONCRETE FLOOR OR WALL ASSEMBLY (3-HR FIRE-RATING):
   a. LIGHTWEIGHT OR NORMAL WEIGHT CONCRETE FLOOR OR WALL (MIN. 4-1/2" THICK).
   b. ANY UL/ULC CLASSIFIED CONCRETE BLOCK WALL.
2. OPTIONAL: MAXIMUM 32" NOMINAL DIAMETER STEEL PIPE SLEEVE (SCHEDULE 40 OR HEAVIER).
3. PENETRATING ITEM TO BE ONE OF THE FOLLOWING:
   a. MAXIMUM 30" NOMINAL DIAMETER STEEL PIPE (SCHEDULE 10 OR HEAVIER).
   b. MAXIMUM 30" NOMINAL DIAMETER CAST IRON PIPE.
   c. MAXIMUM 6" NOMINAL DIAMETER COPPER PIPE.
   d. MAXIMUM 6" NOMINAL DIAMETER STEEL CONDUIT.
   e. MAXIMUM 4" NOMINAL DIAMETER EMT.
4. MINIMUM 4" THICKNESS MINERAL WOOL (MIN. 4 PCF DENSITY) TIGHTLY PACKED.
5. MINIMUM 1/4" DEPTH HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT.
6. MINIMUM 1/4" CROWN HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT APPLIED AT POINT OF CONTACT.

GENERAL NOTES:

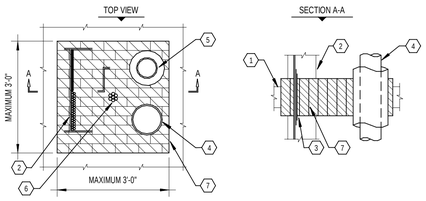
1. MAXIMUM DIAMETER OF OPENING = 32".
2. ANNULAR SPACE = MINIMUM 0", MAXIMUM 1-7/8".
3. MINIMUM 1/4" DEPTH HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT IS REQUIRED ON BOTH SIDES OF A WALL ASSEMBLY.

UL/cUL SYSTEM NO. CAJ1226

F-RATING = 3-HR.
T-RATING = 0-HR.
L-RATING AT AMBIENT = LESS THAN 1 CFM/SQ. FT.
L-RATING AT 400° F = 4 CFM/SQ. FT.

METAL PIPE THROUGH SLEEVE IN CONCRETE FLOOR/WALL OR BLOCK WALL

N.T.S.



CODED NOTES: #

1. CONCRETE FLOOR OR WALL ASSEMBLY (3-HR FIRE-RATING):
   a. LIGHTWEIGHT OR NORMAL WEIGHT CONCRETE FLOOR OR WALL (MIN. 4-1/2" THICK).
   b. ANY UL/ULC CLASSIFIED CONCRETE BLOCK WALL.
2. MAXIMUM 18" x 6" ALUMINUM OR STEEL OPEN LADDER CABLE TRAY.
3. ANY COMBINATION OF THE FOLLOWING CABLES MAY BE USED WITHIN THE CABLE TRAY (SEE NOTE NO. 4 BELOW):
   a. 7/C NO. 12 AWG COPPER CONDUCTOR CABLE.
   b. MAX. 500 KCMIL SINGLE CONDUCTOR CABLE.
   c. MAX. 300 PAIR NO. 24 AWG TELEPHONE CABLE.
   d. 24 FIBER-OPTIC CABLE (MAX. 1/2" DIAMETER).
4. PENETRATING ITEMS TO BE ANY OF THE FOLLOWING: MAXIMUM 6" NOMINAL DIAMETER STEEL PIPE OR STEEL CONDUIT; MAXIMUM 6" NOMINAL DIAMETER CAST IRON PIPE; OR MAXIMUM 4" NOMINAL DIAMETER COPPER PIPE OR EMT.
5. MAXIMUM 1-1/2" GLASS FIBER INSULATION.
6. MAXIMUM 2" CABLE BUNDLE TO BE A COMBINATION OF ANY OF THE FOLLOWING:
   a. 7/C NO. 12 AWG CABLE.
   b. 25 PAIR NO. 24 AWG TELEPHONE CABLE.
   c. ROMEX (2/C NO. 10 +GND).
   d. 3/C NO. 8 ALUMINUM CLAD CABLE.
   e. RG 62A COAXIAL CABLE.
   f. 24 FIBER-OPTIC CABLE (MAX. 1/2" DIA.).
7. HILTI FS 657 FIRE BLOCK (2" THICK x 5" WIDE x 8" DEEP, REF. TOP VIEW).

GENERAL NOTES:

1. MAXIMUM AREA OF OPENING = 1296 SQUARE INCHES, WITH MAXIMUM DIMENSION OF 36 INCHES
2. ANNULAR SPACE FOR CABLE TRAY = MINIMUM 1-1/2", MAXIMUM 4-1/2".
3. ANNULAR SPACE FOR PIPE AND CABLE PENETRATIONS = MINIMUM 1", MAXIMUM 4-1/2".
4. MAXIMUM AREA OF CABLES EQUALS 30% OF CROSS-SECTIONAL AREA OF CABLE TRAY.
5. APPLY HILTI FS-ONE INTUMESCENT FIRESTOP SEALANT INTO INTERSTICES OF CABLES, BETWEEN CABLES AND CABLE TRAY, AND ANY VOIDS TO MAXIMUM EXTENT POSSIBLE.
6. WIRE MESH (NOT SHOWN), WHEN THE ANNULAR SPACE EXCEEDS 4-1/2", A NOMINAL 2 IN. SQ., NO. 16 SWG WIRE MESH SHALL BE USED TO KEEP THE HILTI FS 657 FIRE BLOCKS IN PLACE.

UL/cUL SYSTEM NO. CAJ8056

F-RATING = 3-HR. L-RATING AT AMBIENT = 5 CFM/SQ. FT.
T-RATING = 0-HR. L-RATING AT 400°F = 2 CFM/SQ. FT.

MULTIPLE PENETRATING ITEMS THROUGH CONCRETE FLOOR/WALL OR BLOCK WALL

GROUNDING DETAIL
N.T.S.

GROUNDING DETAIL REFERENCED NOTES:

1. MGB (MAIN GROUND BAR) SHALL BE ERICO #EGBA14412- - (INCLUDES MOUNTING BRACKET AND INSULATORS; HOLE PATTERN AS REQUIRED FOR INSTALLATION, INCLUDING SPARE HOLES FOR FUTURE USE.) OR EQUAL BY HARGER. USE COMPRESSION CONNECTORS (LISTED FOR GROUNDING) TO CONNECT COPPER WIRE TO MGB.
2. TMGB (TELECOMMUNICATION MAIN GROUND BAR) SHALL BE ERICO #TMGBA12L15PT (INCLUDES MOUNTING BRACKET AND INSULATORS) OR EQUAL BY HARGER. USE COMPRESSION CONNECTORS (LISTED FOR GROUNDING) TO CONNECT COPPER WIRE TO TMGB.
3. TGB (TELECOMMUNICATION GROUND BAR) SHALL BE ERICO #TGBA12L06PT (INLUDES MOUNTING BRACKET AND INSULATORS) OR EQUAL BY HARGER. USE PRESSURE CONNECTORS (LISTED FOR GROUNDING) TO CONNECT COPPER WIRE TO TGB.
4. METAL BUILDING FRAME MUST BE USED AS A GROUNDING ELECTRODE WHERE IT IS EFFECTIVELY GROUNDED PER NEC SECTION 250.52. PROVIDE #3/0 BONDING JUMPERS AS REQUIRED TO PROVIDE CONTINUOUS CONDUCTIVITY WHERE BUILDING FRAME IS SEPARATED INTO ELECTRICALLY ISOLATED SECTIONS AS MAY OCCUR FROM EXPANSION JOINTS, BUILDING ADDITIONS, BUILDING ELEVATION CHANGES, AND THE LIKE.
5. WHERE A WATER METER OR FILTERING EQUIPMENT IS IN THIS METAL WATER PIPING SYSTEM, IT MUST BE BONDED AROUND TO MAINTAIN CONTINUITY EVEN IF THE WATER METER OR FILTER IS REMOVED PER NEC SECTION 250.52.
6. THE REBAR MUST NOT BE LESS THAN 20 FEET IN LENGTH AND 1/2" IN DIAMETER OR 20 FEET OR MORE OF BARE COPPER CONDUCTOR NOT SMALLER THAN NO. 4 IN THE BOTTOM OF THE FOOTER PER NEC SECTION 250.52.
7. GROUND RING SHALL BE A BARE COPPER CONDUCTOR, NOT SMALLER THAN NO. 2 AND AT LEAST 20 FEET LONG. THE CONDUCTOR MUST "ENCIRCLE" THE BUILDING OR STRUCTURE AND BE BURIED NOT LESS THAN 2-1/2 FEET DEEP PER NEC SECTION 250.52.
8. IF INSTALLED IN OR ATTACHED TO A BUILDING OR STRUCTURE, METAL PIPING SYSTEM(S), INCLUDING GAS PIPING, THAT IS LIKELY TO BECOME ENERGIZED SHALL BE BONDED PER NEC 250.104 (B). THE BONDING CONDUCTOR(S) OR JUMPER(S) SHALL BE SIZED IN ACCORDANCE WITH TABLE 250.122, AND EQUIPMENT GROUNDING CONDUCTORS SHALL BE SIZED IN ACCORDANCE WITH TABLE 250.122 USING THE RATING OF THE CIRCUIT THAT IS LIKELY TO ENERGIZE THE PIPING SYSTEM(S). THE POINTS OF ATTACHMENT OF THE BONDING JUMPER(S) SHALL BE ACCESSIBLE.
9. THE METAL FRAME OF THE BUILDING SHALL BE USED AS A COMMON GROUNDING ELECTRODE CONDUCTOR. IF BUILDING DOES NOT HAVE A METAL FRAME, A #3/0 COMMON GROUNDING ELECTRODE CONDUCTOR SHALL BE RUN FROM THE MAIN GROUND BAR FOR ALL SEPARATELY DERIVED SYSTEMS. MULTIPLE SEPARATELY DERIVED SYSTEMS MAY BE CONNECTED TO THE GROUNDING ELECTRODE SYSTEM BY INDIVIDUAL CONDUCTORS OR A COMMON CONDUCTOR WITH TAPS. THE GROUNDING ELECTRODE TAP CONDUCTOR FOR EACH SYSTEM SHALL BE CONNECTED TO THE COMMON GROUNDING ELECTRODE CONDUCTOR WITH THE CONNECTION IN AN ACCESSIBLE LOCATION.
10. IF INCLUDED AS PART OF THE PROJECT, THE LIGHTNING PROTECTION SYSTEM SHALL BE BONDED TO THE GROUNDING ELECTRODE SYSTEM AT THE MAIN GROUND BAR. INTERCONNECTIONS AND SIZING OF THE BONDING CONDUCTOR(S) SHALL BE INSTALLED PER NFPA 780 AND AS REQUIRED BY THE DELEGATED DESIGN FOR THE UL MASTER LABELED LIGHTNING PROTECTION SYSTEM.
11. GROUNDING CONDUCTORS TO ADDITIONAL EQUIPMENT AS REQUIRED BY NEC 250 AND SPECIFICATIONS.

GROUNDING DETAIL GENERAL NOTES:

1. ALL GROUNDING WORK AND MATERIALS SHALL BE FURNISHED AND INSTALLED IN ACCORDANCE WITH REQUIREMENTS IN NEC 250.
2. ALL GROUNDING CONDUCTORS SHALL BE COPPER. PROVIDE INSULATED CONDUCTORS FOR INTERIOR INSTALLATIONS AND BARE COPPER FOR EXTERIOR INSTALLATIONS.
3. ALL UNDERGROUND CONNECTIONS TO ELECTRODES AND CONDUCTORS SHALL BE MADE BY EXOTHERMIC WELDING.
4. CONDUCTOR CONNECTIONS TO MAIN GROUND BAR SHALL BE MADE WITH COMPRESSION CONNECTORS LISTED FOR GROUNDING.
5. GROUNDING ELECTRODE AND BONDING JUMPERS SHALL BE INSTALLED SO THAT THEY ARE NOT ANY LONGER THAN NECESSARY AND ANY UNNECESSARY BENDS AND LOOPS ARE AVOIDED.
6. REFERENCE ONE-LINE DIAGRAM FOR CONDUCTOR SIZE OF THE SUPPLY SIDE BONDING JUMPER AND GROUNDING ELECTRODE TAP CONDUCTOR SERVING SEPARATELY DERIVED SYSTEM(S).
7. REFERENCE ONE-LINE DIAGRAM FOR CONDUCTOR SIZE OF THE EQUIPMENT GROUNDING CONDUCTOR SERVING ELECTRICAL DISTRIBUTION EQUIPMENT.
8. INSTALL SLEEVES, SLEEVE SEALS, FIRE STOPPING, RACEWAYS TO PROTECT AGAINST PHYSICAL DAMAGE AND ENVIRONMENTAL CONDITIONS WHERE REQUIRED. FURNISH AND INSTALL BONDING BUSHINGS WHERE FERROUS METALLIC RACEWAYS ARE UTILIZED.
9. GROUND ELECTRODE CONDUCTORS (GECS) AND BONDING JUMPERS ARE PERMITTED TO BE SIZED BASED ON THE ELECTRODES TO WHICH THEY CONNECT, AS SPECIFIED IN NEC 250.66(A), (B), OR (C). HOWEVER, IF THE GEC OR BONDING JUMPER EXTENDS FROM THIS CONNECTION TO AN ELECTRODE THAT IS NOT SPECIFIED IN NEC 250.66(A), (B), OR (C), IT MUST BE SIZED PER NEC TABLE 250.66. THE USE OF BONDING JUMPERS OR GECS LARGER THAN REQUIRED BY NEC 250.66 IS NOT PROHIBITED.

ELECTRICAL DISTRIBUTION EQUIPMENT SURGE SUPPRESSION GUIDELINES

- 320KA FOR SERVICE ENTRANCE EQUIPMENT (SWITCHGEAR);
- 240KA OR 250KA FOR SERVICE ENTRANCE EQUIPMENT (SWITCHBOARDS)
- 140KA OR 150KA FOR DISTRIBUTION PANELS;
- 80KA FOR BRANCH / SUB-PANELS.

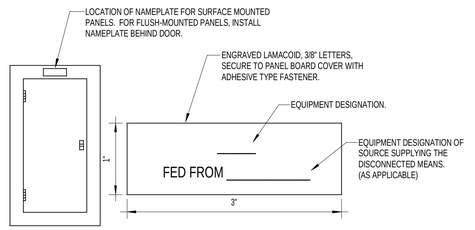
PROVIDE A DISCONNECTING MEANS FOR EACH SURGE SUPPRESSION DEVICE FOR MAINTENANCE.

REFERENCE SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

FAULT CURRENT NOTE:
THE AVAILABLE FAULT CURRENT RATINGS ARE UNKNOWN AT THIS TIME AS THE POWER COMPANY IS IN THE PROCESS OF DESIGNING THE ELECTRICAL DISTRIBUTION SYSTEM FOR THE PROJECT AREA. THE ELECTRICAL CONTRACTOR SHALL OBTAIN THE AVAILABLE FAULT CURRENT FROM THE POWER COMPANY. THE ELECTRICAL CONTRACTOR SHALL UTILIZE THE EQUIPMENT MANUFACTURER TO PERFORM A FAULT CURRENT STUDY BASED ON THE AVAILABLE FAULT CURRENT PROVIDED BY THE UTILITY COMPANY, ACTUAL FEEDER SIZES, ACTUAL FEEDER LENGTHS, AND ACTUAL EQUIPMENT PROVIDED. SUBMIT FAULT CURRENT STUDY WITH SHOP DRAWING SUBMITTAL. THE ELECTRICAL CONTRACTOR SHALL PROVIDE EQUIPMENT RATED TO MEET OR EXCEED THE LEVELS INDICATED IN THE FAULT CURRENT STUDY. **NO ELECTRICAL DISTRIBUTION SHALL BE PURCHASED UNTIL AVAILABLE FAULT CURRENT IS CONFIRMED.**

ONE-LINE DIAGRAM NOTES

1. THE ELECTRICAL CONTRACTOR SHALL VERIFY ALL POWER COMPANY REQUIREMENTS PRIOR TO BIDDING & INCLUDE THE COST OF ALL ASSOCIATED LABOR, MATERIALS, & CHARGES IN HIS BID.
2. THE ELECTRICAL CONTRACTOR SHALL VERIFY THE AVAILABLE FAULT CURRENT WITH THE UTILITY COMPANY PRIOR TO BIDDING AND PROVIDE EQUIPMENT RATED ACCORDINGLY. SUBMIT FAULT CURRENT CALCULATIONS WITH SHOP DRAWING SUBMITTAL.
3. ALL BUSSING SHALL BE COPPER.
4. PROVIDE FULL LENGTH VERTICAL BUSSING IN ALL SWITCHBOARDS, DISTRIBUTION PANELS, & PANELBOARDS.
5. PROVIDE FULL SIZE HORIZONTAL BUSSING IN ALL SWITCHBOARDS.
6. ALL CIRCUIT BREAKERS SHALL BE BOLT-ON TYPE.
7. ALL WALL-MOUNTED EQUIPMENT SHALL BE MOUNTED ON 3/4" FIRE RATED BACKBOARD.
8. ALL FLOOR-MOUNTED EQUIPMENT SHALL BE MOUNTED ON 4" HIGH CONCRETE HOUSEKEEPING PAD.
9. PROVIDE NAMEPLATES PER NAMEPLATE DETAIL, ON THIS SHEET.
10. COORDINATE SPACE WITH ALL OTHER TRADES TO MAINTAIN ALL CODE- REQUIRED CLEARANCES.
11. REFER TO ELECTRICAL SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
12. THE ELECTRICAL CONTRACTOR SHALL PROVIDE FINAL SETTINGS REQUIRED FOR ALL ADJUSTABLE/ELECTRONIC TYPE CIRCUIT BREAKERS WITH LONGTIME, SHORT TIME, GF, INSTANTANEOUS, ETC. THE ELECTRICAL CONTRACTOR SHALL PROVIDE FINAL COORDINATION STUDY.
13. PROVIDE ARC ENERGY REDUCTION AS APPLICABLE:
    - WHERE BREAKERS ARE UTILIZED WITHIN ELECTRICAL DISTRIBUTION EQUIPMENT, THE ELECTRICAL CONTRACTOR SHALL PROVIDE BREAKERS EQUIPPED WITH ADJUSTABLE INSTANTANEOUS TRIP SETTING TO COMPLY WITH NEC 240.87 ARC ENERGY REDUCTION. THE ADJUSTABLE INSTANTANEOUS TRIP SETTING OPTION SHALL BE PROVIDED WHERE THE HIGHEST CONTINUOUS TRIP SETTING FOR WHICH THE ACTUAL OVERCURRENT DEVICE INSTALLED IN A CIRCUIT BREAKER IS RATED OR CAN BE ADJUSTED IS 1200A OR HIGHER.
    - WHERE FUSES ARE UTILIZED WITHIN ELECTRICAL DISTRIBUTION EQUIPMENT, THE ELECTRICAL CONTRACTOR SHALL PROVIDE FUSES EQUIPPED WITH CLEARING TIME OF 0.07 SECONDS OR LESS AT AVAILABLE ARCING CURRENT TO COMPLY WITH NEC 240.67 ARC ENERGY REDUCTION. THIS SHALL BE PROVIDED WHERE THE FUSE IS RATED AT 1200A OR HIGHER.
    - PROVIDE PERFORMANCE TESTING PER NEC FOR ARC ENERGY REDUCTION SYSTEM. ENGAGE A FACTORY AUTHORIZED SERVICE REPRESENTATIVE TO PERFORM TESTING AND PROVIDE REQUIRED DOCUMENTATION. PROVIDE COPY OF TESTING AND DOCUMENTATION TO EOR AND LOCAL AHJ.
14. THE ELECTRICAL CONTRACTOR SHALL COMPLY WITH NEC ARTICLE 110.16 FOR LABELING OF PANELS FOR ARC FLASH HAZARD WARNING AS WELL AS FOLLOWING REQUIRED SAFETY PRECAUTIONS WHEN SERVICING OR MAINTAINING ELECTRICAL EQUIPMENT.
15. HVAC CIRCUIT BREAKERS TO BE "HACR" TYPE WHERE REQUIRED BY EQUIPMENT NAMEPLATE PER NEC.
16. ELECTRICAL CONTRACTOR SHALL BALANCE PANELS AND ELECTRICAL EQUIPMENT TO ±10% BETWEEN PHASES: A/B, B/C, A/C REGARDLESS OF CIRCUITING INDICATED.
17. PROPER CLEARANCE MUST BE MAINTAINED ABOUT ELECTRICAL EQUIPMENT PER NEC. FIELD VERIFY EXACT MOUNTING SPACE AVAILABLE IN ELECTRICAL ROOM / AREA PRIOR TO INSTALLATION OF ELECTRICAL EQUIPMENT.
18. ELECTRICAL CONTRACTOR SHALL MAKE FINAL ELECTRICAL CONNECTIONS FOR A COMPLETE ELECTRICAL DISTRIBUTION SYSTEM.
19. EXTERIOR MOUNTED ELECTRICAL EQUIPMENT SHALL BE NEMA 3R RATED AND BE FURNISHED WITH HEATERS, THERMOSTAT AND DISCONNECTING MEANS INTEGRAL TO EQUIPMENT.
20. GROUNDING ELECTRODE SYSTEM CONDUCTORS SHALL BE COPPER.
21. CONDUCTORS SHALL BE COPPER, UNLESS NOTED OTHERWISE.
22. FEEDER ROUTING IS DIAGRAMMATIC ONLY. ACTUAL ROUTING OF FEEDERS (OVERHEAD OR UNDERGROUND) IS THE RESPONSIBILITY OF THE ELECTRICAL CONTRACTOR.



NOTE:
NAMEPLATES ARE REQUIRED ON ALL SWITCHBOARDS, DISTRIBUTION PANELS, PANELBOARDS, ENCLOSURES AND ELECTRICAL CABINETS, ACCESS DOORS/PANELS FOR CONCEALED ELECTRICAL EQUIPMENT, EMERGENCY SYSTEMS/BOXES, MOTOR CONTROL CENTERS, ENCLOSED SWITCHES/CIRCUIT BREAKERS/CONTROLLERS, POWER-TRANSFER DEVICES, PUSH-BUTTONS, CONTACTORS, LIGHTING CONTROL SYSTEMS, INVERTERS, GENERATORS, UPS, MONITORING EQUIPMENT, STARTERS, DISCONNECT SWITCHES, METER SOCKETS, RELAYS, TRANSFORMERS, AND JUNCTION BOXES GREATER THAN 4 11/16" SQUARE. ALSO PROVIDE NAMEPLATES ON BRANCH SWITCHES/BREAKERS OF SWITCHBOARDS AND DISTRIBUTION PANELS.

STANDARD COLORS:
1. NORMAL POWER - WHITE BACKGROUND, BLACK LETTERS
2. EMERGENCY POWER - RED BACKGROUND, WHITE LETTERING
3. IN ADDITION TO THE FUNCTION NAMEPLATE, PROVIDE NAMEPLATES IDENTIFYING ALL "MAIN SERVICE NAMEPLATE DISCONNECTS" - RED BACKGROUND - WHITE LETTERING

NAMEPLATE DETAIL
N.T.S.

FEEDER NOTES

1. ALL FEEDER AND BRANCH CIRCUIT CONDUCTORS INDICATED ON THE PLANS AND ONE-LINE DIAGRAM(S) ARE BASED UPON THE USE OF COPPER CONDUCTORS, UNLESS NOTED OTHERWISE. "(AL)" - WITHIN THE FEEDER SIZE INDICATES ALUMINUM CONDUCTORS SPECIFIED.
2. IF APPROVED FOR USE BY THE OWNER, LANDLORD, AUTHORITY HAVING JURISDICTION, AND POWER COMPANY, THE CONTRACTOR MAY FURNISH AND INSTALL ALUMINUM CONDUCTORS FOR THE FOLLOWING:
   a. SECONDARY ELECTRIC SERVICE LATERALS.
   b. FEEDERS RATED 100A AND LARGER.
3. ALUMINUM CONDUCTORS ARE PROHIBITED FROM BEING USED TO SERVE ANY EQUIPMENT THAT SPECIFICALLY CALLS FOR THE USE OF COPPER CONDUCTORS OR PROHBITS THE USE OF ALUMINUM CONDUCTORS WITHIN THE EQUIPMENTS' RESPECTIVE WRITTEN INSTALLATION INSTRUCTIONS.
4. CONDUCTORS: ALUMINUM, COMPLYING WITH ASTM B800 AND ASTM B801.
5. CONDUCTOR INSULATION: TYPE THHN AND TYPE THWN-2: COMPLY WITH UL 83; TYPE XHHW-2: COMPLY WITH UL 44.
6. CONDUCTOR INSULATION, APPLICATIONS AND WIRING METHODS:
   a. SERVICE ENTRANCE: TYPE XHHW-2, SINGLE CONDUCTORS IN RACEWAY;
   b. FEEDERS: TYPE THHN/THWN-2, SINGLE CONDUCTORS IN RACEWAY.
7. CONNECTORS AND SPLICES: FACTORY-FABRICATED CONNECTORS, SPLICES, AND LUGS OF SIZE, AMPACITY RATING, MATERIAL, TYPE, AND CLASS FOR APPLICATION AND SERVICE INDICATED; LISTED AND LABELED AS DEFINED IN NFPA 70, BY A QUALIFIED TESTING AGENCY, AND MARKED FOR INTENDED LOCATION AND USE.
8. LUGS: ONE PIECE, SEAMLESS, DESIGNED TO TERMINATE CONDUCTORS BEING FURNISHED.
   a. APPLICATION: CONNECTIONS TO SERVICE ENTRANCE ELECTRICAL DISTRIBUTION EQUIPMENT AND DEVICES, VIBRATING EQUIPMENT, GENERATORS, BUS BARS.
   b. MATERIAL: COPPER/ALUMINUM.
   c. TYPE: ONE OR TWO HOLE WITH STANDARD OR LONG BARRELS, CONFIGURATION PER APPLICATION.
   d. TERMINATION: COMPRESSION.
9. LUGS: ONE PIECE, SEAMLESS, DESIGNED TO TERMINATE CONDUCTORS BEING FURNISHED.
   a. APPLICATION: CONNECTIONS OF FEEDERS TO ELECTRICAL DISTRIBUTION EQUIPMENT AND DEVICES THAT ARE NOT SERVICE ENTRANCE RATED.
   b. MATERIAL: COPPER/ALUMINUM.
   c. TYPE: SET SCREW.
   d. TERMINATION: MECHANICAL.
10. CONNECTIONS: TIGHTEN ELECTRICAL CONNECTORS AND TERMINALS ACCORDING TO MANUFACTURER'S PUBLISHED TORQUE-TIGHTENING VALUES. SUBMIT FIELD QUALITY REPORT SHOWING PUBLISHED TORQUE-TIGHTENING VALUES AND INSTALLED TORQUE VALUES.
11. CONNECTIONS: MAKE SPLICES, TERMINATIONS, AND TAPS THAT ARE COMPATIBLE WITH CONDUCTOR MATERIAL AND THAT POSSESS EQUIVALENT OR BETTER MECHANICAL STRENGTH AND INSULATION RATINGS THAN UNSPLICED CONDUCTORS.
    a. WHERE RECOMMENDED BY WIRE AND/OR TERMINATION MANUFACTURERS, FURNISH AND INSTALL OXIDE INHIBITOR AT TERMINATIONS, SPLICES, AND TAPS.
12. THE GROUNDING ELECTRODE SYSTEM SHALL UTILIZE COPPER CONDUCTORS.
13. IF ALUMINUM CONDUCTORS ARE UTILIZED, BASED ON THE ABOVE CRITERIA, THE ALUMINUM CONDUCTOR SIZES BEING FURNISHED SHALL BE INCREASED TO MEET OR EXCEED THE RATINGS OF THE SPECIFIED COPPER FEEDER CHARACTERISTICS, SUCH AS AMPERAGE AND VOLTAGE DROP. THE CONDUIT, ASSOCIATED WITH EACH OF THE FURNISHED ALUMINUM FEEDERS, SHALL ALSO BE INCREASED TO COMPLY WITH CODE FOR THE QUANTITY AND SIZE OF ALUMINUM CONDUCTORS BEING UTILIZED. E.C. SHALL VERIFY THE EQUIPMENT/DISTRIBUTION LUGS ARE ADEQUATELY SIZED AND RATED TO ACCEPT THE SPECIFIED ALUMINUM CONDUCTORS, AND THE SHORT CIRCUIT RATINGS OF THE ELECTRICAL DISTRIBUTION EQUIPMENT SHALL BE INCREASED, AS REQUIRED, TO ACCOMMODATE THE HIGHER AVAILABLE SHORT CIRCUIT RATING AT THE RESPECTIVE EQUIPMENT'S TERMINALS DUE TO ALUMINUM CONDUCTORS BEING UTILIZED. IF EQUIPMENT/DISTRIBUTION MUST INCREASE IN SIZE TO ACCOMMODATE THE SPECIFIED ALUMINUM CONDUCTORS, THE E.C. SHALL BE RESPONSIBLE TO VERIFY ALL CLEARANCES PER N.E.C. ARE MAINTAINED.

PANELBOARD SCHEDULE CIRCUIT BREAKER NOTES

- ALL BREAKERS SHALL BE "HACR" RATED.
- NOT ALL NOTES MAY APPLY TO THIS PROJECT.

GFI - 5mA "GFI" TYPE FOR PERSONNEL PROTECTION
GFE - 30mA "GFI" TYPE FOR EQUIPMENT PROTECTION
AF - "ARC-FAULT" TYPE
AF/G - COMBINATION "ARC-FAULT / 5mA GFI" TYPE
ST - SHUNT-TRIP TYPE
ET - ELECTRONIC TRIP TYPE
L - BREAKER TO HAVE LOCK-ON CLIP
L/R - BREAKER TO HAVE LOCK-ON CLIP AND RED MARKING
HT - FURNISH AND INSTALL HANDLE TIES FOR MULTIPLEX CIRCUITS
EB - EXISTING BREAKER WITH NEW CIRCUIT. EXISTING BREAKER ASSUMED TO BE SPARE OR EXISTING CIRCUIT ASSUMED DEMOLISHED DURING SCOPE OF THIS PROJECT. FIELD VERIFY.
NB - FURNISH AND INSTALL NEW BREAKER. BREAKER SHALL MATCH EXISTING PANELBOARD MANUFACTURER, TYPE AND AIC RATING.
ETR - EXISTING CIRCUIT TO REMAIN. LOAD SHOWN BASED UPON EXISTING DRAWINGS OR 80% OF FULLY LOADED BREAKER AMPACITY.

WHERE ROOM NAME/NUMBER IS INDICATED FOR CIRCUIT DESCRIPTION, CONTRACTOR IS RESPONSIBLE FOR COORDINATING EXACT NAME/NUMBER WITH ARCHITECTURAL PLANS PRIOR TO INSTALLING CIRCUIT DIRECTORY.

PANELBOARD SCHEDULE CIRCUIT BREAKER NOTES

- ALL BREAKERS SHALL BE "HACR" RATED.
- NOT ALL NOTES MAY APPLY TO THIS PROJECT.

GFI - 5mA "GFI" TYPE FOR PERSONNEL PROTECTION
GFE - 30mA "GFI" TYPE FOR EQUIPMENT PROTECTION
AF - "ARC-FAULT" TYPE
AF/G - COMBINATION "ARC-FAULT / 5mA GFI" TYPE
ST - SHUNT-TRIP TYPE
ET - ELECTRONIC TRIP TYPE
L - BREAKER TO HAVE LOCK-ON CLIP
L/R - BREAKER TO HAVE LOCK-ON CLIP AND RED MARKING
HT - FURNISH AND INSTALL HANDLE TIES FOR MULTIPLEX CIRCUITS
EB - EXISTING BREAKER WITH NEW CIRCUIT. EXISTING BREAKER ASSUMED TO BE SPARE OR EXISTING CIRCUIT ASSUMED DEMOLISHED DURING SCOPE OF THIS PROJECT. FIELD VERIFY.
NB - FURNISH AND INSTALL NEW BREAKER. BREAKER SHALL MATCH EXISTING PANELBOARD MANUFACTURER, TYPE AND AIC RATING.
ETR - EXISTING CIRCUIT TO REMAIN. LOAD SHOWN BASED UPON EXISTING DRAWINGS OR 80% OF FULLY LOADED BREAKER AMPACITY.

WHERE ROOM NAME/NUMBER IS INDICATED FOR CIRCUIT DESCRIPTION, CONTRACTOR IS RESPONSIBLE FOR COORDINATING EXACT NAME/NUMBER WITH ARCHITECTURAL PLANS PRIOR TO INSTALLING CIRCUIT DIRECTORY.

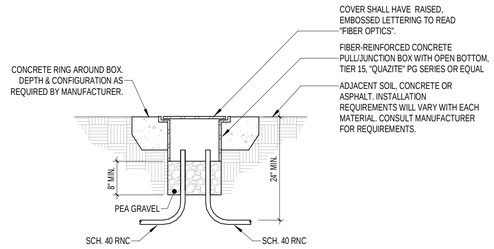
TECHNOLOGY SITE PLAN

1" = 20'-0"



NOTES:

1. SPLICES SHALL BE AVOIDED WHERE POSSIBLE. WHERE REQUIRED, SPLICES SHALL BE MADE WITH WATERPROOF CONNECTORS.
2. CONCRETE ENCASEMENT TO BE 3,000 PSI MINIMUM.
3. DO NOT LOCATE BOXES IN HIGH VOLUME TRAFFIC APPLICATIONS.
4. COMPACT SOIL AROUND BOX TO MANUFACTURERS RECOMMENDATIONS.
5. THIS DETAIL IS INTENDED TO SHOW GENERAL DESIGN INTENT ONLY. THE ELECTRICAL CONTRACTOR MUST VERIFY ALL INSTALLATION REQUIREMENTS WITH THE MANUFACTURER PRIOR TO THE BIDDING AND INSTALL ALL BOXES ACCORDINGLY.

FIRST FLOOR TECHNOLOGY PLAN

3/32" = 1'-0"

TECHNOLOGY GENERAL NOTES:

A. REFER TO ALL TECHNOLOGY DETAIL DRAWINGS AND TECHNOLOGY SPECIFICATION SECTIONS FOR ADDITIONAL INFORMATION.
B. REFERENCE ARCHITECTURAL DRAWINGS FOR ADDITIONAL INFORMATION RELATED TO THE TECHNOLOGY INSTALLATION. COORDINATE FLOOR BOX AND DEVICE LOCATIONS WITH SYSTEMS FURNITURE AND EQUIPMENT BEING PROVIDED BY OTHERS.
C. ARCHITECTURAL DRAWINGS HAVE PRIORITY OVER TECHNOLOGY DRAWINGS WITH REGARD TO LOCATIONS OF ALL VISIBLE ELEMENTS AND DEVICES. COORDINATE EXACT DEVICE LOCATIONS WITH DIMENSIONS INDICATED ON ARCHITECTURAL DRAWINGS. REFERENCE ARCHITECTURAL ELEVATIONS AND TYPICAL DEVICE MOUNTING DETAILS AND NOTES.
D. REFERENCE MECHANICAL AND PLUMBING DRAWINGS FOR ADDITIONAL INFORMATION. COORDINATE SPEAKERS, SECURITY DEVICES, TECHNOLOGY OUTLETS, DISPLAYS, RACKS, CABLE, AND PATHWAYS WITH ELECTRICAL, MECHANICAL AND PLUMBING EQUIPMENT.
E. PRIOR TO ROUGH-IN COORDINATE EXACT POWER REQUIREMENTS AND LOW VOLTAGE ROUGH-IN REQUIREMENTS FOR ALL OWNER FURNISHED EQUIPMENT AND SYSTEMS.
F. E.C. TO FURNISH ROUGH-IN AND AC POWER TO EQUIPMENT PER TECHNOLOGY DRAWINGS.
G. E.C SHALL BE RESPONSIBLE TO FURNISH AND INSTALL RACEWAYS, SLEEVES, PATHWAYS, CORING AND FIRE STOPPING FOR LOW VOLTAGE SYSTEMS. REFERENCE TECHNOLOGY DRAWINGS FOR REQUIREMENTS.
H. COORDINATE ALL TECHNOLOGY OUTLETS WITH ADJACENT ELECTRICAL OUTLETS FOR ELEVATION AND SPACING BETWEEN BOXES. REFERENCE THE TECHNOLOGY DETAIL SHEETS.
I. TECHNOLOGY OUTLETS SHALL MATCH THE MATERIAL AND FINISH OF THE ADJACENT POWER OUTLETS. COLOR AND FINISH OF ALL OUTLETS SHALL BE DETERMINED BY THE ARCHITECT. REFER TO TECHNOLOGY DETAIL DRAWINGS FOR COLORS OF INDIVIDUAL JACKS BY FUNCTION.
J. POWER RECEPTACLES ARE SHOWN FOR COORDINATOIN PURPOSES ONLY. NOT ALL POWER OUTLETS WILL APPEAR ON THIS SHEET. REFER TO THE ELECTRICAL DRAWINGS FOR DETAILED INFORMATION REGARDING POWER SYSTEMS
K. COORDINATE ACTUAL PATHWAY ROUTING, INCLUDING ALL CABLE TRAYS, SLEEVES, CONDUIT STUBS, AND J-HOOK PATHS WITH THE INSTALLING CONTRACTOR. MEASURE ACTUAL CABLE PATHWAY LENGTHS TO VERIFY THAT NO PERMANENT LINK WILL EXCEED TIA STANDARDS. ADVISE THE CM, ARCHITECT, AND DESIGNER SHOULD ANY PRELIMINARY MEASUREMENTS INDICATE INSTALLED CABLING MAY EXCEED PERMANENT LINK LENGTH LIMITS PRIOR TO THE CABLE INSTALLATION.

TECHNOLOGY CODED NOTES: (#)

1. SEE ENLARGED PLANS FOR MORE DETAILS REGARDING ROOM TECHNOLOGY.
2. LOCATION OF RESIDENT CENTRAL WIRING PANEL FOR CONNECTION OF TELEPHONE, DATA, AND CATV OUTLETS WITHIN THE RESIDENT UNIT. REFER TO TECHNOLOGY DETAIL DRAWINGS FOR MORE INFORMATION ON THE CENTRAL WIRING PANELS.
3. THREE (3) 4" EMT COMMUNICATIONS RISER CONDUITS BETWEEN FLOORS
4. COORDINATE PLACEMENT OF ELEVATOR COMMUNICATIONS OUTLETS WITH THE ELEVATOR EQUIPMENT.
5. COORDINATE PLACEMENT OF FIRE ALARM COMMUNICATIONS OUTLETS WITH THE FACP. OUTLETS SHALL BE WITHIN THE CONTROL PANEL.
6. COORDINATE PLACEMENT OF LIGHTING CONTROL PANEL COMMUNICATIONS OUTLETS WITH THE LCP. OUTLETS SHALL BE WITHIN THE CONTROL PANEL.
7. TWO (2) 4" SCHEDULE 40 RNC CONDUITS FOR COMMUNICATIONS SERVICES INTO THE BUILDING. COORDINATE EXACT PLACEMENT AND PATH WITH SERVICE PROVIDERS PRIOR TO COMMENCING SITEWORK.

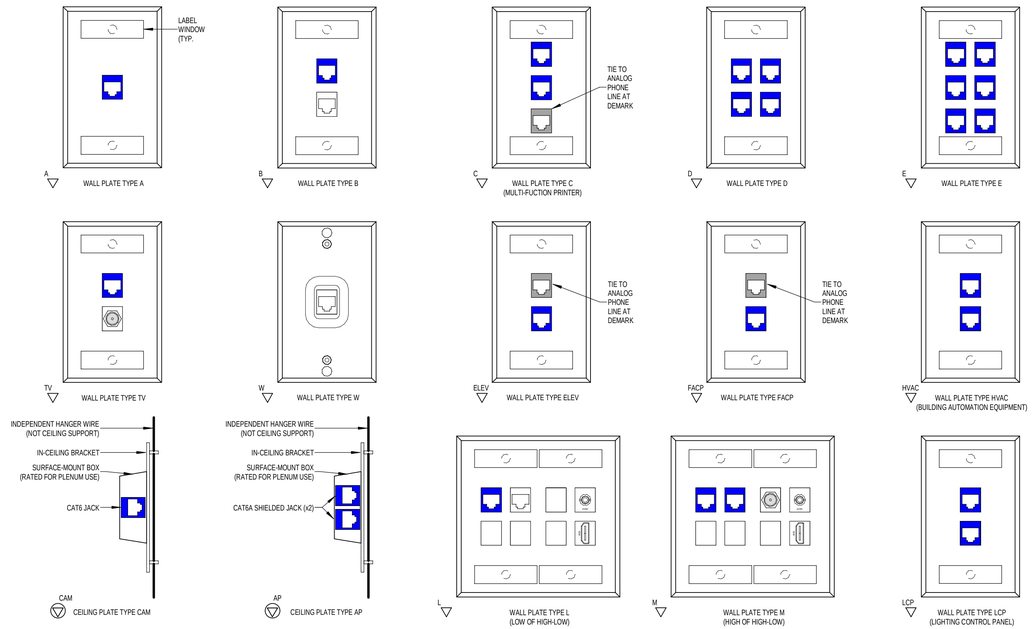
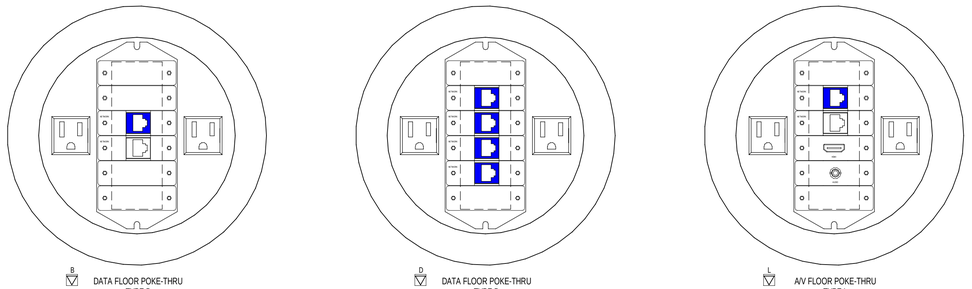
TECHNOLOGY ABBREVIATIONS

AC	ABOVE COUNTER.
ADA	AMERICANS WITH DISABILITY ACT
AFF	ABOVE FINISH FLOOR
AP	(WIRELESS) ACCESS POINT
AV	AUDIO-VISUAL
BFC	BELOW FINISHED CEILING
BICSI	BUILDING INDUSTRY CONSULTING SERVICE INTERNATIONAL
BMS	BUILDING MANAGEMENT SYSTEM
CATV	COMMUNITY ANTENNA TELEVISION (CABLE TELEVISION)
CBC	COUPLED BONDING CONDUCTOR
CCTV	CLOSED CIRCUIT TELEVISION (VIDEO SURVEILLANCE)
CM	CONSTRUCTION MANAGER
CSRS	CLASSROOM SOUND REINFORCEMENT SYSTEM
CT	CABLE TRAY
DAS	DISTRIBUTED ANTENNA SYSTEM
DVR	DIGITAL VIDEO RECORDER
EC	ELECTRICAL CONTRACTOR
EIA	ELECTRONICS INDUSTRIES ASSOCIATION
EMT	ELECTRICAL METALLIC TUBING
ENT	ELECTRICAL NONMETALLIC TUBING
ER	EQUIPMENT ROOM
ET	ELAPSED TIME
ETR	EXISTING DEVICE TO REMAIN
FPD	FLAT PANEL DISPLAY
FR	FIRE RATED
GC	GENERAL CONTRACTOR
HC	HORIZONTAL CROSS CONNECT
HVAC	HEATING, VENTILATING, AND AIR CONDITIONING
IC	INTERCOM
ICC	INTERMEDIATE CROSS CONNECT
IG	ISOLATED GROUND
IP	INTERNET PROTOCOL
LAN	LOCAL AREA NETWORK
LCR	LIGHTING CONTROL RELAY
MATV	MASTER ANTENNA TELEVISION SYSTEM
MCC	MAIN CROSS CONNECT
MM	MULTIMODE FIBER OPTIC CABLE
MUTOA	MULTI-USER TELECOMMUNICATIONS OUTLET ASSEMBLY
NEC	NATIONAL ELECTRICAL CODE
NESC	NATIONAL ELECTRICAL SAFETY CODE
NFPA	NATIONAL FIRE PROTECTION ASSOCIATION
NI	NETWORK INTERFACE
NTS	NOT TO SCALE
NVR	NETWORK VIDEO RECORDER
OBC	OHIO BUILDING CODE
OFE	OWNER FURNISHED EQUIPMENT
OSP	OUTSIDE PLANT.
PA	PUBLIC ADDRESS
PBB	PRIMARY BONDING BUSBAR
PoE	POWER OVER ETHERNET.
PTZ	PAN, TILT, ZOOM (CAMERA).
RCDD	REGISTERED COMMUNICATIONS DISTRIBUTION DESIGNER.
RF	RADIO FREQUENCY
RMC	RIGID METAL CONDUIT
RNC	RIGID PVC CONDUIT
RR	REMOVE AND RELOCATE EXISTING TECHNOLOGY DEVICE AS SHOWN OR AS NOTED ON DRAWINGS
RX	REMOVE EXISTING TECHNOLOGY DEVICE ALONG WITH RELATED CONDUIT AND CABLING, UON
SBB	SECODARY BONDING BUSBAR
SM	SINGLE MODE FIBER OPTIC CABLE
SR	SOUND REINFORCEMENT
STP	SHIELDED TWISTED PAIR
TC	TELECOMMUNICATIONS CONTRACTOR
TIA	TELECOMMUNICATIONS INDUSTRY ASSOCIATION
TR	TELECOMMUNICATION ROOM
UG	UNDERGROUND
UL	UNDERWRITER'S LABORATORIES
UON	UNLESS OTHERWISE NOTED
UPS	UNINTERRUPTIBLE POWER SUPPLY.
UTP	UNSHIELDED TWISTED PAIR.
VoIP	VOICE OVER INTERNET PROTOCOL
VP	VIDEO PROJECTOR
WAP	WIRELESS ACCESS POINT
WAN	WIDE AREA NETWORK
WP	WEATHERPROOF





NOTE: NOT ALL TYPES MAY BE USED ON THIS PROJECT

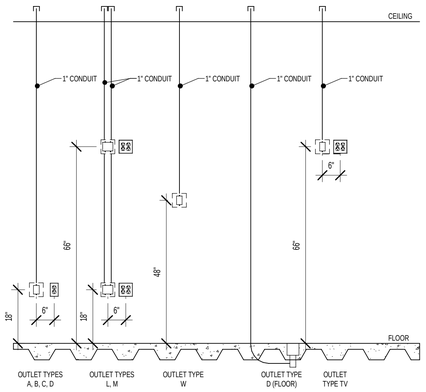
N.T.S.



CONDUIT & ROUGH-IN INSTALLATION NOTES:

A. CONDUIT & ROUGH-IN INSTALLATION IS THE RESPONSIBILITY OF THE ELECTRICAL CONTRACTOR.
B. ELECTRICAL CONTRACTOR SHALL PLACE PULL STRINGS IN ALL CONDUITS.
C. ALL CONDUITS SHALL HAVE BUSHINGS INSTALLED AT CONDUIT ENDS AND AT ALL BOX FITTINGS.
D. CONDUITS SHALL EXTEND TO ACCESSIBLE CEILING AREAS.
E. TYPICAL ELEVATIONS ARE SHOWN. VERIFY ACTUAL ELEVATIONS WITH PLAN DRAWINGS.
F. TECHNOLOGY OUTLETS ARE TO BE COORDINATED WITH ASSOCIATED POWER OUTLETS WHERE REQUIRED.

SECURITY DEVICE LEGEND

SYMBOL	DESCRIPTION
CR	CARD READER - MOUNT TO 1-GANG BOX AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
CR^K	CARD READER w. KEYPAD - MOUNT TO 1-GANG BOX AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
CR^M	CARD READER MULLION MOUNT - MOUNT TO DOOR MULLION AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
DC	DOOR CONTACT - MOUNT IN DOOR FRAME AND STUB UP TO ACCESSIBLE CEILING
DC^S	DOOR CONTACT, SURFACE MOUNT - MOUNT TO DOOR PANEL & TRACK. STUB UP TO ACCESSIBLE CEILING
DR	DOOR RELEASE - MOUNT TO 1-GANG BOX AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
EL	ELECTRIC LOCKSET - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
EP	ELECTRIC PANIC w. LATCH RETRACTION & REQUEST-TO-EXIT - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
ES	ELECTRIC STRIKE - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
KP	KEYPAD - INTRUSION DETECTION SYSTEM. MOUNT TO 3-GANG BOX AT 48" AFF.
KS	KEYSWITCH - MOUNT TO 1-GANG BOX AT 48" AFF. LOCK CORE SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS AND DIMENSIONS.
ML	MAGNETIC LOCK - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
MS	MOTION SENSOR - MOUNTS TO 1-GANG BOX MOUNTED AT ELEVATION NOTED
PB	PANIC BUTTON - MOUNT TO 1-GANG BOX AT 48" AFF. STUB UP TO ACCESSIBLE CEILING
PT	ELECTRIC POWER TRANSFER - SUPPLIED UNDER DIVISION 08 CONTRACT, COORDINATE REQUIREMENTS
PX	PUSH -TO-EXIT BUTTON - MOUNT TO 1-GANG BOX, 48" AFF. WIRE IN SERIES WITH MAGNETIC LOCK
RX	REQUEST-TO-EXIT MOTION SENSOR - MOUNT TO 1-GANG BOX, HORIZONTAL ABOVE DOOR AT 96" AFF UON.
OS	CEILING GLASS BREAK SENSOR - MOUNTS TO 3-1/2" OCTAGON BOX ON TILE SUPPORT
MS	CEILING MOTION SENSOR - MOUNTS TO 3-1/2" OCTAGON BOX ON TILE SUPPORT
VM	VIDEO INTERCOM MASTER - AIPHONE IX-MV7 DESK MOUNT. REQUIRES ONE CAT6 CABLE ON 10-GANG PLATE.
VS	VIDEO INTERCOM SUBSTATION - AIPHONE IX-DVF. MOUNTS TO PROVIDED BACKBOX AT 46" AFF. REQUIRES ONE CAT6 CABLE AND CONNECTION TO DOOR POWER SUPPLY TO RELEASE DOOR LOCK.
MOUNT TYPE	CEILING MOUNTED IP CAMERA. VARIFOCAL LENS. REFER TO CAMERA SCHEDULE FOR MORE INFORMATION. CAMERAS REQUIRE ONE (1) CAT6 NETWORK CABLE, RECEIVE POWER OVER ETHERNET.
MOUNT TYPE	CEILING MOUNTED PANORAMIC IP CAMERA. VARIFOCAL LENS. REFER TO CAMERA SCHEDULE FOR MORE INFORMATION. CAMERAS REQUIRE ONE (1) CAT6 NETWORK CABLE, RECEIVE POWER OVER ETHERNET.
MOUNT TYPE	WALL MOUNTED IP CAMERA, WIDE DYNAMIC RANGE LOW-LIGHT IMAGER. REFER TO CAMERA SCHEDULE FOR MORE INFORMATION. CAMERAS REQUIRE ONE (1) CAT6 NETWORK CABLE, RECEIVE POWER OVER ETHERNET. EXTERIOR CAMERAS REQUIRE IN-LINE LIGHTNING/SURGE SUPPRESSION AT POINT OF ENTRY, GROUNDED TO BUILDING STEEL. POLE MOUNTED EXTERIOR CAMERAS ALSO REQUIRE ETHERNET EXTENDERS. SEE VIDEO SURVEILLANCE SPECIFICATIONS FOR MORE INFORMATION.

NOTE:

THE TECHNOLOGY CONTRACTOR SHALL BE RESPONSIBLE TO SUPPLY THE ENCLOSURE, POWER MODULE, AND CONNECTORS. THE ELECTRICAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE INSTALLATION OF THE ENCLOSURE, ALL PATHWAYS TO THE ENCLOSURE, AND THE POWER MODULE. FACILITY SERVICE PROVIDER SHALL PULL ALL CAT6 BACKBONE CABLING FROM THE MDF / IDF TO THE UNIT, TERMINATE AND TEST THE COPPER BACKBONE, AND PROVIDE AND INSTALL THE WIRELESS GATEWAY / ROUTER. FOUR CAT6 COPPER HORIZONTAL CABLE OUTLETS WILL BE PROVIDED WITHIN THE UNITS.

NOTE:
THIS DRAWING IS DIAGRAMMATIC IN NATURE AND IS INTENDED TO PROVIDE A GENERAL REFERENCE AS TO THE INTENDED SYSTEM CONFIGURATION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THAT ALL SIGNAL LEVELS ARE WITHIN THE TOLERANCES INDICATED IN SPECIFICATION SECTION 274133. TAP VALUES ARE ESTIMATED BASED UPON PREDICTED CABLE ROUTINGS, PATHWAYS, AND CABLE TYPES. ADJUST TAP VALUES, ATTENUATORS, AND AMPLIFIER GAIN AND SLOPES TO MATCH INSTALLATION CONDITIONS.

APPENDIX U
SIGNATURE PAGE

Signature of Responsible Individuals, Cleveland West Veterans Housing

Determination of the Ohio Department of Development:

On the basis of the environmental assessment of the above project, I have made the following finding:

☐ Finding of No Significant Impact (FONSI) [24 CFR 58.40(g)(1); 40 CFR 1508.27]
The project will not result in a significant impact on the quality of the human environment.

☐ Finding of Significant Impact [24 CFR 58.40(g)(2); 40 CFR 1508.28]
The project may significantly affect the quality of the human environment.

CEO Name: Lydia L. Mihalik
Director, Ohio Department of Development

Address: 77 South High Street
Columbus, Ohio 43215

Signature: _____

Date: _____
