1.0 PROJECT INFORMATION

The Mannik & Smith Group, Inc. (MSG) is retained by the Ohio Housing Finance Agency (OHFA) to complete an Environmental Review of the Cleveland West Veterans Housing Project in accordance with OHFA's HOME Investment Partnerships Program (HOME) Environmental Review Standards.

1.1 Project Location and Description

Cleveland West Veterans Housing is a new construction supportive housing development consisting of a single, approximately 55,000 square foot, multi-family 3-story apartment building with sixty-two (62) one-bedroom units, located at West 73rd Street and Neville Avenue, Cleveland, Cuyahoga County, Ohio, in the Stockyards neighborhood on Cleveland's west side. The development site (Site) is comprised of two (2) parcels, designated as 3311 W. 73rd Street (parcel number 72-006-25-028 and 7275 Neville Avenue (parcel number 006-25-027). The development is designed to serve Veterans experiencing homelessness in Cuyahoga County. The Veterans Affairs Northeast Ohio Healthcare System will provide on-site supportive services to residents in a welcoming environment that is close in proximity to transportation, amenities, and medical services in the City of Cleveland. The development will feature on-site property management and a 24-hour front desk, as well as a community room, pantry/kitchen, laundry room, lobby/lounge, outdoor patio, exercise room, elevator, and mailbox area. CHN Housing Partners (CHN) will be the developer, owner, and property manager for Cleveland West Veterans Housing.

The funding source for this project is HOME funding. The proposed date of construction is September 2025.

1.2 Background Information

MSG completed a field inspection of the property on February 18, 2025. A copy of the Field Checklist is provided in Appendix A. A Phase I Environmental Site Assessment (ESA) was completed by Partners dated January 23, 2024, and updated on June 27, 2025. August Mack completed a Limited Subsurface Investigation on August 19, 2024. A copy of the Phase I ESA report is provided in Appendix B, and a copy of the Limited Subsurface Investigation is provided in Appendix C.

The Project Sponsor is CHN Housing Partners (CHN), 3711 Chester Avenue, Suite 100, Cleveland, OH 44114. Jennifer Koperdak is the Project Manager and point of contact for CHN; jkoperdak@chnhousingpartners.org, (216)-325-5438.

The individuals who have prepared and reviewed this report are listed in the following table:

Activity	Name	Company
Environmental Review Preparer	Claire Cerne CCerne@manniksmithgroup.com (216) 378-1490 x8011	The Mannik & Smith Group, Inc. 20600 Chagrin Blvd., Suite 500 Shaker Heights, Ohio 44122
ERR QA/QC	Christopher Owen Cowen@manniksmithgroup.com (216) 378-1490 x8027	The Mannik & Smith Group, Inc. 20600 Chagrin Blvd., Suite 500 Shaker Heights, Ohio 44122
Natural Resources Reviewer	Stephanie Rimko SRimko@manniksmithgroup.com (724) 981-0155	The Mannik & Smith Group, Inc. 1085 S. Hermitage Road Hermitage, PA 16148
Historic Preservation Reviewer	Jeffrey Nagle JNagle@manniksmithgroup.com (419) 891-2222	The Mannik & Smith Group, Inc. 1800 Indian Wood Circle #2 Maumee, Ohio 43537
Field Inspector	Toni Wheeler	The Mannik & Smith Group, Inc. 20600 Chagrin Blvd., Suite 500 Shaker Heights, Ohio 44122

2.0 MITIGATIONS

The project developer is responsible for compliance with the following mitigations and need to provide documentation of compliance with OHFA.

2.1 Site Specific Mitigations

- According to the Ohio Department of Health Radon Variation of Geometric Mean Radon Concentrations in Zip codes for Cuyahoga County Map, the Site is located in an area which has a low potential for elevated indoor radon concentrations ranging between 0 and 2.0 pCi/L. However, this project is a new build project and per OHFA's policy, it must meet the requirements for new construction.

    - Action Item: Follow OHFA's Radon Policy and install passive radon systems and conduct post-construction sampling as a requirement of new construction. The proposed building construction must meet the requirements of ASTM E1465-08a for the installation of passive systems. Post-construction testing will be required (per ANSI-AARST MAMF-2010) by the developer, and if results are at or above the EPA threshold (4.0 picocuries per liter [pCi/L]), the system shall be converted to an active recovery system pursuant to ASTM E1465-08a. The developer will be required to provide sampling results to OHFA.

- The Site is located within the range of the endangered Indiana Bat and Northern Long-eared Bat.

    - Action Item: Removal of trees greater than or equal to three inches diameter at breast height must only occur between October 1 and March 31. If seasonal tree clearing is not possible, a summer presence/absence survey may be conducted for Indiana bats and northern long-eared bats. An environmental commitment to comply with seasonal tree clearing shall be included on all architectural and engineering plans, and written documentation that demonstrates that tree clearing only occurred within the seasonal window between October 1 and March 31 must be submitted to OHFA.

- The proposed project at the Site had a combined noise DNL of 67 dBA, which falls within the Normally Unacceptable HUD Classification.

    - Action Item: To mitigate the Normally Unacceptable noise levels to less than 45 dBA interior, building design architectural enhancements or acoustical construction can be implemented as the acceptable feasible measure. Building design noise attenuation measures may include the use of sound reducing exterior wall materials and insulated exterior walls, windows, and doors. A StraCAT Assessment (https://www.hudexchange.info/stracat/) analysis must be completed prior to construction to confirm the building design has an interior dBA level that is below the HUD Acceptable level of 45 dBA. The StraCAT must be completed by the project structural engineer/architectural team. Post construction interior noise testing must be completed to ensure the interior dB reading is below 45dB as required by HUD and the results must be provided to OHFA.

3.0 HOME ENVIRONMENTAL REVIEW

The Environmental Review has been completed according to the 2016 OHFA's HOME Environmental Review Standards.

3.1 Phase I Environmental Site Assessment (ESA)

Review Description:

The Phase I ESA should be conducted in accordance with the most current ASTM E1527 standard and within six months prior to the date of funding notification.

Compliance Determination:

A Phase I ESA was completed by Partners following ASTM E1527-21 standards, and was dated January 23, 2024, and was revised June 27, 2025. A copy of the Phase I ESA report is included in Appendix B.

3.2 Letter of Reliance

Review Description:

A "reliance" statement/letter to the Ohio Housing Finance Agency shall be provided in the report.

Compliance Determination:

A reliance statement is provided in Section 1.6 of the Phase I ESA. Reliance was granted to CHN, the United States (U.S) Housing and Urban Development (HUD), and OHFA.

3.3 Conclusion Statement

Review Description:

A Conclusion Statement regarding the presence or absence of recognized environmental conditions (RECs) shall be provided per ASTM E1527-21 12.7.

Compliance Determination:

A conclusion statement was provided in the Executive Summary and Section 11.0 of the Phase I ESA. No RECs were identified.

3.4 Environmental Professional Statement

Review Description:

An environmental professional statement shall be provided per ASTM E1527-21 12.14.

Compliance Determination:

The environmental professional statement was provided in Section 13.0 of the Phase I ESA.

3.5 Environmental Professional Qualifications

Review Description:

Environmental professional qualifications shall be provided per ASTM E1527-21 12.14.2.

Compliance Determination:

Environmental professional qualifications were provided in Appendix I of the Phase I ESA.

3.6 Recognized Environmental Conditions (RECs)

Review Description:

Recognized Environmental Conditions (REC) should be identified during the Phase I ESA investigation. If RECs or other concerns are identified, they should be resolved.

Compliance Determination:

No RECs were identified in the Executive Summary and Section 11.2 of the Phase I ESA.

3.7 Environmental Liens and Activity Use Limitation (AUL) information

Review Description:

Consideration for the presence of Environmental liens and AULS shall be provided per ASTM E1527-21 6.2.4.

Compliance Determination:

No Environmental liens or AULs were identified in Section 3.1 and 3.2 of the Phase I ESA.

3.8 Site Plan

Review Description:

A Site plan/sketch must show prominent Site features including any identified concerns and should identify adjacent land use, including the names of any commercial or industrial businesses.

Compliance Determination:

A Site Plan is presented as Figure 2 in the Figures attachment of the Phase I ESA.

3.9 Interviews

Review Description:

Interviews should be conducted with local government officials (Health Department and Fire Department) and with a key site manager (owner, or owner representative).

Compliance Determination:

Interviews were conducted with the owner and local government officials in Section 8.1.1, 8.1.2, and 9.1 of the Phase I ESA. Correspondence documentation was provided in Appendix H of the Phase I ESA.

3.10 USGS Topographic Map

Review Description:

A United States Geological Survey (USGS) topographic map of the site shall be provided, with the site boundary identified.

Compliance Determination:

The USGS topographic map provided is identified as Figure 1 within the Phase I ESA and are attached in Appendix E of the Phase I ESA.

3.11 Aerial and Color Photographs

Review Description:

Aerial photographs and color photographs shall be provided.

Compliance Determination:

Aerial photographs (Appendix E) and color photographs (Appendix B) are provided in the Phase I ESA.

3.12 Sanborn Maps or Sanborn No Coverage Letter

Review Description:

Sanborn Maps or a Sanborn Map No Coverage Letter must be provided.

Compliance Determination:

Sanborn Maps were provided in Appendix E of the Phase I ESA.

3.13 Historical Documentation

Review Description:

Adequate historical documentation should be provided for the site and adjacent properties, identifying the Site's first use or back to 1940, whichever is earlier.

Compliance Determination:

Historical documentation was provided in Sections 5.0 of the Phase I ESA, with supporting documentation in Appendix E of the Phase I ESA.

3.14 Database Search Review

Review Description:

A search of government database records shall be provided, with records searched to the ASTM required approximate minimum search distances. An evaluation of the significance of the database listings shall be included.

Compliance Determination:

Database record review information was included in Section 6.0 of the Phase I ESA. The regulatory database search report is provided in Appendix F of the Phase I ESA.

3.15 Vapor Encroachment Screening (VES)

Review Description:

Vapor Encroachment Screening documentation must be included if completed at the site.

Compliance Determination:

The Vapor Encroachment Screening review is included in Section 8.5 of the Phase I ESA. It was determined that a Vapor Encroachment Condition (VEC) does not exist related to the Site.

3.16 Interior Inspection

Review Description:

Provide documentation that an interior inspection was conducted of all on-site structures.

Compliance Determination:

The Site did not contain any buildings at the time of the Site Reconnaissance; therefore, interior building inspections were not completed.

3.17 Phase II Environmental Site Assessment (ESA)

Review Description:

The Phase II ESA should be completed to address the RECs identified within the Phase I ESA.

Compliance Determination:

A Limited Subsurface Investigation was completed by August Mack for the Site on August 19, 2024. August Mack installed eight soil borings to identify possible contamination present on the Site related to the historical use of the property and adjoining properties. The Phase II sampling results did not identify analytical results were higher than their comparative standards. A copy of this report can be found in Appendix C.

3.18 Asbestos-Containing Materials (ACM)

Review Description:

For rehab and adaptive reuse projects, an ACM survey is required. The survey should be completed for areas to be disturbed by the proposed work, but may be delayed until just prior to the start of construction.

Compliance Determination:

The project will consist of new construction, and no structures are present on the Site. Therefore, asbestos-containing materials (ACMs) were not sampled and are not a concern at this time.

3.19 Air Quality

Review Description:

As part of the air quality consideration, determine whether the Site is located in an Air Quality Non-Attainment Area. Determine whether there are any Aerometric Retrieval System (AIRS) facilities or Toxic Release Inventory (TRI) facilities having air releases within 1,000-feet of the Site.

Compliance Determination:

According to the National Environmental Policy Act (NEPA) Assist Tool, there are no Aerometric Information Retrieval System (AIRS) facilities within 1,000-feet of the Study Site. Two Toxics Release Inventory System (TRIS) facilities were identified. Park-Ohio Products, Inc., located at 7000 Denison Avenue, is located approximately 400 feet east of the Site. Technical Products, Inc., located at 3500 Ridge Road, is located approximately 860 feet south of the Site. A copy of the NEPAssist Report is included in Appendix D.

According to the National Ambient Air Quality Standards (NAAQS) map, Cuyahoga County is in non-attainment for ozone. A copy of the NAAQS map is included in Appendix D.

3.20 Airport Zones

Review Description:

In order to comply with the airport zones provision, the project is NOT located within a Runway Protection Zone (RPZ) of a civilian airport or the clear zone or Accident Potential Zone (APZ) of a military airfield.

Compliance Determination:

The Site is not within 15,000-feet of a military airport or within 2,500-feet of a civilian airport. The closest airport is the Cleveland Burke Lakefront Airport, approximately 22,180-feet (4.2-miles) northeast of the Site. Therefore, the Site is not located within a Runway Protection Zone (RPZ) of a civilian airport or the clear zone or Accident Potential Zone (APZ) or a military airfield. The project meets the requirements of the airport zones provision. An airport location map is included in Appendix E.

3.21 Coastal Barrier Resources

Review Description:

In order to comply with the Coastal Barrier Resources provision, the project is not located within a Coastal Barrier Resources System unit.

Compliance Determination:

According to the John H. Chafee Coastal Barrier Resources System (CBRS) map, the Site is not located within a Coastal Barrier Resources System unit. A copy of the CBRS map is included in Appendix F.

3.22 Coastal Zone Management

Review Description:

In order to comply with the Coastal Zone Management provision, the project is not located in a Coastal Zone, or it has been determined that the project is consistent with the State Coastal Zone Management Plan.

Compliance Determination:

According to the Ohio Department of Natural Resources (ODNR) Office of Coastal Management Ohio Coastal Atlas Map Viewer, the Site is not located within a Coastal Zone Management Area. A copy of the Coastal Atlas map is included in Appendix G.

3.23 Contamination

Review Description:

In order to comply with the Contamination provision, the project needs to be free of hazardous materials, contamination, toxic chemicals and gases, and radioactive substances, where a hazard could affect the health and safety of occupants or conflict with the intended use of the property.

And

The project is not located within 0.25-miles of a Superfund or Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) site or other contaminated site reported to Federal, State, or local authorities without a statement in writing from the U.S. Environmental Protection Agency (EPA) or the appropriate State agency that there is no hazard that could affect the health and safety of the occupants or conflict with the intended use of the property.

Compliance Determination:

A review of the June 2025 Phase I ESA prepared by Partners did not identify any RECs associated with the Site. A Phase II ESA was conducted in August 2024 by August Mack to investigate five RECs previously identified in a Phase I ESA completed by Partners in January 2024. The Phase II ESA soil and groundwater sampling results indicated constituents were below their comparative standards, therefore eliminating the previously identified RECs from the Site.

Additionally, the Site is not located within 0.25-miles of a Superfund or CERCLIS site.

3.24 Endangered Species

Review Description:

In order to comply with the Endangered Species provision, the project will NOT impact endangered or threatened species or their habitat.

Compliance Determination:

Based on the United States Fish & Wildlife Service (USFWS) Information for Planning and Consultation (IPAC) review (project code 2024-0143861), the following species were identified with ranges that overlap the project area: Indiana bat (endangered), Piping Plover (endangered), Rufa Red Knot (threatened), and Monarch butterfly (candidate). No critical habitats are located on-site. A review of the Ohio Natural Heritage Database indicates that there are no records or state or federally listed species within one mile of the Site. The Ohio Department of Natural Resources (ODNR), in their review of the project, identified the following additional threatened and endangered species: Northern long-eared bat (endangered), little brown bat (state endangered), and tricolored bat (state endangered).

Per recommendations from USFWS and ODNR, removal of trees greater than or equal to three inches diameter at breast height may only occur between October 1 and March 31. Seasonal clearing is recommended to avoid adverse effects to Indiana bats and northern long-eared bats. If seasonal tree clearing is not possible, a summer presence/absence survey may be conducted for Indiana bats and northern long-eared bats. If Indiana bats and northern long-eared bats are not detected during the survey, then tree clearing may occur at any time of the year. Surveys must be conducted by an approved surveyor and be designed in coordination with the USFWS Ohio Field Office. Surveyors must have a valid federal permit and mist net surveys may only be conducted between June 1 and August 15.

Written documentation must be submitted to OHFA to demonstrate that tree clearing only occurred within the seasonal window between October 1 and March 31. An environmental commitment to comply with seasonal tree clearing shall be included on all architectural and engineering plans, and written documentation that demonstrates that tree clearing only occurred within the seasonal window between October 1 and March 31 must be submitted to OHFA.

Copies of the IPaC species list and ODNR review are included in Appendix H.

3.25 Environmental Justice

Review Description:

As part of the environmental justice consideration, a "printable standard report" for the site and a one-mile buffer from USEPA's EJScreen online tool shall be reviewed.

Compliance Determination:

According to the U.S. Environmental Protection Agency (EPA) Environmental Justice Screen (EJSCREEN) report obtained for the review, the project area has a people of color population of 62%, which is higher than the State of Ohio average (24%). The low income population within a 1-mile radius of the Site measured 65%, which is higher than the state average of 33%. The Cleveland West Veterans Housing project is intended to enhance the quality of life in the community and will not cause adverse effects to new and existing residents. No adverse environmental impacts were identified in the project's total environmental review. A copy of the EJScreen report is included in Appendix I.

3.26 Explosives and Flammable Hazards

Review Description:

In order to comply with the Explosives and Hazards provision, the acceptable separation distance (ASD) requirements must be met as described in 24 CFR part 51, subpart C. Two main factors affect this determination; 1) does the project itself include a hazardous facility, and 2) are aboveground storage tanks (ASTs) near the project. Furthermore, if ASTs are in proximity to the project, the rehabilitation of the building cannot increase residential densities in the building. If the project will increase residential densities, the project must be in compliance with the standards for acceptable separation distances (ASD), as set forth at 24 CFR part 51, subpart C.

Compliance Determination:

No ASTs were observed on or within visible range of the Site. Additionally, the Cleveland Fire Department indicated that there are no records of any ASTs within a one-mile radius of the Site.

August Mack eliminated adjoining properties as potential hazardous facilities impacting the Site based on Phase II ESA results indicating that soil and groundwater constituents were found below their comparative standards.

According to the National Pipeline Mapping System (NPMS) public viewer, there are no gas transmission pipelines or hazardous liquid pipelines located near the Site.

According to the ODNR Oil & Gas Wells map viewer, no oil & gas wells are located near the Site.
Explosion hazard documentation is included in Appendix J.

3.27 Farmland Protection

Review Description:

In order to comply with the Farmland Protection provision, the project activity must be solely rehabilitation, or the project will not convert unique, prime, or significant (state or local) farmland to an urban use.

Compliance Determination:

The Site is not currently farmed. According to the U.S. Department of Agriculture's (USDA) The regulatory definition of farmland (7 CFR 658.2(a)) indicates that farmland does not include land already committed to urban development or water storage. Farmland already in urban development includes lands identified as "urbanized areas" (UA) on the Census Bureau Map. According to the 2020 Census Urban Areas of the United States and Puerto Rico map, the Site is located in a designated urban area; therefore, the land is already committed to urban development. Thus, the project is exempt from the Farmland Protection Policy Act (FPPA). A copy of the 2020 U.S. Census map is included in Appendix K.

3.28 Floodplains

Review Description:

As part of the floodplain consideration, complete a review of the Federal Emergency Management Agency (FEMA) map and determine whether the Site is located within the 100-year floodplain.

Compliance Determination:

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for the City of Cleveland effective December 3, 2010, the Study Site is in Zone X, outside the 100- and 500-year floodplains. Therefore, the Site is not located in a Special Flood Hazard Area. A copy of the FIRM is included in Appendix L.

3.29 Historic Preservation

Review Description:

As part of the Historic Preservation, no demolition of an eligible building is permitted, and any plans for rehabilitation must meet Secretary of Interior standards.

Compliance Determination:

The Project Area consists of a vacant parcel. There are no buildings present; therefore, the Site does not contain any buildings listed or eligible for listing to the National Register of Historic Places (NRHP). The vicinity of the project area was developed in the late nineteenth century. A site visit by MSG found twenty-one properties over 45 years of age within the Area of Potential Effect (APE). Seven of these properties are documented on the Ohio Historic Inventory. All seven, unexceptional examples of residential or municipal infrastructural buildings from the first half of the twentieth century, do not rise to the level of eligibility for the NRHP either individually or as part of a district. As documented through a request to the Ohio History Connection's GIS system, there are no listed NRHP in the Project Area or the APE.

An Ohio State Historic Preservation Office (OSHPO) Section 106 Application was prepared by an MSG federally-qualified historian that meets the Secretary of Interior standards. The Section 106 Application was submitted to the OSHPO on July 15, 2025. On August 19, 2025, the OSHPO concurred that the proposed new construction will have no effect on historic properties or archaeological resources. No further coordination is necessary barring the unanticipated discovery of archaeological remains during project construction.

In the event an Inadvertent Discovery (ID) occurs at any phase of a project or undertaking as defined, and human remains, or archaeological materials are exposed as a result of project activities, work should cease immediately, and the Tribe(s) must be included with the SHPO in any consultation regarding treatment and disposition of the find.

Copies of the OSHPO project summary form, survey table of properties in the APE, photo pages, the mapped results of an OSHPO literature review search, sample Tribal Historic Preservation Office coordination letter, and OSHPO decision letter are included in Appendix M.

3.30 Lead-Based Paint (LBP)

Review Description:

Lead-based paint evaluation shall be conducted in accordance with the OHFA Lead-Based Paint Investigation Policy as referenced in the OHFA Environmental Review Standards for HOME-Funded Projects document.

Compliance Determination:

The project will consist of new construction and does not involve any pre-1978 structures. Therefore, LBP is not a concern at this time.

3.31 Noise

Review Description:

As part of the noise evaluation, provide consideration of the presence of major roadways within 1,000-feet, railroads within 3,000-feet, and airports within 5-miles of the site. All activities will be developed to ensure an internal noise level of no more than 45 decibels (mitigation may be required). Additionally, hazards and nuisances, including site safety and noise, should be minimized and mitigated during the construction process.

Compliance Determination:

Noise sources in the vicinity of the Site were evaluated including major roadways within 1,000-feet, railroads within 3,000-feet, and airports within 5-miles. Noise sources include one major roadway, including Denison Avenue and two railroads. No airports were identified within 5-miles of the Site.

MSG completed a Noise Screening, which evaluated the identified one major roadway in relation to the Site. Denison Avenue has a Day/Night Average Sound Level (DNL) of 63 decibels A-weighted (dBA). Railroad crossing 941947J has a DNL of 65 dBA, while railroad crossing 48269P has a DNL of 54 dBA. The combined DNL for the Site is 67 dBA.

The HUD classification system for DNL classifies all sites between 65-75 dBA as “Normally Unacceptable”. The Site has a combined exterior DNL of 67 dBA and falls within the Normally Acceptable HUD Classification; however, this project consists of new construction, including the installation of Energy Star windows and doors. A StraCAT Assessment (https://www.hudexchange.info/stracat/) analysis can must be completed by the project structural engineer/architectural team prior to post-construction. Post construction interior noise testing must be completed to ensure the interior dB reading is below 45dB as required by HUD and the results must be provided to OHFA.

The attached worksheets are available in Appendix N.

Anticipated hazards and nuisances, including site safety and noise, are anticipated to be addressed during the duration of the project. Noise will be limited to typical construction related noise during the designated noise producing work time and site safety will be achieved through implemented site safety plans. A copy of the Architectural Plan Set is provided in Appendix P.

3.32 Radon

Review Description:

Radon testing and mitigation shall be conducted in accordance with the OHFA Radon Policy as specified in Section B of the OHFA 2021 Design & Architectural Standards.

Compliance Determination:

According to the Ohio Department of Health Radon Variation of Geometric Mean Radon Concentrations in Zip codes for Cuyahoga County Map, the Site is located in an area which has a low potential for elevated

indoor radon concentrations ranging between 0 and 2.0 pCi/L. However, per OHFA's Radon Policy, the installation of passive radon systems and post-construction testing are required for new construction. Construction shall meet the requirements of ASTM E1465-08a for the installation of passive systems. Post-construction testing will be required (per ANSI-AARST MAMF-2010), and if results are at or above the EPA threshold (4.0 pCiIL), the system shall be converted to an active recovery system pursuant to ASTM E1465-08a. A copy of the Ohio Department of Health Radon Variation of Geometric Mean Radon Concentrations in Zip codes for Cuyahoga County Map is included in Appendix O.

3.33 Safe Drinking Water

Review Description:

In order to comply with the Safe Drinking Water provision, projects with a potable water system must use only lead-free pipes, solder, and flux.

Compliance Determination:

The project will consist of new construction and will not utilize lead pipes, solder, or flux. Therefore, the project is in compliance with the safe drinking water provision.

3.34 Soil Suitability

Review Description:

As part of the soil suitability consideration, determine whether the on-Site soils are suitable for construction of the proposed development using NRCS classifications.

If a geotechnical study of the site has been performed, it can be used to meet this requirement.

Compliance Determination:

The USDA NRCS Web Soil Survey map for the Site was reviewed in the Phase I ESA. Soils were identified as Urban Land, consisting of loamy fine sands with moderately drained permeability. Urban Land is characterized as areas in which more than 80 percent of the surface is covered by asphalt, concrete, buildings, and/or other manmade surfaces. It did not meet the hydric criteria.

The proposed project is not anticipated to negatively affect the soil stability of the Site. Erosion control measures and storm water runoff control will be managed through the design site plan during construction and after the construction phase has been completed. A copy of the Architecture Plan Set is provided in Appendix T.

3.35 Sole Source Aquifers

Review Description:

In order to comply with the Sole Source Aquifers provision, the project will NOT impact a Sole Source Aquifer.

Compliance Determination:

According to the US EPA Sole Source Aquifer Map, the Site is not located within a Sole Source Aquifer. The map is included in Appendix P.

3.36 Visible Mold

Review Description:

A consideration for the presence of visible mold shall be provided.

Compliance Determination:

Based on the lack of structures, mold was not considered a potential environmental concern to the Site.

3.37 Wetlands

Review Description:

In order to comply with the Wetlands provision, the project will NOT adversely impact a wetland. The project will NOT drain, dredge, channelize, fill, dike, impound, or perform grading activities in wetlands.

Compliance Determination:

According to the U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) map, no wetlands are located on the Site. A copy of the NWI map is included in Appendix Q.

3.38 Wild and Scenic Rivers

Review Description:

In order to comply with the Wild and Scenic Rivers provision, the project is not located near a Wild and Scenic River.
OR
The project is located near a Wild and Scenic River and is consistent with the River's Management Plan.

Compliance Determination:

Based on a review of the National Wild and Scenic Rivers System map, the Site is not located in the vicinity of a Wild and Scenic River. A copy of the National Wild and Scenic Rivers System map is included in Appendix R.

3.39 Zoning

Review Description:

As part of the zoning code consideration, identify zoning classification and obvious violations if applicable. Zoning of the Site should account for development patterns including density, construction, alteration, and use of buildings, structures, or land.

Compliance Determination:

According to the letter provided by the City of Cleveland dated February 1, 2024, the Site is currently zoned as Semi-Industry-SI. A copy of the letter is attached in Appendix S.

The proposed design plan is consistent with the land use and zoning of the Site. According to the Architectural plan set and zoning use of the area, the proposed development will fit within the plans of the neighborhood development. A copy of the Architectural Plan Set is provided in Appendix T.

4.0 ENVIRONMENTAL ASSESSMENT FACTORS

Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented, as appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed and applicable permits of approvals have been obtained or noted. All mitigation measures have been clearly identified.

Impact Codes: Use an impact code from the following list to make the determination of impact for each factor.

(1) Minor beneficial impact
(2) No impact anticipated
(3) Minor Adverse Impact – May require mitigation
(4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

Environmental Assessment Factor	Impact Code	Impact Evaluation
LAND DEVELOPMENT		
Conformance with Plans / Compatible Land Use and Zoning / Scale and Urban Design	2	The proposed project is consistent with the overall community vision, development plans, and policies. The demand exists for a sixty-two (62) multi-family apartment building to support Veterans experiencing homelessness in Cuyahoga County. The site location and scope of development make the proposed development marketable in the prevailing rental market within Cleveland. Based on the scope, unit sizes, rents, and amenities, the proposed apartment development is appropriate for the intended use and target market.
Soil Suitability/ Slope/ Erosion/ Drainage/ Storm Water Runoff	2	A review of the 2019 United States Geological Survey (USGS) 7.5-Minute topographic map for the project area indicates that the Site is approximately 710 feet above mean sea level (msl). The topography of the area implies that shallow groundwater movement is likely to the north toward Lake Erie. According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) website (https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx), the soils on the Site consist of urban land. This soil type consists of areas where the original soils have been disturbed, removed, cut, and/or filled, or are otherwise masked by pavement, buildings, and other structures that obscure the original soil profiles. There were no noted concerns regarding slope, erosion, drainage, or runoff during the site inspection.
Hazards and Nuisances including Site Safety and Noise	2	The proposed project is anticipated to avoid hazards and nuisances through the duration of the project. Anticipated hazards and nuisances, including noise, are anticipated to be addressed during the duration of the project. Noise will be limited to typical construction-related noise during the designated noise producing work time and will follow the City of Cleveland Noise regulations for construction. The noise screening completed for the Site evaluated one roadway and two railroads. The combined DNL for the Site is 67 dBA. The HUD classification system for DNL classifies all sites between 65-75 dBA as “Normally Unacceptable”.

		Due to the location of the building immediately adjacent to urban roadways, Site design and sound control measures, such as a noise barrier wall are likely not feasible. To mitigate the Normally Unacceptable noise levels to less than 45 dBA interior, building design architectural enhancements or acoustical constriction may be the acceptable feasible measure. Building design noise attenuation measures may include the use of sound reducing exterior wall materials and insulated exterior walls, windows, and doors.
Energy Efficiency	2	The proposed project will install Energy Star-rated appliances and HVAC system, and will perform work to meet or exceed minimum energy efficiency and performance in accordance with Energy Star requirements and local energy code.

Environmental Assessment Factor	Impact Code	Impact Evaluation
SOCIOECONOMIC		
Employment and Income Patterns	2	The proposed project is supported by the need for strong and stable employment base which has resulted in a consistent demand for multifamily housing in the area. The project will neither increase or decrease employment opportunities because the project consists of the construction of a multifamily rental housing apartment building. The project area's civilian employee population is most found in the healthcare and social assistance services, financial services, manufacturing, and educational services industries. The project is not anticipated to negatively affect the local county workforce.
Demographic Character Changes, Displacement	1	The proposed project demographic is targeting low-income individuals, which will positively affect the minority group by increasing affordable housing in the City of Cleveland. The project involves the new construction of sixty-two (62) units of affordable supportive rental housing for homeless veteran households with incomes up to 30%, 50%, and 60% of Area Median Income (AMI). The project is applying for Low-Income Housing Tax Credit (LIHTC) financing and will provide Veteran Affairs Supportive Housing (VASH) vouchers for all units. The proposed project will not displace individuals or families and will not result in probable indirect displacement because the project site currently consists of vacant land.

Environmental Assessment Factor	Impact Code	Impact Evaluation
COMMUNITY FACILITIES AND SERVICES		
Educational and Cultural Facilities	2	Local educational and cultural facilities are projected to meet the needs of the proposed project. The proposed project is targeting low-income veterans experiencing homelessness. The project will not increase the student population within the project area location. The proposed project is located within 3-miles of several community centers and cultural facilities including the Community Arts Center.

Commercial Facilities	2	The proposed project site is located in proximity of downtown Cleveland and its proximity to nearby jobs, recreation, and businesses. The proposed site is located approximately 3-miles southwest of downtown Cleveland. The proposed site is in proximity to opportunities for shopping, recreation and entertainment. The Greater Cleveland Regional Transit Authority (RTA) provides public transportation options in the area. The closest bus stops are adjacent to the site, and a light rail station is 1.1-mile northeast. Grocery stores, shopping stores, convenience stores, and pharmacies are located within 5-miles of the site.
Health Care and Social Services	2	The proposed project is located in an area that has capacity and access to nearby health care, emergency services, and social services. Comprehensive medical care is available 2.9-miles east at Metrohealth Main Campus.
Solid Waste Disposal / Recycling	2	The proposed project will produce general construction waste, and residential waste after completion. Debris created during the construction process will be removed of and disposed of off site in a safe and legal manner. The project is not anticipated to exceed the capacity of the local waste system/landfill.
Waste Water / Sanitary Sewers	2	The proposed project will connect to the local municipal sanitary and wastewater system managed by the City of Cleveland. The local municipal sanitary and wastewater system has the capacity for the proposed project.
Water Supply	2	The proposed project will be connected to the local municipal water supply from the City of Cleveland. The local municipal water supply system has the capacity for the proposed project.
Public Safety - Police, Fire and Emergency Medical	2	The proposed project is anticipated to be appropriately serviced by local public safety providers. The Cleveland Police and Fire departments operate stations 2.0- and 1.4-miles east, respectively.
Parks, Open Space and Recreation	2	The proposed site is in proximity to opportunities for shopping, recreation and entertainment. Several parks are within 1.1- and 2.2-miles of the site. A movie theater, AMC Ridge Park Square 8, is 2.8-miles south. Cleveland Public Library – Lorain Branch is 0.9-mile north.
Transportation and Accessibility	2	Major highways within 1.4-miles of the site include Interstate 90, State Route 10 and Interstate 71. Greater Cleveland Regional Transit Authority (RTA) provides public transportation options in the area. The closest bus stops are adjacent to the site, and a light rail station is 1.1-mile northeast. The site will also include 32 surface parking spaces. The existing transportation facilities and services are adequate to meet the needs of the project.

Environmental Assessment Factor	Impact Code	Impact Evaluation
NATURAL FEATURES		
Unique Natural Features, Water Resources	2	The project is not anticipated to adversely affect unique natural features on or near the site. No unique natural features or areas were identified within visible distance of the Site. The proposed project is

		anticipated to not affect groundwater or water quality in the surrounding area.
Vegetation, Wildlife	2	The project location has a combination of a grass lot and deteriorated concrete pavement. The project will not likely impact existing wildlife habitats. No vegetation, wildlife, or other factors were identified at the Site.
Other Factors	2	No other factors of concern were identified.

APPENDIX A
FIELD INSPECTION FORM

Project Number:	401.2300437.000	**MSG Inspector:**	Toni Wheeler

Site Location: Cleveland West Veterans, 3311 W 73rd St, Cleveland, OH 44102
Date of Investigation: 6/29/2025

EXECUTIVE SUMMARY

Partners was contracted by CHN Housing Partners (User/Client) to conduct a Phase I Environmental Site Assessment (ESA) at vacant land located at West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio (Subject Property) in an effort to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), and de minimis conditions. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society of Testing and Materials (ASTM) Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21). The report also complies with the Ohio Housing Finance Agency (OHFA), United States (U.S.) Department of Housing and Urban Development (HUD), and City of Cleveland Department of Community Development Environmental Review non-scope items. Limitations and/or deviations from the ASTM E1527-21 standard are described in **Section 1.4** of this report.

According to the Cuyahoga County Auditor's website, the Subject Property is comprised of two (2) parcels, designated as Permanent Parcel Numbers (PPNs) 006-25-027 and 006-25-028, which are currently owned by the City of Cleveland Land Utilization Program. The Subject Property was initially developed by at least 1902, with industrial and residential development of the Subject Property apparent by at least 1913. Several residential dwellings were located in the north-central portion of the Subject Property, the Atlas Steel Foundry Company occupied the eastern portion, and the Standard Steel Casting Company Foundry occupied the western portion of the Subject Property. One (1) 6,000-gallon crude oil underground storage tank (UST) was depicted southwest of the Atlas Steel Foundry Company warehouse on the 1913 Sanborn Fire Insurance map. There are no records indicating that the UST was removed from the Subject Property.

By at least 1930, the Atlas Steel Foundry Company warehouse was occupied by the Cleveland Cleaner & Paste Company, who manufactured wallpaper, pastes, and commercial-grade cleaning products. Records reviewed from the City of Cleveland Fire Department (CFD) indicated that the Cleveland Cleaner & Paste Company obtained several permits throughout their occupancy period for the usage of various UST systems, including USTs for gasoline and kerosene. Specific notes related to the location, size, and duration of use for these USTs was not specified. There are no records indicating that the UST was removed from the Subject Property. Additionally, CFD records indicate the storage and use of dry-cleaning detergent solvents.

The Standard Steel Casting Company vacated the Subject Property by at least 1950, and the residential dwellings appeared to have been razed. The former buildings associated with the Standard Steel Casting Company operation were razed, and the location was labeled to be occupied by an automotive trailer and truck yard. According to CFD records, the Cleveland Cleaner & Paste Company vacated the Subject Property in 1984. By at least 1991, any remaining structures associated with past operations were razed, and the Subject Property remained vacant.

The adjoining sites and surrounding area were developed by at least 1902; the C.C.C. and St. L Railroad is present adjoining the Subject Property to the east. By 1903, the Cleveland Macaroni Factory was apparent on the northeastern adjoining site. The site was vacated by 1930 and reoccupied by at least 1938 by the Cleveland Corrugated Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue), which changed entities to the Great Lakes Box Company Division of St. Regis Paper Company by 1961. The southern adjoining site was developed by at least 1950 with an electrical substation. The northeastern adjoining site was purchased by Simkins Industries in 1991 and Fluorescent Recycling, Inc. occupied the site by at least 2016. Observations made during the site visit indicated the northeastern adjoining site is currently vacant.

According to CFD records reviewed for the northeastern adjoining industrial warehouse site, the Great Lakes Box Company Division of St. Regis Paper Company utilized several USTs of various sizes and contents ranging from gasoline, kerosene, and fuel oil. There were no records available that indicated whether or not these tanks were removed from the site.

Additionally, Simkins Industries, a former occupant, was identified to be a former Resource Conservation and Recovery Act (RCRA) Generator for the generation of various hazardous substances, including Not Defined Waste, Ignitable Waste, Benzene, Tetrachloroethylene (TCE), Nonhalogenated solvents, and Solvent Washes and Sludges. Several violations were reported and returned to compliance. A Phase I ESA previously conducted on the site determined that the storage and use of these hazardous substances

Copyright © 2025, Partners

(TCE, petroleum products, inks, and film developing chemicals) likely adversely impacted the site. Fluorescent Recycling, Inc. was also a former occupant of the northeastern adjoining site and was identified to be an RCRA Generator for the generation of mercury waste. The facility occupied the site by at least 2016 and received numerous compliance violations, which do not appear to have been resolved. A fire occurred at the site in 2018, resulting in a Superfund listing for the site, however, the site is listed to not require site assessment work.

The southwestern adjoining site beyond West 73rd Street was historically developed as a dry cleaner in at least 1991 and 1992. Additionally, an electrical substation was noted on the southern adjoining site from at least the early 1950s to present.

In order to assess the RECs identified in Partners' January 2024 Phase I ESA, August Mack installed eight (8) soil borings with depths ranging from 20 to 25 feet below grade. A total of one (1) or two (2) soil samples from each boring was submitted for analysis of VOCs, PAHs, and RCRA Metals, depending on if groundwater was encountered during drilling. Additionally, three (3) out of the eight (8) of the soil borings were converted into one (1)-inch temporary monitoring wells and sampled for the same chemicals of concern as the soils. Several VOCs and PAHs were detected in the soil samples above laboratory reporting limits but below applicable standards. Metals including arsenic, barium, cadmium, chromium, and lead were detected in each of the soil samples; however, all concentrations were below their respective standards with the exception of arsenic in three (3) borings. While above the Residential Land Use standard (14 mg/kg) were below the Cuyahoga County background level (24 mg/kg). Therefore, this is not considered a concern. No VOCs or PAHs were detected in the groundwater samples from the Subject Property. All analyzed metals were below their respective standards with the exception of barium; however, no exceedances were above the Unrestricted Potable Use Standards (UPUS) and, given the lack of detections, there was nothing relevant to compare to USEPA Vapor Intrusion Screening Levels (VISL). Based on the findings of this limited subsurface investigation, August Mack concluded that there was no evidence of a release at the Subject Property and no further investigation was warranted at that time.

Below are conclusions derived from this Phase I ESA, which were based on, but not necessarily limited to, a visual inspection of the Subject Property; review of pertinent background and historical information; evaluation of physical setting sources; interviews with persons knowledgeable of the Subject Property (as available); review of environmental records; and Partners' professional experience.

Significant Data Gaps

There were no significant data gaps identified during the performance of this Phase I ESA.

Recognized Environmental Conditions

The Phase I ESA has revealed no evidence of RECs in connection with the Subject Property.

Controlled Recognized Environmental Conditions

The Phase I ESA has revealed no evidence of CRECs in connection with the Subject Property.

Historical Recognized Environmental Conditions

The Phase I ESA has revealed no evidence of HRECs in connection with the Subject Property.

De Minimis Conditions

The Phase I ESA has revealed no evidence of de minimis conditions in connection with the Subject Property.

RECOMMENDATION

Based on the findings and conclusions of this Phase I ESA, no additional subsurface investigation is required at this time.

Copyright © 2025, Partners

In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system. Additionally, noise mitigation measures, such as barriers or berms, site design, or acoustical construction (e.g., specialized insulation, double-pane windows) could be justified. A noise analysis study may also be warranted.

Notice

This Executive Summary is part of this complete report; any findings, opinions or conclusions in this Executive Summary are made in context with the complete report. Partners recommends that the User read the entire report and supporting documentation for all supporting information related to findings, opinions, and conclusions.

1.0 INTRODUCTION

Partners was contracted by CHN Housing Partners (User/Client) to conduct an ASTM E1527-21 Phase I ESA at vacant land located at West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio (Subject Property). According to information obtained from the Cuyahoga County Auditor's website, the Subject Property is comprised of two (2) parcels, designated as Permanent Parcel Numbers (PPNs) 006-25-027 and 006-25-028, which are currently owned by the City of Cleveland Land Utilization Program.

The Subject Property's current land use is designated "Exempt – City Land Bank." A zoning map of the Subject Property and surrounding area obtained from the Cleveland City Planning Commission Zoning Department website indicates that the Subject Property is zoned as "Semi-Industry." The Subject Property information is included in **Appendix A**.

The Client did not contract with Partners to procure title, lien search, and/or activity and use limitation (AUL) nor did Client provide same to Partners as part of this Phase I ESA.

1.1 Purpose

One of the purposes of conducting a Phase I ESA in accordance with the ASTM Practice E1527-21 and the All-Appropriate Inquiries (AAI) Final Rule is to permit the User to satisfy one of the requirements to qualify for the Innocent Landowner, Contiguous Property Owner, or Bona Fide Prospective Purchaser limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability.

Partners understands that this Phase I ESA Report was completed in preparation of the Subject Property being approved for a low-income tax credit application.

1.2 Objective

The goal of the Phase I ESA process is to identify RECs at the Subject Property and present findings in a written report. A REC is defined by ASTM E1527-21 as follows:

1) "the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* to the *environment*;

2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* or likely *release* to the *environment*; or

3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* under conditions that pose a *material threat* of a future *release* to the *environment*."

The ASTM E1527-21 standard indicates (Appendix X4) that Historical RECs (HRECs), Controlled RECs (CRECs), and de minimis conditions are defined differently from RECs.

An HREC is defined by ASTM E1527-21 as follows:

> *A previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

A CREC is defined by ASTM E1527-21 as follows:

> *A recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

Copyright © 2025, Partners

A *de minimis* condition is defined by ASTM E1527-21 as follows:

> *A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.*

Partners has considered the migration of hazardous substances or petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property.

1.3 Scope of Work

Partners conducted the Phase I ESA in general accordance with the United States Environmental Protection Agency (USEPA), *Standard and Practices for All Appropriate Inquires (AAI), Final Rule (40 CFR Part 312)* and *ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-21), effective February 13, 2023.* Phase I ESA activities generally consisted of the following components, presented below with the dates those activities commenced:

ASTM E1527-21 Component	Date Activity Started
Retention of Partners to perform ASTM E1527-21 Phase I ESA	6/6/2025
Obtaining and reviewing federal, state, and local environmental databases;	6/18/2025
Reviewing other reasonably ascertainable public records (historical and current) for the Subject Property and surrounding sites;	6/18/2025
Conducting a site walkover to observe and document existing conditions;	6/20/2025
Interviewing people knowledgeable about current and past operations at the Subject Property;	6/20/2025
Documentation of findings in this Phase I ESA Report.	6/30/2025
Declaration by Environmental Professional	6/30/2025

In addition to ASTM standards, at the request of the Client, Partners had also included Ohio Housing Finance Agency (OHFA) considerations as described in the *Ohio Housing Finance Agency* (OHFA) *Environmental Review Standards for HOME Funded Projects* (OHFA Requirements), effective May 11, 2016, and the OHFA *2024-2025 Qualified Allocation Plan*. These non-scope items are detailed in **Section 8.0**.

Exceptions to, or deletions from these practices are described in **Section 1.4** of this report.

1.4 Limitations to the ASTM Standard and Data Gaps

Limitations or exceptions to ASTM Standard E1527-21 and data gaps, as defined in the AAI Final Rule noted during the course of the Phase I ESA are discussed below.

Based on a review of available resources and conditions observed during the site inspection, the potential data gaps or limitations to ASTM Standard E1527-21 described below do not likely affect the ability to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the Subject Property or would be likely to have a material impact on the conclusions of this report. The

Copyright © 2025, Partners

following limitations or deviations to the ASTM standard are not considered significant, as they do not substantially change the findings and conclusions of this report.

- Although available resources were reviewed, there are intervals over five (5) year periods when data was not available.
- The apparent uses of the Subject Property were identified to 1913, the date of the earliest historical resource that was reviewed and contained information as to the Subject Property's use. The use of the Subject Property as an industrial steel foundry in the 1913 Sanborn Fire Insurance map could not definitively be identified as first use. Topographic maps were reviewed back to 1902; however, Topographic maps do not generally provide information regarding property use. Although additional information sources listed in ASTM E1527-21 were not reviewed (other than as described in **Section 5.0**), it is not expected that any information reviewed prior to 1913 would substantially change the findings and conclusions of this report.
- The Client did not provide Partners with an environmental lien and/or activity use limitation (AUL) search for the Subject Property. Partners was not requested to obtain this item for the purposes of review. While no other resource reviewed as part of this Phase ESA provided an indication that such information would change the conclusions of this report, the absence of this information may limit various protections provided under the AAI standard.

There were no exceptions and/or significant data gaps encountered during the performance of this Phase I ESA. As a result, they did not affect the ability of the Environmental Professional (EP) to identify a REC.

1.5 Non-Scope Considerations

Non-scope considerations may be present at a property that do not present potential CERCLA liability and are beyond the scope of ASTM Standard E1527-21. These may include but are not limited to items such as asbestos containing building materials, biological agents, cultural and historical resources, ecological resources, endangered species, health and safety, indoor air quality, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, and wetlands.

Business Environmental Risk is defined by ASTM 1527-21 as follows:

> *A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope consideration, some of which are identified in Section 13 (of the Standard).*

The Client has not requested that any additional non-scope considerations or BERs be assessed as part of this Phase I ESA except for the OHFA considerations as specified in their *Environmental Review Standards for HOME Funded Projects*, effective May 11, 2016, and the *2023 Qualified Allocation Plan Technical Amendment*, approved September 21, 2022.

1.6 Reliance

The Phase I ESA Report has been prepared for the exclusive use of the Client, OHFA, and HUD and may not be relied upon by any other party. The Client, OHFA, and HUD may rely on this Phase I ESA subject to the terms and conditions of the contractual agreement between Partners and the Client for environmental consulting services relative to the Subject Property, and any limitations identified in this Phase I ESA.

2.0 SUBJECT PROPERTY AND ADJOINING SITES DESCRIPTION

2.1 General Subject Property Location

The Subject Property is located on the southeastern corner of West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio. The Subject Property is located in an area developed primarily

Copyright © 2025, Partners

for residential use to the north and west, industrial use to the northeast, and railroad tracks with industrial properties beyond to the south and east. The location of the Subject Property is depicted on **Figure 1**.

2.2 Subject Property Characteristics

Figure 2 depicts the features on the Subject Property. Photographs are included in **Appendix B**. Below is a description of the Subject Property features and characteristics.

Subject Property Feature/Characteristics	Description
Approximate Acres	1.99 acers
Approximate Elevation	710 feet above the mean sea level (AMSL)
Topographic Gradient(1)	Northeast towards Old River approximately 2.05 miles away.
Buildings/Structures	Not Applicable
Roads, Paths, and/or Rail	Access to the Subject Property is gained from Neville Avenue by means of both a gravel and asphalt drive.
Water Supply System	City of Cleveland Division of Water (currently not utilized, but connections are available.)
Sanitary Disposal System	Not Applicable
Industrial Wastewater System	Not Applicable
Stormwater Control System	Infiltration through the ground surface, with catch basin along Neville Avenue and West 73rd Street.
Electric Provider	First Energy (currently not utilized, but connections are available.)
Natural Gas Provider	Dominion (currently not utilized, but connections are available.)
Back-Up Power System	Not Applicable.
Heating/Cooling System (including fuel source)	Not Applicable.
Solid Waste Storage/Transport Provider	Not Applicable.
Exterior	Partially Paved Parking, Wooded, Unmanicured Greenspace

(1) According to the Cleveland South, Ohio Quadrangle, USGS 7.5-Minute Topographic Map (**Figure 1**).

2.3 Current Uses of Subject Property

Currently, the Subject Property is owned by the City of Cleveland Land Utilization Program and is vacant land. At the time of the site visit, no buildings were observed.

Copyright © 2025, Partners

2.4 Past Uses of Subject Property

According to historical documents reviewed (**Section 5.0**), in general, the Subject Property was developed for industrial purposes by at least 1913. Below is a table summarizing past uses of the Subject Property.

Occupant/Operator	Description of Use	From	To
Various	Residential	Prior to 1913	c. 1950
The Atlas Steel Foundry Company	Steel Foundry	Prior to 1913	c. 1930
The Standard Steel Casting Company Foundry	Steel Foundry	Prior to 1913	c. 1950
The Cleveland Cleaner & Paste Company	Cleaning and Wallpaper Paste Manufacturing	c. 1930	c. 1991
Unknown	Automotive Truck and Trailer Yard	c. 1950	c. 1991
Simkins Industries, Inc.	Vacant Industrial Land (PPN 006-25-028)	1979	2010
City of Cleveland Land Bank	Vacant Industrial Land (PPN 006-25-027)	1992	Present
City of Cleveland Land Bank	Vacant Industrial Land (PPN 006-25-028)	2010	Present

2.5 Current Uses of Adjoining Sites

Current uses of the adjoining sites and surrounding area were observed from the Subject Property or public rights-of-way. The following are observations of the current uses of adjoining sites and the surrounding area, which are depicted on **Figure 2**.

Adjacent Site	Owner/Operator	Description of Use
North	Various	Residential and Vacant Industrial Building
East	W & L E Railroad	Railroad (Industrial Buildings beyond)
South	City of Cleveland	CEI Substation
West	Various	Residential

2.6 Past Uses of Adjoining Sites

According to historical documents reviewed (**Section 5.0**), the adjoining sites were developed prior to 1902 for residential and industrial use. Industrial development of the northeastern adjoining site is apparent by at least 1903, when it was occupied by the Cleveland Macaroni Factory. The site was occupied by the Cleveland Box Company by at least 1938 and continued similar operations until the early 2000s, operating

Copyright © 2025, Partners

under different entities. CFD records indicate the site was formerly developed with several USTs of various contents and capacities, however there are no records indicating that these USTs were removed from the site. Residential and industrial development of the adjoining sites continued through the 1950s, when the sites were developed as they generally appear today. Specific information from historical documents reviewed is presented below.

Adjacent Site	Owner/Operator	Description of Use
North	Cleveland Macaroni Factory	Industrial factory
East	W & L E Railroad	Railroad tracks
South	Various	Industrial and residential
West	Various	Residential

2.7 Current and Past Uses of Surrounding Area

According to historical documents reviewed (**Section 5.0**), in general, the area surrounding the Subject Property was developed prior to 1902. Residential, commercial, and industrial development of the surrounding area was apparent by at least 1903 in the earliest reviewed Sanborn Fire Insurance map; residential development was apparent to the north, northwest, and west of the Subject Property. Commercial and industrial development of the surrounding area continued to the east and southeast through the 1960s, when much of the area was developed as it appears today.

3.0 USER PROVIDED INFORMATION

Where the term "User" appears in this report, it refers to the Client. To satisfy the intent of the ASTM E1527-21, inquiries were made with the User for information that will help identify the potential for a REC. Therefore, Partners provided the User with an *ASTM E1527-21 Questionnaire* (User Questionnaire). When completed, the User Questionnaire provides certain information and satisfies Section 6. User's Responsibilities of the ASTM E1527-21 Standard.

The User completed the User Questionnaire to assist in gathering information that may be material to identifying RECs at the Subject Property. The User provided the information in **Sections 3.1** through **3.7** by means of the User Questionnaire. Refer to **Appendix C** for a copy of the completed questionnaire.

3.1 Environmental Cleanup Liens

The User is not aware of environmental cleanup liens that have been filed or recorded for the Subject Property.

3.2 Activity and Land Use Limitations

The User is not aware of any activity or land use limitations in place on the Subject Property or that have been filed or recorded in a registry.

3.3 Specialized Knowledge or Experience

The User does not have any specialized knowledge or experience related to the Subject Property, aside from the findings of a previous Phase I ESA prepared by Partners in 2024, which are incorporated into this current report.

Copyright © 2025, Partners

3.4 Relationship of Purchase Price to Fair Market Value

According to the User, the parcels are city-owned Land Bank parcels, and the city policy is to price the land below the fair market value.

3.5 Commonly Known or Reasonably Ascertainable Information

The User is aware of the commonly known past uses of the Subject Property. The User is unaware of any specific chemicals historically or currently present on the Subject Property, spills or chemical releases or any environmental cleanups that have taken place on the Subject Property, aside from any mentions of these items in Partners' prior 2024 Phase I ESA.

3.6 Presence of Contamination

The User is not aware of any obvious indicators that point to the presence or likely presence of contamination at the Subject Property.

3.7 Other

The User did not provide any other information of environmental significance.

4.0 GEOLOGIC AND HYDROGEOLOGIC INFORMATION

Partners reviewed readily available information provided by the Ohio Department of Natural Resources (ODNR) website and other sources about oil and gas wells, abandoned mines, water wells, soil, geology, and groundwater in the general area of the Subject Property. Copies of geologic and hydrogeologic information are included in **Appendix D**. Site-specific information regarding the Subject Property is not available.

4.1 Oil and Gas Well Map

Partners reviewed the Oil and Gas Well Map obtained from the ODNR website. According to the ODNR map, no oil or gas wells are located on the Subject Property or the adjoining sites.

4.2 Abandoned Mines

Partners reviewed the Abandoned Mines of Ohio Map obtained from the ODNR website. According to the ODNR map, no abandoned underground mines are located beneath the Subject Property or surrounding area.

4.3 Water Well Drilling Log Reports

According to the ODNR website, one (1) water well is located on the Subject Property. A total of 31 water wells are located within 2,000 feet of the Subject Property. Refer to **Section 4.5** for additional discussion of these water wells.

4.4 Soils

According to the United States Department of Agriculture's (USDA) Natural Resources Conservation Service Web Soil Survey, the Subject Property is underlain with the following soil types:

Soil Name	Soil Description	Permeability	Meets Hydric Criteria
Urban land(1)	N/A	N/A	No

Copyright © 2025, Partners

Soil Name	Soil Description	Permeability	Meets Hydric Criteria
Urban land(1)-Mahoning Complex, 2 to 6 percent slopes	Silty Clay Loam	Somewhat poorly drained, very low to moderately low	No

(1)Urban Land is characterized as areas in which more than 80 percent of the surface is covered by asphalt, concrete, buildings, and/or other manmade surfaces. Most areas are artificially drained by sewer systems and gutters.

4.5 Geology

According to the ODNR Water Well Logs for the 31 total water wells referenced in **Section 4.3**, subsurface material generally consists of clay from the surface to a depth of 17 feet below ground surface (bgs), gravel ranging from one (1) to four (4) feet bgs, sand ranging from one (1) to 42 feet bgs, silt ranging from four (4) to 16 feet bgs, and sandstone ranging from four (4) to 116 feet bgs. Native soils are underlain by shale to a depth of 125 feet bgs (terminal depth of the deepest water well).

According to the *Surficial Geology of the Cleveland South 30 x 60 Minute Quadrangle* map, subsurface materials at the Subject Property include Wisconsinan-age till, which includes an unsorted mix of clay, silt, sand, gravel, and boulders with an average thickness of 30 feet bgs, Wisconsinan-age sand and gravel with an average thickness of 20 feet bgs, underlain by Devonian-age shale bedrock.

4.6 Groundwater

According to the ODNR Water Well Logs for the 31 water wells referenced in **Section 4.3**, static water levels ranged from five (5) to 62.6 feet bgs.

No information was available to quantitatively determine shallow groundwater flow direction at the Subject Property. However, shallow groundwater typically follows surface topography. According to the Cleveland South, Ohio Quadrangle, USGS 7.5-Minute Topographic Map, regional topography in the vicinity of the Subject Property slopes down to the northeast. Therefore, the inferred direction of groundwater flow is to the northeast.

5.0 HISTORICAL RECORDS REVIEW

Past uses of the Subject Property, adjoining sites and the surrounding area were determined by reviewing 1) historical topographic maps dated between 1902 and 2019; 2) historical Sanborn Fire Insurance (Sanborn) maps dated between 1903 and 1971; 3) historical aerial photographs dated between 1938 and 2017; and 4) city directories dating back to 1930. Historical information reviewed was provided by Environmental Data Resources, Inc. (EDR). The historical information is included in **Appendix E**.

5.1 Subject Property History

Based on the review of the aforementioned historical records, the following Subject Property history was obtained.

Years	Description of Subject Property History
Prior to 1902	Unknown
1902 to 1913	The Subject Property appears to be developed with several unlabeled structures.

Copyright © 2025, Partners

Years	Description of Subject Property History
1913 to 1930	By at least 1913, the Subject Property is developed with The Atlas Steel Foundry Company warehouse, sand house, brick storage, and office in the northeastern portion (7255-7275 Neville Avenue). One (1) 6,000-gallon crude oil underground storage tank (UST) is listed to be located southwest of the warehouse and enclosed in cement. Additionally, three (3) single-family dwellings in the north-central portion (7279-7291 Neville Avenue). The Standard Steel Casting Company Foundry (7299 Neville Avenue, 3297 and 3319 West 73rd Street) is located in the western and south-central portions of the Subject Property, with a large industrial warehouse, pattern shop, storage building, sand house, and coke bin.
1930 to 1950	The Atlas Steel Foundry Company warehouse is now occupied by the Cleveland Cleaner & Paste Company, which reportedly manufactured wallpaper, cleaners, and pastes (7255-7283 Neville Avenue).
1950 to 1991	By at least 1950, the Standard Steel Casting Company warehouse, storage building, sand house, and coke bin are no longer located on the Subject Property (7299 Neville Avenue, 3297 and 3319 West 73rd Street). The pattern shop was converted into an office. The location of the previous warehouse is listed to be utilized as an automotive truck and trailer yard (3311 West 73rd Street). Additionally, the three (3) single-family dwellings in the north-central portion of the Subject Property were razed (7279-7291 Neville Avenue). An addition was added to the northern and western portions of the Cleveland Cleaner & Paste Company Warehouse (7255-7283 Neville Avenue). The previous crude oil UST, office building, sand house, and brick storage house utilized by the Atlas Steel Foundry Company are no longer depicted on the Subject Property.
1991 to 1994	The remaining structures on the Subject Property were razed and the Subject Property appears to be vacant with remnants of asphalt and gravel.
1994 to 2005	The Subject Property appears to be generally consistent with previous conditions, except for the Subject Property appears to be utilized as a parking lot.
2005 to the Present	Parking activities on the Subject Property are no longer apparent.

5.2 Adjoining Site History

Based on the review of the aforementioned historical records, the following history of the adjoining sites was obtained.

Copyright © 2025, Partners

Years	Description of Adjoining Sites' History
Prior to 1902	Unknown
1902 to 1913	Adjoining sites appear to be developed. The C.C.C. and St. L Railroad is present adjoining the Subject Property to the east. Several single-family residences are apparent in the 1903 Sanborn Fire Insurance map to the north along Neville Avenue and West 73rd Street, and the Cleveland Macaroni Factory (7256 Neville Avenue) is present to the northeast of the Subject Property beyond Neville Avenue.
1913 to 1930	By at least 1913, further residential development is apparent to the west of the Subject Property along West 73rd Street, and a Warf House appeared on the Cleveland Macaroni Factory site to the northeast.
1930 to 1938	The adjoining site to the northeast was listed to be vacant by at least 1930 and reoccupied by at least 1935 with the Cleveland Corrugated Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).
1938 to 1941	By at least 1938, the demolition of several residential homes to the north along Neville Avenue was apparent and the location was redeveloped with a large industrial warehouse (7260 and 7270 Neville Avenue).
1941 to 1950	The adjoining sites appear generally consistent with previous conditions, except for the site to the northeast is occupied by the Great Lakes Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).
1950 to 1961	The adjoining site to the south was developed by 1950 with an electrical substation (3321 and 3323 West 73rd Street). The Warf House previously located on the northeastern adjoining site is now labeled as a donut factory.
1961 to 1991	By at least 1961, the site to the northeast is now referred to as the Great Lakes Box Company Division of St. Regis Paper Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).
1991 to the Present	The adjoining sites appear generally consistent with previous conditions, except for an additional structure appeared on the site to the south. Additionally, the site to the northeast is now occupied by NDHMD, Inc (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue).

5.3 Surrounding Area History

Based on the review of the aforementioned historical records, the following history of the surrounding area was obtained.

Years	Description of the Surrounding Area's History
Prior to 1902	Unknown
1902 to 1938	The surrounding area appears to be developed. Residential development of the surrounding area is apparent in the 1903 Sanborn Fire Insurance Map.

Copyright © 2025, Partners

Years	Description of the Surrounding Area's History
1938 to 1952	Commercial and industrial development is apparent in the surrounding area to the east and southeast. Heavy residential development is apparent to the northwest.
1952 to 1971	By at least 1952, the site to the southeast of the adjoining railroad tracks was developed with the Denison Coal and Supply Company, which was no longer apparent in the 1963 Sanborn Fire Insurance map.
1971 to the Present	The site to the southeast beyond the adjoining railroad tracks was redeveloped with an industrial warehouse.

6.0 RECORDS REVIEW

6.1 Regulatory Database Records

Records reviewed during the Phase I ESA include databases maintained by federal, tribal, and state agencies. Partners contracted EDR to conduct a database search in accordance with ASTM Standard E 1527-21 and the AAI Final Rule. In preparing this Phase I ESA report, Partners relied upon the results of the database search provided by EDR. The conclusions can only be as accurate as the information provided by EDR and Partners cannot be held liable for inaccurate or incomplete information provided by EDR. The purpose of the database search was to obtain for review the records that would help identify RECs in connection with the Subject Property and the surrounding sites.

The following is a summary of our review and evaluation of the facilities identified in the EDR report. All of the statements in **Sections 6.1.1** through **6.1.3** are based on the EDR report. A copy of the EDR report is provided in **Appendix F**.

6.1.1 Subject Property

There were no records identified for the Subject Property in the listed regulatory databases.

6.1.2 Adjoining and Nearby Sites

There were 100 records for other sites identified in the listed regulatory databases, for which five (5) records were listed in the EDR proprietary databases. These sites were reviewed based on their distance to the Subject Property, the inferred direction of groundwater flow to the Subject Property and regulatory status. Based on the information reviewed in **Section 4.0**, the first encountered groundwater at the Subject Property likely flows to the northeast. Therefore, sites located hydraulically upgradient in the inferred direction of groundwater flow are more likely to adversely impact the Subject Property.

Based on this review of all listed records, a total of 44 listings at seven (7) sites were identified to have the potential to adversely impact the Subject Property's environmental condition. These adjoining and/or nearby sites are further described below.

- **Fluorescent Recycling, Inc., 7260 Neville Avenue:** This facility adjoins the Subject Property to the northeast beyond Neville Avenue, which is hydraulically down gradient in the inferred direction of groundwater flow from the Subject Property and is identified in the Resource Conservation and Recovery Act (RCRA) Non-Generator / No Longer Regulated (NONGEN / NLR) database. The site operated as a Specialized Freight (Except Used Goods) Trucking (48423), Solid Waste Collection (562111), and Administration of Air and Water Resource and Solid Waste Management Programs (924110) facility. The facility was historically a Large Quantity Generator (LQG) in March 2018 and reportedly generated mercury (D009). By December 2018, the facility was listed to be a Non-Generator. The facility has received numerous violations since 2016. The violations have related to Treatment, Storage, and Disposal Facilities (TSD) Preparedness and Prevention, TSD General Facility Standards, State Statute or Regulation, Focused Compliance Inspection, and

Copyright © 2025, Partners

Significant Non-Complier. The violations received do not appear to have been resolved. Additionally, the facility is identified in the Superfund Enterprise Management System (SEMS) database relating to a fire that occurred at the facility in February 2018 (OHN000507862). The facility is listed to not be on the National Priority List (NPL), and it was noted that the facility was a removal only site with no site assessment work needed. However, based on the unresolved violations and SEMS listing, this facility is likely to have potentially adversely impacted the Subject Property.

- **Simkins Industries, 7275 Wentworth Avenue:** This facility adjoins the Subject Property to the northeast beyond Neville Avenue, which is hydraulically down gradient in the inferred direction of groundwater flow from the Subject Property and is identified in the Division of Emergency & Remedial Responses (DERR), Spills, SEMS Archive, Corrective Action Report (CORRACTS), US Brownfields, RCRA NONGEN / NLR, and Facility Index System (FINDS) databases. The facility was listed to be a Folding Paperboard Box Manufacturer and held a RCRA EPA Generator ID (OHD097623961), reportedly generating Not Defined Waste (D000), Ignitable Waste (D001), Benzene (D018), Tetrachloroethylene (D039), Nonhalogenated Solvents (F003 and F004), and Solvent Washes and Sludges (K086). Several historic violations were reported, all of which returned to compliance. A Phase I ESA conducted in June 2004 by Partners Environmental, Inc. revealed that early manufacturing activities at the facility may have adversely impacted the facility. It was recommended that a Phase II investigation be conducted. The facility is listed to not be on the NPL and deferred to RCRA. Additionally, a transformer oil spill occurred at the facility in 2007. Based on the historic uses of this facility and its proximity to the Subject Property, this facility is likely to have potentially adversely impacted the Subject Property.

- **Royce Cleaning Systems, 3322 West 73rd Street:** This facility adjoins the Subject Property to the southwest beyond West 73rd Street, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the EDR Historical Cleaners database. The facility reportedly operated as a dry-cleaning plant from at least 1991 through approximately 1992. No further useful information is provided. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.

- **S. Redman Garage Rear, 7406 Denison Avenue:** This facility is located approximately 315 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the EDR Historical Auto Station database. The facility reportedly operated as an automotive repair station in 1951. No further useful information is provided. Based on the distance from the Subject Property, location across multiple major roadways, and redeveloped status, this facility is not likely to have adversely impacted the Subject Property.

- **Denison Auto Body and Frame, 7408 Denison Avenue:** This facility is located approximately 425 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the RCRA NONGEN / NLR database. The facility was reportedly a Small Quantity Generator (SQG) (OH986966570) in at least 1988, and reportedly generated Not Defined Waste (D000), Ignitable Waste (D001), and Nonhalogenated Solvents (F003 and F005). No violations were reported. As of at least July 2020, the facility was listed to no longer be a generator. Additionally, the facility was identified in the FINDS and Enforcement Compliance History Online (ECHO) databases with no further useful information provided. Based on the lack of violations identified and distance from the Subject Property, this facility is not likely to have adversely impacted the Subject Property.

- **Angelo's Service, 7401 Denison Avenue:** This facility is located approximately 460 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property and is identified in the EDR Historical Auto Station database. The facility reportedly operated as a gasoline service station from at least 1986 through approximately 1989. No further useful information is provided. Based on the distance from the Subject Property, location across multiple major roadways, and redeveloped status this facility is not likely to have adversely impacted the Subject Property.

Copyright © 2025, Partners

- **Sunoco Service Station / Former Sunoco 0001-7403 / G&S Sunoco Service Station, 7403 Denison Avenue:** This facility is located approximately 575 feet southwest of the Subject Property, which is hydraulically upgradient in the inferred direction of groundwater flow from the Subject Property, and is identified in the EDR Historical Auto Station, Underground Storage Tank (UST), and Leaking UST (LUST) databases. The facility reportedly operated as a gasoline station from at least 1935 until approximately 1974. The location was historically developed with five (5) USTs; three (3) 6,000-gallon gasoline USTs, which were removed on October 25, 1990, and one (1) 8,000 gallon and one (1) 1,000-gallon UST, both with unknown contents, were removed on December 27, 1990. On December 19, 1990, a LUST incident (#18010145-N00001) was reported. The LUST incident received No Further Action status. An NFA status is defined as a suspected or confirmed release where initial and/or long-term corrective actions have been conducted and the regulating authority has determined that further corrective actions are not necessary for the incident. The facility is also identified in the RCRA NONGEN / NLR, database and reportedly generated Not Defined Waste (D000) and Ignitable Waste (D001). No violations were reported. Additionally, the facility is identified in the FINDS and ECHO databases with no further useful information provided. Based on the NFA status, lack of violations reported, and distance from the Subject Property, this facility is not likely to have adversely impacted the Subject Property.

Partners completed a detailed review of 56 additional regulatory database listings and determined that these listings are not likely to adversely impact the Subject Property due to their locations either cross-gradient and downgradient in the inferred direction of groundwater flow from the Subject Property and/or resolved regulatory issues.

6.1.3 Orphan Sites

An orphan (non-geocoded) site is a facility, or a location listed in one (1) or more of the federal, tribal, state, or local databases that have not been mapped due to an inadequate address. A total of three (3) orphan sites are identified in the database report. Partners verified the addresses of the orphan sites and determined that the facilities are located outside the ASTM standard search distances and are unlikely to have adversely impacted the Subject Property.

6.2 Previous Reports

Partners completed the following report for the Subject Property, the text of which is provided in **Appendix G**:

Partners Draft Phase I Environmental Site Assessment of 3 Parcels of Land, Wentworth, and Neville Avenues and West 73rd Street, Cleveland Ohio 44102, dated June 3, 2004.

- Four (4) RECs were identified in the previous report relating to the historical usage of the subject property, the northeastern adjoining site, and the southern adjoining electrical substation site. Historic operations by the northeastern adjoining Great Lakes Box Company Division of St. Regis Paper Company (7256-7270 Neville Avenue) and Simkins Industries (7275 Wentworth Avenue) indicated that hazardous substances were stored and used in daily operations of the facility, including tetrachloroethylene (TCE), petroleum products, inks, and film developing chemicals. Several drums and containers remained at the site, and the remaining industrial warehouse was noted to contain suspected Asbestos Containing Materials (ACM), and suspected lead-based paint (LBP). The electrical substation was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release but were labeled as a REC due to the close proximity to the subject property. A Limited Phase II investigation was recommended for the subject property and northeastern adjoining site due to the historical operations.

Partners OHFA and HUD Compliant Phase I Environmental Assessment for VA Supportive Housing Property, Vacant Land, West 73rd Street and Neville Avenue, Cleveland Ohio 441102, dated 2022 and updated January 23, 2024.

Phase I ESA has revealed no evidence of HRECs, CRECs, OCCs in connection with the Subject Property. The following RECs were identified:

Copyright © 2025, Partners

- **REC-1: Historical Operations, 7255-7283 Neville Avenue (Subject Property):** The eastern portion of the Subject Property addressed at 7255-7275 Neville Avenue was developed and utilized as a foundry (Atlas Steel Foundry Company) from approximately 1913 until 1930. At least one (1) 6,000-gallon crude oil UST was associated with the foundry operations. Following the foundry, a paste and commercial-grade cleaning product manufacturer (Cleveland Cleaner & Paste Company) operated at 7255-7283 Neville Avenue through the 1980s. Fire department records show that high volumes of solvents were stored and used in their operations, and multiple kerosene and gasoline UST systems were in operation during this time as well. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.
- **REC-2: Former Foundry, 7299 Neville Avenue, 3297 and 3319 West 73rd Street (Subject Property):** The western portion of the Subject Property was also developed and utilized as a foundry (Standard Steel Casting Company Foundry) from approximately 1913 until 1950. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.
- **REC-3: Historical Operations, 7260 Neville Avenue, and 7275 Wentworth Avenue (Adjoining Site):** The northeastern adjoining site has been developed and utilized as various manufacturing and industrial facilities, generally from 1913 through the 2010s. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.
- **REC-4: Historical Operations, 3322 West 73rd Street (Adjoining Site):** The adjoining site to the southwest was historically utilized as a dry cleaner. Based on Partners' experience, hazardous substances and/or petroleum products may have been used during these historical operations, which have the potential to adversely impact the Subject Property.
- **REC-5: Electrical Substation, 3321-3323 West 73rd Street (Adjoining Property):** The southern adjoining electrical substation, present since at least 1951, was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release but are considered as a REC due to the close proximity to the Subject Property. Based on Partners' experience, hazardous substances may have been used at this adjoining property, which have the potential to adversely impact the Subject Property.

Based on the findings and conclusions of this Phase I ESA, Partners recommended a Limited Phase II Investigation to determine if the above-listed RECs have adversely impacted the Subject Property.

Limited Subsurface Investigation, West 73rd Street and Neville Avenue, Cleveland, Ohio 44106, prepared by August Mack Environmental and dated August 19, 2024.

In order to assess the RECs identified in Partners' January 2024 Phase I ESA, August Mack installed eight (8) soil borings with depths ranging from 20 to 25 feet below grade. A total of one (1) or two (2) soil samples from each boring was submitted for analysis of VOCs, PAHs, and RCRA Metals, depending on if groundwater was encountered during drilling. Additionally, three (3) out of the eight (8) of the soil borings were converted into one (1)-inch temporary monitoring wells and sampled for the same chemicals of concern as the soils. Several VOCs and PAHs were detected in the soil samples above laboratory reporting limits but below applicable standards. Metals including arsenic, barium, cadmium, chromium, and lead were detected in each of the soil samples. All concentrations were below their respective standards with the exception of arsenic in SB-4 (0-2), SB-5 (1-3), and SB-6 (6-8). The soil exceedance of arsenic (17.6 mg/kg, 15.6 mg/kg, and 14.7 mg/kg, respective) while above the Residential Land Use standard (14 mg/kg) were below the Cuyahoga County background level (24 mg/kg). Therefore, this is not considered a concern.

No VOCs or PAHs were detected in the groundwater samples from the Subject Property. All analyzed metals were below their respective standards with the exception of barium was found in SB-1-GW (92.7 ug/l) and at SB-7-GW (133 ug/l). No exceedances were above the Unrestricted Potable Use Standards

Copyright © 2025, Partners

(UPUS) and, given the lack of detections, there was nothing relevant to compare to USEPA Vapor Intrusion Screening Levels (VISL).

Based on the findings of this limited subsurface investigation, August Mack concluded that there was no evidence of a release at the Subject Property and no further investigation was warranted at that time.

Subsurface Exploration, West 73rd Street and Neville Avenue, Cleveland, Ohio 44106, prepared by Geo-Sci, Inc and dated February 18, 2025.

A total of fourteen (14) test borings were drilled, 10 within the proposed building footprint to an approximate depth of 20 feet each, three (3) within the proposed pavement areas to an approximate depth of 10 feet each, and one (1) in the proposed stormwater detention area to 10 feet deep, below existing grade. The test boring locations were selected by the client and field located by Geo-Sci representatives utilizing visual surveying techniques. The groundwater levels at the test boring location were measured at encounter and upon completion of the drilling operations. In general, the previously placed fill materials, consisted mostly of dark brown, gray and black silty sand, silt and silty clay/sandy silty clay with gravel, organics, topsoil, cinders, brick, asphalt and debris. Natural soils consisted primarily of gray lean clay/silty clay and silty sand with varying amounts of sand and gravel fragments.

Geo-Sci made a variety of recommendations on the foundation, concrete slab on grade, pavement, earthwork general guidelines, stormwater management ponds, excavation considerations, site class definition, groundwater and construction monitoring in regards to its proposed construction of a new three (3) story slab-on grade veterans support building, with the associated pavement to be used for access and parking. They noted that the site is currently vacant, relatively flat, and covered with grass and some trees on the north and east sides. Their preliminary plans indicate a finish-floor elevation approximating the existing ones.

Based on the presence of saturated soils, depths of fills soils and high ground water table, Geo-Sci,Inc found the removal and replacement of the fill was not considered to be an economically feasible alternative. Additionally, they recommend that the geotechnical engineer and/or representative be onsite during foundation and earthwork operation to observe field conditions at the time of construction.

This geotechnical work does not represent an environmental concern in relation to the Subject Property.

7.0 SUBJECT PROPERTY AND SURROUNDING SITE RECONNAISSANCE

Ms. Halle A. Miller and Ms. Margaret Eibler of Partners conducted a site visit on June 20, 2025, to observe and document existing conditions at the Subject Property in accordance with the requirements of ASTM E1527-21 and the AAI Final Rule. The weather conditions at the time of the site visit included clear skies and temperatures in the 70s (degrees Fahrenheit). Partners was unaccompanied during the site visit.

Observations made during the site reconnaissance were directed at the use, treatment, storage, disposal or generation of hazardous substances, petroleum products with the potential to adversely impact the Subject Property. An inspection was made for the following: aboveground storage tanks (ASTs); USTs; drums and other containers; electrical or hydraulic equipment likely to contain polychlorinated biphenyls (PCBs); pits, ponds, or lagoons; stained soils or pavement; stressed vegetation; depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors. For any buildings present, observations were made regarding the means of heating and cooling, including the following: fuel sources; stains or corrosion on walls, floors, and ceilings; and the presence of floor drains.

7.1 Site Reconnaissance

Report Section	Section Description	Observed	
		Yes	No
7.1.1	Hazardous Substances and Petroleum Products		No
7.1.2	Underground Storage Tanks		No

Copyright © 2025, Partners

7.1.3	**Aboveground Storage Tanks**		**No**
7.1.4	**Storage Drums and Containers**		**No**
7.1.5	**Stained Surfaces, Corrosion, Pooled Liquids and Stressed Vegetation**		**No**
7.1.6	**Strong, Pungent or Noxious Odors**		**No**
7.1.7	**Polychlorinated Biphenyl**	**Transformer** – See Section 7.1.8	**No**
7.1.8	**Solid Waste Disposal, Fill Material, Mounds or Depressions**	**Yes** – See Section 7.1.8	
7.1.9	**Pits, Ponds, or Lagoons**		**No**
7.1.10	**Wastewater Discharge or Treatment, Floor Drains, Sump Pumps, Septic Systems, Wells**		**No**

7.1.1 Hazardous Substances and Petroleum Products

Partners did not observe apparent hazardous substances or petroleum products.

7.1.2 Underground Storage Tanks

Apparent locations of current and/or former USTs were not identified.

7.1.3 Aboveground Storage Tanks

Apparent locations of current and/or former ASTs were not identified.

7.1.4 Storage Drums and Containers

Partners did not observe visual evidence of storage drums or containers.

7.1.5 Stained Surfaces, Corrosion, Pooled Liquids and Stressed Vegetation

Partners did not identify stained surfaces, corrosion, pooled liquids, or stressed vegetation.

7.1.6 Strong, Pungent or Noxious Odors

Partners did not identify any apparent unusual odors emanating from the Subject Property.

7.1.7 Polychlorinated Biphenyl

Partners observed the following potential PCB-containing equipment or materials.

- Electrical service is provided to the Subject Property by means of overhead lines located within the public rights-of-way. One (1) pole-mounted electrical transformer was observed along the northern Subject Property boundary. The electrical transformer was observed to be in good condition with no evidence of a release (e.g., leakage and staining). The electrical transformer was not labeled as to the PCB content. Based on the age of the transformer, the dielectric fluids in the transformer may contain PCBs. First Energy owns and maintains this transformer, and if an oil discharge or spill were to occur, First Energy should be contacted.

Copyright © 2025, Partners

7.1.8 Solid Waste Disposal, Fill Material, Mounds or Depressions

Partners did not identify apparent mounds or depressions. The following solid waste disposal activities and fill material were observed:

- According to historical documents reviewed (**Section 5.0**), the majority of the Subject Property once contained residences and industrial warehouse structures. It is possible that during the demolition of the former structures, fill material of unknown composition was used to grade the individual parcels.
- Three (3) pallets of bricks were present on the north Subject Property near Neville Avenue. The origins of the materials are unknown.
- Two (2) mounds were found on the northeastern and eastern side of the Subject Property. In the northeast corner, the mound appeared to be approximately 10 feet long by 12 feet wide by three (3) feet high in size, composed of asphalt and fill. The mound on the eastern Subject Property boundary was approximately 15 feet long by 15 feet wide by two and a half feet high, consisting of a similar fill.

These sources of refuse and fill material are not likely to adversely impact the Subject Property.

7.1.9 Pits, Ponds, or Lagoons

Partners did not identify apparent pits, ponds, or lagoons.

7.1.10 Wastewater Discharge or Treatment, Floor Drains, Sump Pumps, Septic Systems, Wells

Partners did not observe apparent wastewater discharge or treatment, floor drains, sump pumps, septic systems, or wells.

7.2 Adjoining Sites and Surrounding Area

Observations made of the adjoining sites and surrounding area during the site visit were directed at the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products on adjoining sites or surrounding area with the potential to adversely impact the Subject Property. Observations of the adjoining sites and surrounding area were made from the Subject Property or from public rights-of-way. Observations were made for the following: ASTs; USTs; drums and containers; electrical or hydraulic equipment likely to contain PCBs; pits, ponds, or lagoons; stained soils or pavement; stressed vegetation and depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors.

Partners did not observe visual evidence of environmental concerns at the adjoining or surrounding sites, except the following:

- An electrical substation to the south of the Subject Property was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers were observed to be in good condition with no evidence of a release (e.g., leakage and staining). The electrical transformer was not labeled as to the PCB content. Based on the age of the transformer, the dielectric fluids in the transformer may contain PCBs. First Energy owns and maintains these transformers, and if an oil discharge or spill were to occur, First Energy should be contacted. However, given the large scale, proximity to the Subject Property, and location upgradient of the Subject Property, hazardous substances that may have been used at this adjoining property have the potential to adversely impact the Subject Property.

8.0 OHFA AND HUD CONSIDERATIONS

In addition to the observations made in accordance with ASTM E 1527-13 and AAI Final Rule, Partners conducted a preliminary review of environmental conditions, which, according to the OHFA, may pose a threat to the health and safety of proposed residents of the sites. In addition to ASTM regulations, this

Copyright © 2025, Partners

report also complies with the OHFA, HUD, and City of Cleveland Department of Community Development Environmental Review non-scope items. Partners' evaluation of OHFA and HUD considerations is limited to information that was obtained from sources typically utilized in the completion of a Phase I ESA under the ASTM E 1527-21 standard, and no physical testing or laboratory analysis was completed. Supporting documentation for the OHFA and HUD considerations, including associated maps, and the OHFA letter of reliance is included in **Appendix H**.

8.1 Local Regulatory Review

8.1.1 Fire Department

During the initial Phase I ESA, Partners conducted a file review at the City of Cleveland Fire Department (CFD) on November 7, 2022. According to files reviewed from the CFD, the Subject Property held several permits for various capacities of kerosene and gasoline USTs associated with the Cleveland Cleaner & Paste Company. Records from 1947 indicate that a 1,000-gallon fuel oil tank was approved to be installed in the "center of the triangle of lot." In 1950, the Subject Property obtained a permit for a 500-gallon gasoline UST and 5,000-gallon kerosene UST. By at least 1969, another permit was filed for a 500-gallon gasoline UST and a 10,000-gallon kerosene UST. No records reviewed indicated that the previous USTs were removed from the Subject Property. Additionally, a CFD record from 1966 indicates that dry cleaning detergent solvents were stored and used in the manufacturing process at the Subject Property. The Cleveland Cleaner & Paste Company vacated the Subject Property in 1984.

The CFD also provided files pertaining to the northeastern adjoining site. According to the CFD files reviewed, the Great Lakes Box Company site utilized several USTs or various sizes, and contents ranging from gasoline, kerosene, and fuel oil. There were no records available that indicated whether or not these tanks were removed from the site.

During the completion of the current Phase I ESA, on June 13, 2025, Partners contacted the CFD to obtain any updated information pertaining to the Subject Property and surrounding sites. The City of Cleveland Fire Department reached out on June 15, 2025, with records that matched the previous Phase I conducted by Partners. No new information has become apparent in this records review. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.2 Health Department

On June 13, 2025, Partners contacted the Cleveland Public Health Department (CPHD) to obtain information pertaining to the Subject Property and surrounding sites. The CPHD has not responded to Partners' request for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.3 Building Department

On June 18, 2025, Partners contacted the Cleveland Building and Housing Department (CBHD) to obtain information pertaining to the Subject Property and surrounding sites. The CBHD has not responded to Partners' request for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.4 Police Department

During a previous Phase I ESA, Partners conducted a file review at the City of Cleveland Police Department (CCPD) on November 7, 2022. According to files reviewed from the CCPD, the Subject Property had three (3) incident reports found two (2) of which were scattershot reports and one (1) which was a stolen car report. No other useful information was given.

Copyright © 2025, Partners

During the completion of the current Phase I ESA, on June 18, 2025, Partners contacted the CCPD to obtain any updated information pertaining to the Subject Property and surrounding sites. The CCPD has not responded to Partners' request for additional information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.5 Public School District

On June 19, 2025, Partners contacted the Cleveland Public School District (CPSD) to obtain information pertaining to the Subject Property and surrounding sites. The CPSD has not responded to Partners' request for information at this time. If any records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.1.6 Local Emergency Planning Committee

Partners contacted the Cuyahoga County Local Emergency Planning Committee (LEPC) on June 13, 2025 to obtain information. No response was received by Partners from the LEPC online request submission and June 20, 2025, follow-up request. The LEPC had no records on file of environmental significance for the Subject Property and/or the adjoining and surrounding sites.

8.1.7 State Regulatory Agency

Partners contacted the Ohio EPA on June 13, 2025, to obtain information. No response was received by Partners from the EPA online request submission/email and June 20, 2025 follow-up email. Nicole Petella, from the Ohio EPA, responded on June 20,2025 stating she had no records for the subject property but had some for the northern adjacent property. At this time, Partners has not received those records. If the records become available within 20 days of this report being submitted, then Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

Additionally, Partners searched for the Subject Property on the Ohio EPA eDocuments website. No files related to the Subject Property were provided.

8.1.8 Bureau of Underground Storage Tank Regulations

Partners contacted the Bureau of Underground Storage Tank Regulations (BUSTR) to obtain information pertaining to the Subject Property and surrounding sites. BUSTR replied that they have no information related to the Subject Property or western adjoining facility. If any further records become available within 20 days of this report being submitted, Partners will review the available documents and issue an addendum *only if* there are any relevant changes to our findings and conclusions.

8.2 Observations for Structures Undergoing Demolition and/or Rehabilitation

8.2.1 Asbestos Containing Materials

The Subject Property is vacant with no structures or improvements; therefore, a pre-demolition/renovation asbestos containing materials (ACM) inspection to identify and quantify all ACM that might be disturbed during any renovation or demolition work is not applicable.

8.2.2 Lead Based Paint

The Subject Property is vacant with no structures or improvements; therefore, a pre-demolition/renovation lead-based paint inspection to identify and quantify all lead-based paint materials that might be disturbed during any renovation or demolition work is not applicable.

Copyright © 2025, Partners

8.2.3 Histoplasmosis

The presence of birds or bats was not apparent during the reconnaissance conducted on June 20, 2025. The Subject Property consisted of some sparse wooded land; however, no birds, bats, or evidence of these animals (nests, etc.) were observed. If redevelopment takes place between April 1 and September 30, Indiana Bat activity should be verified and tree removal restrictions may apply.

8.2.4 Lead in Drinking Water

The Subject Property is not developed with water supply infrastructure. Drinking water in the surrounding area is supplied by the City of Cleveland, which draws from four (4) intake sources offshore in Lake Erie's Central Basin. Raw water is treated and tested at an on-site Ohio EPA certified lab before distribution to public consumers. According to the City of Cleveland Water Department website, the drinking water does not have high levels of naturally occurring lead and the water is treated to prevent corroded lead from piping and soldering from entering the water flow. The City of Cleveland follows all EPA mandates to treat and test water to prevent lead from entering public drinking water systems.

Ohio Administrative Code (OAC) 4101:3-6-01, outlines the construction material requirements for water service pipes, water distribution pipes and associated manufactured pipe nipples, pipe fittings, and valves. According to OAC 4101:3-6-01, the lead content of water supply pipe and fittings in pipe, pipe fittings, joints, valves, faucets, and fixture fittings utilized to supply water for drinking or cooking purposes is required to have an average lead content of 0.25 percent lead or less. Any new construction on the Subject Property should be done in accordance with these regulations. Given that the Subject Property is currently vacant, undeveloped land assessment of lead in drinking water is not required.

8.2.5 Radon

The Subject Property is vacant with no structures or improvements. According to the Ohio EPA Map of Radon Zones, the Subject Property is located in Zone 2. In this zone, indoor radon can range between two (2) to four (4) picocuries per liter of air (pCi/L). The EPA recommends action if the radon level is four (4) pCi/L (picocuries per liter) or more. A copy of the map is included in **Appendix H.**

In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system. If the current Subject Property buildings remain, a radon mitigation system within the buildings would be necessary.

8.2.6 Mold

The Subject Property is currently vacant land with no structures; therefore, a mold assessment is not applicable.

8.2.7 Historic Preservation

The Subject Property is currently vacant land with no structures. According to the Ohio Historic Preservation Office (OHPO) National Register website, the Subject Property is not a registered historical site. No known historic sites adjoin the Subject Property. The associated map is included in **Appendix H.**

8.3 Geologic, Hydrogeologic, and Natural Observations

8.3.1 Floodplain

Partners reviewed the National Flood Insurance Program, Flood Insurance Rate Map, for the Subject Property and surrounding area. The Subject Property is mapped as Zone X, which is defined as an area located outside of the 0.2% annual chance flood. A copy of the Flood Insurance Rate Map is included in **Appendix H**.

Copyright © 2025, Partners

8.3.2 Wetlands

Partners reviewed the National Wetlands Inventory (NWI) map obtained from the U.S. Fish and Wildlife Service (USFWS) Wetlands website. According to the NWI map, no wetlands are identified on the Subject Property. A copy of the NWI Map is included in **Appendix H**.

According to the USDA's Natural Resources Conservation Service Web Soil Survey, the Subject Property is underlain with soil classified by the USDA as Urban land(1)-Mahoning Complex silty clay loam, two (2) to six (6) percent slopes (CTA), which is listed as a non-hydric soil.

8.3.3 Wild and Scenic Rivers

According to the National Wild and Scenic Rivers System website, no applicable rivers are located on or near the Subject Property. The associated map is included in **Appendix H.**

8.3.4 Coastal Barrier Resources

According to the USFWS Coastal Barrier Resources System Mapper website, the Subject Property is not located within a designated coastal barrier resources area. The associated map is included in **Appendix H**.

8.3.5 Coastal Zone Management

According to the ODNR Office of Coastal Management website, the Subject Property is not located within a designated coastal management area. The Ohio Coastal Atlas Map is included in **Appendix H.**

8.3.6 Sole Source Aquifer

According to the USEPA's Sole Source Aquifer website for Region 5, the Subject Property is not located in a sole source aquifer area. The Sole Source Aquifer Map is included in **Appendix H.**

8.3.7 Safe Drinking Water

According to the Cleveland Water 2023 Water Quality Report, the city of Cleveland ensures safe drinking water for the community. Cleveland water uses a conventional treatment process to ensure drinking water meets federal and state requirements. This process turns water into clean and safe drinking water by coagulation, flocculation, sedimentation, filtration, disinfection, and finishing to remove dirt, bacteria, and viruses. The city of Cleveland complies with the US EPA drinking water standards and the federal Safe Drinking Water Act.

8.3.8 Soil Suitability

Soils on the property consist of Urban land complex soils, which are nearly level silty-clay loams that are poorly drained. This soil partially meets hydric criteria, and no wetlands were mapped via USFWS or observed during reconnaissance. Storm water runoff is managed by a municipal system. Further geologic information is included in **Section 4.0**.

8.3.9 Farmland Protection and Agricultural Use

Due to the known former commercial/industrial uses of the Subject Property, its location within an urban setting, and the urban land soil types underlying the Subject Property, farmland protection considerations are not applicable. Prior to 1902, the Subject Property may have been undeveloped fields or agricultural land; however, chemical pesticides were not a concern during this time period and have note likely adversely impacted the Subject Property.

Copyright © 2025, Partners

8.3.10 Endangered Species

According to the USFWS Critical Habitat Mapper, the Subject Property is not located in or within the vicinity of any registered critical habitats. A copy of the Critical Habitats map is included in **Appendix H**.

According to the USFWS Endangered Species website, two (2) endangered species are listed in Cuyahoga County including the Indiana Bat and Piping Plover. No evidence of habitats for these species was noted during Subject Property reconnaissance. A copy of the species informational pages is also included in **Appendix H**.

8.4 Manmade Hazards

8.4.1 Aboveground Storage Tanks

Partners did not observe visual evidence of current or former ASTs on the Subject Property or surrounding sites during reconnaissance.

8.4.2 Underground Storage Tanks

Partners did not observe visual evidence of current or former USTs on the Subject Property or surrounding sites during reconnaissance. However, at least two (2) former USTs were known to be associated with the former Atlas Steel Foundry Company that operated on the eastern portion of the Subject Property. The USTs included one (1) 1,000-gallon fuel oil UST and one (1) 6,000-gallon crude oil UST.

8.4.3 Electromagnetic Fields

Overhead electric distribution lines are situated along various public rights-of-way provide service to the Subject Property and surrounding areas. An electrical substation was observed on the southern adjoining site, addressed at 3321-3323 West 73rd Street. More information on this site is provided in **Section 7.2**. No other high voltage electrical transmission lines were observed in the vicinity of the Subject Property during reconnaissance.

8.4.4 High Pressure Buried Gas Lines or Liquid Petroleum Transportation Pipelines

According to the Cleveland South, Ohio Quadrangle, USGS 7.5-Minute Topographic Map, no pipelines are depicted on or in the vicinity of the Subject Property. In addition, no evidence of buried gas pipelines or liquid petroleum pipelines was observed on or in the vicinity of the Subject Property during reconnaissance.

Additionally, according to the United States Department of Transportation (DOT) National Pipeline Mapping System, there are two hazardous liquid pipelines are located within 10 miles of the Subject Property. One approximately 3.8 miles to the east and the other about 2.9 miles to the south. Due to their proximity away, it is unlikely that it adversely effected the Subject Property. A copy of the US DOT National Pipeline Map is included in **Appendix H**.

No oil or gas wells were identified on the Subject Property or adjoining sites in reviewed ODNR information.

8.4.5 Traffic Hazard Consideration

West 73rd Street runs along the west Subject Property boundary; Neville Avenue runs along the north Subject Property boundary. Cloggsville Rail Line adjoins the Subject Property to the east. Interstate 90 is located approximately 2,200 feet north of the Subject Property. The western, northern, and southern surrounding neighborhood is mainly residential, with a vacant commercial building to the northeast. Railroad tracks with commercial development beyond are present to the east.

Additionally, noise-related considerations related to traffic are addressed in **Section 8.4.7**.

Copyright © 2025, Partners

8.4.6 Airport Hazards

The Cleveland Burke Lakefront Airport is located approximately three and a half (3.5) miles northwest of the Subject Property, which is inside of the five (5) mile consideration. According to the Global Land and Flight Noise Dashboard, the Subject Property has a nightly average of 44 decibels, daily average of 47 decibels, and an overall average of 47 decibels. It is designated as quiet rural background noise. The Global Land and Flight Noise Map is included in **Appendix H**. Based on this assessment, Cleveland Burke Lakefront Airport does not represent a noise concern to the Subject Property.

8.4.7 Major Roadways

West 73rd Avenue adjoins the Subject Property to the west; therefore, it is within the 1,000-foot consideration and can reach 47 decibels within 24 hours. The Level of Traffic Stress of 2025 for West 73rd Street was given a level of three (3), indicating that this street involves interaction with moderate traffic stress. Neville Avenue adjoins the Subject Property to the north; therefore, it is within the 1,000-foot consideration and can reach 47 decibels within 24 hours. The Level of Traffic Stress of 2025 for Neville Avenue was given a level of one (1), indicating that this street involves interaction with minimal traffic stress.

The Norfolk Southern Railway, Keystone Division Cloggsville Line tracks are located approximately 50 feet east of the Subject Property. The Subject Property adjoins the railroads tracks and is therefore in the 3,000 foot consideration. Based on this assessment, the railroads do a noise condition to the Subject Property.

According to the HUD Exchange's Day/Night Noise Level (DNL) reference materials and calculator, a day-night average of 49 decibels was determined for Denison Avenue, an intersection approximately 330 feet to the south. The following assumptions were made to calculate this DNL value:

Vehicle Type: Cars, Medium Trucks, and Heavy Trucks

- Effective Distance: 330 feet
- Distance to Stop Sign: Greater than 600 feet
- Average Speed: 35 miles per hour
- Average Daily Trips (ADT): Cars (10,441), Medium Trucks (163), and Heavy Trucks (41)
- Night Fraction of ADT: 15
- Road Gradient (percent): 2

According to the HUD Exchange's DNL reference materials and calculator, a day-night average of 75 decibels was determined for railroad Norfolk Southern Railway-Cloggsville Line District. The following assumptions were made to calculate this DNL value:

Train Type: Diesel

- Effective Distance: 50 Feet
- Average Train Speed: 30 Miles Per Hour
- Engines Per Train: Two (2)
- Railway Cars Per Train: 50
- Average Train Operations (ATO): 35
- Night Fraction of ATO: 15
- Railway Whistles or Horns: No
- Bolted Tracks: Yes

According to the HUD Exchange's DNL reference materials and calculator, a day-night average of 75 decibels which is greater than 65 decibels for exterior and 45 decibels for interior noise. The HUD DNL

Copyright © 2025, Partners

output is included in **Appendix H**. Based on this assessment, Denison Avenue and Norfolk Southern Railway-Cloggsville Line District may represent noise conditions to the Subject Property. Noise mitigation measures, such as barriers or berms, site design, or acoustical construction (e.g., specialized insulation, double-pane windows) could be justified. A noise analysis study may be warranted.

Other potential noise considerations are listed in **Sections 8.4.5** and **8.4.6** above and were factored into the DNL calculations, as necessary.

8.4.8 Air Quality Consideration

The Subject Property's county or air quality management district (Cuyahoga County) is in non-attainment status for the following: Ozone. This project does not exceed de minimis emissions levels or the screening level established by the state or air quality management district for the pollutant(s) identified above. The project is in compliance with the Clean Air Act, and construction is not anticipated to change this status in a long-term capacity.

8.4.9 Emerging Contaminants

Emerging contaminants were considered during the Phase I ESA process. During reconnaissance chemicals were not noted to be stored on the Subject Property; however, given the commercial/industrial historical uses and known solvents previously used and stored on the Subject Property, chlorinated solvents may previously have been present. No known spills were documented.

8.4.10 Environmental Justice

During the previous Phase I ESA , according to information included in the Environmental Justice Assessment for the Subject Property, obtained from the United States EPA EJScreen website, the Property is located in an area in which 67 percent or greater of the residents live below the poverty line, the per capita income is $18,696, and 62 percent of the population is a minority. It is Partners' understanding that the intention for the Subject Property is to be developed as veteran supportive housing, which these statistics support that the neighborhood would appear to benefit in a net positive manner. The EJScreen Summary Report is saved in **Appendix H**.. It should be noted that the US EPA EJScreen website is no longer active.

8.5 Vapor

Partners prepared a Tier 1 Vapor Encroachment Screening (VES) in general accordance with *ASTM E 2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (VES Standard). Under the ASTM VES Standard, information obtained during the Phase I ESA is used to evaluate if the Subject Property is subject to a Vapor Encroachment Condition (VEC). A VEC is defined by ASTM E 2600-10 as follows:

> *The presence or likely presence of chemicals of concern (COC) vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property as identified by Tier 1 or Tier 2 procedures*.

The purpose of a VES is to identify, to the extent feasible pursuant to the procedures presented in ASTM VES Standard, if a VEC exists at the Subject Property.

The first step of the VES is to identify known or suspected contaminated sites within an established search distance or Area of Concern (AOC). The ASTM VES Standard establishes a search radius of one third (1/3) of a mile for non-petroleum hydrocarbon sources and one tenth (1/10) of a mile for petroleum hydrocarbon sources. If a known or suspected contaminated site is located within the AOC, the site is evaluated to determine if the site is located, up-, cross-, or down-gradient in the inferred direction of groundwater flow from the Subject Property or if the site is separated from the Subject Property by a hydraulic or physical barrier (i.e., stream, perched aquifer, utility corridor, etc.). The conclusion from a Tier 1 VES can be any of the following:

1. A VEC exists;

Copyright © 2025, Partners

2. A VEC likely exists;
3. A VEC cannot be ruled out; or
4. A VEC can be ruled out because a VEC does not or is not likely to exist.

Partners reviewed historical documents (**Section 5.0**) and regulatory database records (**Section 6.0**) to identify sites located within 1/10 of a mile from the Subject Property for petroleum sources (i.e., service stations, UST, or LUST sites) and sites within 1/3 of a mile of the Subject Property for non-petroleum hydrocarbon sources. Facilities that were determined to be far enough away or hydraulically cross gradient to down gradient in the inferred direction of groundwater flow from the Subject Property and would not be expected to have an impact on the subject property are not discussed in further detail. The sites that may represent a VEC to the Subject Property are discussed in further detail below.

Subject Property:

- **Former Atlas Steel Foundry Company / Former Cleveland Cleaner & Paste Company, 7255-7283 Neville Avenue:** The eastern portion of the Subject Property was utilized as a foundry from approximately 1913 until 1930, with one (1) 6,000-gallon crude oil UST. Following the foundry, a paste and commercial-grade cleaning product manufacturer operated until the mid-1980s. Solvents were stored and used in their operations, and multiple kerosene and gasoline UST systems were associated with this occupant as well. No record of UST removal was available. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.
- **Former Standard Casting Company Foundry, 7299 Neville Avenue, 3297 and 3319 West 73rd Street:** The western portion of the Subject Property was utilized as a foundry from approximately 1913 until 1950. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.

Adjoining and Surrounding Sites:

- **Former Fluorescent Recycling, Inc. / Former Simkins Industries / Former Great Lakes Box Company, 7260 Neville Avenue, and 7275 Wentworth Avenue (Adjoining Site):** The northeastern adjoining site has been developed and utilized as various manufacturing and industrial facilities, generally from 1913 through the 2010s. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.
- **Royce Cleaning Systems, 3322 West 73rd Street:** This site is identified as a dry cleaner in 1991 and 1992 and was located on the southwestern adjoining site beyond West 73rd Street. Based on Partners' experience with these types of facilities, a VEC cannot be ruled out.

In accordance with the ASTM VES Standard, a finding that a VEC exists or likely exists at the Property or that a VEC cannot be ruled out for the Property is not a determination that a REC is identified at the Subject Property. Refer to **Section 10.0 and 11.0** for further discussion of the findings and conclusions of this Phase I ESA report.

9.0 INTERVIEWS

Interviews were conducted with the following individuals in order to obtain pertinent information regarding the Subject Property including the current or historical presence of the following: ASTs; USTs; drums and containers; electrical or hydraulic equipment likely to contain PCBs; pits, ponds, or lagoons; stained soils or pavement; stressed vegetation and depressions or mounds which could indicate past burial or disposal activities; wastewater; wells or septic systems; and odors.

9.1 Owner/Operator/Occupants

Partners called and spoke with a representative of the City of Cleveland Land Bank, the current owner of the Subject Property, on November 9, 2022, and January 4, 2024, for previous Phase I ESAs. The representatives did not have any historical information on past uses of the Subject Property. They were unaware of details related to hazardous material, underground tanks, or other potential environmental concerns related to the Subject Property and did not have copies of any previous reports. According to the

Copyright © 2025, Partners

auditor's files reviewed in **Section 1.0**, the city land bank acquired PPN 006-25-027 on May 13, 1992, and PPN 006-25-028 on December 6, 2010. Partners reached out again on June 18 and 20, 2025, but did not receive a call back.

9.2 Owner/Operator/Occupants

The Subject Property is vacant, undeveloped land with no current operator or occupant.

10.0 FINDINGS

10.1 Subject Property

- The Subject Property was developed by at least 1902. Industrial development of the Subject Property was apparent by at least 1913, with the Atlas Steel Foundry Company in the eastern portion and the Standard Steel Casting Company Foundry was located in the western and southern portions of the Subject Property. One (1) 6,000-gallon crude oil UST was listed to be southwest of the warehouse on the Atlas Steel Foundry site. By 1930, the Atlas Steel Foundry Company warehouse was occupied by the Cleveland Cleaner & Paste Company. No evidence was apparent of the UST being removed. By 1950, the buildings associated with the Standard Steel Casting Company were razed, and the location of the former buildings was utilized as an auto truck and trailer yard. The Cleveland Cleaner & Paste Company occupied the Subject Property until the 1980s.
- According to historical documents reviewed (**Section 5.0**), the majority of the Subject Property once contained residences and industrial warehouse structures. It is possible that during the demolition of the former structures, fill material was used to grade the individual parcels. Based on a Geo-Sci geophysical survey, this materials is suitable for building and does not represent an environmental concern.
- According to files reviewed from the CFD, the Subject Property held several permits for various capacities of kerosene and gasoline USTs. Records from 1947 indicate that a 1,000-gallon fuel oil tank was approved to be installed in the "center of the triangle of lot." In 1950, the Subject Property obtained a permit for a 500-gallon gasoline UST and 5,000-gallon kerosene UST. By at least 1969, another permit was filed for a 500-gallon gasoline UST and a 10,000-gallon kerosene UST. It is not clear whether or not the previous USTs were removed from the Subject Property; however, no subsurface anomalies were detected during August Mack's 2024 Phase II.
- The Subject Property has remained vacant since at least the 1980s, and the Cleveland Land Bank acquired the eastern parcel in 1992, and the western parcel in 2010.
- One (1) pole-mounted electrical transformer was observed along the northern Subject Property boundary. The electrical transformer was observed to be in good condition with no evidence of a release (e.g., leakage and staining). The electrical transformer was not labeled as to the PCB content. Based on the age of the transformer, the dielectric fluids in the transformer may contain PCBs.
- Several piles of miscellaneous trash were present on the eastern Subject Property parcel. The origins of the materials are unknown.

10.2 Adjoining/Surrounding Sites

- The adjoining sites and surrounding area were developed by at least 1902; the C.C.C. and St. L Railroad is present adjoining the Subject Property to the east. By 1903, the Cleveland Macaroni Factory was apparent on the northeastern adjoining site. The site was vacated by 1930 and reoccupied by at least 1938 by the Cleveland Corrugated Box Company (7256, 7260, 7270 Neville Avenue and 7201 Wentworth Avenue), which changed entities to the Great Lakes Box Company Division of St. Regis Paper Company by 1961. The southern adjoining site was developed by at least 1950 with an electrical substation. The northeastern adjoining site was purchased by Simkins Industries in 1991 and Fluorescent Recycling, Inc. occupied the site by at least 2016. Observations made during the site visit indicated the northeastern adjoining site is currently vacant.

Copyright © 2025, Partners

- According to CFD records reviewed for the northeastern adjoining industrial warehouse site, the site utilized several USTs of various sizes and contents ranging from gasoline, kerosene, and fuel oil. There were no records available that indicated whether or not these tanks were removed from the site; however, no evidence of subsurface anomalies or chemicals of concern were detected above applicable standards in the 2024 August Mack Phase II.

- Simkins Industries, a former occupant of the northeastern adjoining site, was identified to be a former RCRA Generator for the generation of various hazardous substances. Several violations were reported and returned to compliance. A Phase I ESA previously conducted on the site determined that the storage and use of these hazardous substances (TCE, petroleum products, inks, and film developing chemicals) likely adversely impacted the site; however, no evidence of these chemicals of concern were detected above applicable standards in the 2024 August Mack Phase II.

- Fluorescent Recycling, Inc., a former (and most recent) occupant of the northeastern adjoining site, was identified to be a RCRA Generator for the generation of mercury waste. The facility occupied the site by at least 2016 and received numerous compliance violations, which do not appear to have been resolved. A fire occurred at the site in 2018, resulting in a Superfund listing for the site, however, the site is listed to not require site assessment work.

- The southwestern adjoining site beyond West 73rd Street was historically developed as a dry cleaner in at least 1991 and 1992. No further useful information is provided regarding this site.

- The southern electrical substation was noted to contain several transformers, past and present, which could have had PCB containing dielectric fluids. The electrical transformers observed were in good condition with no evidence of a release; however, given the proximity to the Subject Property, potential hazardous substances used may have adversely impacted the Subject Property.

- Other than the above-described electrical substation, Partners did not observe visual evidence of environmental concerns at the adjoining or surrounding sites during the site visit that would be likely to adversely impact the Subject Property.

11.0 OPINIONS AND CONCLUSIONS

Partners was contracted by CHN Housing Partners (User/Client) to conduct a Phase I ESA at vacant land located at West 73rd Street and Neville Avenue in the City of Cleveland, Cuyahoga County, Ohio (Subject Property). The Subject Property is further defined as PPNs 006-25-027 and 006-25-028.

Partners conducted the Phase I ESA in general accordance with the USEPA, *Standard and Practices for AAI, Final Rule* (40 CFR Part 312) and *ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-21).* The report also complies with the Ohio Housing Finance Agency (OHFA), United States (U.S.) Department of Housing and Urban Development (HUD), and City of Cleveland Department of Community Development Environmental Review non-scope items. Exceptions to, or deletions from these practices are described in **Section 1.4** of this report. The purpose of conducting a Phase I ESA in accordance with the ASTM Practice E1527-21 and the AAI Final Rule is to permit the User to satisfy one of the requirements to qualify for the Innocent Landowner, Contiguous Property Owner, or Bona Fide Prospective Purchaser limitations on CERCLA liability.

Partners has considered the migration of hazardous substances or petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property.

11.1 Significant Data Gaps

As discussed in **Section 1.4**, there were no significant data gaps identified during the performance of this Phase I ESA.

11.2 Recognized Environmental Conditions

A REC is defined by ASTM E1527-21 as follows:

Copyright © 2025, Partners

1. "the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* to the *environment*;
2. the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* or likely *release* to the *environment*; or
3. the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* under conditions that pose a *material threat* of a future *release* to the *environment*."

The ASTM E1527-21 standard indicates (Appendix X4) that Historical RECs (HRECs), Controlled RECs (CRECs), and de minimis conditions are not RECs.

Partners has considered the migration of hazardous substances or petroleum products in soil, groundwater, and vapor in the evaluation of potential RECs associated with this Subject Property.

This assessment has revealed no evidence of RECs in connection with the Subject Property.

11.3 Controlled Recognized Environmental Conditions

A CREC is defined by ASTM E1527-21 as follows:

> *A recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

This assessment has revealed no evidence of CRECs in connection with the Subject Property.

11.4 Historical Recognized Environmental Conditions

An HREC is defined by ASTM E1527-21 as follows:

> *A previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

This assessment has revealed no evidence of HRECs in connection with the Subject Property.

11.5 De Minimis Conditions

De minimis condition is defined by ASTM E1527-21 as follows:

> *A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.*

This assessment has revealed no evidence of de minimis conditions in connection with the Subject Property.

11.6 Other Conditions of Concern

While not representing RECs, CRECs, HRECs, or *de minimis* conditions, Other Conditions of Concern (noteworthy items), including business environmental risk, may be of interest or significance to the Client or User.

Business Environmental Risk is defined by ASTM 1527-21 as follows:

> *A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope consideration, some of which are identified in Section 13 (of the Standard).*

Copyright © 2025, Partners

This assessment has revealed no evidence of business environmental risk or other noteworthy items in connection with the Subject Property. All OHFA or HUD related items of potential concern are related to and included within the identified RECs.

12.0 RECOMMENDATIONS

Based on the findings and conclusions of this Phase I ESA, no additional subsurface investigation is required at this time.

In accordance with the Ohio Housing Trust Funds (OHTF) Radon Policy, all new construction will require a radon mitigation system. Additionally, noise mitigation measures, such as barriers or berms, site design, or acoustical construction (e.g., specialized insulation, double-pane windows) could be justified. A noise analysis study may also be warranted.

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

Partners has prepared this report on behalf of its Client, Cleveland Housing Network. Resumes for the individuals who worked on this report are included in **Appendix I** and signatures are provided below.

The following participated in the preparation of this Phase I ESA Report:

Margaret Eibler
Environmental Professional I

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312.10.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Halle A. Miller
Associate Director, Assessment, Remediation, & Revitalization

United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Cuyahoga County, Ohio

October 31, 2022

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Cuyahoga County, Ohio
Survey Area Data: Version 21, Sep 8, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Aug 15, 2020—Sep 25, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
Ub	Urban land	0.2	12.1%
UmB	Urban land-Mahoning complex, 2 to 6 percent slopes	1.8	87.9%
Totals for Area of Interest		**2.0**	**100.0%**

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however,

onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Cuyahoga County, Ohio

Ub—Urban land

Map Unit Composition

Urban land: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

UmB—Urban land-Mahoning complex, 2 to 6 percent slopes

Map Unit Setting

National map unit symbol: 2v038
Elevation: 590 to 1,970 feet
Mean annual precipitation: 33 to 52 inches
Mean annual air temperature: 43 to 52 degrees F
Frost-free period: 135 to 215 days
Farmland classification: Not prime farmland

Map Unit Composition

Urban land: 60 percent
Mahoning and similar soils: 20 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Urban Land

Setting

Down-slope shape: Linear
Across-slope shape: Linear

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8
Hydric soil rating: Unranked

Description of Mahoning

Setting

Landform: Till plains
Landform position (two-dimensional): Summit, footslope
Landform position (three-dimensional): Interfluve, base slope
Down-slope shape: Concave
Across-slope shape: Linear
Parent material: Till

Typical profile

Ap - 0 to 7 inches: silt loam
Eg - 7 to 9 inches: silt loam
Btg - 9 to 12 inches: silty clay loam
Bt1 - 12 to 20 inches: silty clay
Bt2 - 20 to 30 inches: silty clay
BCt - 30 to 36 inches: clay loam
C - 36 to 60 inches: clay loam

Properties and qualities

Slope: 2 to 6 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.14 in/hr)
Depth to water table: About 6 to 12 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 15 percent
Available water supply, 0 to 60 inches: Moderate (about 6.6 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3e
Hydrologic Soil Group: D
Ecological site: F139XY002OH - Moist Calcareous Till Flats
Hydric soil rating: No

Minor Components

Udorthents

Percent of map unit: 10 percent
Hydric soil rating: Unranked

Trumbull

Percent of map unit: 5 percent
Landform: Depressions
Landform position (two-dimensional): Toeslope
Landform position (three-dimensional): Base slope
Down-slope shape: Concave
Across-slope shape: Concave
Hydric soil rating: Yes

Ellsworth

Percent of map unit: 5 percent
Landform: Till plains
Landform position (two-dimensional): Summit, shoulder
Landform position (three-dimensional): Interfluve, side slope
Down-slope shape: Convex
Across-slope shape: Convex
Hydric soil rating: No

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partners Env. Consulting, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Limited Permission To Make Copies

Partners Env. Consulting, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FLUORESCENT RECYCLIN	7260 NEVILLE AVE	NE 0 - 1/8 (0.008 mi.)	A3	76

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there

are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

OH DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the OH DERR list, as provided by EDR, and dated 10/18/2024 has revealed that there are 14 OH DERR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

OH LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Commerce Division of State Fire Marshal's List of Reported Petroleum Underground Storage Tank Release Incidents.

A review of the OH LUST list, as provided by EDR, and dated 01/30/2025 has revealed that there are 27 OH LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/24/2025 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 7 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 21 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 4 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated

SIMKINS INDUSTRIES (Continued) **1000270828**

Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: K086
Waste Description: Solvent Washes And Sludges, Caustic Washes And Sludges, Or Water Washes And Sludges From Cleaning Tubs And Equipment Used In The Formulation Of Ink From Pigments, Driers, Soaps, And Stabilizers Containing Chromium And Lead.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene,

TECHNICAL PRODUCTS INC. (Continued) **1000243038**

2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U057
Waste Description: Cyclohexanone (I)

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U140
Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Environmental Interest/Information System:
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

TECHNICAL PRODUCTS INC. (Continued) **1000243038**

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
